In setting standards pursuant to the Act, the Secretary is expressly required to consider the feasibility of the proposed standards. Senate Committee on Labor and Public Welfare, S. Rep. No. 91-1282, 91st Cong., 2d Sess., p. 58 (1970). Nevertheless, considerations of technological feasibility are not limited to devices already developed and in use. Standards may require improvements in existing technologies or require the development of new technology. *The Society of the Plastics Industry v. OSHA*, *supra* at 1309.

Where appropriate, the standards are required to include provisions for labels or other forms of warning to apprise employees of hazards, suitable protective equipment, control procedures, monitoring and measuring of employee exposure, employee access to the results of monitoring, appropriate medical examinations and training and education. Moreover, where a standard prescribes medical examinations or other tests, they must be made available at no cost to the employees (section 6(b)(7)). Standards may also prescribe recordkeeping requirements where necessary or appropriate for enforcement of the Act or for developing information regarding occupational accidents and illnesses (section 8(c)).

Sections 2(b)(5), 2(b)(6), 6, 20, 21, 22, and 24 of the Act reflect Congress' recognition that conclusive medical or scientific evidence including causative factors, epidemiological studies or dose response data may not exist for many toxic materials or harmful physical agents. Nevertheless, Congress mandated that standards should not be postponed because definitive medical or scientific evi-

dence is not currently available. Indeed, while final standards are based on the best available evidence, the legislative history makes it clear that "it is not intended that the Secretary be paralyzed by debate surrounding diverse medical opinion." House Comm. On Education and Labor, H.R. Rep. No. 91-1291, 91st Cong., 2d Sess. 18 (1970).

This congressional judgment is supported by the Courts which have reviewed standards promulgated under the Act. In *Industrial Union Department, AFL-CIO v. Hodson*, 499 F. 2d 467 (D.C. Cir. 1974), the United States Court of Appeals considered the Secretary of Labor's delegated mandate and power under the Act to protect the health of workers from exposure to asbestos. It stated (499 F. 2d at 474):

From extensive and often conflicting evidence, the Secretary in this case made numerous factual determinations. With respect to some of those questions, the evidence was such that the task consisted primarily of evaluating the data and drawing conclusions from it. The court can review that data in the record and determine whether it reflects substantial support for the Secretary's findings. But some of the questions involved in the promulgation of these Standards are on the frontiers of scientific knowledge, and consequently as to them insufficient data is presently available to make a fully informed factual determination. Decision making must in that circumstance depend to a greater extent upon policy judgments and less upon purely factual analysis.¹⁴

This rationale was likewise applied in *The Society of the Plastics Industry, Inc. v. OSHA*, 509 F. 2d 1301 (2d Cir.), *cert. den.* 421 U.S. 992 (1975), where the Second Circuit reviewed regulations limiting worker exposure to vinyl chloride. The Court stated at 1308:

As in *Industrial Union Department, AFL-CIO v. Hodson*, *supra*, the ultimate facts here in dispute are on the frontiers of scientific knowledge, and, though the factual finger points, it does not conclude. Under the command of OSHA, it remains the duty of the Secretary to act to protect the workingman, and to act even in circumstances where existing methodology or research is deficient. The Secretary, in extrapolating the MCA study's findings from mouse to man, has chosen to reduce the permissible level to the lowest detectable ones. We find no error in this respect.

And in *Ethyl Corp. v. EPA* 541 F. 2d 1 (D.C. Cir. 1976), the Court of Appeals affirmed the EPA Administrator's decision to limit lead in gasoline, based in large part upon the rationale of *UD v. Hodson*, *supra* and *SOCMA v. OSHA*, *supra*. The Court stated at pp. 24-28:

Questions involving the environment are particularly prone to uncertainty. Technological man has altered his world in ways never before experienced or anticipated. The health effects of such alterations are often unknown, sometimes unknowable. While a

¹⁴ Where existing methodology or research in a new area of regulations is deficient, the agency necessarily enjoys broad discretion to attempt to formulate a solution to the best of its ability on the basis of available information. *Permian Basin Area Rate Cases*, 390 US 747, 811, 88 S. Ct. 1344, 20 L. Ed. 2d 312 (1968).

concerned Congress has passed legislation providing for protection of the public health against gross environmental modifications, the regulators entrusted with the enforcement of such laws have not thereby been endowed with a prescience that removes all doubt from their decisionmaking. Rather, speculation, conflicts in evidence, and theoretical extrapolation typify their every action. How else can they act, given a mandate to protect the public health but only a slight or nonexistent data base upon which to draw? Never before have massive quantities of asbestiform tailings been spewed into the water we drink. Never before have our industrial workers been occupationally exposed to vinyl chloride or to asbestos dust. Never before has the food we eat been permeated with DDT or the pesticides aldrin and dieldrin. And never before have hundreds of thousands of tons of lead emissions been disgorged annually into the air we breathe. Sometimes, of course, relatively certain proof of danger or harm from such modifications can be readily found. But, more commonly, "reasonable medical concerns" and theory long precede certainty. Yet the statutes—and common sense—demand regulatory action to prevent harm, even if the regulator is less than certain that harm is otherwise inevitable.

Undoubtedly, certainty is the scientific ideal—to the extent that even science can be certain of its truth. But certainty in the complexities of environmental medicine may be achievable only after the fact, when scientists have the leisurely and isolated scrutiny of an entire mechanism. Awaiting certainty will often allow for only reactive, not preventive, regulation. Petitioners suggest that anything less than certainty, that any speculation, is irresponsible. But when statutes seek to avoid environmental catastrophe, can preventive, albeit uncertain, decisions legitimately be so labeled? 541 F. 2d 1 at pp. 24-25, omitting footnotes.

That petitioners, and their scientists, find a basis to disagree is hardly surprising, since the results are still uncertain, and will be for some time. But if the statute accords the regulator flexibility to assess risks and make essentially legislative policy judgments, as we believe it does, preventive regulation based on conflicting and inconclusive evidence may be sustained. Recent cases have recognized this flexibility in similar situations [citing *UD v. Hodson*; *SOCMA v. OSHA*, *supra*; and *Reserve Mining Co. v. EPA* 514 F. 2d 492 (8th Cir. 1975) (*en banc*)] 541 F. 2d 1 at 26.

Where a statute is precautionary in nature—the evidence difficult to come by, uncertain, or conflicting because it is on the frontiers of scientific knowledge, the regulations designed to protect the public health, and the decision that of an expert administrator, we will not demand vigorous step-by-step proof of cause and effect. Such proof may be impossible to obtain if the precautionary purpose of the statute is to be served. 541 F. 2d 1 at 28.

And finally, in *Certified Color Manufacturers Ass'n v. Mathews* 543 F. 2d 284 (D.C. Cir. 1976), the Commissioner of FDA had terminated provisional approval of the color additive "Red Dye No. 2" because of evidence that it caused cancer in rats. In affirming that action, the Court stated at 297-98:

Courts have traditionally recognized a special judicial interest in protecting the pub-

¹⁵ Or, as with OSHA, mandatory in its command to act. See note 56 *supra*.

lic health, particularly where "the matter involved is as sensitive and frightful as cancer." Where the harm envisioned is cancer, courts have recognized the need for action based upon lower proof than otherwise applicable (footnotes omitted).

This proposal marks a departure from OSHA's usual pattern of a substance-by-substance approach in setting health standards concerning exposures to potential occupational carcinogens. One obvious result of OSHA's current case-by-case approach to the regulation of carcinogens has been the relitigation of certain issues in each and every rulemaking. This taxes witnesses who have in the past been willing to testify in prior rulemakings. In addition, the system hardly guarantees a continuity of approach in every case, whether it be within the Agency or within the Courts. And finally, the manpower resources of OSHA are exceeded using the present approach. See, for example, the affidavits of the chief legal advisor and the chief of the health standards division filed in an action brought to compel the issuance of a cotton dust standard (*Textile Workers Union of America, et al. v. Wm. J. Usery, Jr., et al.*, Civil Action No. 75-2157 (D.D.C. —, 1975)). It is OSHA's belief that if this proposal or something similar is not promulgated, with present resources the output of standards to protect American workers from carcinogens will never be adequate and may collapse by means of the futility of the effort. Indeed, to follow the present system and procedure for each and every individual substance and hazard would be, we contend, beyond the abilities of any agency, no matter how large a staff it may have.

The vinyl chloride standard (29 CFR 1910.1017) provides a striking example of the effort which has been required for standard promulgation, under optimum circumstances, pursuant to the *de novo* case-by-case approach. That standard, developed on a top priority basis with resources borrowed from other ongoing projects, took the full statutory six months from the issuance of the emergency temporary standard, through the required hearings and the adequate review of the record, to publish a final rule. And that time does not include the time and manpower devoted to the earlier fact-finding hearing and the necessary preparation of the emergency temporary standard and preamble themselves. Moreover, that time does not include the resources that were required to defend the final standard in the appellate courts. The ETS itself was not contested.

The vinyl chloride rulemaking proceedings concerned a substance which undisputedly was a human carcinogen. Yet, controversy raged during the hearing concerning the precise level of exposure which posed a hazard, whether a "safe" exposure level existed, whether animal data could be prudently extrapolated to man in quantitative terms and the appropriateness of the regulatory requirements. The comments and testimony concerning these issues were discussed in a significant part of the more

than 600 written comments, 200 written and oral hearing submissions, the hearings, and the 4,000 page record.

Notwithstanding the bulk and comprehensiveness of the record, OSHA finally determined that the record did not provide definitive answers to these questions. The Agency declared, "[w]e cannot wait until indisputable answers to these questions are available, because lives of employees are at stake." (39 FR 35392).

Moreover, certain issues predictably and inevitably reoccur in other proceedings concerning highly toxic and carcinogenic substances, such as arsenic, coke oven emissions, benzene and beryllium. Yet, the determinations on these issues have been made by the Agency as a matter of "policy", not necessarily with complete factual certainty at the time of that determination. These determinations have been upheld as policy matters. For example, OSHA's determination in the preamble to the final standard regulating exposure to one of the 14 carcinogens, (ethyleneimine, EI), that carcinogenicity in animals should be treated as posing a carcinogenic threat to humans, was characterized by the United States Court of Appeals for the Third Circuit as "not really a factual matter." Rather, the Court stated that, the determination "is in the nature of a recommendation for prudent legislative action," i.e., a policy decision. *SOCMA v. Brennan*, 503 F. 2d 1155, 1159 (3d Cir., 1974).

To dedicate substantial (and unavailable) resources to the rehearing, and record resubstantiation in each and every rulemaking, of these kinds of policy issues is truly nonproductive if we are honestly concerned about the health of workers and, possibly, the future of mankind.

OSHA therefore, like other administrative agencies in the past, has determined that it is necessary at this time, to the fulfillment of its statutory objectives, to reshape the size and content of its rulemaking proceedings at least insofar as potential carcinogens are concerned. This proposed set of regulations incorporates policy determinations concerning how and when chemical or physical substances should be identified, classified, and consequently regulated, as posing a carcinogenic risk to humans. It is OSHA's intention, once this proposal is duly promulgated, to foreclose, in the subsequent 6(b) rulemakings on individual substances, the rehearing of the validity of this classification system and most other policy determinations made in this proposal, including the procedural structure intended to be followed.

For example, one such foreclosed policy determination is whether employees shall be exposed to potential occupational carcinogens above the lowest level feasible. Accordingly, during the subsequent section 6(b) proceedings, interested parties would be foreclosed from the present endless debate concerning whether permissible exposure limits to humans can be related or extrapolated to those levels of exposure in test ani-

mals that indicated evidence of carcinogenesis.

OSHA intends and expects that these and the other issues raised by this proposal will be fully discussed, debated and aired in this rulemaking proceeding. At the conclusion of these proceedings, these policy decisions, including the regulatory framework embodied in this new Part 1990, will have been subjected to public proceedings, their scientific bases debated, and their consequences delineated. Based on the record fully developed in this proceeding, the scientific and related policy determinations will be made in the final regulations. Consequently, the Agency believes that this "generic" form of standard setting will not in any way shortcut "due process", the statutory procedural requirements set forth in section 6(b) of the Act or in 5 U.S.C. 553, *et seq.*, since every opportunity for notice, comment, and public participation in extensive hearings pursuant to those provisions will have been afforded.

It has long been recognized by the courts that regulatory agencies, such as OSHA, must and should use innovative rulemaking procedures to set policy, in order to comply with their statutory mandates, even at the expense of nominally depriving interested parties of a hearing on individual claims which may be contrary to the generally announced policy. Thus in 1956, the Supreme Court held that the Federal Communications Commission was not required to give a license applicant a statutorily required hearing, when the applicant did not qualify under the Commission's policy, adopted through rulemaking, that no person could own more than 5 broadcasting stations. (*United States v. Storer Broadcasting Co.*, 351 U.S. 192, 202 (1956). See also, *FPC v. Texaco*, 377 U.S. 33 (1964); *Airline Pilots Assn. v. Quesada*, 276 F. 2d 892 (2d Cir. 1960).

The overriding concern in these cases was whether parties had unreasonably been deprived of statutory procedural rights which were intended to assure that the agency would not act arbitrarily in denying claims. OSHA believes that no such deprivation will occur as the result of promulgation of these proposed regulations.

Rather, we believe that the combination of the broadly based rulemaking hearing and proceeding concerning this proposal and the subsequent section 6(b) proceedings on individual standards will provide all parties with ample opportunity to present their views and comments at the most relevant procedural stages. Certain policy determinations will be foreclosed from rehearing at the subsequent section 6(b) hearings. Those decisions based more on factual considerations, such as the applicability of the content of specific protective provisions as monitoring, respirator use and protective clothing, may be open in the section 6(b) proceeding depending on whether the unique properties of the substance are shown to warrant an exception to the general policy.

In addition, the following questions may also be at issue in the subsequent

proceedings relating to individual substances: (1) Whether the Secretary correctly classified the toxic material according to the appropriate criteria, (2) whether the Secretary correctly decided that the classification should not be rebutted, (3) the determination of the lowest feasible occupational exposure, or whether there are suitable substitutes found that are less hazardous to humans than the toxic materials, (4) the appropriateness and feasibility of the specific protective measures of the proposed standard and (5) the environmental impact arising from regulation of the toxic material.

Therefore, OSHA believes the flexibility and fairness of the individual substance-by-substance approach will be preserved by the procedures and policies incorporated in this proposal, for the feasibility and appropriateness of the protective provisions as applied to a given substance will be fully discussed at the rulemaking, concerning the specific substance, held pursuant to this Part and subpart. Yet OSHA's policy and factual judgments, based mainly "on the frontiers of scientific knowledge" with a "command to act", will be established after opportunity for full public participation in this rulemaking, and any future amendments thereto, and will not be allowed to be relitigated in "the standard-by-standard or substance-by-substance process".

II. CRITERIA FOR THE IDENTIFICATION OF TOXIC SUBSTANCES THAT POSE A CARCINOGENIC RISK TO MAN

For the reasons discussed below, there are currently two principal methods to identify the carcinogenic potential of any substance, namely, studies of human experience and tests on animals. In determining whether a toxic substance poses a carcinogenic risk to humans, OSHA intends, in general, to primarily rely upon evidence from these two methods, namely, human epidemiological studies, animal studies, or both. Two other possible methods to identify the carcinogenic potential of a substance—molecular structure (or similarity) and short-term tests—are also discussed, but OSHA will not, at this time, place sole reliance upon short term tests, and will not place any reliance on molecular structure or similarity for the reasons discussed below. OSHA invites public comment on all aspects of this specific part of this proposal.

While human studies are valuable, they cannot be the sole basis for regulatory decision making. Three overwhelming considerations generally require reliance upon laboratory animal testing insofar as carcinogenicity or other irreversible effects are concerned:

(1) As an ethical or moral matter, humans should never be used deliberately and prospectively as test subjects to determine the carcinogenicity of a substance. This principle has been affirmed in *Ethyl Corp v. EPA*, *supra* at p. 26:

Lastly, significant exposure . . . is toxic, so that considerations of decency and morality limit the flexibility of experiments on

humans that would otherwise accelerate lead exposures from years to months, and measure these results. *Cf. Environmental Defense Fund Inc. v. EPA* (shell), 167 U.S. App. D.C. 71, 78, 510 F. 2d 1292, 1299 (1975).

As FDA recently stated in issuing its final "Criteria and Procedures for Evaluating Assays for Carcinogenic Residues" in food producing animals (42 FR 10412, 10418; February 22, 1977):

As a source of information, direct carcinogenesis testing of chemical compounds in man is and must remain beyond the ethical bounds placed by society on human experimentation. In the absence of this source of information, which incidentally would be the most relevant, alternate sources are human epidemiology studies and animal experimentation. Human epidemiology may provide post facto information about the carcinogenic effects of chemical compounds on man. However, while potentially useful in assessing the significance of new exposures or the risk posed by related compounds, such experience cannot be a central basis for . . . safety evaluations for several reasons, including the same ethical objections that make direct experimentation in man unacceptable.

(2) Moreover, even if such testing were condoned, an agency would have to wait for the linking of individual human cancers to exposure to the carcinogen pending the usual long latency period of 5 to 40 years before meaningful results could be obtained. This is, of course, not necessarily so in the case of lead, referred to by the Court of Appeals in *Ethyl Corp v. EPA*. As the Ad Hoc NTC Committee reported to the Surgeon General in 1970:

Because the latent period in human carcinogenesis is so long, epidemiologic evidence develops only over periods of 15 to 20 years. Timely decisions to exclude materials from uses involving exposure to man, therefore, must be based solely on adequately conducted animal bioassays. Retrospective human evidence of risk must not be allowed to show itself before controlling action is taken. (p. 8)

(3) It is extremely difficult to construct a valid human study because humans are continually exposed to many toxic materials, most of which are not known either to be carcinogenic or not. See, *eg. EDF v. EPA*, 510 F. 2d 1292 (D.C. Cir. 1975).

A. HUMAN STUDIES

Identification of carcinogens through human experience requires comparing cancer risk for selected groups of individuals exposed to known agents with the risk for a similar population that either has not been exposed to the same agents or has been exposed but at significantly lower levels. Such population, or epidemiological, studies have tended to focus upon occupational groups because of their relatively high or consistent exposures to substances often found in the workplace.

Several problems however exist in using human studies, although epidemiological studies can provide strong evi-

It is for these reasons that, although lead additives have been used for over 50 years, the danger posed by lead emissions is still a question "on the frontiers of scientific knowledge." *Industrial Union Department, AFL-CIO v. Hodgson*, *supra* . . .

dence of the causal relationship between exposure and disease, particularly when the findings are positive. Negative studies are difficult to interpret for the reasons discussed below. Although experiments on humans should never be used prospectively, as pointed out above, to wait for retrospective studies, based on *post hoc* investigation, clearly subjects workers to massive, involuntary human experiments with their attendant tragedies years later. Indeed:

[e]xisting epidemiologic methods are adequate for demonstrating carcinogenic hazards in the work environment even when the excess risk is rather small and the disease in question is relatively common in the general population . . . [But] . . . this capacity for recognition depends on the actual occurrence of disease and, by itself, has no preventive or control value. (Cole and Goldman, in Fraumeni, Persons at High Risk of Cancer, Natl. Cancer Inst., 1975, p. 177.)

Also acknowledged is that:

. . . all public health approaches to the prevention of occupational cancer are to complement, not replace or make less stringent, the industrial hygiene practices that should be in effect. (*Ibid.*, p. 179.)

In addition, often severe reliability problems exist which limit the value of human studies. As Fraumeni pointed out:

[I]t seems likely that existing epidemiologic methods will allow the identification of groups at high risk of cancer because of their occupational experience . . . [t]hese methods are imperfect, however, and limitations in study design and types of data should be borne in mind when occupational carcinogenesis is studied. (*Ibid.*, p. 168.)

First, an important characteristic of carcinogenesis is the apparent variability in individual susceptibility. Since carcinogenesis results from the interaction of the toxic material with the biological target, the effect is qualified by the susceptibility of various cell types, various tissues or organs and various individuals as has been pointed out above. It has been found that individual variability in response to carcinogens is great. Factors such as age, sex, hormonal status, diet and nutritional conditions, genetic factors, individual variations in the metabolic handling of chemicals, or the combined effect of different chemicals, all contribute to determine the response of an individual to a chemical carcinogen; differences in response in test animals as high as 100 fold or 1000 fold can be obtained by changing only one factor at a time. Thus, valid epidemiological studies are difficult to conduct because study population groups tend to be small and reactions to a single carcinogen may not appear in the study groups due to the varying degrees of susceptibility.

Second, these difficulties are further complicated by the latency period between exposure and cancer symptoms. It usually takes 5-40 years between exposure to a cancer-producing chemical and manifestation of the disease.

Generally, the greater the exposure the shorter the latency period. In one study of bladder tumors among 78 aromatic amine workers, for instance, the length of exposure appears to correlate

inversely with the length of the latency period—the greater the exposure, the shorter the latency. Because so many factors influence latency, however, it is impossible to define the extent to which the length and degree of exposure may be important.

Latency poses troublesome medical, social, and economic implications for identifying hazardous contaminants in the environment. Chemicals may appear safe for human exposure after they have been used for 10 to 15 years without obvious harm. With carcinogens, however, the lack of demonstrated damage to health even after this comparatively long period presents a false sense of security. Thirty or 40 years may be required before enough individuals have been exposed to a carcinogen to produce detectable cancers. The long delay between exposure and symptoms and the irreversibility of the disease often makes it medically and scientifically impossible to identify carcinogens in the environment.

Detection difficulties posed by the latency period are compounded by the mobility of our society. People in this country change jobs, residences, and, consequently, doctors and hospitals relatively frequently, so that even large-scale adverse health effects from latent diseases may be undetected. Moreover, people are exposed to carcinogens in great variety and concentration not only on the job but in their diets and surrounding environments; this multiplicity of exposure further complicates identification of the causes for any given cancer.

And third, epidemiological studies are difficult to conduct because seldom is it possible to isolate a single variable for study because of the complex mix of chemical agents to which humans are exposed in their work and other environments. In the real world, obviously, workers are exposed to a combination of substances, rather than just one chemical. Often exposure levels are difficult to define. Individual resistance to participation in tests and an investigator's inability to obtain medical histories and records may also hamper a study. Some chemicals are virtually everywhere in the environment, but at low concentrations—a combination of circumstances which presents formidable problems of safety assessment for investigators. It will be extremely difficult, for example, to assess the carcinogenic impact of the pesticide dieldrin because residues are found in 99 percent of the U.S. population. More important, perhaps, is the possible synergistic effects of that substance in workers who are exposed to other cancer causing agents. The Ad Hoc NCI Committee recognized this possibility in 1970 when it stated:

It has become increasingly obvious that the hazard from a single chemical carcinogen cannot be evaluated out of a context of the total environmental exposure. Estimation of the "cumulative carcinogenic dose" resulting from all possible chemical carcinogens or even from all sources of a single type or class of chemical carcinogens is presently impossible. (P. 3)

The same state of science exist today although the theory is perhaps confirmed. As the Administrator of EPA stated in 1975, in denying the use of the pesticide DDT in Louisiana:

In addition, evidence reviewed by me in September 1974 that had been introduced in the Aldrin/Dieldrin suspension hearing revealed the apparent synergistic effects on the development of tumors in mice fed DDT and Dieldrin in combination. (39 FR at 37268) While such a possibility had long been feared, this was the first evidence actually demonstrating such effects. (40 FR 15940, April 8, 1975)

Thus, even if the effects of a carcinogen can be unequivocally demonstrated as soon as those first exposed manifest symptoms of cancer (rarely, the case because their first exposure occurred 5-40 years earlier) and even if exposure can be immediately eliminated and we could solve the problem of synergism, mankind still faces several decades of cancer in individuals who have already been exposed but who have not yet manifested symptoms. In those circumstances, there is nothing any regulatory agency can do to prevent the disease. Thus, what is true of carcinogenesis for an individual or a working population is also true for society, namely that an epidemic of cancer may be in the making while exposure to the unknown carcinogenic agent continues for decades, multiplying its potential effects.

B. ANIMAL STUDIES

Because we have been unable to identify with sufficient precision the causes of cancer in humans already affected and because it is unacceptable to wait for additional cases of human cancer to provide the scientific evidence needed, investigators have long relied upon laboratory tests with animals to study the carcinogenic potential of chemicals. We discuss the general propositions herein, although we recognize that some of the opinions of the distinguished bodies discussed go farther than, or not quite as far as, some of the positions taken in these proposed regulations.

For all practical purposes, the detection of carcinogenic activity of chemicals is based on animal experimentation. All chemical substances or mixtures that have been proven carcinogenic by direct observation in man have also been shown to be carcinogenic in experimental animals (with the possible exception of arsenic and benzene, still under experimental study). Because of the difficulties of epidemiological studies on humans exposed to potential carcinogens stated above, there are usually no data which provide us with any evidence—one way or another—whether cancer is caused in man by a chemical that has been shown to be carcinogenic in animal studies. However, not to at least qualitatively assume that such a chemical does pose a carcinogenic threat to man seems imprudent and could lead to disaster. As the Ad Hoc NCI Committee's report to the Surgeon General stated in 1970:

Any substance which is shown conclusively to cause tumors in animals should be

considered carcinogenic and therefore a potential cancer hazard for man. (P. 1)

Indeed, OSHA has long ago accepted this principle. In the preamble to the standards for the 14 carcinogens, OSHA stated:

A major question of occupational carcinogenesis relates to the extrapolation of results of animal experimentation to humans. The basis of numerous objections to the proposals is that, even assuming the validity of animal experiments, such do not furnish sufficient evidence that the substances involved are carcinogenic to humans. Extrapolation of results obtained by animal experimentation is alleged to be vitiated by several considerations: (a) That certain cancers are specific only to some species; (b) that the conditions of animal experiments are out of proportion to, and not consistent with conditions prevailing in industrial exposure; and (c) that no cancers have yet been detected in humans exposed to the substances. For those substances whose metabolism is understood, and is similar in both animals and man, the fact that they induce cancers in animals warrants the expectation that they will induce cancers in men. This applies to the substances which cause urinary bladder cancers in animals acting, not directly, but indirectly through the mediation of metabolites formed both in experimental animals and in exposed workers. This is also true of those substances which apparently require no metabolic alteration but attack a particular biologic system (e.g., respiratory tract, alimentary canal) which is similar in both animals and humans.

The objections raise the much broader issue of human exposure to a chemical which is only known to have caused cancers in experimental animals. It is important to note that some opponents of the regulation of such chemicals do not advocate treating them as if they were harmless with respect to carcinogenic potential. Several employers, for instance insist that such substances must be treated with "care" or "respect," while also insisting that they call for significantly less protection than those substances known to be human carcinogens.

We think it improper to afford less protection to workers when exposed to substances found to be carcinogenic only in experimental animals. Once the carcinogenicity of a substance has been demonstrated in animal experiments, the practical regulatory alternatives are to consider them either non-carcinogenic or carcinogenic to humans, until evidence to the contrary is produced. The first alternative would logically require, not relaxed controls on exposure, but exclusion from regulation. The other alternative logically leads to the treatment of a substance as if it was known to be carcinogenic to man.

We agree with the Director of NIOSH, and the report of the Ad Hoc Committee on the Evaluation of Low Levels of Environmental Chemical Carcinogens to the Surgeon General, U.S. Public Health Service, April 22, 1970, that the second alternative is the responsible and correct one. This decision accords with the work practices of some who object to the proposed regulation. (39 FR 3756 at 3757-58)

Moreover, in regulating ethyleneimine (EI) in 1974 as a carcinogen, OSHA stated:

The carcinogenic potential of ethyleneimine (EI) has been confirmed by a study conducted by Walpole in 1954 involving rats and one sponsored by the National Cancer Institute involving mice. In the first study, animals developed injection site sarcomas

which the investigators attributed to the direct action of Ethyleneimine, and in the second study 80 percent of the animals developed tumors, including more than one-half with hepatomas (which the investigators stated had "malignant potential") and almost three-quarters with pulmonary tumors. Although high doses of EI were administered, the investigators stated there was no way to predict whether man would be more or less susceptible to tumor induction by EI.

The case for the carcinogenicity of EI, then, rests on the extrapolation to humans of the findings in two separate, controlled animal studies. The position is compatible with that of NIOSH concerning the prior demonstration of carcinogenicity in at least two animal studies. (39 FR 3756 at 3757)

This position was affirmed by the Third Circuit which held in *Synthetic Organic Chemical Manufacturers Association v. Brennan*, 503 F.2d 1155, 1160 (3d Cir. 1974) that: "There does exist substantial evidence in the record as a whole to support the Secretary's finding that EI is carcinogenic in rats and mice and, in the absence of evidence of carcinogenicity in humans, the Secretary properly weighed the only available alternatives."

In *In Re Shell supra*, The EPA Administrator agreed:

The ultimate issue in this suspension proceeding is whether Aldrin-Dieldrin is carcinogenic in man. Because man's response to carcinogens is similar to that of rodents, the finding that a substance is carcinogenic in experimental animals indicates that it poses a similar risk to man.

In affirming that decision, the Court of Appeals for the District of Columbia stated at 510 F.2d at 1299:

The validity of extrapolation to humans from data derived from tests on animals is also a matter within the agency's expertise. There was testimony before the Administrator to support such extrapolation and this court has acknowledged the significance of test animal data when cancer is involved. Use of animal data is particularly appropriate where, as here, accurate epidemiological studies cannot be conducted because the virtually universal contamination of humans by residues of aldrin/dieldrin make it impossible to establish an uncontaminated human control group. The long latency period of carcinogens further hinders epidemiological research, and the ethical problems of conducting cancer experiments on human beings are too obvious to require discussion. Although extrapolation of data from mice to men may be quantitatively imprecise, it is sufficient to establish a "substantial likelihood" that harm will result. *Cf. Society of Plastics Industry, Inc. v. OSHA*, 509 F.2d 1301, at 1308 (2d Cir. 1975).

And in proposing to ban the use of chloroform in drug and cosmetic products, FDA stated (41 FR 15027):

Although he is not aware of any direct evidence that chloroform induces cancer in man, the Commissioner recognizes that the positive finding of cancer in test animals in the National Cancer Institute report indicates chloroform may pose a risk of cancer for humans. Experience has indicated that, with one or two possible exceptions, compounds that are carcinogenic in humans are also carcinogenic in one or more experimental animal bioassay systems. In addition, several compounds first detected as a carcinogen in experimental animals were later found to cause human cancer. The clear

demonstration that a compound is carcinogenic in experimental animals must, therefore, be taken as evidence that it has a potential for carcinogenesis in humans unless there is strong evidence to the contrary.

In finalizing that decision some two months later, FDA stated (41 FR 26844):

The Commissioner considers the fact that a substance has been shown to be an animal carcinogen must be taken as evidence that it has a potential for carcinogenesis in humans unless there is strong evidence to the contrary.

And, in banning "TRIS", the Consumer Product Safety Commission stated:

The Commission has no conclusive data that establish that TRIS has caused cancer in humans. Since cancers develop over many years and cannot be easily linked to particular causes, this is not unexpected. The Commission's Office of the Medical Director (OMD) believes that once a substance is established as an animal carcinogen it can never be assured as a safe substance for human exposure. In addition, OMD believes that all known human carcinogens have been shown to be carcinogenic in laboratory animals. (Footnotes omitted). (42 FR 28060 at 28061, June 1, 1977)

Animal studies are most often conducted on small mammalian rodents such as mice, hamsters, and rats. Although as mammals, rodents are biologically closer to humans than fish, birds, or invertebrates, the choice of rodents as test species is not based solely upon their similarity to man. In large part, they are chosen for scientific convenience; they are small, easy to breed, relatively inexpensive to maintain, and have gestation periods of only a few weeks, so that an investigator can study many generations of rodents in a single year. Most important, cancers with a latency period of 5-40 years in humans will show up in rodents in only 1 to 2 years.

Animal studies typically use either a heterogeneous group of animals—one exhibiting a wide variety of physical and physiological traits, as humans do—or a carefully inbred strain that continues to exhibit the same well-defined characteristics generation after generation. Inbred strains offer experimental advantages and disadvantages; in studies of the carcinogenic potential of ultraviolet radiation on the skin, for example, hairless strains eliminate the need for removing the test animal's hair so that radiation can reach the skin. On the other hand, an inbred strain may have either an atypical sensitivity or resistance to the carcinogenic effects of a chemical. Repeated results can often be obtained with smaller numbers when animals of an inbred strain are used because of less variation due to genetic variation.

The chemical being tested may be administered to the animal in any one of several ways, for example: By ingestion through food or water, inhalation, injection under the skin or through the skin into the peritoneum, application to the skin, or directly to the stomach by means of a throat tube (gavage). Ingestion, inhalation, and skin application correlate with the normal modes of human exposure. Injection and a tube to the stomach

are the favored methods when the amount of exposure must be measured precisely.

The validity of extrapolating animal test results to man is firmly based upon empirical evidence as we point out below. Not only have mammalian experiments given positive carcinogenic test results for every compound known to cause cancer in man, except arsenic and perhaps benzene; although there may be wide variations in the susceptibility of various species to cancer, evidence indicates that a chemical that causes cancer in one animal species is likely to do so in most other species tested. The preponderance of scientific data indicates, in sum, that laboratory animals are suitable test models for determining the cancer causing potential of a toxic substance to humans.

In "General Criteria for Assessing the Evidence for Carcinogenicity of Chemical Substances", recently proposed for NCI by the Subcommittee on Environmental Carcinogenesis of its National Cancer Advisory Board (NCAB Report), 58 JNCI 461 (Feb. 1977) the expert subcommittee stated that studies with animal populations represent "a major source of data on carcinogenicity". Although present knowledge is not sufficiently advanced to allow a precise determination of whether a carcinogen identified solely by means of a bioassay in animals will or will not be carcinogenic in man and because it is not ethically nor practically feasible to undertake to study the effects on man of substances identified as carcinogens through animal studies, it is necessary to rely on the correlation between substances studied in animals and those known to induce cancer in man. The NCAB Report states that:

[e]xperience has indicated that, with one or two possible exceptions, compounds that are carcinogenic in humans are also carcinogenic in one or more experimental animal bioassay systems. In addition, several compounds first detected as carcinogens in experimental animals were later found to cause human cancer. Demonstration that a compound is carcinogenic in animals should therefore, be considered evidence that it is likely to be carcinogenic in humans, unless there is strong evidence in humans to the contrary.

The validity of using animal data as a qualitative indication of potential human effects has long been recognized by scientific advisory committees, and other governmental bodies; portions of the extensive discussion by expert committees, of the general criteria and principles applied to the design and interpretation of studies in animals will be traced to illustrate the varying conditions accepted for testing for carcinogenicity in animals (including length of the exposure period, number of animals to be employed, kinds of controls to be used, etc.) and the necessity for reliance on such data despite considerable uncertainties. As far back as 1959, a report of the National Research Council's Food Protection Committee provided one of the earliest reviews of the problems of identifying carcinogens. In the case of food additives, it was noted that epidemiological studies were even more difficult to conduct than for occu-

pational exposures, and a series of general considerations and principles underlying evaluations of carcinogenicity from animal studies were outlined. The report stated with regard to substances studied by administration to experimental animals that:

[t]here is general agreement as to the carcinogenicity of these substances and, although the carcinogenicity of all of them for man has not been demonstrated, it is unlikely that anyone would defend the addition of any of them to the human diet. (NRC, 1959, p. 6)

In 1961, a joint committee of the Food and Agricultural Organization (FAO) and the World Health Organization (WHO) issued a report entitled: "Evaluation of the Carcinogenic Hazards of Food Additives" (WHO Tech. Rept. 220). The committee, in its report, noted the "... difficulty of carrying out and interpreting epidemiological studies" and recognized that tests in animals are necessary to identify carcinogens. The committee stated that:

... tests on experimental animals cannot provide irrefutable proof of the safety or carcinogenicity of a substance for the human species. However, it is at least reassuring that the known carcinogenic activities of certain chemicals in man are similar in many ways to those found in experimental animals. (WHO Tech. Rept. 220, p. 6)

As a minimum safeguard, the committee said an "... investigation of the tumor incidence in a chronic toxicity test ..." should be performed, which "... should involve the study of an adequate number of animals of two species (e.g., rats and mice) and subjected to the feeding of a suitable dose range of the substance under question for the lifetime of the animals." (Ibid., p. 7)

The committee also noted its view of the need to use sensitive animals and stated:

Both sexes of each of at least two species of animals should be used in the tests throughout their lifespan. In most cases these species would be rats and mice. Hamsters or dogs might be suitable, but guinea-pigs, for example, appear to be resistant to some known carcinogens. The use of dogs in carcinogenicity tests has disadvantages. Because of the expense of maintenance, it is difficult to use a sufficient number to detect a low incidence of cancer, and the life span of the animal is 12-15 years. (Ibid., p. 8)

The committee report further stated that to establish valid negative results requires either the "unrealistic" use of large numbers of animals or dose levels "... far in excess of those recommended for human consumption." (Ibid., p. 9) Thus, to reduce the possibility that studies in animals will be too insensitive to detect the carcinogenic action of a substance, large doses of the substance are administered to the animals, despite the fact that in some cases large doses of many substances may cause non-lethal, non-carcinogenic but toxic effects in animals.

A report published in 1969 by the International Union Against Cancer (UIAC, 1969) discussed the results of a

study of "... those aspects of experimental carcinogenesis in animals which have a direct bearing on the problems of environmental cancer in man ..." with particular emphasis on "... methods of testing substances suspected of being carcinogenic in man, and to problems related to testing procedures." (UIAC, 1969, p. 1). The report states:

The need to formulate minimal requirements for satisfactory testing of substances suspected of being carcinogenic for man, has been recognized for a long time, and a number of international and regional bodies had already discussed it in some detail and published specific recommendations "... These earlier recommendations differed one from another in several respects, due in part to conflicting views among the various experts in the field, though some of the divergencies of opinion were more concerned with differences between minimal and optimal requirements. (Ibid., p. 11)

The report then discussed the minimal, and to some extent desirable, procedures to be employed in animal bioassays for carcinogenicity, the presentation of data, their interpretation, and other points, including priorities for testing. In the report it was also stated that positive findings should outweigh negative results:

It is generally recognized that negative results of biological testing are less significant than positive results, in relation to human application. This is all the more true when testing procedures are inadequate. (Ibid., p. 18)

In the United States, a review of concepts to be applied in carcinogenicity testing was also published in 1969 by the Commission on Pesticides and Their Relationship to Environmental Health, appointed by the Secretary of the Department of Health, Education, and Welfare (Mrak Commission). The Technical Panel on Carcinogenicity recommended that food additives and contaminants be tested for possible carcinogenic effects by means of adequate long-term bioassays.

The minimum requirements for such bioassays should include: Adequate numbers of animals of at least two species and both sexes with adequate positive and negative controls, subjected for their lifetime to the feeding of a suitable dose range of the test material, including doses considerably higher than would be present in food "... any substance which is shown conclusively to cause cancers in animals when tested under these conditions should be considered potentially carcinogenic for man ..." (Mrak Commission, p. 467)

... the number of animals in each test group should be sufficient throughout the tests to yield statistically significant results. It is important to stress that the detection of positive results in these bioassays depends on the development of tumor incidences significantly above the threshold of detectability for a given number of animals. Any carcinogenic effect below these levels will not be detected by the bioassays used. (Ibid., p. 465)

The species most practical for testing are rats, mice, and—as more recently shown—hamsters. Strains and colonies should be se-

lected to provide adequate sensitivity to tumor induction, as revealed by positive control tests with known carcinogens. (Ibid., p. 465)

The Technical Panel noted (footnote 2 on p. 465) that:

[t]he use of nonrodent species, recommended in the earlier reports, has now been substantially dropped. A suitable, practical nonrodent species would be useful but it is not available at this time "... While dogs have been employed for tests of carcinogenicity, with noteworthy success in selected cases (bladder carcinogenicity of aromatic amines), the requirement of lifetime feeding makes this species too expensive, in terms of time and funds, to be employed routinely.

The Technical Panel also noted the:

[g]eneral principles and criteria for evaluation of carcinogenic hazards "... laid down by several expert committees conceived in the last fifteen years by scientific and public health agencies ...

and stated that:

Recommendations made in these reports express a remarkably unanimous view on the general principles and criteria to be followed for carcinogenesis safety evaluations, widely accepted in principle by the scientific community (references omitted). (Ibid., p. 464)

In the report, the Technical Panel discussed the uncertainties as to the relevance and extrapolation of animal data to man, which it was stated:

... are a cause for concern and caution in interpretation of results. It should be noted, however, that a remarkable degree of concurrence has been found to exist between chemical carcinogenesis in animals and that in man where it has been studied closely. (Ibid., p. 482)

Thus, in recommending that human exposure to those pesticides considered to present a potential health hazard to man should be reduced, the Mrak Commission cautioned that:

... it is of utmost importance that the results of screening tests be scientifically and rationally considered. The correct interpretation of hazards to human health is sometimes extraordinarily difficult. It must involve the transfer of the results of animal experiments to prediction of human effects. In addition, the screening process frequently involves preliminary examination of the effects of massive dosages, possible contamination of test samples, and other factors which affect proper interpretation "... [but] ... [t]he health and welfare of the public must be effectively protected. (Ibid., p. 10)

Also in 1969, a Panel on Carcinogenesis of FDA's Advisory Committee on Protocols for Safety Evaluation prepared a report (FDA Panel Report) and later published it ("Panel on Carcinogenesis Report on Cancer Testing in the Safety Evaluation of Food Additives and Pesticides," *Toxic and Appl. Pharmacol.*, 20, 419 (1971)). The FDA Panel concerned itself "... with an evaluation of the present status of testing for carcinogenic action of food additives and other chemicals, which come into contact with man principally through his diet ..." and "... consideration of recommended test procedures for carcinogen-

sis (p. 425). A number of issues involved in the reliance on tests in animals under controlled conditions were discussed. Of the species of animals that might be used, the Panel said:

There is general recognition that new species in addition to the commonly used rodents are needed for carcinogenicity testing. Increasing the number of species used would greatly increase the margin of confidence with which safety can be predicted "... The most discussed additional species are primates. Recent studies show certain primates to be highly susceptible to some carcinogens; however, much more work is needed to justify the additional expense and time that would be necessitated by the introduction of these animals in routine test procedures. (FDA Panel Report, p. 426)

And in a discussion of the use of dogs, the Panel said:

There is general agreement that the dog is not a practical test animal because of its size and relatively long life span. (Ibid., p. 426)

The FDA Panel also delineated the responses in experimental animals as compared with a series of untreated (control) animals that "... may suggest the presence of a carcinogenic hazard ..." They are:

... (1) an increased incidence of tumors of a type seen commonly in the control animals, (2) an occurrence of a type of tumor not seen at all in the control animals or (3) a combination of the occurrence of a different type of tumor and an increased incidence of one or several types of tumors seen in the controls. In some experiments the only manifestation of an effect consists of (4) an earlier occurrence of tumors in the treated animals than in the controls, the incidence being the same in both. In yet another variation the only effect seen may consist of (5) an increase in the number of tumors per animal, the number of tumor bearing animals being the same. (Ibid., 419-420)

In 1969, the NRC Food Protection Committee prepared another report, "Evaluating the Safety of Food Chemicals," which was published in 1970 (NRC, 1970). The Committee noted that the previous reports of the Food Protection Committee, the Joint FAO/WHO Expert Committee, and the FDA contained:

... complementary statements of the principles underlying evaluation of the safety of food chemicals and "... set forth proposed procedures for accomplishing the evaluation ..." (NRC, 1970, p. 1)

The Committee stated that it was:

... not the purpose of this report to present another set of principles and procedures, but rather to review the purposes and value of what have become conventional procedures "... (Ibid., p. 1)

The Committee discussed the difficulty in carrying out controlled epidemiological studies and stated that:

[c]ontrolled experimental studies in man, though desirable, have limited predictive value "... (Ibid., p. 44)

and therefore:

[I]t is clear that appropriate and well-executed animal studies are more likely to provide a substantial background of biological

data from which to judge safety than are studies in man alone. (Ibid., p. 45)

In a discussion of the evaluation of the carcinogenic hazards of chemicals for man, the Committee stated that:

[o]n both ethical and practical grounds, the possible carcinogenic effects of chemicals to which man might be exposed must be determined in experimental animals, generally in short-lived species. The extrapolation of the results of these determinations to man rests on two basic findings:

1. Despite a great variety of studies, no significant aspect of the natural occurrence, induction, and properties of cancer has been shown to differ fundamentally between man and experimental animals.

2. Considerable assurance of the general applicability of the tests can be derived from the fact that the chemicals generally known to be carcinogenic in man also induce neoplasia (tumors) in experimental animals.

Many clear differences in the activities of chemical carcinogens in various species exist, however, and the unpredictable nature of species differences is the principal limitation to the extrapolation of results from studies with experimental animals to man. (Ibid., p. 47)

In 1970, the report, prepared for the Surgeon General by the Ad Hoc Committee of NIC, dealt with problems of exposure to chemical agents from all sources and "... the scientific criteria for evaluation of carcinogenic hazards." (NIC, 1970, p. 1). In emphasizing the broader scope of their report, the Committee said:

[M]any previous recommendations on the criteria to be used for evaluating environmental chemical carcinogenic hazards have been made for specific sources of exposure or for specific groups of substances (e.g., food additives, pesticides, certain occupational carcinogens). In some cases this approach has led to an uneven assessment of risks from different sources and to an uneven approach to preventive measures. (Ibid., p. 1)

The Committee acknowledged that:

[t]he present state of the art requires long-term bioassays in mammalian species for the experimental identification of carcinogenic activity "... A body of knowledge has developed over the years on the response of experimental animals to chemical carcinogens. Several committees of experts in the field of carcinogenesis convened by national and international bodies over the past 15 years have formulated general principles for performance and evaluation of carcinogenesis studies in animals. The recommendations put forth by these committees have shown remarkable unanimity (specifically cited were WHO Tech Repts 276 and 220, FDA Panel Report, Mrak Commission Report) and are widely accepted in principle by the scientific community" (Ibid., p. 1)

The committee cited the following references: P. Shubik and J. Sice, "Chemical carcinogenesis as a chronic toxicity test: A Review," *Cancer Res.* 61, 728 (1956). D. B. Clayton, "Chemical Carcinogenesis," Boston, Massachusetts, Little Brown and Co., 1962. W. C. Hueper, W. D. Conway, "Chemical Carcinogenesis and Cancers," Springfield, Illinois, C. C. Thomas, 1964. J. H. Welsburger and E. K. Welsburger, "Tests for Chemical Carcinogens, In Methods in Cancer Research, Volume 1, (H. Busch, ed.), New York, New York, Academic Press Inc., 1967, pp. 307-

Among the Committee's recommendations were:

Any substance which is shown conclusively to cause tumors in animals should be considered carcinogenic and therefore a potential cancer hazard for man. Exceptions should be considered only where the carcinogenic effect is clearly shown to result from physical, rather than chemical, induction, or where the route of administration is shown to be grossly inappropriate in terms of conceivable human exposure.

Data on carcinogenic effects in man are only acceptable when they represent critically evaluated results of adequately conducted epidemiological studies.

... Evidence of negative results, under the conditions of the test used, should be considered superseded by positive findings in other tests. Evidence of positive results should remain definitive, unless and until new evidence conclusively proves that the prior results were not causally related to the exposure.

... A basic distinction should be made between intentional and unintentional exposures.

... No substance developed primarily for uses involving exposure to man should be allowed for wide-spread human intake without having been properly tested for carcinogenicity and found negative.

... Any substance developed for use not primarily involving exposure in man but nevertheless resulting in such exposure, if found to be carcinogenic, should be either prevented from entering the environment or, if it already exists in the environment, progressively eliminated. (Ibid., pp. 1, 2)

The Committee also stated:

Any substance which is [validly] shown conclusively to produce tumors in animals ... should be considered potentially carcinogenic for man. (Ibid., p. 7)

More recent reports further confirm the widely recognized validity of animal experiments for establishing the carcinogenic potential of substances. An ongoing series of monographs published by the International Agency for Research on Cancer of WHO (IARC) beginning in 1972 lists animal data and any epidemiological evidence of cancer in man when discussing the carcinogenic potential of individual substances or of classes of substances. The monographs were initiated as a result of a recommendation in 1970 of the IARC Advisory Committee on Environmental Carcinogenesis:

... that a compendium on carcinogenic chemicals be prepared by experts. The biological activity and evaluation of practical importance to public health should be referenced and documented. (IARC Monographs, Vol. 1, p. 8)

The stated objective of the monographs is:

... to achieve a balanced evaluation of data through the deliberations of an international group of experts in chemical carcinogenesis and to put into perspective the present state of knowledge with the final aim of evaluating the data in terms of possible human risk, as well as to indicate the need of research efforts. (IARC Monographs, Vol. 1, p. 8)

387. J. G. Arcos, M. G. Argus, G. Wolf, "Testing Procedures," In "Chemical Induction of Cancer," Volume 1 (J. G. Arcos, M. G. Argus, and G. Wolf, eds.), New York, New York, Academic Press Inc., 1968, pp. 340-463.

The monographs emphasized that the response to a carcinogen in animals may be observed in several forms:

- (a) as a significant increase in the frequency of one or several types of neoplasms, as compared with other than zero frequency in control animals;
- (b) as the occurrence of neoplasms not observed in control animals;
- (c) as a decreased latent period as compared with control animals;
- (d) as a combination of (a) and (c).

(IARC Monographs, Vol. 1, p. 10)

In 1975, the National Research Council published two reports that addressed the question of carcinogenicity testing in animals. In a report on present and alternative technologies for pest control ("NRC Pest Control"), it is concluded:

... the carcinogenic risks, and other health hazards, of pesticides require continuing evaluation by testing with laboratory mammals, and that despite the problems involved in translating the results from such experiments to human risk, the present techniques are sufficiently reliable to justify registration actions based upon such data alone, on an interim basis, until evidence convincingly demonstrates that there is no human risk (NRC Pest Control, Vol. 1, p. 5)

In a report on principles for evaluating chemicals in the environment (NRC Principles for Evaluating Chemicals), a section is devoted to chemical carcinogenesis which discussed aspects of experimental design for carcinogenicity testing. The report states:

[R]odents are the animals of choice for carcinogenesis tests because of their convenience, comparatively short life span and proven susceptibility to a broad range of carcinogenic agents. (NRC Principles for Evaluating Chemicals, p. 150)

In 1976 the Subcommittee on Environmental Carcinogenesis of the National Cancer Advisory Board, National Cancer Institute, issued a report entitled "General Criteria for Assessing the Evidence for Carcinogenicity of Chemical Substances" (NCAB Report), June 2, 1976. The report stated:

... Demonstration that a compound is carcinogenic in animals should, therefore, be considered evidence that it is likely to be carcinogenic in humans, unless there is strong evidence in humans to the contrary. (NCAB Report, p. 2)

The report also stated:

Because of the limitations inherent in animal bioassays, a negative result obtained in a particular animal bioassay does not exclude the potential carcinogenicity of a compound in humans. The inappropriate experimental species may have been chosen; the number of animals tested may have been too small; or the duration of observation may have been too short. Alternatively, test conditions may have been inappropriate in terms of their predictive value for the response of humans. The extrapolation of experimental carcinogenicity data to the human situation is strengthened by obtaining results in more than one species. Negative results obtained in one species do not, however, detract from the significance of clearly positive results obtained in another species. (NCAB Report, p. 9)

It would seem, therefore, that opinions of scientific experts generally are substantially in agreement on (1) the prac-

tical and ethical difficulties in relying on epidemiological studies in man as the basis for establishing the lack of a carcinogenic potential of substances; (2) the validity of studies in experimental animals to establish the carcinogenic potential of a substance; (3) the minimal and optimal experimental conditions for testing for carcinogenicity; and (4) the kinds of statistically significant changes in tumor incidents that may be observed in experimental animals and used to characterize carcinogenic potential.

In particular, there appears to be general agreement on some of the following major issues and OSHA relies upon these concepts in proposing these regulations:

1. *Mammalian Species.* Mammalian species are those species of test animals generally considered directly relevant to man insofar as carcinogenicity testing is concerned. Other species, such as reptiles have not been shown to have any such similarity to humans, insofar as carcinogenicity is concerned. Thus, OSHA relies, in general, only upon results found in testing of mammalian species. In that regard, the rat and mouse (and to a lesser extent the hamster) have traditionally been the species of choice for carcinogenicity testing, other mammalian species being useful for certain purposes but being generally impractical for use in full-scale bioassays (WHO Tech. Rept. 220, p. 8; Mrak Commission, p. 465; FDA Panel Report, p. 426; NRC Principles for Evaluating Chemicals, p. 150). The choice of the rat and mouse is not only dictated by considerations of convenience, but because of their known susceptibility to agents known to be carcinogenic in humans as well as the similarity in the mechanisms of tumor induction (NRC, 1970, p. 47).

In *In Re Shell, supra*, the EPA Administrator stated:

Most of what we know about cancer is derived from tests with experimental animals, usually mice. The response of mice to carcinogens is similar pathologically to that of man; and research laboratories, such as those of the National Cancer Institute and Shell Chemical Company, use mice extensively in their research. (Footnotes omitted)

In affirming the EPA action, the United States Court of Appeals for the District of Columbia stated, 510 F. 2d 1292 at 1299:

Shell claims that tests based on mouse data are not substantial evidence, because mouse livers are unusually susceptible to cancer. Still, Shell's data—of statistically significant incidence of malignant liver tumors—were in strains of mice that were, as was noted by the Administrator, unusually resistant to such tumors. In any event, Shell's objections are outweighed by the substantial evidence supporting EPA's determination that mice are not uniquely susceptible to carcinogens, but are, in fact, good predictors of carcinogenic hazard to man. The Administrator found that rodents are particularly useful experimental animals, in part because of the similarity of their response to carcinogens to the response of man, their short lifespan, and our relatively well-developed understanding of the pathological development of tumors in mice and rats. Respected research institutions such as the National Cancer Institute have used mice ex-

tensively because they have found mice to be an accurate predictor of cancer in other species. (omitting footnotes).

And, in *In Re Velsicol*, the EPA Administrator stated:

For these reasons, pesticides and other chemicals are tested for carcinogenicity in laboratory animals, particularly mice (the first choice) and rats, which are broadly accepted by the scientific community as appropriate test animals for these purposes.

The mouse develops almost every kind of cancer that occurs in man and, with few, if any, exceptions, is subject to cancer from any source which is known to be a carcinogen in man. In both mouse and man, genes are involved in the control of processes through which cancer is induced. They control reactions to physical and chemical carcinogens. The genetic characteristics of mouse and man are sufficiently similar to permit the assumption that if a chemical or other agent such as radiation causes cancer in a particular organ of mice, then it will also cause cancer in the same organ, or possibly some other organ, of man.

In fact, the difficulty with using laboratory animals to test for carcinogenicity lies in the other direction. The failure of a chemical to induce cancers in a particular strain (or even several strains) of laboratory animals is not an assurance that the chemical is not a carcinogen in man, since that particular strain may be genetically resistant to cancer from that source, where, by contrast, the genetic susceptibility of people to cancer varies a great deal from person to person.

In the final determination to prohibit the use of chloroform in drug and cosmetic products, FDA was also faced with a study based on mice and rats. In discussing the issues raised concerning the mouse, FDA stated:

1. One comment from the Cosmetic, Toiletry and Fragrance Association, Inc. (CTFA), which also submitted safety data to FDA on studies involving the use of chloroform, questions the relevancy, design, execution, and interpretation of the National Cancer Institute (NCI) studies, and expressed the opinion that it is scientifically unjustified to disregard CTFA's studies in favor of the NCI studies. The specific points raised by the comment in opposing the Commissioner's determination that chloroform is a carcinogen or is otherwise a deleterious substance are as follows:

a. The comment contends that the NCI studies in no way consider the differences in metabolism between rodents and man. In support of this contention regarding differences in metabolism, the comment cites an article by Hill et al., "Genetic Control of Chloroform Toxicity in Mice," *Science*, 190:159, 1975; a recent review by Charlesworth in *BIBRA* (British Industrial Biological Research Association) *Information Bulletin*, 14:225, 1975, which cites Taylor et al. in *Xenobiotica*, 4:165, 1974; and a paper entitled "Covalent Binding of Haloalkanes to Liver Constituents, but Absence of Mutagenicity on Bacteria in Metabolizing Test System" by Uehleke, Greim, Kramer and Werner, presented at the fifth meeting of the European Environmental Mutagen Society, Florence, October 19-22, 1975. The comment states that (1) Hill et al. demonstrated that there are genetic factors in mice that affect susceptibility to chloroform lethality and induction of organ pathology and that these are associated with a metabolite whose formation is regulated by genetic factors; (2) Charlesworth reported distinct species differences to show that the metabolic fate of chloroform in mice and most likely in rats,

is not the same as in man, that there are sex-linked differences in metabolism that are peculiar to the mouse, and that man appears to eliminate more of the chloroform unchanged in the exhaled air; (3) Taylor et al. concluded that the mouse is an unsuitable species for evaluating the toxic effects of chloroform; and (4) Uehleke found in the "Ames study" that chloroform is not mutagenic and unlikely to be carcinogenic.

The comment further states that a "recognized international expert in oncology" concluded that in consideration of the findings in the NCI report and those obtained by himself, "there is obviously wide species, strain, and sex variation both in the incidence of spontaneous tumor of the liver and kidney and in the response of these organs to chloroform." The comment claims that such a conclusion is supported by an opinion expressed by Dr. Grasso in a talk entitled "Evaluation of the Hepatoma in the Rodent in Carcinogenesis Bioassay" summarized in *BIBRA*, 1975 ("The Value of the Mouse in Carcinogenesis Bioassay" summarized in *BIBRA*, 1975).

The Commissioner views the conclusions expressed in the comment as relying on the finding that, in studies of three mouse strains, male and female mice showed a sex-linked difference in ability to metabolize chloroform. The Commissioner does not agree that this forms an adequate basis for rejecting the mouse as a useful experimental animal, especially since the work of Hill et al. indicates that this variability exists not only between sexes but also within the same sex among different strains of the same species. Since these authors cite findings in humans of large interindividual difference in the disposition of commonly used drugs—differences which they attribute to genetic variability—it is not surprising that chloroform toxicity would be variable in the same species as well.

The Commissioner points out that the NCI report observes the variation in species and sex in the incidence of spontaneous tumor of the liver and kidney, and the response of these organs to chloroform. The report notes that the Osborne-Mendel strain was selected by NCI because it was reported to be sensitive to the carcinogenic effects of carbon tetrachloride (CCl₄). The question of genetic drift within a strain might also be a factor since the positive control (CCl₄) produced a relatively low response (less than 5 percent with hepatocellular carcinomas). Thus, if anything, the Osborne-Mendel rats used in the NCI studies appear to be less sensitive to the hepatocarcinogen than those reported in the literature.

The Commissioner recognizes that there is disagreement among pathologists on diagnosis of lesions, including hepatic nodular lesions. However, proliferative changes and neoplastic lesions are discussed in considerable detail on pages 32-37 and 40 of the NCI report. The critique submitted by the comment provides no new information that would negate the effects discussed in the pathology section of the NCI report. (41 FR 26842)

2. *Positive Versus Negative Results.* Testing of chemicals for valid negative results may be used to evaluate the evidence only if they are derived from tests which used both sexes of each species tested, exposed for their lifetime to a suitable dose range of the test material, with appropriate controls (WHO Tech. Rept. 220, p. 8; Mrak Commission, p. 486-87). As the Ad Hoc NCI Committee report recommended to the Surgeon General of the United States:

4. No chemical substance should be assumed safe for human consumption without proper negative lifetime biological assays of adequate size. The minimum requirements for carcinogenesis bioassays should provide for: adequate numbers of animals of at least two species and both sexes with adequate controls, subjected for their lifetime to the administration of a suitable dose range, including the highest tolerated dose, of the test material by routes of administration that include those by which man is exposed. Adequate documentation of the test conditions and pathologic standards employed are essential. (Emphasis supplied) (P. 1)

However, as the following discussions make clear, OSHA is concerned not about negative test results in species other than the species in which the substance created positive carcinogenic activity, but rather additional negative test results in the species that has been reported as positive in other tests. This is so because, as pointed out, known carcinogens in humans are not necessarily so in all species of test animals or even consistently so.

Likewise, positive results in tests with experimental animals, if obtained under sound experimental conditions and with proper statistical confirmation, should generally supersede negative results, both because of the aforementioned insensitivity of laboratory bioassays conducted with limited numbers of animals, which may frequently lead to false negative results, and also because of interspecies differences in susceptibility. For example, in 1970, the Ad Hoc NCI Committee's report to the Surgeon General recommended that:

5. Evidence of negative results, under the conditions of the test used, should be considered superceded by positive findings in other tests. Evidence of positive results should remain definitive, unless and until new evidence conclusively proves that the prior results were not causally related to the exposure. (P. 1)

FDA appears to accept this view. In banning the use of chloroform, FDA stated:

E. The comment contends that FDA has never made a determination that a substance is carcinogenic on the bases of a single unreplicated study where there are contradictory data, and it refers to saccharin, where the studies produced conflicting test results, as an example.

The Commissioner advises that the reference to saccharin is neither analogous nor applicable to the chloroform toxicity and carcinogenicity bioassays relied upon in this action. Thus far, the results of studies using saccharin have been inconclusive; additional studies are ongoing. The results of the NCI studies are conclusive. In addition, the studies submitted by CTFA were conducted at lower dosages than those reported by NCI. The lack of sensitivity of the current carcinogenesis bioassays in rodents is well recognized. Thus the positive finding with chloroform should be given greater weight than studies at lower dosages using smaller numbers of animals.

Moreover, FDA stated:

... negative evidence in experimental animals, such as reported in some of the studies submitted by CTFA, does not exclude the potential human carcinogenicity of a substance. The Commissioner is of the opinion that the risk to humans through

frequent and long-term exposure to a substance in human drugs and cosmetics that has been shown to be an animal carcinogen is contrary to the public health unless the benefit of such exposure clearly outweighs the risk. (41 FR 26844)

And, it should be noted that certain chemicals may be carcinogenic in certain species, including man, but not in others. For example, betanaphthylamine, a known carcinogen in man, monkeys and dogs, is not apparently carcinogenic in rats or rabbits. Hence, positive studies in any mammalian species will, as a general rule, always supersede negative findings in another species. (UICC 1969, p. 18; NCI, 1970, p. 2; NCAB, report, p. 9)

Thus, OSHA believes that, as a practical rather than a theoretical matter, positive animal data should supersede negative human data, in general, because of the inherent defects in such human studies, as pointed out above. Moreover, in the case of DES, OSHA is unaware of any data indicating that women who took DES during pregnancy (with the possible exception of those with gonadal dysgenesis) have any greater risk of contracting cancer than women who have never been exposed to the chemical. Yet, DES is unquestionably a human carcinogen in terms of at least the exposed female offspring. Thus, humans may be exposing themselves to potential carcinogens that may affect, and appear in, only future generations, at that point a matter which is irreversible even in terms of reduction of exposure. But, as in the case of all known human carcinogens (with the possible exception of arsenic and benzene), DES had been regarded for years as positive, for carcinogenic activity, by all routes of administration, in test animals, including the mouse, rat, hamster and the squirrel monkey.

3. *Testing at High Doses.* The testing of chemicals at constant high exposure levels, at or approaching the maximum tolerated dose level, is not inappropriate and is indeed required to overcome the statistical insensitivity of laboratory bioassays conducted with the limited numbers of animals that can be handled in practical laboratory conditions (WHO Tech. Rept. 220, p. 9; Mrak Commission, p. 487; UIAC 1969, p. 17). As the NCI Ad Hoc Committee's report to the Surgeon General stated:

... bioassay methods have remained tools of low sensitivity, capable only of detecting the highest peaks of carcinogenic activity. The factor which limits bioassay sensitivity is usually the small number of test animals used. If the bioassay design has a low probability of detecting carcinogenic effects produced by hazards at levels comparable to those present in environmental samples, then tests at such levels are wastes of time, effort and money. The need to test levels higher than those found in the environment is thus founded. (P. 7)

Regulatory agencies have agreed. The Administrator of EPA stated in *In Re Shell, supra*:

High doses are administered in animal tests, not because the researchers seek to correlate animal response levels to humans, but because with a limited number of animals

this methodology is necessary to determine gross effect. Consequently, a substance that will induce cancer in experimental animals at any dose level, no matter how high or low, should be treated with great caution. (Footnotes omitted) (39 FR 37268)

Again, in *In Re Veliscol*, EPA addressed this issue and stated:

Some interest has focused on the high dose levels given to laboratory animals as opposed to the much lower levels encountered by man in the environment, the supposition being that the lower doses naturally encountered may not be dangerous. However, there is not any evidence to indicate that there is a minimum dosage of any known carcinogen below which it does not have a carcinogenic effect. There does not appear to be a relationship between the dose level of a carcinogen on the one hand and, on the other both the percentage of the total of persons or animals exposed who get cancer and the latency period of the disease. High doses in animal experiments are thus justified, and indeed necessary, because the comparatively small numbers of animals necessarily involved in the experiments make it very difficult at least to test for positive results at lower doses.

Testing at . . . relatively high doses is now generally regarded as essential to the attempt to reduce the gross insensitivity imposed on tests by the small size of animal groups routinely tested, such as 50 or so rats or mice per dose level per chemical, compared with the millions of humans at presumptive risk . . .

To illustrate the insensitivity of conventional animal test systems, assume that man is as sensitive to a particular carcinogen as the rat or mouse. Assume further that this particular agent carries a risk of producing cancer in 1 of 10,000 humans exposed; this would result in approximately 20,000 cancers in the United States population. Then the chances of detecting this in groups of 50 rats or mice, tested at ambient human exposure levels, are very low. Indeed, samples of 10,000 rats or mice would be required to yield 1 cancer over and above any spontaneous occurrences; for statistical significance, perhaps 30,000 rodents would be needed.

Moreover, there exists the problem that for particular chemicals, human beings may be far more sensitive than laboratory animals. For example, thalidomide produces teratogenic effects in man at a dose level that is 1/60 of that needed to produce that effect in mice, 1/100 of that for rats, 1/200 of that for dogs, and 1/700 of that for hamsters. (41 FR 7575)

And again, FDA in eliminating chloroform from drugs and cosmetics stated:

b The comment also argues that the dosage in the NCI studies was excessive and thus does not support the contention of risk to humans. Noting that the NCI report states that the methodology used in their studies differs from that which is currently used by NCI, the comment states that the most serious defects in the methodology used are the inadequacy of the subchronic toxicity study to determine the maximal tolerated dose (MTD) and one-half MTD, and the failure to employ a meaningful definition of MTD. The comment further states that had a proper and reliable subchronic study been conducted, employing liver and renal function measurements as well as histological assessment of the effects of chloroform upon the liver and kidney, it would have been found that the dose levels used were too toxic. In support, the comment notes that in the NCI rat study, the dose levels had to be reduced after 22 weeks of

treatment because the lethal consequences were too great. The comment also cites in support a short term study conducted at Bio/dynamics Inc. at dosage levels of 60, 120, 240, and 480 milligrams/kilogram and with the same strain of mice as that used in the NCI study. In the Bio/dynamics Inc. study both males and females had poor tolerance to the chloroform and at the 480 and 240 milligrams/kilogram levels most of the mice died.

It is the Commissioner's opinion that the growth and survival curves as plotted for the mice in the NCI report reveal no significant effect on growth from the dosages administered, and only in the high-dose level female mice is there an effect seen on survival. However, this effect was observed late in the study, when the death rate showed a sudden increase after the 70th week. The Commissioner therefore concludes that the dosages in the NCI mouse study conform to the standard generally accepted for an MTD to be used in carcinogenicity studies.

In the NCI rat study, it is true that the survival rate for chloroform-treated rats was lower than that for control rats.

However, in the Commissioner's view the high dosage level for male rats appears to conform to standards for MTD when the first 90 days of the growth curves are examined. The comment's objection regarding excessive dosage (greater than MTD) would apply only to female rats. In this regard the Commissioner notes that the statement in the comment that dosage levels employed had to be reduced after 22 weeks because of lethality applies only to the female rats. Despite the reduction in dosage, the survival curves show a consistently lower survival rate. However, the Commissioner emphasizes that there was no increase in tumors reported for these animals. Rather, it was only in the male rats that an increased incidence of renal tumors was reported.

The comment also points out that the ratio of tumor-bearing animals to animals involved in all chloroform treatment groups is less than that found in both male and female matched control groups. This observation, however, is noted and described by NCI in their report as not significant. Moreover, the Commissioner believes the distribution of other than kidney tumors to be normal. Aside from this, the comment disregards the dose-related time of tumor onset. The CITFA analysis further states that . . . data for the female groups indicate that chloroform treatment may have actually exerted beneficial effects. Obviously, the lethal effects cannot be viewed as beneficial. Finally, the Commissioner notes that in the case of male rats where dosage would appear to conform to the generally accepted standard for carcinogenicity studies, definite evidence of kidney carcinogenicity appeared. (41 FR 26842)

4. *Species or Organ-Specificity.* In experimental carcinogenesis, the type of cancer seen is often the same as that recorded in human epidemiological studies (e.g., bladder cancer in man, monkeys, dogs, and hamsters with beta-naphthylamine). In other instances, however, a chemical will induce neoplasms at different sites in different animal species (e.g., benzidine, which induces hepatic carcinoma in the rat, but bladder carcinoma in man; or chloroform, which induces hepatic carcinoma in the mouse, but kidney carcinoma in the rat) (IARC Monographs, Vol. 1, p. 10; 41 FR 15026; NRC Pest Control, Vol. 1, pp. 74-82). Thus there can be no presumption that the organ affected in ani-

mal experiments would necessarily be that at risk in man. And, in *In re Shell* the EPA Administrator further stated:

Most carcinogens are also not organ-specific. In a survey by Dr. Tomatis of 58 compounds known to produce liver tumors in mice, 40 also induced tumors in a variety of other organs. Furthermore, chemically induced tumors in one species need not appear in the same organ in other species. Thus, a carcinogen which induces liver tumors in mice might, for example, produce mammary cancers in rats and lung tumors in men. (39 FR 37268)

5. *Statistical significance.* For adequate demonstration of carcinogenicity of a substance in test animals, it is generally necessary that the increased incidence of neoplasms in one or more of the experimental groups should be evaluated statistically for significance (NCAB Report, p. 5; Mrak Commission Report, p. 465). This requires that the size of the experimental groups be adequately large to permit statistical evaluation (Mrak Commission Report, p. 465; UICC 1969, p. 17).

In contrast to the five (5) points discussed above, on six (6) other issues discussed below (6-11), the opinions of scientific experts appear to be less fully in agreement, and OSHA takes cognizance of the areas of scientific debate in determining the weight to be placed on different types of evidence. However, for the reasons stated in the following discussions, OSHA believes that responsible public rulemaking and prudence concerned with protecting the health of American workers mandate the decisions reached therein.

6. *How much weight should be placed upon the incidence of benign tumors in animals as an indication of potential carcinogenic hazard in man?* There are well-established morphological and histological criteria for distinguishing between benign and malignant tumors, and there is substantial agreement among scientific experts that the occurrence of tumors in advanced stages of cancer—invasion of adjoining tissue and metastasis to other organs—is an unequivocal predictor of carcinogenic hazard to man. Malignant tumors are those that display these characteristics of invasion and metastasis, or have the capacity to do so, whereas benign tumors are those which are judged by experts to lack this capacity (NCAB Report, p. 3). Scientific opinion has varied on the issues of whether substances which induce benign tumors only should be characterized as carcinogenic, and whether they should be regarded as posing a potential carcinogenic hazard to man. Historically, a distinction was drawn. For example, the FDA Panel on Carcinogenicity in 1969 stated:

. . . a carcinogen is a substance that when administered by an appropriate route, causes an increased incidence of malignant tumors in experimental animals as compared with a control series of untreated animals . . . The occurrence of benign tumors only would not classify an agent as a carcinogen. (FDA Panel Report, pp. 419-420)

The Panel pointed out that:

The occurrence of metastases provides an unequivocal demonstration of malignancy. There are, however, many tumors induced experimentally that are invasive and are classified as malignant, that metastasize only rarely during the average experiment. The absence of metastasis, in view of most pathologists, does not rule out the diagnosis of malignancy. (FDA Panel Report, p. 420)

This position was also supported in the 1959 report of the NRC Food Protection Committee:

The general term "cancer" refers to the development of all kinds of malignant tumors. This term is not applied to non-malignant tumors . . . It is recognized, however, that progression from benignity to malignancy may occur. (NRC, 1959, p. 5)

The FDA Panel did, however, note that:

. . . benign tumors may cause death in man and animals without ever undergoing malignant transformation. The induction of a benign tumor is, itself, therefore, an indication of a serious adverse reaction. There can be no doubt from a survey of experimental studies that benign neoplasms are often precursors of malignancies . . . (and) it would be wise to take serious note of the occurrence of benign neoplasms in experimental studies . . . (FDA Panel Report, p. 420)

However, in more recent times, the considerations that benign tumors are hazardous without progressing to malignant stages and that benign tumors are often precursors to malignant tumors have led other expert agencies and committees to be more cautious in terms of exposing man to potential carcinogens. For example, the Technical Panel on Carcinogenicity of the Mrak Commission stated:

. . . the majority of the Panel recognizes that benign tumors may become malignant. The Panel is unaware of the existence of any chemical which is capable of inducing benign tumors only, which is to say, in the light of present knowledge, all tumorigens must be regarded as potential carcinogens. Thus, the majority of the Panel accepts tumorigenicity as an index of potential carcinogenicity. (Mrak Commission Report, p. 466)

In a discussion of the Litton-Bionetics study sponsored by NCI, the Technical Panel stated:

The end point employed in the study was tumors. This term was used to include the benign and the malignant neoplasms and those neoplasms whose malignancy could not be ascertained on the basis of histomorphology alone . . . This use of the term "tumor," in the opinion of the panel, is both useful and admissible for the purposes of quantitating chemical carcinogenicity in animals. Its admissibility is based upon two facts: (a) No adequately tested chemical has been found to produce only benign neoplasms and, (b) a substantial percentage of benign-appearing tumors in mice, has been demonstrated ultimately to eventuate in cancer. (Mrak Commission Report, p. 482)

Other reports as well support the position of considering the occurrence of benign tumors to be evidence of carci-

nogenicity. The World Health Organization Report in 1961 stated:

In the assessment of the carcinogenic risk it is not considered relevant whether the tumor is benign or malignant since the conversion of the first to the second must be regarded as possible. (WHO Tech. Rept. 220, p. 16)

The Ad Hoc Committee that reported to the Surgeon General in 1970 recommended that:

. . . The implication of potential carcinogenicity should be drawn both from tests resulting in the induction of benign tumors and those resulting in tumors which are more obviously malignant. (NCI, 1970, p. 1)

In the report of the Ad Hoc Committee, the earlier definition of the FDA Panel was specifically discussed, and the Ad Hoc Committee stated:

The assessment of the carcinogenic activity of a chemical depends on a variety of parameters. These include not only the total numbers of tumors induced but also their multiplicity, latent period, morphologic type, and degree of malignancy. The induction of tumors diagnosed as benign as a result of treatments has been interpreted by certain groups in the past as not sufficient to demonstrate a "carcinogenic" effect. This is a dangerous position since few, if any, substances have produced only benign tumors and no malignant ones when properly and repeatedly tested. (NCI, 1970, p. 6)

In the report of the WHO Expert Committee in 1964 on "Prevention of Cancer" precancerous lesions in animals were discussed:

In the thinking of most experimentalists the induction of a benign tumour represents the production of neoplasia. Most would feel that this is an indication of carcinogenicity although it is usual to continue studies until morphologically malignant tumours have appeared. There are few studies on record in which only benign tumors are recorded (the neurofibromas induced by ergot appear to be such an instance). In the majority of experimental studies with epithelial tissues, the induction of a benign tumor is merely a stage in the subsequent occurrence of a malignancy. (WHO Tech. Rept. 276, p. 12)

A World Health Organization report on "Principles for the Testing and Evaluation of Drugs for Carcinogenicity" ("WHO Tech. Rept. 426"), published in 1969, stated:

The response of test animals to carcinogens may take one of several forms: (1) an increased incidence of one or more of the tumor types noted in the controls; (2) the occurrence of tumors earlier than in the controls, without increased incidence; (3) the development of types or tumor not seen in the controls (this may or may not be associated with an overall increase in the number of tumors seen in the controls; and (4) a multiplicity of tumors in individual animals, the incidence in terms of tumor-bearing animals being the same. Furthermore, the tumors seen may be benign or malignant, or tumors of both categories may be present. (WHO Tech. Rept. 426, p. 19)

The International Agency for Research on Cancer (IARC) took a similar position:

The qualitative nature of neoplasia has been much discussed. Many instances of carcinogenesis involve the indication of both benign and malignant tumors. There are few, if any, recorded instances in which only benign tumors are induced; their occurrence in experimental systems is usually indicative of eventual malignancy. (IARC Monographs, Vol. 1, p. 10)

And a decision of the Administrator of EPA in suspending two pesticides in *In Re Shell*, *supra*, is noteworthy. He stated, citing the above mentioned report of the IARC:

The once significant distinction between tumors and cancers, or between tumorigenic and carcinogenic substances has lost much of its validity with the increasing evidence that many tumors can develop into cancers. Thus, for purposes of carcinogenicity testing, they should be considered synonymous. Similarly, the distinction between benign and malignant tumors, while important to the individual host animal, is not a reliable indicator of carcinogenicity, for in the thinking of most experimentalists, the induction of a benign tumor is merely a stage in a subsequent occurrence of a malignancy. (39 FR 27267)

In addition, one recent committee reports the following position:

The carcinogenicity of a substance is established when the administration to groups of animals in adequately designed and conducted experiments results in increases in the incidence of one or more types of malignant neoplasms (or a combination of benign and malignant neoplasms) in the treated groups as compared to control groups maintained under identical conditions but not given the test compound . . .

The occurrence of benign neoplasms raises the strong possibility that the agent in question is also carcinogenic since compounds that induce benign neoplasms frequently induce malignant neoplasms. In addition, benign neoplasms may be an early stage in a multi-step carcinogenic process and they may progress to malignant neoplasms; also, benign neoplasms may themselves jeopardize the health and life of the host. For these reasons, if a substance is found to induce benign neoplasms in experimental animals it should be considered a potential human health hazard which requires further evaluation. In experiments where the increased incidence of malignant neoplasms in the treated group is of questionable significance, a parallel increase in incidence of benign tumors in the same tissue adds weight to the evidence for carcinogenicity of the test substance. (NCAB Report, p. 5)

It is plain from the above quotations that the scientific discussion is not concerned with the significance of benign tumors, but rather with the precise degree of weight that should be placed upon the results of an experiment in which a substance induces only tumors that are authoritatively classified as benign in the test animals. Since such instances are acknowledged to be rare (IARC Monographs, Vol. 1, p. 10; WHO Tech. Rept. 276, p. 12; NCI, 1970, p. 6; Mrak Commission Report, pp. 466, 482), the issue may be somewhat academic. However, if such a case should arise before OSHA in regulatory decision-making, the Agency proposes to place as much weight on an experiment in which only benign tumors are observed, as upon experi-

ments in which both malignant and benign tumors are induced.

7. *How much weight should be placed on the induction of a type of tumor which occurs spontaneously in untreated animals?* There has been some debate in recent years as to the amount of weight that should be placed on experiments in which administration of a compound merely increases the frequency of a type of tumor which occurs spontaneously in untreated control animals of the species and strain involved in the test. Some would argue that such compounds should not be classified as carcinogenic, but merely as "augmenting" or "enhancing" agents. However, such a view is not supported by the expert committees which have reviewed this problem:

For present practical purposes, no distinction is made between the induction of tumors and the enhancement of tumor incidence, although it is noted that there may be fundamental differences in mechanisms that will eventually be elucidated (IARC Monographs, Vol. 1, p. 10)

It is not possible to differentiate clearly between initiating agents, promoting agents, and certain modifying factors. Any factor or combination of factors which increases the risk of cancer in humans is of concern regardless of its mechanism of action. (NCAB Report, p. 2)

Ineed, if a species of animals has a very low or zero spontaneous incidence of tumors at various sites, this may indicate that it is resistant to the induction of tumors at these sites by carcinogens, and hence would be unsuitable as an experimental subject. It is for this reason that the use of positive controls in carcinogenesis bioassays is recommended by some expert committees (Mrak Commission Report, p. 467).

A more substantial argument that has been raised is that certain animal strains may be inappropriate for testing because of high and variable spontaneous incidence of tumors in one or more organs. This argument has been made with particular reference to liver tumors in certain strains of mice but has also been made in reference to lympho-sarcomas in mice, and certain other tumors. The NCAB Report cautions against unequivocal reliance on:

[b]ioassays employing inbred strains of animals which develop high incidences of particular tumors in the untreated state. In some of the studies the particular characteristics of the animals and the results obtained may require additional evaluation—in other instances, such well controlled test systems may be quite satisfactory for the establishment of carcinogenicity of an agent. (NCAB Report, p. 6)

The other expert committee reports cited above, however, expressed no such reservations, merely emphasizing that the spontaneous incidence of tumors be carefully recorded (Mrak Commission Report, p. 465; UICC 1969, p. 17), and in some cases recommending the use of genetically inbred strains with known spontaneous tumor incidence for specific bioassay purposes (UICC 19, p. 16; NAS Principles for Evaluating Chemicals, p.

135; FDA Panel, p. 422). Where the spontaneous incidence of tumors is high or even 100 percent, reliable inferences of carcinogenicity can be drawn from a decrease in the latency periods or an increase in the number of tumors per animal (IARC Monographs, p. 10; FDA Panel, p. 420). In such cases, the emphasis that the study be "well controlled" (NCAB Report, p. 6) is important since the incidence of spontaneous tumors may depend on age or other factors, which therefore must be maintained the same in control and treated groups.

Indeed, recent studies of the mechanisms of cancer induction and their implications for dose-response relationships have suggested that animals with relatively high spontaneous tumor incidence may in fact be more appropriate for assaying potential carcinogens than animals with low or zero spontaneous incidence:

One practical implication of the fact that different carcinogens share many mechanistic steps is that enhancement of certain carcinogenic processes may have a more readily detectable effect on cancer incidence in animals with high background levels of all other carcinogenic processes. Therefore carcinogenicity tests of various substances should possibly include tests on high-spontaneous incidence strains or experiments to see whether the test substance enhances the carcinogenic effect of a standard carcinogen. (K. S. Crump, D. G. Hoel, C. H. Langley, and R. Peto, *Cancer Research*, 36:2977, 1976)

Accordingly, OSHA proposes to interpret the results of experiments showing increased incidence of tumors in treated animals as positive evidence of carcinogenicity, regardless of the spontaneous tumor incidence, provided that the experiments are sufficiently well controlled and the increase in incidence is statistically significant. However, it may be appropriate to place less weight on an experiment conducted with an animal strain in which the spontaneous tumor incidence is relatively high. For example, an increase in tumor incidence from 1% to 21% would appear more biologically significant than an increase from 50% to 70%, even if both were equally significant in the statistical sense. It should be remembered that if only very resistant strains are used, some substances that may be carcinogenic in susceptible humans may be missed.

8. *Which routes of exposure of experimental animals are to be considered appropriate for extrapolation to man?* The NCI Ad Hoc Committee recognized that exceptions to the validity of qualitative extrapolation from data on carcinogenic effects on animals to predict potential hazard for man might be considered "where the route of administration is grossly inappropriate in terms of conceivable human exposure." (NCI, 1970, p. 1). The National Cancer Advisory Board Subcommittee similarly expressed reservations about the unequivocal interpretation of:

[b]ioassays in which the test compound is given by unusual routes of administration [such as bladder implantation] and there is reason to believe that the tumors that occurred may not be due to a specific effect

of the test compound. (NCAB Report, pp. 6-7)

However, the Subcommittee continued:

This does not mean, however, that substances should only be tested in animals by the same route of administration as pertains to human exposure (*ibid.*).

In cases where the test compound is absorbed by the experimental animals and is circulated systemically, giving rise to tumors at sites other than the point of application, it seems reasonable to regard the route of administration as irrelevant to weighing the potential risks to man. This principle was specifically enunciated by the National Cancer Institute in its report in the "Carcinogenesis Bioassay of Trichloroethylene" (NCI Carcinogenesis Tech. Rept. Series No. 2, May 31, 1976):

Trichloroethylene was administered by gavage in this study while the main human exposures are by inhalation of vapors and by ingestion through contaminated water and food products. The selected route of exposure is considered relevant to all modes of human exposure because trichloroethylene is readily absorbed and distributed to all organs following ingestion or inhalation. This has been shown in several species, including the rabbit (Gask, 1936), the dog (Barrett and Johnston, 1939), and the guinea pig (Fabre and Truhaut, 1952). The fact that in this study tumor induction occurred in the liver indicates that trichloroethylene was absorbed and that systemic exposure of tissues occurred. (NCI Tech. Rept. Series 2, p. 41)

In cases where tumors are induced in experimental animals only at the site of administration of the substance, it becomes important to evaluate the appropriateness of the route of exposure to that likely to occur in occupational situations. OSHA intends to consider each such case on its merits, subject to the following guiding principles:

(1) oncogenic effect resulting from dermal, inhalation, injection (with tumors at distant sites) and oral exposure (including gavage or intratracheal instillation), shall be regarded as directly relevant to occupational exposure, except in special circumstances;

(2) carcinogenesis resulting from injections or implantations, in which the tumors are induced only at the site of application, shall generally be regarded as irrelevant to occupational exposure, except where the substance is distributed systemically or in other special circumstances.

OSHA draws attention to this specific part of the proposal and invites public comment on its proposed conclusions.

9. *How much confirmation of positive results is necessary?* For the reasons stated above, positive results in tests with experimental animals, if obtained under sound experimental conditions and with proper statistical confirmation, should in general, supersede negative results, including those in humans, as pointed out. In particular, positive findings of carcinogenicity in one animal species should generally outweigh negative reports in another, in relation to human application (UICC, 1969, p. 18; NCI, 1970, p. 2, NCAB Report, p. 9).

Nevertheless, OSHA recognizes that "false positive" results may arise occasionally, both through statistical ac-

cidents and honest errors in the conduct of single experiments. Accordingly, OSHA recognizes that much greater weight should be attached to positive results that have been replicated in another study than in a single unconfirmed result. As the National Cancer Advisory Board expressed the situation:

Such increases [in neoplasms in experimental animals] may be regarded with greater confidence if positive results are observed in more than one group of animals or in different laboratories. The demonstration that the occurrence of neoplasms follows a dose-dependent relationship provides additional evidence of a positive result. (NCAB Report, p. 5)

While recognizing the importance of a single positive result as a warning flag, the Agency believes that it would not serve the interest of responsible public rulemaking to impose major, cost intensive regulatory requirements on the basis of unconfirmed, and possibly unreplicable, results. Following the guidance of the NCAB Subcommittee, which emphasized in the above-quoted passage and elsewhere that varying degrees of confidence can be attached to positive results, OSHA proposes to establish a three-tier system of classification for those toxic substances that are found in the American workplace. In general, as is more fully discussed below, Category I toxic substances are those whose carcinogenicity, as defined, has been determined in humans or in two or more mammalian species of test animals or in one species if the results of that study have been replicated. Category II toxic substances are those whose carcinogenicity has been reported but the evidence for some reason is only suggestive, as defined, or positive in one species, but not yet replicated. Category III toxic substances are those for which the evidence is inadequate to raise any concern regarding carcinogenicity or where the evidence consists of animal data in a single species that is less than suggestive. As pointed out, OSHA is also proposing a classification for those substances that might be classified as one of the 3 categories except for the fact that they are not found in American workplaces (Category IV toxic substances).

OSHA recognizes that there are other factors involved in carcinogenicity tests which affect the degree of confidence in the results (e.g., choice of strain, spontaneous tumor incidence, duration of experiment, survival, intensiveness and competence of pathological examination, etc.). In addition, OSHA may require detailed review of each experiment, including, where necessary, independent pathological diagnoses, before classifying each toxic substance. Comments on this aspect of the proposed classification scheme are specifically invited.

These principles appear to be closely aligned with past actions of FDA and EPA. For example, in *In Re Shell supra*, the Administrator of EPA stated:

Some witnesses also suggested that carcinogens can be species-specific—that is, a chemical substance might affect mice but not any other species, including man. This is

theoretically possible. But of the thousands of compounds tested the record indicates that this effect has been suggested for only one of them, and even this single exception has been seriously challenged. I therefore will rely on the conclusion of such organizations as the International Association for Research on Cancer, which have rejected species-specificity as unsubstantiated.

If carcinogens are not species-specific, it logically follows that the demonstration of carcinogenic effect in more than one species is not absolutely necessary for a finding of carcinogenicity.

This evidence of carcinogenicity [in the mouse] is supported by additional, although not definitive, evidence that Aldrin-Dieldrin has increased the incidence of tumors in rats. Dr. Upton, a recognized cancer expert, has testified:

In safety testing of carcinogens today we are concerned with one question: Does exposure to the test agent result in a significant induction of tumors in exposed populations as compared to controls? If so then the test agent has elicited a carcinogenic response and must therefore be considered potentially hazardous to human health. Whether the agent actually is a *sine qua non* of the observed response or merely enhances a virus or some other factor found in the host animal is irrelevant unless and until we know that similar factors are not also found in man. Until we have such knowledge, we have no basis on which to make distinctions between "carcinogens" and "co-carcinogens" and "causative agents" versus "enhancing agents".

Given this lack of knowledge concerning mechanisms, I believe that a carcinogenic reaction in any species of test animal must be considered sufficient to describe the test compound as a carcinogen and so a threat to human health. I consider that a similar reaction in a second mammalian species is a confirmation of the carcinogenicity of the test agent but it is not necessary before a finding of carcinogenicity and threat to human health can be made; and negative results in a second or even third species of test animal do not in my mind establish that the test agent is not a threat for human beings. Given the variation in human susceptibility to carcinogens, I believe it unreasonable to ignore a finding of carcinogenicity in any mammalian test species when considering possible effects on human health. (Emphasis added) (39 FR at 37269-70)

10. *Can "safe" or "no-effect" levels be set for exposure to chemical carcinogens?* Toxic effects, and biological effects in general, are assumed on the basis of much experience to occur above a certain "threshold" or "no-effect" level of exposure to the causative agent or agents. For many such effects, thresholds may theoretically occur for specific individuals as well as for defined populations at risk, even though thresholds for specific individuals may vary substantially within a population. The relationship between dose and response and knowledge of the underlying biological stages leading to the effect in question provide the basis for estimating such thresholds for defined populations. Safety factors are then applied to give additional assurance that the estimated threshold is not too high.

For many chemical carcinogens, identified either by means of studies in man or animals, a relationship between dose and response has been found to exist.

The nature of the relationship is generally for the response to increase with increasing dose, although in some carefully studied cases this relationship has been found either not to exist or to be opposite to that usually found (the response is greater at lower doses). In comparable test systems, chemical carcinogens can vary in the responses they elicit by as much as a factor of 10 (WHO Tech. Rept. 546, p. 11).

The incidence of tumors and the period of latency can be related to dose, and because any individual has a finite lifetime an individual threshold may exist by virtue of the fact that the latency of the disease may be so long that it exceeds the individual's lifetime. Also, in light of increasing evidence that cancer originates from a single cell a threshold may exist for the particular affected cell; however, a large number of factors—age, sex, nutritional status, and health, to name a few—can affect individual susceptibility, and there is a large number of types of cells that can give rise to cancer. Thus, there is no means of predicting an individual threshold, even if they do indeed exist.

It might be thought that on the basis of general experience with other toxic effects, no-effect levels for a defined population could be set for chemical carcinogens by means of extrapolation from observed dose-response relationships. However, the variation among individual susceptibilities to cancer is extremely large, making it very difficult to place any confidence in observed no-effect levels in animals or in defined human populations for which individual variations are small in comparison. Furthermore, the underlying biological events by which cancer is initiated and progresses are not well understood, and on the basis of what is known the existence of thresholds for chemical carcinogens has been questioned because of:

- (1) the self-replicating nature of the cancer cell.
- (2) . . . work . . . which has been interpreted to indicate summation of irreversible effects in carcinogenesis . . .
- (3) evidence from experiments on tumor initiation and promotion in skin carcinogenesis indicating lasting change induced by one tumor-initiating event.
- (4) the fact that cancer can occur in response to chemicals, even after single doses, long after their disappearance from the body.
- (5) the possibility that cancer may result from mutation in a somatic cell (that is, a cell that contains all the necessary genetic materials to life, as opposed to a germ or reproductive cell which contains only half the necessary genetic material. (WHO Tech. Rept. 546, pp. 9, 10)

The nature of the dose-response relationship and the existence of thresholds has been discussed by many expert committees and they are substantially in agreement that dose-response data cannot be used to set no-effect levels for exposure to chemical carcinogens. As early as 1959 the NRC Food Protection Committee stated:

. . . the possibility exists that doses at "no-effect levels" [observed in experimental studies] do in fact exert carcinogenic

effects but that the effects are too weak to detect with the numbers of animals feasible for routine testing. Such a possible effect, though extremely weak, might become evident in a large population such as, for example, the population potentially exposed to . . . [the substance].

The foregoing . . . supports the view that there is a level of exposure to a carcinogen below which cancer will not be induced in the exposed animal. The practical establishment of this threshold level is, however, complicated by a number of factors affecting, or related to, the carcinogenic process . . . (NRC, 1959, p. 15)

The Committee also stated:

Information obtainable from dose-response curves prepared from data obtained in animal experiments appears of limited practical use in evaluating carcinogenic hazard for man. The apparent lack of quantitative correspondence in the carcinogenicity of a substance for different mammalian species and the other complicating factors that have been discussed make meaningful extrapolation from the "no-effect" level on the dose-response curve to a "safe level" of use by man currently impossible. . . . (Ibid., pp. 31, 32)

This view was reiterated by the Joint FAO/WHO Expert Committee in 1961, the WHO Expert Committee in 1964, and in 1969 the Technical Panel on Carcinogenicity of the MRAK Commission, which stated:

The evaluation of carcinogenic hazards for man is based on a judgment of all available information: on bioassay, on toxicologic, metabolic, and pharmacologic studies, on the extent and route of exposure of man, and on epidemiologic studies The position of this Panel is that the different qualitative and quantitative response of various animal species, including man, to carcinogens make meaningful extrapolation from "no-effect" levels in dose-response studies in animals to man currently impossible (MRAK Commission Report, pp. 466, 467)

The FDA Panel discussed the quantitative methods available at that time for estimating a "virtually safe dose," particularly the methods proposed by Mantel and Bryan and by Druckrey (N. Mantel, "The concept of threshold in carcinogenesis," *Clin. Pharmacol. Therap.*, 4, 104-109 (1963); N. Mantel and W. R. Bryan, "Safety testing of carcinogenic agents," *J. Nat. Cancer Inst.*, 27, 455-470 (1961); H. Druckrey, "Quantitative aspects in chemical carcinogenesis," U.I.C.C. Monograph No. 7, "Potential Carcinogenic Hazards from Drugs," 60-77 (1967); H. Druckrey, R. Preussman, S. Ivankovic, D. Schmaehl, "Organotrope carcinogene Wirkungen bei 65 verschiedenen N-Nitroso-Verbindungen an BD-Ratten," *Z. Krebsforsch.* 69, 103-201 (1967). The Panel said:

. . . the only practicable basis for estimating a safe dose is by extrapolation downward from results obtained at some level well above the actual use level. But this extrapolation introduces serious uncertainties, which must be recognized if rational methods of safety evaluations are to be developed. The basic problem is that extrapolation outside the range of observation must be based on generally unverifiable assumptions about the mathematical nature of the dose-response relationship near zero dosage (FDA Panel Report, p. 432)

And the Panel concluded:

Although it is possible in principle to estimate "safe" levels of a carcinogen, uncertainties involved in downward extrapolation from test levels will usually result in permissible levels that are the practical equivalent of zero. (Ibid., p. 435)

One committee that has been interpreted as differing to an extent on this point from others is the NRC Food Protection Committee of 1969 and 1970. The Committee stated with respect to the evaluation of carcinogenic hazards:

Although there are probably noncarcinogenic dosage levels for an experimental species in which a given compound is carcinogenic, there is as yet no generally accepted way of quantitatively extrapolating dose-response data in predicting a noncarcinogenic level for man. This fact is the principal basis for urging that such compounds be permitted for use in foods only if an explicit judgment has been made that demonstrable benefit greatly exceeds the risk. (NRC, 1970, pp. 47, 48)

Despite this situation with respect to cancer, the Committee introduced criteria for toxicologically insignificant levels of exposure to apply generally to substances found in the diet. The Committee stated that:

[t]o provide optimum assurance of public safety within the limitations of capabilities available, toxicological facilities for evaluating safety must be concentrated on environmental situations in which there is a reasonable expectation that exposure to chemicals may cause real hazards. The definition of a "toxicologically insignificant" level simply as one well below an established safe level is too indefinite and too limiting to be of practical value, since it requires in every case the establishment of a safe level by experiment. To insist that nothing can be assumed to be safe without direct experimental toxicological evidence implies that safety must be proved experimentally before the proof of safety can be considered unnecessary. This denies the value of establishing criteria for insignificance. Thus, there is urgent need to arrive at more specific guidelines for estimating dietary levels that can be considered toxicologically insignificant. (NRC, 1970, p. 51)

However, the Ad Hoc Surgeon General's Committee discounted the application of this concept to evaluations of carcinogenic risks. The scientific blue-ribbon Committee recommended to the Surgeon General that:

2. No level of exposure to a chemical carcinogen should be considered toxicologically insignificant for man. For carcinogenic agents a "safe level for man" cannot be established by application of our present knowledge. (NCI, 1970, p. 1)

In addition, the Committee recommended that:

3. The statement made in 1969 by the Food Protection Committee . . . that natural or synthetic substances can be considered safe without undergoing biological assay should be recognized as scientifically unacceptable

The Committee further stated:

It is impossible to establish any absolutely safe level of exposure to a carcinogen for man. The concept of "toxicologically insignificant" levels (as advanced by the Food Protection Committee of the NAS/NRC

in 1969; see Appendix II), of dubious merit in any life science, has absolutely no validity in the field of carcinogenesis. (P. 7)

Thus, once a qualitative presumption of carcinogenicity has been established for a substance, any exposure to the substance must be considered to be attended by risk when considering any given population. No exception to this point has yet been demonstrated. OSHA proposes to adopt this principle to establish qualitatively the existence of risk posed by exposure to carcinogens, and hence to justify the classification of substances shown to be carcinogenic in animals at Category I or Category II toxic substances as proposed in the rulemaking. OSHA does, however, recognize that obviously not all individuals contract cancer because of exposure to a carcinogen. Thus, it appears that there may be individual effect levels. However, we have attempted to point out, we do not know who in any exposed population is susceptible and at what levels.

The regulatory decision to treat a carcinogen as having no "safe" or "no-effect" levels is supported by logic and decisions made by OSHA and other regulatory agencies.

First, as pointed out, is our inability, at present, to determine whether humans are more or less sensitive than the test animal in question. In the case of thalidomide, admittedly not a carcinogen but a teratogen, human were 60 times more sensitive than mice, 100 times more sensitive than rats, 200 times more sensitive than dogs and 700 times more sensitive than hamsters. In the case of inorganic arsenic, a known human carcinogen, no positive results have been reported in any mammalian test animal, including the mouse and rat, although negative results have been. And in the case of beta-naphthylamine, a known bladder carcinogen in man, monkeys and dogs, negative reports have been reported in rats and rabbits. Hence, today it does not appear feasible to predict a quantitative finite "safe" level for a carcinogen to an individual human, let alone for a population, comprised as we are of aggregates of genetically heterogeneous individuals with widely varying predispositions and susceptibilities.

Second, other bodies and regulatory agencies have taken the same position in the past, in addition to OSHA. In 1958, Congress expressed its policy by enacting the "Delaney Clause" which, in general, imposes a zero tolerance for carcinogenic food additives. The clause states:

. . . no additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal, or if it is found after tests which are appropriate for the evaluation of the safety of food additives, to induce cancer in man or animals

These conclusion were further emphasized, as pointed out, by the expert committee of the World Health Organization in 1961:

. . . It is agreed that no assuredly safe level for carcinogens in human food can be determined from experimental findings at the present time. (P. 5)

In 1960, Secretary Arthur Flemming of the Department of Health, Education, and Welfare testified at the Hearings on Color Additives, Committee on Interstate and Foreign Commerce, House of Representatives that:

Scientifically, there is no way to determine a safe level for a substance known to produce cancer in animals.

This scientific principle was re-affirmed over fourteen years later by Secretary Caspar Weinberger of the same Department, in a letter dated June 14, 1974 to the Congress objecting to proposed legislation amending the "anti-cancer" or Delaney clause of the Food, Drug and Cosmetics Act. He said:

At present the Department of Health, Education and Welfare lacks the Scientific information necessary to establish no-effect levels for carcinogenic substances in animals in general and in man in particular. In the absence of such information, we do not believe that detectable residues of carcinogenic animal drugs should be allowed in the food supply.

. . . It may someday be possible for the Department to establish levels at which residues of carcinogens can safely be tolerated in human food without risk of cancer to humans. Until the necessary scientific data base exists to establish such levels, however, we oppose enactment of legislation such as H.R. 922 or H.R. 1171 to amend or even repeal one or all of the anticancer clauses of the Act. Enactment of such legislation would have no effect on current Department policies since, under the present state of scientific knowledge, the general safety provisions of the Act would not permit this Department to allow detectable residues of carcinogenic animal drugs in human food.

And finally, in the revised NIOSH Arsenic Criteria Document (1975), the Director of NIOSH also stated:

. . . It is not possible at present to determine a safe exposure level for carcinogens. (p. iv)

The proposal therefore makes clear, as pointed out below, that in regulating a toxic substance that meets the criteria of a Category I toxic substance, the level of exposure set by the standard is not a "healthful", "safe", or "no-effect" level but a feasibility level. The proposal further provides that the Secretary shall determine what levels of employee exposure can feasibly be met.

11. *Quantification.* While OSHA is of the view that "threshold" or "no-effect" levels cannot be set for chemical carcinogens, some have said that it may be desirable to attempt to quantify risk for the purpose of evaluating the expense and level of control considered feasible in view of the risk posed by any given substance. However, because of the previous discussion, it appears that such consideration should apply, if at all, only at the point of considering the feasibility of the regulatory provisions of any given standard—not the risk as determined pursuant to this proposed regulatory framework. Work by Mantel and co-workers (N. Mantel, N. Bohidar, C. Brown, J. Ciminera, and J. Tukey, "An Improved 'Mantel-Bryan' Procedure for 'Safety' Testing of Carcinogens," *Cancer*

Res., 35, 865-872 (1975) and by N. Mantel and M. Schneiderman, "Estimating 'safe' Levels, a Hazardous Undertaking," *Cancer Res.*, 35, 1379-1386 (1975) highlight the need to be cautious in estimating the nature of the dose-response relationship for chemical carcinogens. More recent work by Crump *et al.* (K. Crump, D. Hoel, C. Langley, and R. Peto, "Fundamental Carcinogenic Processes and Their Implications for Low Dose Risk Assessment," *Cancer Res.*, 36, 2973-2979 (1976)) indicates that on the basis of increasing evidence that exposure to carcinogens is additive and that since a large number of carcinogenic substances are known to be present in the environment at low levels, any low dose exposure can be seen as affecting an ongoing process in which progressive stages are shared by chemical carcinogens in general. Thus a mathematical model that incorporates a number of very different biological models of cancer causation shows that the response in terms of the number of individuals at risk within a population will be linear with dose. With respect to the method employed by Mantel to predict risk at low doses the authors state:

. . . [It] may be valid for a few very special 'indirect' carcinogenic processes, but our arguments suggest that in general it is not correct (Crump, *et al.*, p. 2978)

and the authors recommend that:

. . . linear dose-response relationships are likely to be approximately correct for many environmental carcinogens, and this should be publicly agreed for such substances, as it was for radiation 20 years ago. (Ibid., p. 2979)

OSHA invites comments on whether such an estimation should be attempted and, if so, the methods to be employed for a quantitative estimation of risk to be used in the rulemaking process triggered by classification of a toxic substance as a Category I toxic substance. Such a classification will establish required control techniques and also require that permissible levels of exposure be reduced to as low as feasible.

C. SHORT-TERM OR IN VITRO TESTS FOR CARCINOGENS

OSHA is aware that short term and *in vitro* tests for carcinogens are being developed rapidly, take a few weeks at most to complete and yet examine the capacity of a substance to cause mutagenicity, other genetic alterations or neoplastic transformation. Reliance upon the short-term mutagenic tests is based upon the assumption that cancer can be related to genetic alterations and that, therefore, detection of such changes is indicative that such a substance may have carcinogenic potential. Mutagenesis tests are very useful as screening tests because they can be conducted quickly and inexpensively. In addition, short term tests have been developed to test the ability of a substance to induce neoplastic transformation of cells that are cultured *in vitro*.

Short term tests use a variety of biological systems, such as bacteria yeast and mammalian cells. These methods are in various stages of development and

some of these methods have been more extensively utilized than other ones. To date, the most widely used method appears to be the Salmonella, or Ames, test. This method utilizes several specially constructed strains of Salmonella bacteria to detect mutagenic changes. Rat (or human) liver extracts are used to activate the mutagenic form of the substance being tested. However, although the correlation between positive short term test and animal carcinogenicity may be good, the number of validation studies is still small. Therefore, OSHA agrees with the following judgment as to these tests, at the time, set further in the NCAB report:

A major practical limitation in the bioassay of potential carcinogens is the large number of test animals and the long duration required to obtain results. A number of short-term or *in vitro* tests are currently under development and appear promising. These include assays for: the induction of DNA damage and repair; mutagenesis in bacteria, yeast, *Drosophila melanogaster*, or in mammalian somatic cell cultures; and neoplastic transformation of mammalian cells in culture. Other assays that have been employed include the dominant lethal test and studies of chromosomal damage. The latter two tests suffer from the fact that they are frequently non-specific and/or difficult to quantify. Of the various short-term tests, the Ames Salmonella mutagenesis system has been studied the most extensively. Tests based on other *in vitro* approaches are also being developed.

The intelligent application and interpretation of the *in vitro* tests must also take into account species variations in factors related to the pharmacologic distribution and metabolism of the parent compound as well as possible species differences in macromolecular repair and host defense mechanisms. A number of approaches addressed to the metabolic aspects are now available, including "host-mediated" mutagenesis assays; the assay of urine and other biologic fluids taken from animals or humans receiving the test compound; the addition of microsomal enzymes and co-factors to the assay system; and the inclusion of specific cells in the assay.

At present, none of the short-time tests can be used to establish whether a compound will or will not be carcinogenic. Positive results obtained in these systems suggest extensive testing of the agent in long-term animal bioassays, particularly if there are other reasons for testing. Negative results in a short-term test, however, do not establish the safety of the agent.

This Subcommittee is enthusiastic about the possible future use of *in vitro* tests as part of a screening system for potential carcinogens and believes that their further development and validation deserve high priority.

Thus, while these short-term tests appear very promising for the identification of carcinogens, OSHA does not regard them as sufficiently well developed for use as a sole basis for identification of carcinogenic potential. However, OSHA does believe that it is appropriate to give serious regard to a combination of positive results when found both in adequate short-term tests and in experimental animal models. In particular OSHA proposes that the combination of positive results in short-term tests and a positive result for carcinogenesis in a single bi-

oassay in a mammalian test species would provide sufficient evidence for classifying a substance as a Category I toxic material. In this regard, FDA, in banning chloroform stated:

Regarding the reported findings of Uehleke in the "Ames study," which use a bacterial system, the Commissioner recognizes that rapid progress is being made in the development of mutagenicity test systems. He is aware of a number of reports indicating a mutagenicity carcinogenicity correlation using these test systems. However, a number of "false positives" as well as "false negatives" have been observed in these test systems. Such tests using nonmammalian systems have not been validated for establishing correlations and are not considered an appropriate basis for regulatory actions. (41 FR 26842)

D. MOLECULAR STRUCTURE OR SIMILARITY

Whether chemical similarities between known carcinogens and other untested substances should be used to qualitatively predict the carcinogenic effects of those untested substances, as a matter of regulation, rather than of research, has been debated in recent time.

OSHA is aware that, for many years, priorities for scientific research in testing individual substances for carcinogenic activity have sometimes been set, to a certain extent, by the structural similarity of those substances to be tested to the structural similarities of other substances that have been tested and found positive for carcinogenic activity. This concept has often been referred to as the "structure/function" theory. Many have recognized the distinction between using a structural similarity to predict carcinogenic activity of an untested substance as a basis for setting priorities when actually testing substances on the one hand and using such structural similarity to regulate untested substances that may have a great deal of structural similarity to substances that have been tested and found positive on the other hand. OSHA agrees, at this time, with the Ad Hoc NCI Committee's Report to the Surgeon General that:

The carcinogenic activity of materials can only be detected by long-term biological tests. At the present time the chemical structure or physico-chemical properties of a compound do not provide a reliable basis for prediction of freedom from carcinogenic activity. Several structure-activity correlations are valuable indicators of the possible carcinogenicity of a compound, but none can be used to classify the compound as non-carcinogenic. Short-term bioassays that determine the effect of certain chemicals on selected biologic targets have not been reliable for prediction of carcinogenic activity. (Pp. 5-6)

Chemicals of many classes and vastly different structures have produced cancer of virtually all organ sites in experimental animals. For some of these chemicals, there are data showing cancer induction in man. OSHA is not aware of any single molecular configuration, structural characteristic, or physical property of chemical carcinogens that can be pinpointed as the crucial cancer inducing element or site. One explanation may be that a substance may be

metabolized to a different form when exposed to the test model or man and that metabolite be the carcinogen, rather than the substance itself. However, gross similarities in chemical reactivity and metabolic fate in the host can be identified for many chemical carcinogens. This followed the discovery by the Millers that metabolic conversion of environmental chemical carcinogens can occur in the host with the ultimate formation of the "proximate" or "active" form of the chemical carcinogen.

The history of attempts to identify structure activity correlations useful for the prediction of carcinogenic capability on the basis of chemical structure is as old as the scientific study of carcinogenesis. Cook, Kennaway, and their co-workers² in 1932 were the first to isolate and characterize the carcinogenic polycyclic aromatic hydrocarbons (PAH) in soot. They were unable to identify any unique distinction between carcinogenic and noncarcinogenic PAH. Years later a major step forward in the knowledge of the metabolism of PAH was achieved in 1964 by Boyland and Sims,³ who demonstrated the formation of epoxidic metabolites of carcinogenic PAH. They, too, were unable to identify the locus responsible for carcinogenic properties. The epochal observation of the Millers⁴ in 1968 that all chemical carcinogens that are not themselves chemically reactive must be converted metabolically into a reactive form, and that this reactive form is an electrophilic reagent, provides some hope that a unifying thread for carcinogenesis exists and may someday be found.

The limitations in our current knowledge of carcinogen metabolism which fail to provide a basis for prediction are reinforced, however, by several other categories of data which further cast doubt that structure/activity correlations are a useful tool for regulatory purposes at the present time. These include variations within major classes of chemicals, such as PAH, aromatic amines and amides, and chlorinated hydrocarbons.

In addition, it appears that single substituents can markedly affect carcinogenic potential. As shown by the Millers in 1961, the substitution of a fluorine atom in the 6 position of the K region of 7 methyl-BA had little effect on carcinogenicity, while a fluorine substitution in the 5 position appears to have completely obliterated the carcinogenicity of this compound. The literature on chemical carcinogenesis is replete with myriad instances where a single atom or molecule substituent markedly affects carcinogenic potential.

Finally, it appears that isomers of carcinogenic chemicals may frequently exhibit non-carcinogenic effects. Stearic properties of chemical compounds ap-

pear to be of major importance in the ultimate carcinogenic potency of the compound. Non-carcinogenic isomers of chemical carcinogens are common, as for example perylene (non-carcinogenic) and benzo-a-pyrene (carcinogenic). An array of non-carcinogenic isomers exist for the carcinogenic aromatic amine 3'DAB.

That someday structure/activity correlations would be of predictive value for regulation is something that all would appear to hope for. However, in addition to the obstacles listed above, there are the compounding factors of dose dependent variations in metabolic fate, species differences in anatomic and metabolic fate, and the influence of related compounds (summation, synergism or inhibition) upon chemical carcinogens when present simultaneously either in the environment or in the host. Thus, at least at this time, OSHA does not propose to rely upon structural similarities between known carcinogens and other substances to regulate those other toxic substances as carcinogens. Public comment as to this specific part of the proposal is invited. In that regard, such comment may also address whether implementation of the Toxic Substances Control Act might in effect, "moot" this problem by requiring testing based on such molecular or structural similarities.

III. CLASSIFICATION AND REGULATION: THE PROPOSAL

The previous discussions have set forth the necessity of and the rationale for OSHA's proposal to identify, classify and regulate potential occupational carcinogens. It is not intended to duplicate those discussions here. The following sections attempt to explain: (1) the procedural mechanisms which will be utilized to accomplish these goals and (2) the additional rationale and policy considerations, not been already discussed above, regarding the specific requirements that will be mandated by the three individual model standards that are part of these proposed regulations.

The individual model standards include an emergency temporary standard (ETS) to be issued, in general, if the toxic substance meets the criteria for a Category I toxic substance; a proposed permanent standard for such a Category I toxic substance; and a proposed permanent standard for those toxic substances that meet only the criteria for a Category II toxic substance, as defined. The three proposed model standards incorporate OSHA's views concerning which protective provisions are generally the most appropriate to permanently protect employees against exposure to Category I and Category II toxic substances, as defined, and, in the model emergency temporary standard, which protective provisions should be instituted immediately. As a result of this rule-making, OSHA will promulgate, in final form, models for an emergency temporary standard and for permanent standards for Category I and Category II toxic substances. Except where the unique properties of such a substance

warrant departure from any given provision, the model ETS will be issued as the actual ETS when a substance is classified as a Category I toxic substance. Similarly, the model Category I and Category II permanent standards will be issued as the proposal in the subsequent section 6(b) proceedings except where unique properties of the substance under consideration warrant departure from any given provisions. It is OSHA's intention that apart from the unique substance-specific aspects of these standards, the appropriateness of the model permanent standards, resolved in this proceeding, will not be at issue in the subsequent rulemaking proceedings. Once promulgated in this rulemaking therefore, these proposed procedures, identification and classification criteria, and the provisions of the model standards will be consistently applied in future regulatory activity. Of course, the Secretary's decision in the particular final standard will reflect the adequacy of the evidence in the rulemaking record in support of any such deviation, addition or change from the model standard.

This regulatory framework permits OSHA to retain the flexibility necessary for regulating substances of differing toxicological properties while speeding the process of standards development in the important area of control of exposures to potential or proven cancer causing substances.

This proposed set of regulations also provides for a third and fourth category of toxic substances. The third category of toxic substances (Category III), includes those toxic substances for which OSHA had determined that the evidence is insufficient to warrant taking regulatory action insofar as carcinogenicity is concerned. In other words, the proposal requires that OSHA, as a responsible public agency, will affirmatively review the evidence, concerning any substance that meets the definition of a toxic substance, seek public comment and then classify these substances as Category III toxic substances, if warranted. In addition, this action will notify the public, industry and labor of OSHA's position so that attention can be drawn to the important task of reducing employee exposures to those other substances that are or have been identified as Category I or Category II toxic substances.

Finally, the fourth category of toxic substances (Category IV) includes those substances that might meet the definition of a toxic substance except that they are not found in American workplaces. OSHA intends to list these substances in the FEDERAL REGISTER and the Code of Federal Regulations for the convenience of the concerned public. However, OSHA does not intend to review the evidence concerning carcinogenicity at that time. And, as pointed out below, OSHA intends to enter into an agreement with EPA with respect to implementation of the Toxic Substances Control Act so that when or if such substances are permitted to be introduced into the American workplace, OSHA will have ample time to develop a standard regulating expo-

sure to the substance as is warranted by the proposed regulatory program herein.

A. GENERAL

Section 190.102 sets forth the general definitions for both a "toxic substance" and a "potential occupational carcinogen". OSHA is aware of the difficulties that experts have had in reaching a scientific consensus as to the precise definition of a carcinogen. However, as pointed out above, the definitions herein are viewed, for the purposes of regulation, as reflecting policy decisions, and not solely as decisions of science.

The definition of a toxic substance is intended to include any scientific report of carcinogenicity as pointed out below, and merely meeting the definition would not require by itself that the Secretary initiate standard setting activity. In other words, the term "toxic substance" is intentionally defined to include more substances than the definition of a "potential occupational carcinogen", i.e. any information that is "reported" to meet the definition of a potential occupational carcinogen is sufficient to categorize that substance as a toxic substance. The purpose of this preliminary designation as a toxic substance is to require the Secretary to affirmatively classify the substance, after receiving public comment and reviewing the available information. As described below, the classification category would either require the initiation of standard setting activity or an announcement that the evidence appears insufficient to require regulation of the substance as posing a carcinogenic risk to man.

For purposes of this regulation, a toxic substance will be classified qualitatively as a "potential occupational carcinogen" if it has been found in the American workplace and OSHA believes that it has been shown: (a) to cause, at any level of exposure or dose, as the result of any oral, respiratory or dermal exposure, or any other exposure which results in systemic distribution of the substance under consideration, in the organism tested, an increased incidence of malignant or benign neoplasms, or a combination thereof, in any experimental mammalian species or in humans, or, (b) in a statistically significant manner decreases the latency period between exposure and onset of neoplasm formation in any experimental mammalian species or in humans. In addition, the definition is intended to cover leukemogens and particulate substances such as asbestos. However, it is not intended *per se* to include non-systemic substances which are reported to cause injection site sarcomas.

OSHA is of the impression that a certain number of the "suspect carcinogens" reported by NIOSH are not found in American workplaces. Naturally, therefore, no standard for such a substance will be required and no classification will be made for such substances at this time. Thus, the definition of a "foreign toxic substance" has been provided to set out the parameters for Category IV toxic substances. As pointed out,

OSHA intends to initiate with EPA discussions leading to an agreement so that information submitted to EPA under the Toxic Substances Control Act concerning these substances, when and if the substance is introduced into American workplaces, will be reported to OSHA without requiring duplicative reporting on the part of the public. Public comment on this specific aspect of this proposal is invited.

Section 190.103 permits "any interested person" to notify the Secretary, or designee, in writing, of the existence of information concerning any toxic substance. The Secretary shall publish a notice of receipt of this information in the FEDERAL REGISTER, together with a short statement identifying the contents and source of such information. Where relevant data is presently being generated but which is then unavailable to the Secretary, he may delay the publication of the receipt of the information up to, but no longer than, 180 days. In most cases a comment period of at least thirty (30) days but no longer than sixty (60) days shall be provided. However, where the Secretary finds that extraordinary circumstances warrant less or no time for comment, he may issue an ETS without such an opportunity for any comments. After the comment period, the Secretary of required to classify within thirty (30) days the toxic substance into one of three possible categories (discussed further below) and publish in the FEDERAL REGISTER a notice and an explanation of his decision.

While § 190.103 enables any interested party to present information to the Secretary for the classification of any toxic substance, as defined, it does not preclude OSHA from devising its own system for the orderly, systematic classification of the large number of potential carcinogens already identified by NIOSH. In fact, OSHA recognizes the backlog of substances that will confront it at the outset of a regulatory program such as proposed. OSHA therefore intends to develop a separate schedule, if such is warranted, even while implementing this proposal as to other toxic substances, to permit the orderly handling of the hundreds of compounds with allegedly some degree of evidence of tumorigenicity or carcinogenicity, as identified by NIOSH. For example, where the evidence is sufficient to classify a toxic substance on the NIOSH list as a Category I toxic substance but where the evidence is not relatively recent, one option available to OSHA in implementing this separate schedule might be to commence the regulatory process by a notice of proposed rulemaking pursuant to § 190.160 herein and section 6(b) of the Act, rather than by the issuance of an ETS pursuant to § 190.150 herein and section 6(c) of the Act. Another option would be to decide how many years should be taken to handle the NIOSH list, such as 3 years, and then take the NIOSH identified substances on an alphabetical basis. OSHA solicits public comment as to the best way to imple-

I

ment these regulations insofar as those substances identified as "suspect carcinogens" by NIOSH are concerned.

Sections 1990.110, 1990.120, and 1990.130 define three categories for the classification of toxic substances, namely: Category I toxic substances, Category II toxic substances, and Category III toxic substances. The classification is determined by the kind and degree of evidence indicating that a substance may, or may not, pose a carcinogenic risk to workers and thereafter governs the type of responsive protective action which OSHA will appropriately take. In addition, and notwithstanding the other provisions of these proposed regulations, section 1990.140 provides for Category IV toxic substances, namely, those foreign toxic substances, as defined, for which no standards will be issued during the duration of that classification.

1. *Category I Toxic Substances.* Section 1990.110 establishes a presumption that a substance shall be classified by the Secretary as a "Category I Toxic Substance" if the evidence concerning such substance meets the definition of a potential occupational carcinogen and the evidence was developed: (a) in humans; (b) in two mammalian test species; (c) in a single mammalian species, if those results have been replicated in the same species in another experiment or supported by short-term tests, as defined; or (d) upon the basis of any other scientific evidence that the Secretary finds sufficient. A result is considered to have been replicated if a similar significant increase in tumor incidence is induced in the same or different strain of the particular species so long as the experiments were carried out independently (i.e. at the least, with independent sets of control animals). If the evidence satisfies any of these criteria, the presumption exists that the Secretary shall classify the substance as a "Category I Toxic Substance."

The basis for these criteria initiating a Category I classification are predicated upon the discussions above and here. First, despite the inherent limitations of epidemiological studies in humans, where such studies indicate positive results, even where there is a small cohort of workers, OSHA believes that exposure to such a substance gives rise to great concern. Thus, the proposed set of regulations provides that such evidence in humans at least presumptively initiates a Category I classification, unless the evidence is "only suggestive" in which case the evidence initiates the Category II classification. It is only where the human evidence is "totally inadequate" that OSHA will classify the toxic substance as a Category III toxic substance. OSHA believes that responsible public regulation in matters concerning human health requires no less action or caution.

Second, as pointed out above, OSHA intends to qualitatively treat a toxic substance that produces cancer in at least two species of test animals as posing a potential carcinogenic risk to humans. This is so because positive results in at least two species of test animals gen-

erally replicate the results of each test and thus gives rise to a higher degree of confidence in those results than might exist in the case of results arising from a single unreplicated study, so long as the grounds for rebutting the presumption are not found appropriate, as discussed below. The risk of cancer is "sensitive and fright-laden" (*EDF v. EPA*, 465 F.2d 528, 538 (1972)). Although the Delaney Clause is not applicable to the statutory mandate of the Act, it has been stated that it:

... does, however, indicate the magnitude of Congressional concern about the hazards created by carcinogenic chemicals, and places a heavy burden on any administrative officer to explain the basis for his decision to permit the continued use of a chemical known to produce cancer in experimental animals. *EDF v. Ruckelshaus*, 439 F.2d 543 at 596, n. 41.

Third, OSHA recognizes that the results from a single study in a single species can be in error. OSHA therefore believes that before it regulates a toxic substance as a Category I toxic substance, that positive animal test results be replicated either by similar results in another species, as pointed out above, a replicated study in the same animal species or supported by short-term tests, as defined. Insofar as the validity of short-term testing is concerned, at the present time OSHA relies upon the National Cancer Advisory Board of NCI, and the discussion above. It should be noted that reliance upon replicated experiments in a single species of test animals is not new and has been accepted by other Federal agencies. FDA, in banning chloroform, as discussed above, relied almost exclusively on mouse data. And, in his aldrin and dieldrin suspension decision, EPA Administrator Russell E. Train stated:

Some witnesses also suggested that carcinogens can be species-specific—that is, a chemical substance might affect mice but not any other species, including man. This is theoretically possible. But of the thousands of compounds tested, the record indicates that this effect has been suggested for only one of them, and even this single exception has been seriously challenged. I therefore will rely on the conclusion of such organizations as the International Association for Research on Cancer, which have rejected species-specificity as unsubstantiated.

If carcinogens are not species-specific, it logically follows that the demonstration of carcinogenic effect in more than one species is not absolutely necessary for a finding of carcinogenicity.¹

Most carcinogens are also not organ-specific. In a survey by Dr. Thomatis of 58 compounds known to produce liver tumors in mice, 40 also induced tumors in a variety of other organs. Furthermore, chemically-induced tumors in one species need not appear in the same organ in another species. Thus, a carcinogen which induces liver tumors in mice might, for example, produce mammary cancers in rats and lung tumors in men.

¹ An HEW Advisory Panel has recommended that a finding of carcinogenicity be made when a substance is "judged positive for tumor induction in one or more species * * *." (*EPA Ex. 40F*, p. 468)

And, in that same proceeding, Dr. Arthur C. Upton, then Dean of the School of Basic Health Sciences at the State University of New York at Stony Brook, New York and now Director of the National Cancer Institute, testified:

Given this lack of knowledge concerning mechanisms, I believe that a carcinogenic reaction in any species of test animal must be considered sufficient to describe the test compound as a carcinogen and so a threat to human health. I consider that a similar reaction in a second mammalian species is a confirmation of the carcinogenicity of the test agent but it is not necessary before a finding of carcinogenicity and threat to human health can be made; any negative results in a second or even third species of test animal do not in my mind establish that the test agent is not a threat for human beings. Given the variation in human susceptibility to carcinogens, I believe it unreasonable to ignore a finding of carcinogenicity in any mammalian test species when considering possible effects on human health. (*EPA Ex. S-19* at pp. 4-5)

Likewise, three other eminent scientists testified to the same effect in that same proceeding. Doctor Melvin D. Reuber, then Associate Professor of Pathology at the University of Maryland School of Medicine and formerly a staff pathologist at NCI, testified:

Sufficient documentation is available on qualitative extrapolation of animal data that one must conclude that a finding of carcinogenicity in one mammalian species should be deemed to have relevance for other mammalian species—including man. (*EPA Ex. 42*, p. 47)

A similar conclusion was drawn by Dr. Walter E. Heston, then Chief of the Laboratory of Biology at NCI, a position that he had held since 1961. Dr. Heston testified:

If a chemical causes a neoplastic change in the liver of a mouse or rat, we would expect that through a comparable mechanism it could cause a neoplastic change in the liver of man if given in adequate doses to genetically susceptible individuals. If an agent causes the neoplastic transformation in cells of any organ of the mouse, one would expect that in some human beings, cells either in the same organ or possibly in some other organ that were exposed to the same agent would also become neoplastic. (*EPA Ex. 46*, p. 9; see also *EPA Ex. S-11*, p. 7)

Moreover, Dr. Heston further testified:

Knowing this, and knowing the general biological similarity of mice and other mammalian species, including man, we can reasonably expect that in a population of human beings exposed to Aldrin-Dieldrin, cancer of some kind will occur in some individuals, and these individuals will not have been afflicted in the absence of these compounds * * *. The human population is so much more genetically diverse than any laboratory animals, that if a chemical has been shown to be carcinogenic by a significant induction in any laboratory strain of mammal, we can reasonably expect that at least certain human beings would also respond to the chemical by developing some kind of neoplasm. (*EPA ex. S-11*, 5-7)

And, finally, as unequivocal as the testimony of Dr. Upton was the testimony of Dr. Emmanuel Farber, then Professor of Pathology and Biochemistry and Director of the Fels Research Institute of the

Temple University School of Medicine, Philadelphia, who testified:

* * * any compound shown clearly to be a carcinogen in any animal species, especially a mammal, must be considered as a possible or even probable carcinogen for man. (*EPA Ex. 45*, p. 4)

Finally, the proposed set of regulations for any other evidence to initiate a Category I classification, if the Secretary so determines. This basis is meant to include evidence, for example, of those substances that might possess a unique property, e.g., a substance that generates nonstatistically significant but extremely rare or unusual tumors, such as brain tumors, that might not otherwise, standing alone, meet the other criteria for a Category I classification. This might also include evidence from a single, exceptionally well conducted, test in one animal species, as well.

Section 1990.111 sets forth the circumstances under which the Secretary determines that the evidence rebuts the presumption of a Category I classification. This section is one of the key sections of this proposed set of regulations. The Secretary may find that a Category I classification of a substance is not warranted if he scientifically determines on the basis of the evidence: (a) that the alleged carcinogenic effect based on animal data clearly resulted from non-specific physical, rather than chemical induction; (b) that the route of exposure was grossly inappropriate relative to the potential occupational routes of human exposure; (c) that the animal or human studies submitted for review were only suggestive; (d) that the human or animal studies are totally inadequate to establish any conclusion with respect to the carcinogenicity or noncarcinogenicity of the toxic substances; or (e) that for some other scientific reason, the positive results in experimental mammals are not relevant to man. Any such determination by the Secretary shall be after consultation with the Director of NIOSH and published in the *FEDERAL REGISTER*. In the event that the Secretary finds that a Category I classification has been rebutted, he shall classify the substance as either a Category II or III toxic substance.

The first two bases for rebutting the presumption of a Category I classification reflect the advice of the Ad Hoc Committee to the Surgeon General in 1970, as cited above. There, the Committee stated:

1. a. Any substance which is shown conclusively to cause tumors in animals should be considered carcinogenic and therefore a potential cancer hazard for man. Exceptions should be considered only where the carcinogenic effect is clearly shown to result from physical, rather than chemical, induction, or where the route of administration is shown to be grossly inappropriate in terms of conceivable human exposure. (p. 1)

The third basis for rebutting the presumption that a toxic substance should be classified as a Category I toxic substance has been provided because OSHA believes that some suggestive evidence of

carcinogenicity, where perhaps not conclusive and therefore not sufficient to support a full blown regulation of the substance as a carcinogen, raises, nevertheless, a yellow flag of caution. OSHA believes in such a case that responsible public policy dictates that some regulation of the toxic substance should occur even if the evidence is "only suggestive" of carcinogenicity. Therefore, provisions such as medical surveillance of employees, exposure monitoring, and the other requirements of the model standard found in section 1990.160 are considered appropriate. However, as pointed out below, OSHA recognizes that in general, the most cost intensive items found in the Category I model standard are the requirements that the permissible exposure limits be set as low as feasible and be achieved by way of equipment or work practice controls. Thus, because of the lower qualitative and quantitative evidence required for a Category II classification, OSHA has not required that permissible exposure limits be reduced to as low as feasible, as in the case of a Category I toxic substance.

The fourth rebuttal criterion is implicit in the Ad Hoc Surgeon General's Committee's Report, namely that if the studies are scientifically totally inadequate, for example in methodology or conduct, then OSHA will not rely upon such studies at all.

Finally, because of possible legal necessity or the needed flexibility in the field of scientific research, the proposed set of regulations provides that OSHA will rebut the presumption of a Category I classification if it can be shown that "for some other" scientific reason, the results in experimental animals "are not scientifically relevant to man." OSHA is reluctant to add this fifth option, for OSHA does not intend to reopen discussion and litigation on the scientific issues foreclosed by these regulations, such as whether a tumorogen should be regulated as a carcinogen. OSHA specifically invites public comment on this issue and its scientific and legal necessity and relevance.

Section 1990.112 sets forth the regulatory consequences of a Category I classification, which include, among other things, the issuance of an emergency temporary standard, in accordance with section 6(c) of the Act, and a proposed permanent standard, in accordance with section 6(b) of the Act. The permissible exposure limits in both model standards must be set as low as feasible. The model permanent standard also provides that when it is determined by the Secretary that there are suitable substitutes for certain uses or classes of uses that are less hazardous to humans, on the basis of the best available evidence, the proposal shall permit no occupational exposure. These requirements concerning the setting of permissible exposure limits, namely, as low as feasible, is one of those requirements that may not be deviated from in the standard setting process in the subsequent rulemakings.

Section 1990.113 provides for a public hearing pursuant to section 6(b) of the

Act, if requested or upon the Secretary's own initiative. In addition, § 1990.113 describes the issues to which the scope of such a hearing is limited. They are: (1) whether the Secretary correctly classified the toxic material as a Category I Toxic Substance; (2) whether the Secretary was correct in the determination that the Category I classification should not be rebutted; (3) whether the Secretary correctly determined the lowest feasible occupational exposure, and whether there are suitable substitutes that are less hazardous to humans; (4) whether the toxic substance has unique properties or uses that make any of the specific protective measures of the model standard inappropriate or infeasible; and (5) the environmental impact arising from regulation of the toxic substance.

Section 1990.114 provides that at the conclusion of the rulemaking as to the specific substance, the Secretary has three options. First, if he determines, based on the record, that he was correct in his initial classification of the toxic substance as Category I, he is required to issue a standard that shall follow the content and format of the model standard set forth in § 1990.160. This is the "full-blown" OSHA carcinogen standard. The permissible exposure limits shall, as pointed out, reflect the lowest feasible levels and, where it is determined by the Secretary that there are suitable substitutes that are less hazardous to humans, no occupational exposure shall be permitted. As we point out below in discussing this specific requirement, "no occupational exposure" does not mean a ban of the use of the substance; for example, a substance might be used where it can be used in a truly closed system.

Second, if the Secretary determines, based on the record, that the toxic substance should have been classified as a Category II toxic substance, he is required to issue a standard following the content and format of the model permanent standard set forth in § 1990.170.

Finally, if the Secretary determines, based on the record, that the toxic substance should be classified as a Category III toxic substance, he is required to follow the procedures provided by section 1990.131, *et. seq.* These procedures however, as pointed out, do not require regulatory action.

2. *Category II Toxic Substances.* Section 1990.120 establishes that certain evidence mandates a Category II classification while other evidence only triggers a presumption that a substance shall be classified as a "Category II Toxic Substance". If the substance meets the definition of a potential occupational carcinogen (as was the case with a Category I toxic substance) but the evidence was scientifically found to be "only suggestive" by the Secretary in determining not to classify the substances as Category I, the Secretary is required to classify the toxic substance as a Category II toxic substance. This classification is not discretionary on the part of the Secretary and may not be deviated from. This is so because any evidence in humans or in

I

V

more than one mammalian test animal species or in one such species that is replicated, as defined, that is not totally inadequate obvious forms the basis for some degree of concern. In addition, if the evidence meets the definition of a potential occupational carcinogen in an unreplicated experiment in only one mammalian species, or the Secretary finds that any other evidence is sufficiently convincing, the toxic substance should be classified, as posing some carcinogenic risk, a presumption exists that the toxic substance shall be classified as a "Category II Toxic Substance".

Section 190.121 sets forth the circumstances under which the Secretary may rebut the presumption of a Category II classification. First, it should be pointed out, as it was above, that if the evidence would have supported a Category I classification but for the finding that the evidence was "only suggestive", the classification of Category II is not presumptive but mandatory. Thus the presumptive nature of the Category II classification exists only for evidence based on unreplicated animal data in one mammalian animal species or other evidence that the Secretary finds sufficient. The grounds to rebut that limited presumption are exactly the same as those used to rebut the Category I presumption, with the exception of the finding that the evidence is "only suggestive". Because OSHA believes that this evidence will generally consist of one study in a single mammalian species, OSHA believes that if the evidence is "less than suggestive" but not totally inadequate, regulatory activity may be unjustified. Thus, the proposal provides that the Secretary may rebut the presumption that a toxic material be classified as a Category II toxic substance where the evidence in the unreplicated experiment in a single mammalian test species is less than suggestive, as defined (but by definition not totally inadequate). As with the rebuttal of a presumptive classification of a Category I toxic substances, any such rebuttal by the Secretary shall be after consultation with the Director of NIOSH, and published in the FEDERAL REGISTER. In the event that the Secretary finds that a presumptive Category II classification has been rebutted, he shall classify the material as a Category III toxic substance.

Section 190.122 sets forth the regulatory consequences of a Category II classification, which includes, among other things, the issuance of a proposed permanent standard in accordance with section 6(b) of the Act. As will be pointed out, the permissible exposure limits found in the proposed model standard will not be changed from those if no OSHA standard exists or the present OSHA standard if one exists. If OSHA standard is inadequate, based on evidence of acute or chronic effects other than carcinogenicity, the exposure limits shall be set at levels found appropriate by the Secretary to protect against such acute or chronic effects. OSHA is concerned that this require-

ment may result in rulemakings under this subpart for such a Category II toxic substance that will be consumed by issues concerning toxic effects other than carcinogenicity. One obvious alternative to the proposal would be to keep the present OSHA standard or, where there is none, not to attempt to set permissible exposure limits in that rulemaking. The limits might be set in a subsequent rulemaking devoted entirely to that issue. This alternative, of course, could provide that in cases, where good evidence is in hand as to other toxic effects, the Secretary would set a level or lower the present OSHA standard, where appropriate. Because one of the essential reasons for this proposal is to speed up regulatory activity as to occupational exposure to potential carcinogens, OSHA seeks and invites the widest public comments and views as to how to handle the problems posed by an inadequate, or nonexistent OSHA standard for Category II toxic substances. It should be pointed out, as we have above, that the Category II classification exists for those substances for which the evidence raises concern about possible carcinogenic effects of exposure but not as high degree of confidence. Thus, OSHA believes that some regulation of such a substance should occur, where perhaps none occurred in the past. However, OSHA believes that, in general, the most cost intensive items found in the "full-blown" carcinogen standard are the requirements that the mandated permissible limits be set as low as feasible and be achieved by way of equipment or work practice control. Thus, with respect to the potential cancer hazard of a Category II toxic substance OSHA does not believe it appropriate to impose the requirement that permissible exposure limits be reduced to the lowest feasible levels.

Section 190.122 also gives notice that if, pursuant to the rulemaking, the Secretary determines that the substance should have been classified as a Category I toxic substance, the final standard will be that required for a Category I toxic substance, as required by § 190.160. The regulation also specifically requires that the Secretary give explicit notice of this possibility in the notice of proposed rulemaking for a Category II substance. This provision exists because OSHA believes that it would serve no purpose to have multiple rulemakings on the same substance, particularly where adequate notice of the possibility of such events is given in advance to the concerned public.

Section 190.123 describes the issues to which the scope of such a hearing is limited. Those issues are exactly the same as those to which hearings and comments are limited as to Category I toxic substances.

Finally, § 190.124, as did § 190.114, provides that, at the conclusion of the public rulemaking, the Secretary has three options. First, if he determines that he was correct in his initial classification of the toxic substance as a Category II toxic substance, he is required to issue a standard that shall follow the content and format of the model standard set forth in § 190.170.

Second, if the Secretary determines that the toxic substance should have been classified as a Category I toxic substance, he is required to issue a standard that shall follow the content and format of the model standard set forth in § 190.160.

Third, if the Secretary determines that the toxic substance should have been classified as a Category III toxic substance, he is required to follow the procedures provided by § 190.131, *et seq.*

3. *Category III Toxic Substances.* Section 190.130 provides that any toxic substance, as defined, not classified by the Secretary as a Category I or II toxic substance shall be classified as a Category III toxic substance. Naturally, this does not include Category IV toxic substances. Basically the Category III classification includes substances for which there is meager or no valid scientific evidence indicating that the substance has a carcinogenic potential to humans. Moreover, it may also include substances for which there is some evidence of a lack of carcinogenic activity. This is not to say however that OSHA has determined by such classification that the toxic substance does not pose a carcinogenic risk—it is merely to say that on the basis of the present evidence, one cannot say that it does. No regulation of this category of toxic substance is provided, insofar as carcinogenicity is concerned. Regulation will occur through OSHA's present standard setting activity or in the future concerning other acute or chronic effects of exposure.

Section 190.131 provides that when the Secretary determines that a toxic substance should be classified as a Category III toxic substance, he will publish his determination in the FEDERAL REGISTER and add that substance to the list provided for by § 190.133, in order to approximately inform the public as to the status of any toxic substance for which there is no Category I or Category II standard. The Secretary is also required to transmit his findings to EPA, NIOSH, NCI and CPSC with a request that each agency determine if there is additional information, unavailable to, or unreviewed by, the Secretary that might be relevant to the classification of that toxic substance.

4. *Category IV Toxic Substances.* OSHA does not believe that prudent government regulation should control substances that are not found in American workplace for several reasons. First, it would be a waste of precious manpower that is needed to regulate substances already found in the workplace. Second, it would be difficult if not impossible to foresee the possible problems concomitant with regulation of substance not yet found in the workplace. For example, uses for a substance might not now exist. When they do, what substitutes for that substance that might exist could not be known with any degree of certainty. And finally, to conduct such a rulemaking would perhaps deprive the public—and thus OSHA—of any meaningful input into such process because of the probable lack of any present in-

terest in participating in such a process for a substance that nobody uses.

Thus OSHA intends to list such substances in section 190.141. The regulations provide, however, that the Secretary will first publish a notice of intent to list those toxic substances as Category IV toxic substances which he believes are not found in American workplaces, in order to provide an opportunity for public comment. Thereafter, the Secretary will publish and update a list of these substances in the FEDERAL REGISTER and the Code of Federal Regulations. OSHA intends to add or delete from that list but without the formality of rulemaking, *per se*. In addition, OSHA intends to develop a procedure with EPA to coordinate this part of the proposal with EPA's implementation of the Toxic Substances Control Act.

B. THE BASIS AND RATIONALE FOR THE EMERGENCY TEMPORARY STANDARD FOR A CATEGORY I TOXIC SUBSTANCE (1990.150)

The Secretary believes, upon the basis of the preceding discussion of cancer, that when evidence exists that meets the definition of a potential occupational carcinogen and the criteria found in § 190.110, (a) continued exposure constitutes "a grave danger" within the meaning of section 6(c)(1)(A) of the Act and (b) that an emergency temporary standard as proposed in § 190.150 is necessary and proper to protect employees from such danger. The proposition that cancer, and substance that cause cancer, pose a grave danger to man does not need lengthy discussion. As pointed out, the nature of a cancer hazard differs from other types of toxicity. Employees exposed to carcinogens risk incurable, irreversible and, in most cases, fatal consequences. These consequences may be irreversibly set in time. No symptomatic evidence of the development of he cancer may be apparent to the employee during a long latency period. A single exposure episode may be sufficient to cause cancer. These factors, which establish the grave danger posed by exposure to carcinogens, also lead inexorably to the conclusion that it is necessary to provide protection for employees as soon as possible through the issuance of an emergency temporary standard, within the meaning of section 6(c)(1)(B) of the Act.

Further, another basis for immediate action arises from the nature of the disease itself. If cancer were a reversible, generally curable disease, there might be some justification for pursuing a standard by some other procedure than an ETS. For example, a worker contracting the disease during the time required to complete full rulemaking proceedings might possibly be cured at some subsequent time. However, cancer is not generally reversible. The Court of Appeals in *Florida Peach Growers v. Bren-*

nan 489 F.2d 120 (5th Cir. 1974) emphasized the importance of irreversibility in its interpretation of some of the criteria that might be necessary to sustain an emergency temporary standard. The Court stated:

We reject any suggestion that deaths must occur before health and safety standards may be adopted. Nevertheless, the danger of incurable, permanent, or fatal consequences to workers as opposed to readily curable and fleeting effects on their health, become important in the consideration of the necessity for emergency measures to meet a grave danger. 489 F.2d at 132.

The model emergency temporary standard contains those provisions deemed necessary and possible to immediately provide employee protection pending completion of the 6(b) permanent rulemaking proceedings to commence shortly thereafter. OSHA firmly believes that when a toxic substance meets all of the criteria and definitions herein, it would be unconscionable not to require those actions that can be done immediately to reduce human exposure. Simply put, the model emergency temporary standard, in general, would require the employer to identify exposed employees, measure their exposures, inform them of the hazards associated with exposure to the toxic substance, provide medical examinations, and reduce their exposures to the lowest level possible that, in OSHA's judgment, can be complied with immediately through any practicable combination of engineering, work practice, and appropriate personal protective equipment control. It would not require that the reduction of employee exposures to the permissible exposure limits be achieved solely by way of equipment or work practice controls, as described more fully below.

Additionally, the ETS would require employers to notify OSHA of the location of workplaces in which employees are exposed to the Category I toxic substance and to describe the conditions of use and exposure and protective measures in effect. Such information will facilitate OSHA's decisions in the subsequent rulemaking proceedings by providing information concerning the extent of use, number of exposed employees, other facts relevant to determination of feasible exposure limits and the appropriateness of specific regulatory provisions.

C. THE BASIS AND RATIONALE FOR THE REQUIREMENTS OF THE THREE MODEL PROPOSED STANDARDS: 1. THE CATEGORY I TOXIC SUBSTANCE ETS (1990.150); 2. THE CATEGORY I TOXIC SUBSTANCE PERMANENT STANDARD (1990.160); AND 3. THE CATEGORY II TOXIC SUBSTANCE PERMANENT STANDARD (1990.170)

The following discussion summarizes the significant provisions of the three model standards and the rationale and policy considerations underlying those

provisions. As pointed out, these three model standards are intended to be proposed and promulgated in their entirety, in form and content, in each of the substance-by-substance rulemakings, except where deviations, additions or changes are shown to be appropriate. However, certain provisions of the model standards, which represent basic policy decisions of OSHA, such as the requirement that the lowest feasible levels of exposure to be achieved for Category I toxic substances, will not be permitted to be changed in the subsequent substance-by-substance rulemakings. Other requirements, such as the content of medical tests and procedures, may properly vary according to the unique properties or uses of the substance to be regulated and the appropriateness of such requirements will be obviously issues in the subsequent 6(b) rulemaking. Therefore, §§ 190.113 and 190.123 permit the rulemaking proceedings on specific substances to consider whether the unique properties or uses of the substance make any of the specific protective measures of the model standards inappropriate or infeasible. For example, in the recent proposal to regulate occupational exposure to benzene (42 FR 27452), no provision was made for change rooms or showers. This omission from usual OSHA requirements for occupational exposure to a carcinogen occurred because the high volatility of benzene made such requirements unnecessary as to the regulation of that toxic substance.

In format, OSHA has identically lettered those provisions appearing in the model ETS and the model permanent standards for Category I and Category II toxic substances, which cover the same subject headings, for the convenience of the public. For example, paragraph (n) in all three model standards will always contain the requirements for medical surveillance, whether it be the model ETS or the model standards for Category I or Category II toxic substances. Where inappropriate provisions are deleted, for example the regulated area requirement is omitted from the ETS, the lettered paragraph will nonetheless appear with the notation "deleted" to maintain consistency throughout the three model standards.

For the convenience of the public, OSHA attempts here to graphically illustrate, in general, as Table I, the requirements of, and differences in, the three model standards. This table does not, however replace the discussion of the individual requirements, as Table I can only generalize. In addition, attached to this proposed set of regulations, as Appendix A, is a three column display of the three model proposed standards side by side. OSHA believes that Table I and Appendix A will greatly facilitate public understanding and response to this rulemaking.

TABLE I

Description of the 3 model standards, as proposed	Category I: Toxic substances emergency temporary standard	Category I: Toxic substances standard	Category II: Toxic substances standard
1. See (a): Scope and application.	As provided.	As provided.	As provided.
2. See (b): Definitions.	Do.	Do.	Do.
3. See (c): Permissible exposure limits.	Levels are to reflect the lowest levels feasible that can be achieved within the shortest possible time.	Levels are to reflect the lowest levels feasible or, in certain cases, the levels shall permit no occupational exposures.	Levels are to retain the present OSHA standard (29 CFR 1910.1000) or if none or inadequate, the appropriate levels based on acute or chronic non-carcinogenic effects.
4. See (d): Notification of use and emergencies.	Provides for notification of use.	Provides for notification of use and emergencies.	Provides for notification of use and emergencies.
5. See (e): Exposure monitoring and measurements.	Monthly if above limits set by sec. (c); quarterly otherwise.	Monthly if above limits set by sec. (c); quarterly otherwise.	Monthly if above limits set by sec. (c); quarterly otherwise.
6. See (f): Regulated areas.	Omits this requirement.	Required.	Omits this requirement.
7. See (g): Methods of compliance.	Any combination of equipment controls and personal protective equipment.	By way of engineering and work practice controls only, except in certain circumstances.	By way of engineering and work practice controls only, except in certain circumstances.
8. See (h): Respiratory protection.	Required.	Required.	Required.

1. *Paragraph (a): Scope and Application.* The three proposed model standards would apply to all workplaces in all industries, including the general, construction, maritime, and agriculture industries, wherever occupational exposure to the toxic substance, as defined, occurs. The three model standards also provide for instances where the standard will be determined by OSHA not to apply, if applicable. The wordings of the three model standards, as proposed, are identical in this regard, although in their application they will obviously be different. See for example, the differences between the final Coke Oven Emissions Standard (29 CFR 1910.1029), the final Vinyl Chloride standard (29 CFR 1910.1017), and the recent Benzene proposal (42 FR 47452).

2. *Paragraph (b): Definitions.* The three proposed model standards contain definitions in order to establish a consistent working vocabulary. OSHA considers these definitions to be minimal insofar as the model standards are concerned. There are some differences, however, even as proposed, in the three model standards because of deleted or additional requirements found in the body of each standard, as discussed. However, there are no differences in the definitions common to the standards.

3. *Paragraph (c): Permissible Exposure Limits.* The proposed ETS and the model permanent standard for a Category I toxic substance would require that employee exposure to a Category I toxic substance be reduced to the lowest levels feasible. In practice, it may be that the permissible exposure limits for the ETS might be higher or lower than those pro-

posed or promulgated in the permanent model standard because of the opportunity for a better assessment of feasibility during the comment period and possible hearing. Additionally, where, on the basis of facts set forth in the proposal or on the record of the public rulemaking, suitable substitutes in certain applications or uses are found to exist which are less hazardous to workers, the Secretary shall prohibit, in the permanent standard, occupational exposure for such specific applications or uses. This prohibition against occupational exposure is not *per se* a ban upon the use of the toxic substance, unless otherwise noted. Any such use of the toxic substance might, for example, be safely contained in a system that would not create any occupational exposure even when the toxic substance were still being used.

The policy decision to reduce exposures to as low as feasible, or to prohibit occupational exposure where suitable substitutes exist, is not made without sound support. As has been discussed above, a no-effect or threshold level may theoretically exist for any specific carcinogen. As yet, however, there is no satisfactory scientific basis for determining such levels for any given population. Thus, as has been proposed, any human exposure to a carcinogen, even at levels below those which induced positive effects in man or in test animals, would be considered by OSHA to present a potential cancer risk as a policy matter. We do not know whether "safe" or "no-effect" levels exist for a carcinogen and, if so what they may be. Therefore, attempts to set finite exposure limits are not directed at determining "safe" levels

of exposure but rather are attempts to determine the lowest feasible levels.

OSHA intends to permit no deviation from the general policy, that the employee exposure limits in the ETS and permanent Category I standard shall always be "the lowest feasible level". OSHA does not believe that it should deviate, in the substance by substance rulemakings themselves, from the position proposed to be established in this rulemaking, namely, that when dealing with human carcinogens it is appropriate to set a level which assures the lowest feasible risk to workers. If and when substantial evidence is available to show that "safe" or "no-effect" levels can be predicted for exposure of human beings to carcinogens, OSHA will act to amend this basic policy decision reflected in this set of regulations proposed today.

The two model permanent standards for Category I and Category II toxic substances provide for permissible exposure limits for inhalation over a time weighted average for an 8 hour day and a ceiling level for any prescribed appropriate interval during that day. They also provide that no employee shall be exposed to eye contact or repeated skin contact. The only difference is that insofar as the model permanent standard for a Category I toxic substance is concerned, the ceiling level shall not be over five (5) times the time weighted average for the inhalation permissible exposure limit. This is provided because statistically, an employer can not generally assure that his employees' exposures are below the time weighted average limit unless the ceiling exposures are less than 5 times that limit.

Finally, the proposed permanent standard for a Category II toxic substance differs markedly from the requirements for Category I toxic substances concerning the permissible exposure limits. This is so because of the lower quantity or quality of the evidence being relied upon. Thus, the model standard for a Category II toxic substance: (a) retains the present OSHA standard found in 29 CFR 1910.1000 or (b) where none exists, sets an appropriate level based upon acute or chronic effects of exposure other than carcinogenicity to the toxic substance, or (c) where acute or chronic effects of exposure other than carcinogenicity indicate that the present OSHA standard is inadequate, lowers the exposure level from the present OSHA standard to the level found appropriate by the Secretary, in the record, to protect against such effects. As has been pointed out above, OSHA is concerned about this specific provision of the Category II model permanent standard and invites the widest public comment as to whether the lowering or setting of permissible exposure levels for such a substance should await a subsequent rulemaking, except where the Secretary determines that he has sufficient evidence in hand at the time.

4. *Paragraph (d): Notification of Use and Emergencies.* The three model standards all provide that within a certain time after the effective date of each

standard, the employer shall notify the applicable OSHA area office as to the address and location of each workplace in which employee exposure to the toxic substance occurs, a brief description of the work operations and the number of employees that may be exposed.

In addition, the Category I and II proposed permanent standards provide that the employer must also notify the OSHA area office when emergencies, as defined, have occurred. If the OSHA area office requests additional information relevant to the emergency, the employer will be required to furnish such information, together with a description of measures taken to prevent future emergencies of a similar nature. The model ETS does not include this requirement because it does not require written plans for emergency situations, for the reasons set forth in paragraph 9 below. Moreover, because previous employee exposures may be at levels much higher than the ceiling limits and compliance with the lower levels set by the ETS is most likely to be achieved by respirators, OSHA deems such requirement to be unnecessary or even infeasible for the ETS. Finally, in light of the other requirements mandated of employers by the ETS, OSHA believes that such a further requirement might be overburdensome in the case of most employers because of the short effective period of the ETS (6 months).

These reports of use, and in the case of the two model permanent standards, the report of emergencies, are considered necessary and proper in order to aid enforcement activities. In addition, such information is helpful, in the case of the rulemaking concerning the permanent standard for Category I toxic substances, in determining what level of exposure can feasibly be attained by way of engineering and work practice controls. Finally, such reports are necessary in order to monitor the effectiveness of standards in protecting employees against occupational cancer and in order to obtain information, on a continuing basis, concerning the hazards found in the use of these toxic substances.

OSHA recognizes that the reporting of use may be a requirement of the United States Environmental Protection Agency pursuant to the Toxic Substances Control Act of 1976. OSHA does not desire duplication of reporting to more than one Federal agency and therefore directs the attention of the public to this issue and requests comments on ways to achieve notification of use without duplicating reports concerning the use of any given toxic substance. It is OSHA's intention to enter into an agreement with EPA reducing, to the maximum extent possible, any such duplication in reporting requirements.

5. *Paragraph (e): Exposure Monitoring and Measurement.* The three model standards require each employer who has a place of employment where the toxic substance is present to monitor employees to measure their exposure to the toxic substance over an eight (8) hour period, without regard to the use of res-

piratory protection. Section 6(b)(7) of the Act (29 U.S.C. 655) mandates that any standard promulgated under the Act shall, where appropriate, provide for monitoring or measuring of employee exposure and in such manner as may be necessary for the protection of employees. In addition, section 8(c)(3) of the Act (29 U.S.C. 657) requires employers to promptly notify any employee who has been or is being exposed to toxic substances or harmful physical agents at levels which exceed those prescribed by an applicable occupational safety and health standard and to inform such employee of the corrective action being taken to reduce such exposures. Exposure monitoring is necessary, therefore, in order to determine whether employees are being exposed to the toxic substance at levels exceeding those prescribed by the standard and therefore should be notified as required by the Act.

In addition to the statutory requirements, there are various other reasons which make it appropriate for employers to measure employee exposure to the toxic substance.

First, employers would have a legal obligation imposed by the individual standard to assure that their employees are not exposed above the permissible exposure limits. Exposure monitoring informs the employer whether that obligation is being met.

Second, if the employer determines that employee exposures exceed the permissible exposure limits, then there would be an obligation in the case of a permanent standard for Category I or II toxic substances to institute engineering and work practice controls in order to reduce exposures to the permissible exposure levels. Hence, exposure monitoring aids the evaluation of the effectiveness of the installation of engineering and work practice controls and informs the employer whether additional controls need be instituted. For the same reasons, the ETS requires the use of respiratory protection whenever the permissible exposure limits are exceeded.

Third, if the permissible exposure limits are exceeded, either before all feasible engineering and work practice controls have been instituted, or after, then there is an obligation to use respiratory protection to reduce exposures. The selection of a particular respirator depends largely on the level at which employees are being exposed. Therefore, exposure monitoring is necessary in order to determine whether respiratory protection is required at all, and if so, which respirator is to be selected.

Finally, the results of exposure monitoring are a necessary part of the information which is required to be supplied to the physician to enable him to perform his stated functions under the standard.

The three model standards require that the measurements be made by monitoring which is representative of each employee's exposure to the toxic substance over an eight-hour (8) period without regard to the use of respiratory protection. In order to use the results of

exposure monitoring to evaluate the effectiveness of the required engineering and work practice controls, to determine whether additional controls must be instituted, and to ascertain which, if any, respirator must be used, it is necessary to know employee exposure levels without regard to the use of respiratory protection. Exposure measurements of each individual employee would, of course, be the best indication of that employee's exposure. However, OSHA believes that this may be too burdensome and monitoring which is truly representative of an employee's exposure would provide the necessary information with, in many instances, fewer samples. It should be noted that individual exposure measurements would certainly be considered to be representative and are not precluded by this requirement.

All three model standards require that whenever there has been a production, process, control or personnel change which may result in new or additional exposures to the toxic substance or whenever the employer has any other reason to suspect an increase in employee exposure, the employer shall repeat the required monitoring and measurements for those employees affected by such change or increase. This is necessary so that the employer may take the appropriate actions required, such as providing the appropriate respirator protection or instituting engineering controls.

The three model standards require an employer to notify each employee in writing of that employee's representative exposure measurement within five working days after receipt of the results of any required measurement. Section 8(c)(3) of the Act (49 U.S.C. 667) requires employers to promptly notify an employee who is exposed in excess of the permissible exposure limit. The standard extends that right to employees exposed at or below the permissible exposure limits and establishes the time period involved. OSHA believes that informing employees of their exposure measurement, at or below the permissible exposure limits, contributes to their understanding of their work and its attendant hazards, particularly where no level of exposure is "safe" and the level that is set solely a feasibility level. The success of a control strategy that so intimately involves worker cooperation is highly dependent on such understanding. A period of five (5) working days is believed to be a reasonable time in which to notify the employees. The five day limit fulfills the statutory requirement of promptness, yet accommodates the need to allow time for the written notification to be completed.

Section 8(c)(3) of the Act (29 U.S.C. 657) also provides that whenever measurement results indicate that an employee is exposed in excess of the permissible exposure limits, the employer must also notify the employee of the corrective action being taken to reduce exposure to or below the permissible exposure limits. The three model standards all incorporate this statutory obligation.

The employer is also required to use a method of monitoring and measurement with an accuracy (at a confidence level of 95%) of not more than plus or minus an appropriate level to be determined in each specific rulemaking pursuant to this subpart.

6. *Paragraph (i): Regulated Areas.* The model permanent standard for a Category I toxic substance provides that when employee exposure is in excess of the permissible exposure limits, without regard to respiratory protection, the employer must establish a regulated area and limit access to those areas to authorized persons. The purpose of these requirements is to limit the risk of exposure to as few employees as possible. OSHA believes these requirements will allow operation to continue without undue interference, considering the dangerous hazard to which the workers are exposed.

The model ETS does not include a requirement for the designation of regulated areas. As has been explained, the ETS requirements are those that OSHA has determined and believes can generally be instituted immediately or fairly quickly. Yet, before a regulated area is required, employers would be required to monitor to determine which, if any, employees are exposed to the toxic substance over the permissible exposure limits. OSHA believes that with the present requirements of the model ETS, it would not be feasible in many cases to add this additional requirement to the model ETS.

The model permanent standard for a Category II toxic substance also does not include the requirement for regulated areas. OSHA believes, as has been pointed out, that Category II substances are those substances with substantially less quantitative and qualitative proof of carcinogenicity than the Category I toxic substances. In other words, these substances probably have not been regulated in the past by any federal agency insofar as carcinogenicity is concerned. Thus, OSHA believes that requiring regulated areas in the model proposed permanent standard for Category II toxic substances would be too burdensome a requirement based on the quality or quantity of evidence required to trigger a Category II classification.

7. *Paragraph (a): Methods of Compliance.* (a) *The model permanent standards.* The model permanent standards simply restate OSHA's current policy that feasible engineering and work practice controls must be used as the primary methods to reduce employee exposure to or below the permissible exposure limits. They would require the employer to immediately institute feasible engineering and work practice controls to reduce employee exposures to or below the permissible limits, except in situations where the employer proves that such controls are infeasible. Further, in situations where feasible engineering and work practice controls are insufficient to reduce exposure to the permissible limits, they must none-

theless be used to reduce exposures to the lowest achievable level, and then be supplemented by the use of respiratory protection. In addition, a program must be established and implemented to reduce exposures to within the permissible exposure limits or to the greatest extent feasible, solely by means of engineering and work practice controls. Written plans for this program must be developed and be furnished upon request for examination and copying to representatives of the Assistant Secretary and the Director. These plans must be reviewed and updated periodically to reflect the current status of exposure control.

As has been pointed out time and time again in OSHA rulemaking proceedings, respirators are the least satisfactory means of control because of difficulties inherent in their design and use. Respirators are capable of providing good protection only if they are properly selected for the types and concentrations of airborne contaminants present, properly fitted and refitted to the employee, worn by the employee, and replaced when they have ceased to provide protection. While it is theoretically possible for all of these conditions to be met, it is more often the case that they are not. Consequently, the protection of employees by respirators is not always effective and is therefore permitted only in certain specified circumstances. For example, proper facial fit is essential, but due to variations in individual facial dimensions, and the limited range of facepiece configurations, such fit is difficult to achieve. Often the work involved is strenuous and the increased breathing resistance of the respirator reduces their acceptability to employees. Safety problems presented by respirators must also be considered. Respirators limit vision. Speech is also limited. Voice transmission through a respirator can be difficult, annoying and fatiguing. Movement of the jaw in speaking also causes leakage. Communication may make the difference between a safe, efficient operation, on the one hand, and confusion and panic, especially in difficult and dangerous jobs, on the other hand. Also skin irritation can result from wearing a respirator in hot, humid conditions and such irritation can cause considerable distress and disrupt work schedules. The extent of this problem is even greater where the toxic substance is a skin irritant and becomes trapped between the respirator facepiece and the skin.

It is clear therefore that respirators cannot be considered as the primary means of employee health protection. Nevertheless, they do provide some protection and OSHA has concluded therefore that under certain circumstances, the employees must use the respirators provided.

(b) *The Model ETS.* OSHA has indicated herein that the provisions of the model ETS are intended to require only those things which are possible to achieve immediately or within a very short period of time. While the model ETS therefore states that OSHA prefers the re-

duction of employee exposure by way of engineering and work practice controls, it also states that OSHA recognizes, as a very practical matter, that in many instances, the immediate reduction of exposure will be primarily through the use of respiratory protection, with all of the inadequacies stated above, and the institution of good housekeeping practices such as the prohibitions against the blowing of dust containing the toxic substance or the permitting of open containers and vessels of liquids containing the toxic substances. The methods of compliance, therefore, are a major difference between the model ETS and the model 6(b) proposed and final standards. One other major and distinctive feature of the model ETS is the requirement that during the effective period of the ETS (6 months), the affected employers must look down the road to the model permanent standard for the Category I toxic substance and start planning how to reduce exposures to the lowest feasible levels solely by way of engineering and work practice controls. Thus, OSHA anticipates that by such requirements, delayed effective dates of the permanent standard can be limited or perhaps avoided altogether, hastening the reduction of employee exposure to the toxic substance. Because of the general irreversibility of cancer as pointed out above, OSHA considers the early reduction of employee exposures the most significant provision in decreasing the gravity of the risk of contracting cancer.

8. *Paragraph (b): Respiratory Protection.* The model ETS provides that, whenever the permissible exposure limits are exceeded, the employer shall assure that the employees use respirators. The two model proposed and final standards, however, require that respirators be used to achieve compliance with the permissible exposure limits only during the time period necessary to install or implement feasible engineering and work practice controls, in work operations in which such controls are not technically feasible or are not yet sufficient to reduce exposure to the permissible limit, or in emergencies.

The three model standards require that the employee be properly trained to wear the respirator, to know why the respirator is needed and to understand the limitations of the respirator. An understanding of the hazards involved is necessary to enable the employee to take steps for his or her own protection. The respiratory protection program implemented by the employer must conform to the program set forth in 29 CFR 1910.134. This section contains basic requirements for proper selection, use, cleaning, and maintenance of respirators.

The three proposed model standards also contain a respirator selection table (Table I) so the employer will be informed of and provide the type of respirator which affords the proper degree of protection based on the airborne concentrations of the toxic substance.

To prevent skin irritation and to minimize the discomfort of respirator use, the three model standards require that

employees must be allowed to periodically wash their faces and respirator facepieces in order to remove any accumulation of the toxic substance or to reduce the chance of irritation from the wearing of the facepiece itself, such as a heat rash.

9. *Paragraph (i): Emergency Situations.* The two model permanent standards provide that written plans for emergency situations be developed. They further require that some type of alarm or warning system be devised to adequately alert employees of the emergency. Finally, the two model standards provide for evacuation of all employees from the area except those engaged in correcting the emergency.

The model ETS does not provide such a requirement. As has been pointed out under methods of compliance, OSHA recognizes that respirators may be the primary method used to reduce employee exposure in the short term under the ETS. Thus, the requirements concerning emergencies provided for by the two model proposed and final standards would not appear to be necessary or in some cases attainable for the ETS.

10. *Paragraph (j): Protective Clothing and Equipment.* The three model standards require the employer to provide and assure that employees, who are subject to skin or any eye contact, use protective clothing or equipment such as goggles in order to minimize these hazards.

Basically, the requirements of the three model standards are the same. The three model standards also require that the employer clean, launder, or dispose of the required protective clothing to eliminate any potential exposure that might result were the clothing to be laundered by the employee at home or in a commercial laundry.

The three model standards also require that protective clothing be provided in a clean and dry condition at appropriate times. Since repeated skin contact with many toxic substances, as proposed to be regulated herein, creates a potential for skin cancer, OSHA believes that the regular cleaning of contaminated work clothing plays an important role in the prevention of this hazard. More important, this requirement prevents increased exposure to airborne concentrations of the toxic substance released from the contaminated clothing. The three model standards also require that protective clothing and equipment be maintained and replaced as needed in order to ensure effectiveness.

The two model permanent standards provide that the employer assure that all protective clothing is removed at the end of each work shift, only in change rooms, and that the clothing that is to be laundered, cleaned, or disposed of be placed in a closable container in the change room. The purpose in requiring such a container is to prevent the contaminants on the clothing from coming into contact with an individual handling the container or being released in the change room. Since the container is to be located in the change room, it is appropriate

to limit the removal of contaminated clothing to that area.

Finally the three model standards require employers to inform those who handle the contaminated articles of the potentially harmful effects of exposure to the toxic substance. This provision is designed to make clear the need to use proper care in handling of the contaminated articles.

11. *Paragraph (k): Housekeeping, Removal and prevention of accumulations of the toxic substance dust and liquid deposits on all surfaces in the workplace are important aspects in minimizing employee exposure, particularly in the case of a Category II toxic substance where there may not be a mandatory reduction in the present permissible exposure limits, per se.* To assure that the toxic substance is not reintroduced into the workplace air, all three model standards prohibit dry sweeping or the use of compressed air for cleaning of floors and other surfaces where the toxic substance dust or liquid deposits are found.

As important, all three model standards require that when the toxic substance is present in a liquid form, or as a resultant vapor, that all containers or vessels shall be enclosed to the maximum extent feasible and tightly covered when not in use.

12. *Paragraph (l): Waste Disposal.* For disposal of waste, scrap, equipment or debris containing the toxic substance, the three model standards require that such substance be collected and disposed in sealed bags or other closed containers which will prevent dispersion of the toxic substance outside of the container.

13. *Paragraph (m): Hygiene Facilities and Practices.* As to the three model standards, there are, generally, the same provisions for hygiene facilities and practices as are provided by present OSHA standards, as mandated by 29 CFR 1910.141.

The two model permanent standards also add other requirements. For example, the model proposed and final standard for a Category I toxic substance also requires that positive pressured, filtered air lunchrooms be provided and readily accessible for employees whenever food or beverages are consumed in the workplace. These lunchrooms must be provided and readily accessible to encourage employees to make use of them. Positive pressure filtered air is required to create a lunchroom with a relatively emission free air supply and to minimize the amount of air from outside the lunchroom blowing inside whenever the door is opened. The air supply is also required to be temperature controlled so that the lunchroom does not become unbearably hot in the summer or cold in the winter, making employees reluctant to use it. In addition, a lunchroom with a temperature controlled air supply will encourage employees not to leave the door open in order to lower the temperature in hot weather, thus minimizing the opportunities for air contaminated with the toxic substance to blow into the lunchroom.

Second, the model permanent standards for Category I and Category II toxic

substances require the use of hygiene practices and facilities which are intended to remove the toxic substance collected on employees. The standards do this by requiring that the employer assure that employees wash their hands and faces prior to eating. Since washing is required, the model standards also repeat the existing obligation to provide washing facilities and lavatories in accordance with 29 CFR 1910.141(d) (1) and (2).

The two model permanent standards for Category I and Category II toxic substances require the employer to provide change rooms equipped with storage facilities for street clothes and separate storage facilities for protective clothing and equipment as is presently provided by 29 CFR 1910.141. The purpose of this requirement is to reduce the possibility of an employee having skin contact with the toxic substances which collect on the employee's street clothes as a result of those clothes having been in the same storage facility as the employee's contaminated protective clothing and equipment. It should again be noted that this requirement repeats the existing obligation to provide change rooms in § 1910.141(e) of this Part.

In addition to requiring shower facilities, the model proposed and final standards require showering at the end of each work shift. This action can, in certain cases prevent skin cancer among workers. In addition, and as importantly, it reduces the employee's overall exposure to the toxic substance. OSHA believes that, although some allege that workers currently engage in this practice, it is usually not the case. Thus, OSHA believes that it is necessary to create a legal obligation to do so, in order to assure that this practice is continued or created. The model standards also require shower facilities which comply with 29 CFR Part 1910.141(d) (3).

The model standards also require that employers assure that employees do not apply cosmetics in the regulated area. This is intended to prevent employees from sealing the toxic substance onto their skin.

OSHA invites comments on these paragraphs of the model standards. Basically, as pointed out, the additional Category I requirements to those already imposed by 29 CFR 1910.141 for hygiene facilities are capital intensive. In regulating Category II substances, OSHA is relying upon evidence insufficient to justify treating the substance as a full-blown carcinogen. Thus, the lower standard of regulation, but with what OSHA believes is an adequate margin of health and safety commensurate with the quality and quantity of evidence.

14. *Paragraph (n): Medical Surveillance.* The three model standards require that each employer institute a medical surveillance program for all employees who are, or will be, exposed to the toxic substance. OSHA believes that a medical surveillance program is appropriate in dealing with the problem of employee exposure to Category I or II toxic substances; hence, pursuant to the Act, this

V

I

standard has prescribed it. The authority, indeed the requirement, to include medical surveillance in an OSHA standard is found in subsection 6(b)(7) of the Act:

where appropriate, such standard promulgated under subsection 6(b) shall prescribe the type and frequency of medical examinations or other tests which shall be made available, by the employer or at his cost, to employees exposed to high employment-related hazards in order to most effectively determine whether the health of such employees is adversely affected by such exposure.

The three model standards require that the medical surveillance program provide each covered employee with an opportunity for medical examination. As noted above, the authority and requirement for this provision is found in section 6(b)(7) of the Act.

All examinations and procedures are required to be performed by or under the supervision of a licensed physician and provided without cost to the employee. While the physician will usually be selected by the employer, the standard does not so mandate, leaving the employer free to institute alternative procedures such as joint selection with the employee or selection by the employee. Clearly, a licensed physician is the appropriate person to be conducting a medical examination. However, certain parts of the required examination (e.g. taking of a history) do not necessarily require a physician's expertise and may be conducted by another person under the supervision of the physician. As noted above, the Congress has mandated, by reason of section 6(b)(7) of the Act, that medical examinations and procedures required by OSHA standards be provided at no cost to the employee.

The three model standards provide that a work history, medical history and medical examination be performed. The purpose of this requirement is to establish a baseline health condition against which changes in an employee's health may be compared in the detection of changes in physical condition.

The model standards leave blank the specific medical protocols for the examination. The various tests that comprise the medical examination to be prescribed in the individual rulemakings are determined by the specific toxicology and effects of each substance. The tests are designed to be used in an initial assessment of an employee's health and to detect changes in health which may occur are to be required as appropriate. Of course, if additional tests and procedures are appropriate for a given substance, they may be added in the specific rulemaking covering that substance.

The three model standards require that the employer provide the physician with certain specified information. This information includes a copy of the regulation, a description of the affected employee's duties as they relate to the employee's exposure, the results of the employee's exposure measurement, if any personal protective equipment is used or is to be used, and information from previous medical examinations of

the affected employee to the extent that they are not readily available to the physician. The purpose in making this information available to the physician is to aid in the evaluation of the employee's fitness to wear personal protective equipment when required. It should be noted that the three model standards do not require that a copy of the regulation be given to the physician for each employee. One copy would be sufficient, provided the employer assures that the physician is aware of which employees are covered by this standard. Items that relate to individual employees or categories of employees (such as the description of job duties) need be transmitted to the physician only once, unless, for example, the duties change. Exposure measurements will be cumulative so that the results of each monitoring are to be sent to the physician. However, since sampling will be done on a representative basis, the language of the three model standards require the physician to be given either the employee's actual exposure measurements, if available, or the estimated level of the employee's exposure based on the relevant representative measurements.

The employer is required to obtain a written opinion from the examining physician containing: the physician's opinion as to whether the employee has any detected medical conditions which would place the employee at increased risk of material impairment of health from exposure to the toxic substance; the results of the medical tests performed; any recommended limitations upon the employee's exposure to the toxic substance and upon the use of protective clothing and equipment such as respirators; and a statement that the employee has been orally informed by the physician of any medical conditions which require further examination or treatment. This written opinion must not reveal specific findings or diagnoses unrelated to occupational exposure, and a copy of the opinion must be provided to the affected employee. The purpose in requiring the examining physician to supply the employer with a written opinion containing the above-mentioned analyses is to provide the employer with a medical basis to aid in his determination of the employee's initial placement and continuing capability to use protective clothing and equipment of employees. Requiring that the opinion be in written form will serve as an objective check that employers have actually had the benefit of the information in making these determinations. Likewise, the requirement that the employee be provided with a copy of the physician's written opinion will assure that the employee is informed of the results of the medical examination and may take any appropriate action. The purpose in requiring that specific findings or diagnoses unrelated to occupational exposure not be included in the written opinion is to encourage employees to submit to medical examination by removing the fear that employers may find out information about their physical condition that has no relation to occupational exposures.

15. *Paragraph (o): Employee Information and Training.* The three model standards uniformly require the employer to provide a training program for employees exposed to the toxic substance. OSHA believes that an information and training program is essential for the protection of employees because an employee can do much to protect himself if he is informed of the nature of the hazards in his workplace. To be effective, an employee education system must, at the minimum, apprise the employee of the specific hazards associated with his work environment. For this reason, the employer would be required to inform each employee exposed to the toxic substance of the nature of the toxic substance's related health problems; the necessity for exposure control and the medical and industrial hygiene monitoring programs.

The three model standards also require that the training program be provided at least annually. The content of the training program is intended to apprise the employees of: (1) the hazards to which they are exposed; (2) the necessary steps to protect themselves, including avoiding unnecessary exposures, respiratory protection and medical surveillance; (3) their role in reducing exposures to the toxic substance and (4) their rights under the standard. Section 6(b)(7) of the Act makes it clear that these are appropriate goals of an employee training program, and the model standards, therefore, include them.

The employer is required to make a copy of the model ETS and proposed and final standards, as applicable, as well as the appendices available to the affected employees. This requirement, in combination with the review provided for as part of the training program, is intended to assure that employees understand hazards and the requirements of the applicable standard.

The employer is also required to provide, upon request, all materials relating to the training program to the Secretary and the Director. This is intended to provide an objective check of compliance with the content requirements of the applicable standard.

16. *Paragraph (p): Signs and Labels.* The three model standards require the use of signs and labels, with the two model standards for a Category I toxic substance requiring the warning of "Cancer Hazard." The model proposed and final standard for a Category II toxic substance requires the warning of "Potential Cancer Hazard." OSHA believes that it is important, and indeed section 6(b)(7) of the Act requires, that appropriate forms of warning, as necessary, be used to apprise employees of the hazards to which they are exposed in the course of their employment. OSHA believes, as a matter of policy, that employees should be given the opportunity to make informed decisions as to whether to work at a job under the particular working conditions extant. Furthermore, OSHA believes that when the control of potential safety and health problems involves the cooperation of employees, the success of such a program is highly dependent

upon the employee's understanding of the hazards attendant to that job.

In light of the serious nature of the hazard of exposure to carcinogens, OSHA does not believe that periodic training alone will adequately apprise employees of the carcinogenic hazard. However, coupled with the training requirements, OSHA believes that the requirement to post signs will adequately do so. Additionally, the appearance of the phrase "cancer hazard" or "potential cancer hazard" on the warning sign assure that employees are actually being informed of this hazard.

Since even persons who are exposed to a carcinogen only occasionally may face an increased risk of cancer, OSHA does not believe that the hazard to these people is overstated by the required signs. Also, as is the case with a regular employee, the warning signs would serve as an added impetus to occasionally visiting employees to utilize any protective equipment which has been provided.

Finally, given the evidence of the carcinogenicity of substance, OSHA believes that signs will not cause undue alarm. This is especially so when balanced against the positive results anticipated, as described above. For all of the reasons set forth, OSHA believes that it is appropriate to use precautionary signs which warn of a cancer hazard. Additionally, the phrase "authorized personnel only" relates directly to requirements in the Category I permanent standard which limit access and activities within regulated areas. (See discussions of Regulated Areas and of Hygiene Facilities and Practices.)

The words "danger" or "caution" are used for three reasons: (1) To attract the attention of workers; (2) to alert workers to the fact that they are in a dangerous area, i.e., an area where they are exposed to a potential carcinogen; and (3) to emphasize the importance of the message to follow.

The use of labels or signs required by other statutes, regulations, or ordinances in addition to, or in combination with, signs required by this standard is permitted. OSHA recognizes that employers may be subject to various legal requirements to use warning signs and labels. The purpose of this provision of the standard is to allow the employer to comply with these various requirements in an administratively convenient manner.

The standards require that no statement which contradicts or detracts from the effect of any sign required by this paragraph shall appear on or near any such required sign. They also require that the legend on the signs be kept visible to employees by illuminating and cleaning the signs when necessary. These two requirements are designed to ensure the effectiveness of the warning signs.

Statements which contradict or detract from the intended effect of the sign are clearly counterproductive to using signs to convey information. Similarly, if the legend on the sign cannot be read because of either darkness or an

unclean condition, then there is no purpose in requiring signs to be posted.

The use of precautionary labels on containers of protective clothing contaminated with the toxic substance is required. We are mindful that no evidence may presently exist that laundry workers who handle contaminated clothing containing any specific carcinogen exhibit an excess of cancer. However, no evidence exists to the contrary, and in light of our experience with other carcinogens (e.g. asbestos) and the preventative nature of the Act, we have decided to include a requirement for precautionary labels for contaminated clothing. Moreover, OSHA believes it is as appropriate that individuals who are engaged in handling and laundering the contaminated clothing be apprised of the hazard and practices to be avoided when handling the clothing as it is to inform the other primary employees.

As to labels, due to the hazardous nature of exposure to a potential carcinogen, OSHA believes that emphasis should be placed on warning employees and other persons about the danger of exposure. For this reason, the model standards include a requirement that caution labels be affixed to all containers containing the Category I and Category II toxic substance and of the products containing it, not only because of the hazardous nature of this exposure, but because of the related necessity for both the employer and employee to know whether the product contains any of the carcinogen. The labeling provisions for the model standards for the Category I and Category II toxic substance also require the employer to assure that caution labels are affixed to any product containing the toxic substance when such product leaves the employer's workplace. This proposed requirement is designed to protect any other employees who will be handling, transporting, or using this product. Thus manufacturers and suppliers would be required to affix caution labels. The rationale for this requirement is that the manufacturer or supplier is in the best position to know whether the product does contain the Category I and Category II toxic substance and should therefore be required to inform employees of even other employers of the hazards to which they are being exposed.

17. *Paragraph (g): Recordkeeping.* Section 8(c)(3) of the Act mandates the promulgation of regulations requiring employers to maintain accurate records of employee exposure to potentially toxic substances or harmful physical materials which are required to be monitored or measured. Accordingly, the three model standards contain identical provisions for recordkeeping except that the model ETS has a shorter time requirement for retention due to its short effective date and does not require a transfer of records to the Director of NIOSH if the employer ceases to do business. OSHA believes that such a requirement is not necessary for the ETS because of its short effective life (6 months).

The three model standards provide that records must be kept which include information which is intended to identify the employee and to accurately reflect the employee's exposure. Specifically, it must include: (a) the names, social security numbers and job classification of each employee covered by the monitoring; (b) the dates, number, duration and results of each of the samples taken, including a description of the representative sampling procedure used to determine employee exposure where applicable; (c) the type of respiratory protective devices worn by the employee, if any; (d) the environmental variables that could affect the measurement of employee exposure and (e) a description of the sampling and analytical methods used, and evidence of their accuracy.

The model permanent standards for both a Category I and II toxic substance require that this record be maintained for at least 40 years, or for the duration of employment plus 20 years, whichever is longer. OSHA believes that this retention period is necessary and appropriate for the development of information regarding the causes and prevention of occupational cancer related to exposure to a toxic substance. To be useful for this purpose, an exposure monitoring record must be retained long enough to allow health effects related to employee exposure to become manifest. Some of the health effects related to the development of cancer, do not become manifest for at least 20 or 30 years. Therefore, a retention period which encompasses both the period of exposure and the period of latency has been selected. Since the latency period may exceed 20 or 30 years, a minimum retention period of 40 years has been established to cover employees who have experienced shorter periods of exposure, i.e. less than 20 years.

The three model standards also require that the employer keep an accurate medical record for each employee who is subject to surveillance. Section 8(c)(1) of the Act authorizes the promulgation of regulations requiring an employer to keep such records as are necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational illnesses. OSHA believes that medical records (like exposure monitoring records) are both necessary and appropriate to both the enforcement of the standards and the development of information regarding the causes and prevention of illness related to exposure to potential occupational carcinogens.

Like all records, medical records serve as an objective check that an employer has actually performed the substantive requirements of the standard. More importantly, as explained above, it is necessary to relate employee's medical effects with their exposures in order to develop information regarding cause and prevention. Medical records are necessary and appropriate for this purpose. In addition, medical records are necessary for the proper evaluation of an individual employee's health. For all of these reasons, medical records have been required in the three model standards.

M
I

The three model standards provide that the medical records must include information which is intended to identify the employee, to accurately reflect the employee's health, and to establish that the employee has had an opportunity to participate in a medical examination. The reasons for requiring the various aspects of the medical surveillance program have been explained. It is basically these requirements which dictate the content of the medical records.

The two model permanent standards require that medical records be maintained for at least 40 years or for the duration of employment plus 20 years, whichever is greater. OSHA believes that the same justification applies to the retention period for medical records as applies to the retention of exposure monitoring records.

The three model standards require that all records required to be maintained by the recordkeeping section be made available upon request to the Assistant Secretary and Director for examination and copying. The purpose of this section is to insure compliance with the recordkeeping regulations and to provide data necessary for development of information regarding the cause and prevention of occupational cancer.

The three model standards require that employees or their designated representatives be provided access to examine and copy records of required monitoring and measuring. The purpose of this provision is to inform current employees of their exposure levels. An additional purpose for this requirement is to protect the former employee's health over his entire lifespan by permitting him access to records indicating this exposure to potentially carcinogenic substances. Section 8(c)(3) of the Act states that regulations shall provide: "employees or their representatives with an opportunity to observe . . . monitoring or measuring . . . and to have access to the records thereof." Because the final standard permits monitoring which is "representative" of an employee's exposure, not monitoring of each individual employee's exposure, the former employee can also have the right to access to all those measurements from which his exposure was determined to gain assurance that his exposure measurement was properly calculated.

The three model standards require that required employee medical records be made available upon request for examination and copying to the affected employee or former employer or to a physician designated by the affected employee or former employee. The purpose of this provision is to protect the employee's health by authorizing his designated physician to have access to medical records useful in the diagnosis of illness.

The two model permanent standards require, with regard to the transfer of records, that in the event the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained under the recordkeeping section. The purpose of

this section is to assure that the records will be protected and preserved for the required retention period.

The two model permanent standards also require that in the event an employer ceases to do business and there is no successor to receive and retain the records for the prescribed period, the records are to be transmitted by registered mail to the Director of NIOSH. The purpose of this provision is to assure that records are preserved for the requisite retention period.

18. Paragraph (r): *Observation of Monitoring.* Section 8(c)(3) of the Act requires that employers provide employees or their representatives with the opportunity to observe monitoring of employee exposures to toxic substances or harmful physical agents. In accordance with this section, all three proposed model standards contain identical provisions for such observation. To assure that the right to observe is meaningful, observers would be entitled to receive an explanation of the measurement procedure, to observe all steps related to the measurement procedure and to record the results obtained.

The observer, whether an employee or designated representative, must be provided with, and is required to use, any personal protective devices required to be worn by employees working in the area that is being monitored, and must comply with all other applicable safety and health procedures.

19. Paragraph (s): *Effective Date.* The model ETS states that it becomes effective upon publication, as provided by section 6(c) of the Act. However, certain paragraphs do contain minimally longer periods in recognition of the difficulty in requiring "instant" compliance requirements for those respective paragraphs. The two model permanent standards provide that the Agency insert the appropriate effective date during each substance-by-substance rulemaking.

20. Paragraph (t): *Appendices.* All three model standards provide for three appendices: Appendix A entitled "Substance Safety Data Sheet," Appendix B entitled "Substance Technical Guidelines" and Appendix C entitled "Medical Surveillance Guidelines". It should be noted that the appendices will be included for informational purposes only and will vary because of the differing toxicological properties of each substance. None of the statements contained therein should be construed as imposing a mandatory requirement which is not otherwise imposed or as negating any requirement which is imposed by the standard.

The information contained in Appendices A and B is intended to aid the employer in complying with requirements of the standard. This information is also to be provided to employees as part of the annual training and education program. Appendix C gives the employer a means of providing the examining physician with an explanation of the potential health effects of exposure to the toxic material and provides information needed by the physician to evaluate the

results of the medical examination. Appendix C also lists other types of examinations, not required by the individual standard, which may help the physician in making an accurate determination of whether an employee should be exposed or should continue to be exposed to the toxic material.

IV. ENVIRONMENTAL AND ECONOMIC IMPACT ASSESSMENT

The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), requires, among other things, that Federal agencies assess their proposed major actions, including proposed rulemaking, to determine whether a significant impact on the quality of the human environment may result. Furthermore, 29 CFR Part 1999.3(d) requires that where OSHA determines that an environmental impact statement should be prepared, the determination to do so must be published in the FEDERAL REGISTER.

At the outset, it should be pointed out that OSHA intends to issue a draft and final environmental impact statement, where warranted, in connection with each and every individual rulemaking proceeding held pursuant to this proposed Part and subpart. In addition, OSHA intends to do so within a reasonable time after the issuance of the Category I toxic substance ETS (at the time of the issuance of the proposed 6(b) model permanent standard).¹⁰ Evaluation of the potential environmental impact of this set of regulations at this time appears to be of questionable legal

¹⁰ OSHA does not intend to issue a draft EIS at the time a Category I ETS is promulgated but only at the time that the Category I or Category II model permanent standard is proposed. As the Court observed in *Dry Color Manufacturers' Assn., Inc. v. Department of Labor*, 486 F.2d 98 (3rd Cir. 1973) at 107-08: ". . . while the NEPA requirement of an environmental impact statement applies to ordinary standards promulgated under the Occupational Safety and Health Act, an exception should be made for the Emergency Temporary Standard involved in this case. The process by which NEPA statements are produced and circulated is a lengthy one. To require its completion before the promulgation of an emergency temporary standard would impair the purpose of subsection 6(c) to provide speedy protection from grave dangers to the health of employees. No doubt any exemption of emergency temporary standards under this Act from the requirement of an environmental impact statement involves some sacrifice of the policy behind NEPA. However, that sacrifice is mitigated somewhat by the fact that an emergency temporary standard must be replaced within six months by a permanent standard, for which a completed impact statement is required, and it is, in any case, justified by the need to accommodate the provisions of NEPA with those of the Occupational Safety and Health Act. We therefore have concluded that where, as here, OSHA begins the process contemplated by NEPA by issuing a draft environmental impact statement within a reasonable time after issuing an emergency temporary standard, the requirements of NEPA are sufficiently satisfied." OSHA intends in the future, and has in the past, followed exactly that procedure.

necessity and value. This is so because until the proposal is implemented on a substance-by-substance basis, there can be little, if any, precise quantitative assessment of environmental impact. Such an attempt at this time must necessarily be highly speculative because of unknown substances and unidentified industries. Nevertheless, OSHA has attempted to evaluate the elements of environmental impact to the limited extent possible at this time. OSHA intends that the preceding description of the proposed standard, together with its supporting rationale, which relate primarily to the workplace environment, as well as the following section on external environmental impact, do constitute a draft environmental impact statement on this proposed set of regulations concerning the identification, classification, and regulation of potential carcinogens.

This statement has been prepared in accordance with the provisions of NEPA as well as the guidelines of the Council on Environmental Quality (40 CFR Part 1500). The purpose of this draft environmental impact statement, however, is to aid in OSHA's decision making on proposed actions which may have the potential for significantly affecting the quality of the human environment, and, hopefully, for the better. Written comments and information on the projected impacts of this proposed set of regulations, as well as the desirability of preparing an environmental impact statement at this time, are solicited from any interested persons or groups during the period for written comment submissions listed below in this Notice. In issuing the final set of regulations pursuant to this subpart, OSHA will determine whether a final environmental impact statement is required. In addition, prior to the hearing, OSHA will determine if it has facts not before it at present to amend or revise this draft environmental impact statement.

In addition to this general request for comment, copies of this proposal and draft environmental impact statement will be sent to numerous Federal and State agencies, industry representatives, employee unions, and public interest groups with requests for their comments. A copy of this listing is available in the OSHA Technical Data Center, Room S-6212, Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210.

Testimony, data, arguments, and related submissions on environmental impact will be received at the public hearing to be held on this proposed set of regulations on March 14, 1978, provided prehearing submission requirements, also outlined below, are complied with.

Additional copies of this draft environmental impact statement are available for review and copying in the OSHA Technical Data Center.

A. ALTERNATIVES

There appear to be at least three major areas of regulatory decision making which will affect the impact of this proposed Part and subpart on the exter-

nal environment. These are: (1) the scope and application of the applicable model standard, (2) the airborne permissible exposure limits, and (3) the methods by which compliance is mandated. The purpose of this section is to present the alternatives available. The discussion of the impact of each of these alternatives will be in the following section. At the outset however, it should be noted that the impacts on the workplace environment will be beneficial ones, with fewer cases of cancer in the years to come. This preamble details some of the studies and reports on which OSHA bases its belief that this beneficial impact will occur. Further, it is anticipated that more information concerning the proposal's potential for impacting the workplace environment will be introduced during the course of the public comment and hearing period of this rulemaking proceeding.

(1) *Scope and Application.* The three model standards apply to those industries or classes of operations that OSHA determines, in the individual rulemakings conducted pursuant to this proposal Part and subpart, should be regulated. Likewise, this proposal provides an exemption for those industries or classes of operations that OSHA has decided not to include, for the reasons stated in the respective preambles, in those subsequent rulemakings concerning individual toxic substances. As pointed out below, OSHA presently has no data which would quantify the impacts of those subsequent rulemakings as to regulation of toxic substances that will be classified as Category I or Category II toxic substances. Some alternatives would be to provide for no exemption on the one hand or limit application only to industries of major exposure on the other.

(2) *Permissible exposure limits.* The proposed Part and subpart propose that for Category I toxic substances, the permissible exposure limits shall be reduced to the lowest levels feasible, except in cases where suitable, less hazardous substances are available, in which case no occupational exposure is permitted. The model ETS and permanent standard for a Category I toxic substance also prohibit eye contact and skin contact to the toxic substance. The model permanent standard for a Category I toxic substance also prohibits a ceiling level of more than 5 times the airborne 8 hour time-weighted average.

The permissible exposure limits for Category I toxic substances are not chosen as "safe" or "no-effect" levels, but on the basis of OSHA's belief as to the lowest feasible levels. OSHA is mandated by the Act to consider feasibility in setting regulations. However, it is possible that after each such rulemaking contemplated by this proposed Part and Subpart, that a level lower than that set in the ETS or the proposed model standard could be shown to be feasibly attained either by existing controls or by the development of new controls. In that case, OSHA has the option to regulate to whatever level is determined to be appropriate. Likewise, where the proposed

level in the model permanent standard is shown to be infeasible to achieve, a higher figure may appear in the final standard.

As has been pointed out, in the case of the Category II toxic substances, present permissible exposure levels are retained where OSHA presently has a standard, sets permissible exposure limits where no OSHA standard presently exists or lowers the exposure limits found in a present OSHA standard where it can be shown that such levels do not protect against acute and chronic effects other than carcinogenicity.

Another regulatory alternative is to adopt differing standards for different industries, moderating the degree of regulation as deemed necessary for adequate and feasible protection of workers in the various industries where exposure to the Category I and Category II toxic substance exists.

In any event, regardless of the alternative chosen, the impacts of an OSHA regulation for a carcinogen can be summarized as follows: the more of the toxic substances emitted from the workplace into the air or into water systems, the greater the potential for adverse impacts on air and/or water quality. Depending upon the levels of the toxic substance present in the ambient air and water of communities surrounding regulated workplaces, however, better control of exposures in the workplace may have the potential for benefiting the general human environment of nearby areas as a result of limiting fugitive emissions and controlling point source emissions. In any event, in the case of Category I toxic substances, reduction of employee exposure to levels lower than that presently required under the current standard (29 CFR 1910.1000) or lower than present levels where no such standard exists at all should, have a beneficial impact upon the external environment as well. The same can be said for the regulation of Category II toxic substances where the permissible exposure limits can remain the same or be reduced.

(3) *Methods of Compliance.* OSHA's present regulation in 29 CFR 1910.1000, under which exposure levels for certain toxic materials have been set, provide that compliance be achieved first through administrative or engineering controls, where feasible, and, when such controls are not feasible, through the use of supplementary protective equipment.

The two model permanent standards (as distinct from the ETS) require the institution of engineering and work practice controls to reduce exposure to or below the permissible exposure limits. In addition, the proposal requires that a program be established and implemented to reduce exposures to or below the permissible exposure limits, solely by means of engineering and work practice controls. Protective clothing and equipment are also required where necessary to prevent eye contact or repeated skin contact.

Engineering controls may include the installation of local exhaust ventilation, modification of a process so as to reduce

I

emission, or substitution of a less hazardous substance.

Alternatives involved in the compliance section of the regulation are primarily concerned with establishing a particular priority among the types of controls (engineering, work practice, and respiratory protective equipment). Sole reliance on engineering controls or on use of engineering and work practices equally could be required. Another alternative would allow the employer complete freedom in choosing the method of control without any required priority systems.

Additionally, there are other areas in which alternative actions might variously have impact upon what is considered the external environment. One of these areas is medical surveillance. The proposed ETS provides, in general, for the minimum tests considered necessary over the short life of that standard. The two model permanent standards require, in general, a more comprehensive evaluation and perhaps a more sensitive means of detecting changes which may indicate effects of exposure to the individual toxic substances.

The possible impacts of these approaches will be discussed in the following chapter.

B. PROJECTED IMPACTS

The primary effect of this Part and subpart, as implemented in the subsequent substance-by-substance rulemakings that follow, is expected to impact on the workplace by reducing worker exposure to Category I and Category II toxic substances. A second potential impact may occur to the environment external to the workplace.

The impacts on workers and the work environment of this proposed set of regulations has already been treated above. This section attempts, to the best possible extent, to delineate the impacts of this Part and subpart on the external environment and will also consider the potential impacts of alternative regulatory measures and various compliance methods. It should be remembered that, where required, OSHA intends to develop an environmental impact statement where Category I and Category II toxic substances are classified in the individual rulemakings.

A standard for control of occupational exposure to a carcinogen has the potential for affecting the external air quality, water quality, waste disposal (a function of land use, air quality and water quality), energy consumption, and human resources. Economic costs of implementing an occupational health standard also has been determined to have the potential for impacting the general human environment.

The specifics of potential impacts, expected as a result of the promulgation of this proposed Part and subpart, cannot, as pointed out, be foreseen and is somewhat speculative. An overview however gives a general idea of some of the types of impacts which may result, and the ways in which they depend on the various alternatives involved in the regula-

tory decisionmaking and subsequent choice of compliance methods.

The first area of alternatives is in the scope and application of the subsequent rulemakings pursuant to this proposed Part and subpart. If, for some explained reason, a substantial industry or use were excluded from the scope of the standard, there might be little if any impact upon the external environment. The basic direction of the impacts would appear to be improvement of the ambient air quality by reduction of contamination of the employees' breathing air. It would also appear easier to control contamination of the external environment by converting non-point source emissions into point sources.

To the extent that monitoring and medical surveillance of employees is required, there will be an impact on medical resources and the supply of industrial hygienists. The full extent of this impact cannot be readily quantified although the incidence of cancer avoidance may ultimately lead to less demand upon such resources.

The second area of alternative is in setting the permissible exposure limits. This area is integrally related to the methods of compliance (the third area of alternatives) used to achieve control of exposure to or below the permissible exposure limits. The choice of alternative levels of exposure compliance is expected to have impact in some way every category of the external environment.

In a general sense, reduction of exposure to liquid toxic substances will involve engineering control to prevent emissions at the source, work practices to prevent accidental spills and contacts and good housekeeping procedures to cope with spills when they do occur.

In the case of dust, if control of employee exposures are achieved, for example, by methods which collect the exhausted fumes, dust, vapors, etc. of the toxic substance, logically, air quality in the neighborhood surrounding workplaces containing the toxic substance may be improved. Similarly, the method of dust collection and disposal could impact water quality, solid waste and land use categories.

Respirators may also be used in some cases to prevent worker exposure to dust, vapor, etc. An additional method of compliance might be the substitution of some other substance.

The extent of engineering control required is to some extent relative to the level of exposure which must be met. If exposure is to be controlled by preventing leaks and evaporation, then the controls would have to be tighter and perhaps more extensive to meet lower exposure limits. This would result in less workplace contamination and, thereby, lower ambient emissions. On the other hand, if control is achieved by ventilation, the amount of contamination by the toxic substance would remain constant but the rate of exhaust outside the plant would increase. This increased flow rate may not affect the ambient air

quality, but might result in an insignificant increase in energy consumption.

Likewise, tighter engineering controls to achieve lower levels of exposure escape of the toxic substance into the effluent discharge, represent a positive impact on water quality. Conversely, other means of control and their degree of effectiveness may result in increased contamination of water and increased sludge production, representing a potential negative impact on both water quality and the amount of solid waste. The exposure levels and compliance methods chosen should have no effect on the amount of monitoring and medical surveillance required. However, the degree of impact on human resources will depend on the contents of monitoring and medical surveillance provisions.

In sum, as pointed out, OSHA has little data which quantify these potential impacts but will issue an EIS, where required, in the case of each individual rulemakings held pursuant to this proposed Part and subpart. Submissions and public comment into the record of this proceeding concerning this issue are encouraged. Likewise, OSHA believes that potential impacts upon human resources, energy, land use and other economic aspects posed by the proposed set of regulations cannot be readily be quantified, except in the individual environmental impact statements prepared and issued at the time of the substance-by-substance rulemakings pursuant to this proposed part and subpart.

C. RELATIONSHIP WITH OTHER FEDERAL ACTIONS

Workers exposed to a toxic material during industrial operations constitute that portion of the general population most exposed to its health hazards. Any OSHA standard to limit occupational exposure to that toxic material is written for their protection. However, since workers are exposed in a variety of industries and because many toxic materials may be released to the general environment and have impacts on the consumer and the environment external to the workplace this rulemaking is also a matter of concern to EPA, CPSC and FDA. OSHA intends to coordinate its activities with these and other agencies in this and the subsequent rulemakings.

D. ECONOMIC IMPACT ASSESSMENT

The Assistant Secretary of Labor for Occupational Safety and Health has determined that economic impact assessments, as applicable, will be performed pursuant to Executive Orders 11821 (39 FR 41501) and 11949 (42 FR 1017) in the individual rulemakings to be conducted pursuant to this Part and subpart, where it is possible to consider such impacts.

V. PUBLIC PARTICIPATION; NOTICE OF HEARING

On January 20, 1977, the Assistant Secretary of Labor for OSHA transmitted for review and comment a draft of this proposed set of regulations, and preamble, to the National Advisory Com-

mittee on Safety and Health (NACOSH), a standing advisory committee provided for by section 7(a) of the Act.

After several subcommittee meetings, which were duly announced in the *FEDERAL REGISTER*, to discuss the draft preamble and regulations, the two relevant NACOSH subcommittees, one the subcommittee on Standards and the other on Policy and Budget, on April 5, 1977, adopted their position which was received and adopted by the full NACOSH committee on May 5, 1977. The resolution stated:

RECOMMENDATIONS ON PROPOSED REGULATION OF CERTAIN TOXIC MATERIALS

Having reviewed the draft document "Regulation of Certain Toxic Materials", we endorse OSHA's general attempt to deal with this difficult problem. In order to develop in the public forum the various factors, including certain legal and scientific issues, for a regulatory carcinogen policy to govern OSHA's administrative approach and to propose should be published in the *FEDERAL REGISTER* solely for the purpose of information gathering and that neither the document nor the process be engaged for a rulemaking purpose at this time. This recommendation is proposed since:

1. The document can be adopted by OSHA as an administrative policy, and there should be such flexibility.
2. The document, even if adopted as a policy through the rulemaking process, would not deprive due process challenges when subsequent standards are promulgated.
3. The document identifies those issues upon which much debate has evolved and should continue, including the concept that some substances, although not always scientifically definable as carcinogens, must be addressed because of a regulatory obligation.

ISSUES WHICH NEED TO BE EXPANDED

1. Address adequacy of classification system.
2. Address carcinogenicity of impurities and mixtures.
3. Expand discussion on "other than animal testing" routes.
4. Anatomic and metabolic fate.
5. Decision on rate retention issue.

OSHA has carefully reviewed NACOSH's recommendations. Because of importance of the issues raised herein and in order to assure participation in resolution of these issues and maximum usefulness of the cancer policy once adopted, OSHA believes that it should commence this rulemaking at this time with the full procedures provided for in section 6(b) of the Act. The alternative could well be an internal pronouncement of policy which might effect substantive rights of interested parties and therefore not be sustainable in the Courts, thus, in actuality delaying its effective date in this important area by years.

Interested persons are invited to submit written data, views and arguments on this proposed Part, subpart and all issues raised or involved herein. These comments must be postmarked on or before December 8, 1977 and must be submitted in quadruplicate to the Docket Officer, Docket No. H-090, Room S-6212, U.S. Department of Labor, 3rd Street and Constitution Avenue NW., Wash-

ington, D.C. 20210. Written submissions must clearly identify the provisions of the proposal addressed and the position taken with respect to each such provision. The data, views, and arguments will be available for public inspection and copying at the above address. All written submissions received will be made a part of the record of this proceeding.

In order to expedite this rulemaking proceeding and in anticipation of requests for a hearing, OSHA is scheduling an informal public hearing, pursuant to section 6(b)(3) of the Act and 29 CFR Part 1911, to begin on March 14, 1978 in the Department of Labor Auditorium, 3rd Street and Constitution Avenue NW., Washington, D.C.

All issues raised in this notice and all aspects of the proposed set of regulations including OSHA's views on its economic and environmental impacts, will be at issue in the hearing.

NOTICES OF INTENTION TO APPEAR

All persons who desire to participate at the hearing must file a notice of intention to appear, postmarked on or before December 8, 1977 with the OSHA Office of Consumer Affairs, Room N3633, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210 (Telephone: 202-523-8023). The notices of intention to appear, which will be available for inspection and copying at the above address, must contain the following information:

- (1) The name, address and telephone number of each person to appear;
- (2) The capacity in which the person will appear;
- (3) The approximate amount of time required for the presentation;
- (4) The specific issue raised by the proposal that will be addressed;
- (5) A detailed statement of the position that will be taken with respect to each issue addressed; and
- (6) Whether the party intends to submit documentary evidence, and if so, a brief summary of that evidence.

FILING OF TESTIMONY AND EVIDENCE BEFORE HEARING

Any party requesting more than 15 minutes for a presentation at the hearing, or who will submit documentary evidence, must provide in quadruplicate the complete text of testimony, including any documentary evidence to be presented at the hearing, to the OSHA Division of Consumer Affairs. This material must be received by January 9, 1978, and will be available for inspection and copying at the Technical Data Center—Docket Office. Each such submission will be reviewed in light of the amount of time requested in the notice of intention to appear. In those instances where the information contained in the submission does not justify the amount of time requested, a more appropriate amount of time will be allocated and the participant will be notified of that fact.

Any party who has not substantially complied with this requirement may be

limited to a 15 minute presentation, and may be requested to return for questioning at a later time.

Testimony of witnesses to be called by OSHA will be filed and made available to the public on or before February 28, 1978.

CONDUCT OF THE HEARING

The hearing will commence at 9:30 a.m. on March 14, 1978 and will be conducted in accordance with 29 CFR Part 1911. The oral proceedings will be reported verbatim and a transcript will be made available for inspection and copying to interested persons.

The Administrative Law Judge, who will be designated to preside at the hearing, shall have all the powers necessary or appropriate to conduct a fair and full informal hearing, including the powers:

- (1) To regulate the course of the proceedings;
- (2) To dispose of prehearing requests, objections, and comparable matters;
- (3) To confine presentations to matters pertinent to the proposed standard;
- (4) To regulate the conduct of those present at the hearing by appropriate means;
- (5) In his discretion, to question and permit questioning of any witness; and
- (6) In his discretion, to keep the record open to receive written information and additional data, views, and arguments from any person who has participated in the oral proceedings.

Following the close of the hearing, the presiding Administrative Law Judge shall certify the record thereof to the Assistant Secretary of Labor for Occupational Safety and Health. The proposal will be reviewed in light of all the oral and written submissions received as part of the record in this proceeding and appropriate action will be taken.

VI. AUTHORITY

This document was prepared under the direction of Eula Bingham, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, Third Street and Constitution Avenue NW., Washington, D.C. 20210.

Accordingly, pursuant to sections 4(b), 6(b), 8(c) and 8(g) of the Occupational Safety and Health Act of 1970 (84 Stat. 1592, 1593, 1599; 29 U.S.C. 653, 655, 657), the Secretary of Labor's Order 8-76 (41 FR 25059) and 29 CFR Part 1911, it is hereby proposed to amend Title 29, of the Code of Federal Regulations, by adding a new Part 1990, to identify, classify, and regulate certain toxic substances, as set forth below.

Signed at Washington, D.C., this 28th day of September 1977.

EULA BINGHAM,
Assistant Secretary of Labor.

A new Part 1990, and certain subparts thereto, are proposed to be added to Title 29 of the Code of Federal Regulations, reading as follows:

PART 1990—IDENTIFICATION, CLASSIFICATION AND REGULATION OF CERTAIN TOXIC SUBSTANCES

Subpart A—General

Sec. 1990.1 Scope.
1990.2 Purpose.

Subpart B—Identification, Classification and Regulation of Toxic Substances Posing a Potential Carcinogenic Risk

GENERAL

1990.101 Scope.
1990.102 Definitions.
1990.103 Classification of substances.
1990.104 Advisory committees.

CATEGORY I TOXIC SUBSTANCES

1990.110 Category I Toxic substances.
1990.111 Rebuttal of a category I classification to a category II or III classification.
1990.112 Consequences of a category I classification.
1990.113 Limitation of issues in the rulemaking.
1990.114 Final action after a category I rulemaking.

CATEGORY II TOXIC SUBSTANCES

1990.120 Category II Toxic substances.
1990.121 Rebuttal of a category II classification to a category III classification.
1990.122 Consequences of a category II classification.
1990.123 Limitation of issues in the rulemaking.
1990.124 Final action after a category II rulemaking.

CATEGORY III TOXIC SUBSTANCES

1990.130 Category III toxic substances.
1990.131 Consequences of a category III classification.
1990.132 Reconsideration of a category III classification.
1990.133 The category III toxic substances list.

CATEGORY IV TOXIC SUBSTANCES

1990.140 Category IV toxic substances.
1990.141 The category IV toxic substances list.

MODEL STANDARDS

1990.150 Section 6(c) model standard for a category I toxic substance.
1990.160 Section 6(b) model standard for a category I toxic substance.
1990.170 Section 6(b) model standard for a category II toxic substance.

Subpart C—Identification, Classification and Regulation of Toxic Substances Posing a Potential Occupational Teratogenic Risk [Reserved]

Subpart A—General

§ 1990.1 Scope.

This Part provides for the identification, classification and regulation of certain toxic materials, pursuant to the Occupational Safety and Health Act of 1970 (the Act), as set forth in the various subparts below:

§ 1990.2 Purpose.

The Act provides, among other things, that "the Secretary, in promulgating standards dealing with toxic materials or harmful physical agents under this subsection, shall set the standard which most adequately assures, to the extent feasible, on the basis of the best available evidence, that no employee will suf-

fer material impairment of health or functional capacity even if such employee has regular exposure to the hazard dealt with by such standard for the period of his working life. Development of standards under this subsection shall be based upon research, demonstrations, experiments, and such other information as may be appropriate. In addition to the attainment of the highest degree of health and safety protection for the employee, other considerations shall be the latest available scientific data in the field, the feasibility of the standards, and experience gained under this and other health and safety laws. Whenever practicable, the standard promulgated shall be expressed in terms of objective criteria and of the performance desired". (Section 6(b)(5)). It is the purpose of the regulations of this Part to carry out the intent of the Act.

Subpart B—Identification, Classification and Regulation of Toxic Substances Posing a Potential Occupational Carcinogenic Risk General

§ 1990.101 Scope.

This subpart provides for the identification, classification and regulation of toxic substances which pose an occupational carcinogenic risk to workers.

§ 1990.102 Definitions.

Terms used in this subpart shall have the meanings set forth in the Act. In addition, as used in this subpart, the following terms shall have the meanings set forth below:

"Act" means the Occupational Safety and Health Act of 1970 (Pub. L. 91-596, 84 Stat. 1590 *et seq.*).

"Administrator of EPA" means the Administrator of the United States Environmental Protection Agency, or designee.

"Chairman of CPSC" means the Chairman of the United States Consumer Product Safety Commission.

"Commissioner of FDA" means the Commissioner of the Food and Drug Administration, United States Department of Health, Education, and Welfare or designee.

"Director of NCI" means the Director of the National Cancer Institute, United States Department of Health, Education, and Welfare, or designee.

"Director of NIOSH" means the Director of the National Institute for Occupational Safety and Health, United States Department of Health, Education, and Welfare, or designee.

"Foreign toxic substance" means any toxic material that would meet the definition of a toxic substance, except that it is not found in the American workplace.

"Mutagenesis" means the property of a toxic material to induce changes in the genetic material of either somatic or germinal cells or tissues in subsequent generations.

"Potential occupational carcinogen" means any toxic substance which (1) Causes, at any level of exposure or dose, as the result of any oral, respiratory or

dermal exposure, or any other exposure which results in the systemic distribution of the substance under consideration, in the organism tested, an increased incidence of benign or malignant neoplasms, or a combination thereof, in (i) humans or (ii) in one or more experimental mammalian species, or (2) in a statistically significant manner decreases the latency period between exposure and onset of neoplasm in (i) humans or (ii) in one or more experimental mammalian species.

"Secretary" means the Secretary of Labor, or designee.

"Short-term tests" includes, but is not limited to positive results in more than one of the following assays for: (1) the induction of DNA damage and repair; (2) mutagenesis in bacteria, yeast, or *Drosophila melanogaster*; (3) mutagenesis in mammalian somatic cells; (4) mutagenesis in mammalian germinal cells; or (5) positive results in tests for neoplastic transformation of mammalian cells in culture.

"Suggestive" means that degree of confidence in test animal or human data which is less than persuasive or not statistically significant but which, nonetheless, raises scientific concerns that the toxic substance may pose a carcinogenic risk to the exposed animals or humans.

"Toxic substance", for the purposes of this subpart, means any toxic material, found in the American workplace, either a single chemical substance or combination of substances, or any other agent, which has been reported by scientific study, at any level of exposure or dose, as the result of any exposure, to (1) Cause neoplasms, benign or malignant, in (i) humans or (ii) in one or more experimental mammalian species, or (2) In a statistically significant manner decreases the latency period between exposure and onset of neoplasms, in (i) humans or (ii) in one or more experimental mammalian species.

§ 1990.103 Classification of substances.

(a) *General.* (1) Whenever the Secretary receives information, submitted to him in writing by any interested person, concerning any toxic substance, or upon his own cognizance has any such information, he shall, to assist him in developing information relevant to the classification of a toxic substance: (i) Within thirty (30) days publish a notice of receipt in the FEDERAL REGISTER, together with a short statement identifying the contents and sources of such information, and shall provide a period for public comment, except as provided by (a)(2) herein, or (ii) Where the Secretary certifies in writing to the interested party that information exists that additional scientific data or study that may be relevant to the classification of a toxic substance is not immediately available or does not yet exist but will be available within a short period of time, the Secretary may delay the publication date of receipt of the original

information in the FEDERAL REGISTER referred to but in no case shall the publication date be extended to more than one hundred and eighty (180) days after the receipt of the original information.

(2) The period for public comment provided for by § 1990.103(a) (1) shall be at least thirty (30) days but not more than sixty (60) days unless the Secretary determines issued that extraordinary circumstances warrant less or no time for such public comment.

(b) *Classification.* Within thirty (30) days from the close of the comment period, or from the receipt of the report of an Advisory Committee as provided by § 1990.104, the Secretary shall classify or reclassify the toxic substance in accordance with the criteria set forth in this subpart and publish in the FEDERAL REGISTER a notice of his decision as to the classification of that substance, together with the other consequences and actions required by this subpart.

(c) *Reclassification.* As to toxic substances previously classified pursuant to this subpart, the term "information" as used by § 1990.103(a) is limited to additional evidence, not reviewed at the time of the issuance of the final standard, or to a new scientific review of the then existing evidence.

§ 1990.104 Advisory committees.

At any time the Secretary decides to appoint an advisory committee, pursuant to sections 6(b) and 7 of the Act, to assist him in his standard-setting function concerning any toxic substance, he shall require that the advisory committee submit to him its recommendations regarding the rule to be promulgated no later than ninety (90) days from the date of its appointment.

CATEGORY I TOXIC SUBSTANCES

§ 1990.110 Category I toxic substances.

A presumption exists that a toxic substance shall be classified by the Secretary as a "Category I Toxic Substance" if: (a) the toxic substance meets the definition of a "potential occupational carcinogen" in (1) humans, or (2) two mammalian test species, or (3) a single mammalian species, if those results have been replicated in the same species in another experiment or (4) a single mammalian species if those results are supported by short-term tests, or (b) the Secretary finds that any other evidence is sufficient to convince him that the toxic substance should be classified as a Category I Toxic Substance.

§ 1990.111 Rebuttal of a category I classification to a Category II or III classification.

(a) The presumption that a toxic substance be classified as a Category I toxic substance shall be rebutted if the Secretary determines, after consultation with the Director of NIOSH, that scientifically:

(1) The carcinogenic evidence based on animal data clearly resulted from physical, rather than chemical induction; or

(2) The route of exposure in animals is grossly inappropriate relative to the potential occupational routes of human exposure; or

(3) The human or animal data relied upon are only suggestive; or

(4) The human or animal data relied upon are totally inadequate to establish any conclusion with respect to the carcinogenicity or non-carcinogenicity of the toxic substance; or

(5) For some other reason, the positive results in the experimental animal species are not scientifically relevant to man insofar as the toxic substance in question is concerned.

(b) Such determinations and reasons shall be in writing and published in the FEDERAL REGISTER, pursuant to section 1990.103, and shall classify the substance as a Category II toxic substance if the determination was based on § 1990.111 (a) (3) in that the Secretary has determined that the human or animal studies relied upon are only suggestive. All other toxic substances for which the Secretary has determined that a Category I classification is inappropriate shall be classified as a Category III toxic substance.

§ 1990.112 Consequences of a category I classification.

In the event the Secretary determines that a toxic substance shall be classified as a Category I Toxic Substance, he shall require the initiation of the following actions:

(a) He shall, at the time he classifies the toxic substance as Category I, issue an Emergency Temporary Standard, pursuant to section 6(c) of the Act, which shall follow the format and content of the model emergency temporary standard set forth in § 1990.150. Any deviation, addition or change from that format or content shall be explained, together with the reasons therefor.

(b) He shall, within sixty (60) days from such classification, issue a notice of proposed rulemaking, pursuant to section 6(b) of the Act, which shall follow the format and content of the model standard set forth in § 1990.150. Any deviation, addition or change from that format or content shall be explained, together with the reasons therefor. The permissible exposure limits, insofar as the proposed standard is concerned, shall be set as low as feasible. When it is determined by the Secretary that there are suitable substitutes for certain uses or classes of uses that are less hazardous to humans, on the basis of the best available evidence, the proposal shall permit no occupational exposure for such uses or classes of uses.

§ 1990.113 Limitation of issues in the rulemaking.

At any time after a request for a public hearing is made or upon his initiative, subsequent to the publication of the documents referred to in § 1990.112, the Secretary shall provide for such a hearing in accordance with Section 6(b) of the Act, the regulations thereunder and 29 CFR Part 1911. The issues in the hearing or in comment shall be limited to the fol-

lowing: (a) Whether the Secretary correctly classified the toxic substance according to the Category I criteria (§ 1990.110); (b) whether the Secretary was correct in his determination that the Category I classification should not be rebutted (§ 1990.111); (c) the determination of the lowest feasible occupational exposure, or whether there are suitable substitutes that are found to be less hazardous to humans than the toxic substance; (d) whether the toxic substance has unique properties or uses that make the specific protective measures of the proposed standard inappropriate or infeasible; and (e) the environmental impact arising from regulation of the toxic substance.

§ 1990.114 Final action after a category I rulemaking.

(a) *Affirmance.* At the conclusion of the Category I rulemaking, if the Secretary determines, based on the record, that his classification of the toxic substance as Category I was correct and that his decision not to rebut the presumption was also correct, he shall issue a standard which shall follow the format and content of the model standard contained in § 1990.160. Any deviation, addition or change from that format and content shall be explained, together with the reasons and evidence therefor. However, the permissible exposure level shall be set as low as feasible or, when it is determined by the Secretary that there are suitable substitutes that are less hazardous to humans, on the best available evidence, no occupational exposure shall be permitted for that use or class of use.

(b) *Change in classification.* At the conclusion of the Category I rulemaking, if the Secretary determines, based on the record, that his classification of the toxic substance as a Category I Toxic Substance was incorrect, or that his decision not to rebut the presumption was incorrect, he shall classify the toxic substance as a Category II or III Toxic Substance, as follows:

(1) If the Secretary determines that the toxic substance should have been classified as a Category II Toxic Substance, he shall issue a final standard which shall follow the format and content of the model standard contained in § 1990.170. Any deviation, addition or change from that format and content shall be explained, together with the reasons therefor.

(2) If the Secretary determines that the toxic substance should have been classified as a Category III Toxic Substance, he shall follow the procedures provided by § 1990.131.

CATEGORY II TOXIC SUBSTANCES

§ 1990.120 Category II toxic substances.

A toxic substance shall be classified by the Secretary as a "Category II Toxic Substance" if the toxic substance meets the definition of a "potential occupational carcinogen" in studies in test animals or humans, the results of which, however, were found by the Secretary,

pursuant to § 190.111(a)(3), to be only suggestive. This classification is required and is not presumptive. In addition, a presumption exists that a toxic substance shall be classified by the Secretary as a "Category II Toxic Substance" if: (a) The toxic substance meets the definition of a "potential occupational carcinogen" in an unreplicated experiment in a single mammalian test species or (b) the Secretary finds that any other evidence is sufficient to convince him that the toxic substance should be classified as a Category II Toxic Substance.

§ 190.121. Rebuttal of a category II classification to a category III classification.

(a) The presumption that a toxic substance be classified as a Category II toxic substance shall be rebutted if the Secretary determines, after consultation with the Director of NIOSH, that scientifically:

(1) The carcinogenic evidence based on the animal data clearly resulted from physical, rather than chemical induction, or

(2) The route of exposure in animals is grossly inappropriate relative to the potential occupational routes of human exposure, or

(3) The animal data in a single mammalian test species is less than suggestive; or

(4) For some other reason, the positive results in the experimental animal species are not scientifically relevant to man insofar as the toxic substance in question is concerned.

(b) Such determinations and reasons shall be in writing and published in the FEDERAL REGISTER, pursuant to § 190.103, and shall classify the substance as a Category III toxic material.

§ 190.122. Consequences of a category II classification.

In the event the Secretary determines that a toxic substance shall be classified as a Category II Toxic Substance, he shall require the initiation of the following actions:

(a) He shall, within sixty (60) days from the announcement of his intent to classify the toxic substance as a Category II toxic substance, issue a notice of proposed rulemaking, pursuant to section 6(b) of the Act, which shall follow the format and content of the model standard set forth in section 190.170. Any deviation, addition or change from that format or content shall be explained, together with the reasons therefor. The permissible exposure limits, insofar as the proposal is concerned, shall be: (1) the present OSHA standard or (2) where none exists, an appropriate level based upon acute or chronic effects of exposure to the toxic substance other than carcinogenicity or (3) where acute or chronic effects indicate that the present OSHA standard is inadequate, the exposure level shall be lowered to the level found appropriate by the Secretary. He shall also give notice that if, pursuant to the rulemaking, it is determined that the

toxic substance should be classified as a Category I toxic substance, the final standard will be that required by 190.160 herein.

(b) He shall notify the applicable federal and state agencies, including the Administrator of EPA, the Director of NCI, the Director of NIOSH, Commissioner of FDA and the Chairman of CPSC of the determination that the evidence is "only suggestive" or that the evidence consists of only positive results in one mammalian species and request that the applicable agencies engage in, or stimulate, further research pursuant to their legislative authority, to develop new and additional scientific data.

§ 190.123. Limitation of issues in the rulemaking.

At any time after a request for a public hearing is made or upon his initiative, subsequent to the publication of the documents referred to in § 190.122, the Secretary shall provide for such a hearing in accordance with section 6(b) of the Act, the regulations thereunder and 29 CFR Part 1911. The issues in the hearing or in comment shall be limited to the following: (a) Whether the Secretary correctly classified the toxic substance according to the Category II criteria (§ 190.120); (b) Whether the Secretary was correct in his determination that the Category II classification should not be rebutted (§ 190.121); (c) If OSHA presently has no standard, or it is inadequate based on considerations of acute or chronic effects other than carcinogenicity, the appropriate level of exposures; (d) Whether the toxic substance has unique properties or uses that make the specific protective measures of the proposed standard inappropriate or infeasible; and (e) the environmental impact arising from regulation of the toxic substance.

§ 190.124. Final action after a category II rulemaking.

(a) *Affirmance.* At the conclusion of the Category II rulemaking, if the Secretary determines, based on the record, that his classification of the toxic material as Category II was correct and that his decision not to rebut the presumption was also correct, he shall issue a standard which shall follow the format and content of the model standard contained in § 190.170. Any deviation, addition or change from that format and content shall be explained, together with the reasons and evidence therefor.

(b) *Change in classification.* At the conclusion of the Category II rulemaking, if the Secretary determines, based on the record, that his classification of the toxic substance as a Category II Toxic Substance was incorrect, or that his decision not to rebut the presumption was incorrect, he shall classify the toxic substance as a Category I or Category III Toxic Substance, as follows:

(1) If the Secretary determines that the toxic substance should have been classified as a Category I Toxic Substance, he shall issue a standard which shall follow the format and content of

the model standard contained in § 190.160. Any deviation, addition or change from that format and content shall be explained, together with the reasons therefor.

(2) If the Secretary determines that the Toxic Substance, should have been classified as a Category III Toxic Substance, he shall follow the procedure provided by § 190.131.

CATEGORY III TOXIC SUBSTANCES

§ 190.130. Category III toxic substances.

Any toxic substance not classified by the Secretary as a Category I or a Category II toxic substance, pursuant to this subpart, shall be classified as a Category III Toxic Substance.

§ 190.131. Consequences of a category III classification.

(a) At the time a toxic substance is classified as Category III, the Secretary shall transmit his findings to the Director of NCI, the Director of NIOSH, the Administrator of EPA, the Commissioner of FDA, and the Chairman of CPSC with a request that each determine whether there is additional information, previously unavailable to, or unreviewed by, the Secretary, which could have a bearing on reconsideration of the Category III classification of the toxic substance.

(b) The determination that a Toxic Substance is classified by the Secretary as a Category III Toxic Substance shall be published and appropriately updated in the FEDERAL REGISTER and the Code of Federal Regulations.

§ 190.132. Reconsideration of a category III classification.

If, at any time, any of the agencies, referred to in Section 190.131, provide additional information having a bearing on the initial determination of classification, the Secretary shall, within thirty (30) days after the receipt of such a response, publish in the FEDERAL REGISTER the response and reconsider his decision to classify the toxic substance as Category III.

§ 190.133. The category III toxic substance list.

The following substances have been determined by the Secretary to be Category III toxic substances for the purposes of this subpart. They are:

Name: Federal Register date of final publication
1. Water Aug. 26, 1977

CATEGORY IV TOXIC SUBSTANCES

§ 190.140. Category IV toxic substances.

(a) Notwithstanding any other provision of this subpart, whenever the Secretary determines after consultation with the Administrator of EPA, the Director of NIOSH, the Director of NCI, the Commissioner of FDA and the Chairman of CPSC that a toxic material would meet the definition of a toxic substance except that it is not found in the American workplace and therefore meets the definition of a foreign toxic

substance, he shall publish in the FEDERAL REGISTER a notice of his intent to classify the foreign toxic substance as a Category IV Toxic Substance and shall provide a period of at least thirty (30) days but not more than sixty (60) days for public comment.

(b) Within thirty (30) days from the close of the comment period, or from the receipt of the report of an Advisory Committee as provided by § 190.104, the Secretary shall classify the foreign toxic substance as a Category IV Toxic Substance and list such foreign toxic substance in § 190.141 hereof or, if he determines that his original intent was in error, the Secretary shall initiate the procedures required by § 190.103(a) et seq. hereof.

(c) The determination that such toxic substance is not found in the American workplace shall be published and appropriately updated in the FEDERAL REGISTER and Code of Federal Regulations.

(d) Whenever the Secretary receives information, submitted to him in writing by any interested person, or upon his own cognizance has any information, that such toxic substance previously classified as a Category IV toxic substance is, has been, or will be found in an American workplace, the Secretary shall, within thirty (30) days, initiate the procedures required by § 190.103(a) et seq. hereof.

§ 190.141. The category IV toxic substance list.

The following substances are foreign toxic substances that the Secretary has determined are not found in any American workplace. They are:

Name: Federal Register date of final publication
1. French water Aug. 25, 1977
MODEL STANDARDS

§ 190.150. Section 6(c) Model Standard for a Category I Toxic Substance.

OCCUPATIONAL EXPOSURE TO XXXXX EMERGENCY TEMPORARY STANDARD Section 1910.0000 XXXX

(a) *Scope and application.* This section applies to all occupational exposures to XXXX, (Chemical Abstracts Service Registry Number 00000), except that this section does not apply to: (to be filled in as applicable.)

(b) *Definitions.* "XXXX" means (definition of substance to be regulated).

"Authorized person" means any person specifically authorized by the employer and whose duties require the person to be present in areas where XXXX is present; and any person entering such an area as a designated representative of employees for the purpose of exercising the opportunity to observe monitoring procedures under paragraph (r) of this section.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education, and Welfare, or designee.

"OSHA Area Office" means the Area Office of the Occupational Safety and Health Ad-

ministration having jurisdiction over the geographic area where the affected workplace is located.

(c) *Permissible exposure limits.* (1) *Inhalation.* (i) *Time-weighted average limit (TWA).* Within (insert appropriate time) from the effective date of this emergency temporary standard, the employer shall assure that no employee is exposed to an airborne concentration of XXXX in excess of: (insert appropriate exposure limit representing the lowest feasible level that can be complied with immediately) as an eight (8)-hour time-weighted average.

(ii) *Ceiling limit.* (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of XXXX in excess of: (insert appropriate exposure limit representing the lowest feasible level that can be complied with immediately) as averaged over any: (insert appropriate time period) during the working day.

(2) *Dermal and eye exposure.* The employer shall assure that no employee is exposed to eye contact or skin contact with XXXX.

(d) *Notification of Use.* Within (insert appropriate time) of the effective date of this section, or within fifteen (15) days following the introduction of XXXX into the workplace, every employer shall report the following information to the nearest OSHA Area Office for each such workplace:

(1) The address and location of each workplace in which XXXX is present;

(2) A brief description of each process or operation which may result in employee exposure to XXXX;

(3) The number of employees engaged in each process or operation who may be exposed to XXXX and an estimate of the frequency and degree of exposure that occurs; and

(4) A brief description of the employer's safety and health program as it relates to limitation of employee exposure to XXXX;

(e) *Exposure monitoring.* (1) *General.* (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to XXXX over an eight (8) hour period.

(ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

(2) *Initial monitoring.* Each employer who has a place of employment in which XXXX is present shall monitor, within thirty (30) days of the effective date of this standard, each such workplace and work operation to accurately determine the airborne concentrations of XXXX to which employees may be exposed.

(3) *Frequency.* (i) If the monitoring, required by this section, reveals employee exposure to be below the permissible exposure limits, the employer shall repeat such monitoring at least quarterly.

(ii) If the monitoring, required by this section, reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat these determinations for each such employee at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.

(4) *Additional monitoring.* Whenever there has been a production, process, control or personnel change which may result in new or additional exposure to XXXX, or whenever the employer has any other reason to suspect a change which may result in new or additional exposures to XXXX, additional monitoring which complies with this paragraph shall be conducted.

(5) *Employee notification.*

(i) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employee's exposure.

(ii) Whenever the results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice a statement that permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

(6) *Accuracy of measurement.* The method of measurement shall be accurate, to a confidence level of 95 percent, to within plus or minus (insert appropriate value) for concentrations of XXXX at or above the permissible exposure limits.

(7) *Type of monitoring.* (Where applicable, specific mandatory monitoring, devices and techniques may be required.)

(8) *Regulated areas.* (Deleted.)

(g) *Methods of compliance.* (1) *General policy.* OSHA's general policy as to methods of compliance for permanent standards has traditionally required that employee exposures to a substance be reduced to the permissible exposure limits solely by use of engineering and work practice controls. OSHA has permitted reduction of employee exposures by use of respiratory protection only where the employer proves that engineering and work practice controls are not feasible to reduce such exposures to the permissible exposure limits. This general policy is inherent in the model standards found in 29 CFR 190.160 and 190.170. However, during the effective period of this emergency temporary standard, OSHA recognizes the need to permit employee exposures to airborne concentrations of XXXX to be controlled by any practicable combination of engineering controls, work practices and personal protective devices and equipment as follows. OSHA recognizes that the immediate reduction of exposure to XXXX may generally be achieved primarily through the use of respiratory protection and the institution of good work practices during the effective period of this emergency temporary standard, such as the prohibitions against the blowing of dust containing XXXX or the permitting of open containers and vessels of liquids containing XXXX. On the other hand, OSHA believes that where engineering or work practice controls can reduce exposure, they should be used, even where such controls by themselves do not reduce the exposures to the permissible exposure limits. Thus, engineering controls to reduce the airborne concentration of XXXX shall be instituted, if practicable, as soon as possible. Examples of such controls include substitution of a less hazardous material, enclosure of the process, and use of local exhaust ventilation systems. The employer should also examine each work area in which XXXX is present and institute, as soon as possible, work practices to reduce employee exposures to XXXX to or below the permissible exposure limits. Examples of such work practices include, among other things, limiting access to work areas where XXXX is present to authorized personnel only; written procedures and work practices for each operation which may result in employee exposure to XXXX; prohibiting smoking and the consumption of food and beverages in work areas where XXXX is present; requiring the use of appropriate personal protective clothing and equipment to minimize eye and skin contact with XXXX; use of signs, labels, or other means to clearly designate all work areas where XXXX may be present; and institution of good housekeeping practices as set forth in paragraph (k) of this section. Finally, as pointed out, when-

ever the engineering and work practice controls described are not sufficient to reduce employee exposures to or below the permissible exposure limits, the employer should supplement them by the use of respiratory protection which complies with the requirements of the emergency temporary standard.

(2) *Engineering and work practice control plan.* (i) Within ninety (90) days of the effective date of this emergency temporary standard, the employer shall develop a written plan describing proposed means to reduce employee exposures to the lowest feasible level solely by means of engineering and work practice controls (which will be eventually required by a permanent standard for occupational exposure to xxxxx, issued pursuant to section 190.160(g) of this subpart).

(ii) Written plans required by this paragraph shall be submitted, upon request, to the Assistant Secretary and the Director and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, and any affected employee or designated representative.

(h) *Respiratory protection.* (1) *Required use.* The employer shall assure that respirators are used where required pursuant to this section to reduce employee exposures to within the permissible exposure limits and in emergencies.

(2) *Respirator selection.* (i) Where respiratory protection is required or permitted under this section, the employer shall select and provide at no cost to the employee, the appropriate respirator from Table 1 below and shall assure that the employee wears the respirator provided.

TABLE 1

RESPIRATORY PROTECTION FOR XXXXX

(The table will contain a listing of the appropriate type of respirator for various conditions of exposure to xxxxx.)

(ii) The employer shall select respirators from those approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.

(3) *Respirator program.* (i) The employer shall institute a respiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e) and (f).

(ii) Employees who wear respirators shall be allowed to wash their face and respirator face piece to prevent potential skin irritation associated with respirator use.

(i) *Emergency situations.* (Deleted.)

(j) *Protective clothing and equipment.*

(1) *Provision and use.* Where eye or skin contact with xxxxx may occur, the employer shall provide, at no cost to the employee, and assure that employees wear, appropriate protective clothing or other equipment in accordance with 29 CFR 1910.132 and .133 to protect the area of the body which may come in contact with xxxxx.

(2) *Cleaning and replacement.*

(i) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this paragraph, as needed, to maintain their effectiveness. In addition the employer shall provide clean protective clothing and equipment at least (insert appropriate time) to each affected employee.

(ii) The employer shall assure that the employee removes all protective clothing and equipment at the completion of a workshift.

(iii) The employer shall assure that xxxxx-contaminated protective clothing and equipment is placed and stored in closed containers which prevent dispersion of xxxxx outside the container.

(iv) The employer shall inform any person who launders or cleans xxxxx contaminated protective clothing or equipment of the po-

tentially harmful effects of exposure to xxxxx. (v) The employer shall assure that the containers of contaminated protective clothing and equipment which are to be removed from the workplace for any reason are labeled in accordance with paragraph (p) (3) of this section.

(vi) The employer shall prohibit the removal of xxxxx from protective clothing or equipment by blowing or shaking.

(k) *Housekeeping.* (1) *Surfaces.* (i) All surfaces shall be maintained free of accumulations of xxxxx.

(ii) Dry sweeping and the use of compressed air for the cleaning of floors and other surfaces where xxxxx dust or liquids are found is prohibited.

(iii) Where vacuuming methods are selected, either portable units or a permanent system may be used.

(A) If a portable unit is selected, the exhaust shall be attached to the general workplace exhaust ventilation system or collected within the vacuum unit, equipped with high efficiency filters or other appropriate means of contaminant removal, so that xxxxx is not reintroduced into the work place air; and

(B) Portable vacuum units used to collect xxxxx, may not be used for other cleaning purposes and shall be labeled as prescribed by paragraph (p) (3) of this section.

(iv) Cleaning of floors and other contaminated surfaces may not be performed by washing down with a hose, unless a fine spray has first been laid down.

(2) *Liquids.* Where xxxxx is present in a liquid form, or as a resultant vapor, all containers or vessels containing xxxxx shall be enclosed to the maximum extent feasible and tightly covered when not in use.

(l) *Waste disposal.* xxxxx waste, scrap, debris, bags, containers, or equipment shall be disposed of in sealed bags or other closed containers which prevent dispersion of xxxxx outside the container.

(m) *Hygiene facilities and practices.* Where employees are exposed to airborne concentrations of xxxxx, or where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, or where otherwise found to be appropriate, the facilities required by 29 CFR 1910.141 shall be provided by the employer for the use of those employees, and the employer shall assure that the employees use the facilities provided.

(n) *Medical surveillance.* (1) *General.* (i) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to xxxxx. The employee shall provide each such employer with an opportunity for medical examinations and tests in accordance with this paragraph.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and shall be provided without cost to the employee.

(2) *Initial examinations.* Within thirty (30) days of the effective date of this section, or thereafter at the time of initial assignment, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history, a medical history, and a physical examination with direct emphasis towards the pulmonary, renal, and hepatic systems, and shall include the personal history of the employee, family, and occupational background, including genetic and environmental factors. Additionally, such factors as the current systems review, pregnancy, current treatment with steroids or cytotoxic agents, and smoking habits should be considered.

(ii) The medical examination shall also include the following: (insert appropriate medical protocol).

(3) *Periodic examinations.* (Insert appropriate medical protocol and time.)

(4) *Interim examinations.* If the employee for any reason develops signs or symptoms commonly associated with exposure to xxxxx, the employer shall provide appropriate examination and emergency medical treatment.

(5) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(i) A copy of this emergency temporary standard and its appendices;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level; and

(iv) A description of any personal protective equipment used or to be used.

(6) *Physician's written opinion.* (i) The employer shall obtain a written opinion from the examining physician which shall include:

(A) The results of the medical tests performed;

(B) The physician's opinion as to whether the employee has any detected medical condition which would place the employee at an increased risk of material impairment of the employee's health from exposure to xxxxx;

(C) Any recommended limitations upon the employee's exposure to xxxxx or upon the use of protective clothing and equipment such as respirators; and

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further examination or treatment.

(ii) The employer shall instruct the physician not to reveal in the written opinion specific findings or diagnoses unrelated to occupational exposure to xxxxx;

(iii) The employer shall provide a copy of the written opinion to the affected employee.

(o) *Employee information and training.* (1) *Training program.* (i) Within thirty (30) days from the effective date of this standard, the employer shall institute a training program for all employees where there is occupational exposure to xxxxx and shall assure their participation in the training program.

(ii) The employer shall assure that each employee is informed of the following:

(A) The information contained in Appendices A, B, and C;

(B) The quantity, location, manner of use, release, or storage of xxxxx and the specific nature of operations which could result in exposure to xxxxx, as well as any necessary protective steps;

(C) The purpose, proper use, and limitations of respirators;

(D) The purpose and description of the medical surveillance program required by paragraph (n) of this section; and

(E) A review of this standard.

(2) *Access to training materials.* (i) The employer shall make a copy of this standard and its appendices readily available to all affected employees.

(ii) The employer shall provide, upon request, all materials relating to the employee information and training program to the Assistant Secretary and the Director.

(p) *Signs and labels.* (1) *General.* (i) The employer may use labels or signs required by other statutes, regulations, or ordinances in addition to, or in combination with, signs and labels required by this paragraph.

(ii) The employer shall assure that no statement appears on or near any sign or label, required by this paragraph, which contradicts or detracts from such effects of the required sign or label.

(2) *Signs.* (i) The employer shall post signs to clearly indicate all workplaces where xxxxx may be present. The signs shall bear the following legend:

DANGER

XXXXX

(Insert appropriate trade or common names)

CANCER HAZARD

AUTHORIZED PERSONS ONLY

(ii) The employer shall assure that signs required by this paragraph are illuminated and cleaned as necessary so that the legend is readily visible.

(iii) Where airborne concentrations of xxxxx exceed the permissible exposure limits, the signs shall bear the additional legend: "Respirators Required."

(3) *Labels.* (i) The employer shall assure that precautionary labels are affixed to all containers of xxxxx and of products containing xxxxx, and that the labels remain affixed when the xxxxx or products containing xxxxx are sold, distributed, or otherwise leave the employer's workplace.

(ii) The employer shall assure that the precautionary labels required by this paragraph are readily visible and legible. The labels shall bear the following legend:

DANGER

CONTAINS XXXXX

CANCER HAZARD

(q) *Recordkeeping.* (1) *Exposure monitoring.* (i) The employer shall establish and maintain an accurate record of all monitoring required by paragraph (e) of this section.

(ii) This record shall include:

(A) The dates, number, duration, and results of each of the samples taken, including a description of the sampling procedure used to determine representative employee exposure;

(B) A description of the sampling and analytical methods used;

(C) Type of respiratory protective devices worn, if any; and

(D) Name, social security number, and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent.

(iii) The employer shall maintain this record for the effective period of this emergency temporary standard, and for any additional period required by the permanent standard.

(2) *Medical surveillance.* (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.

(ii) This record shall include:

(A) A copy of the physicians' written opinions;

(B) Any employee medical complaints related to exposure to xxxxx;

(C) A copy of the information provided to the physician as required by paragraph (n) (6) of this section; and

(D) A copy of the employee's work history.

(iii) The employer shall assure that this record be maintained for the effective period of this emergency temporary standard, and for any additional period required by the permanent standard.

(3) *Availability.* (i) The employer shall assure that all records required to be maintained by this section be made available upon request to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall assure that employee exposure measurement records, as required by this section, be made available, upon request, for examination and copying to the affected employee, former employee, or designated representative.

(iii) The employer shall assure that employee medical records required to be maintained by this section, be made available,

upon request, for examination and copying to the affected employee or former employee, or to a physician designated by the affected employee, former employee, or designated representative.

(r) *Observation of monitoring.* (1) *Employee observation.* The employer shall provide affected employees, or their designated representatives, an opportunity to observe any monitoring of employee exposure to xxxxx conducted pursuant to paragraph (e) of this section.

(2) *Observation procedures.* (i) Whenever observation of the monitoring of employee exposure to xxxxx requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide the observer with personal protective clothing or equipment required to be worn by employees working in the area, assure the use of such clothing and equipment, and require the observer to comply with all other applicable safety and health procedures.

(ii) Without interfering with the monitoring observers shall be entitled to:

(A) Receive an explanation of the measurement procedures;

(B) Observe all steps related to the measurement of airborne concentrations of xxxxx performed at the place of exposure; and

(C) Record the results obtained.

(s) *Effective date.* This section shall become effective (insert date of publication).

(t) *Appendices.* The information contained in the appendices is not intended, by itself, to create any additional obligations not otherwise imposed or to detract from any existing obligation.

§ 190.160 Section 6(b) Model Standard for a Category I Toxic Substance.

Occupational Exposure to XXXXX

Notice of Proposed or Final Rulemaking

§ 190.0000 XXXXX.

(a) *Scope and application.* This section applies to all occupational exposures to xxxxx (Chemical Abstracts Service Registry Number 00000), except that this section does not apply to: (to be filled in as applicable).

(b) *Definitions.* "xxxxx" means (definition of substance to be regulated).

"Authorized person" means any person specifically authorized by the employer whose duties require the person to enter a regulated area or any person entering such an area as a designated representative of employees for the purpose of exercising the opportunity to observe monitoring procedures under paragraph (r) of this section.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education, and Welfare, or designee.

"Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control

equipment which is likely to, or does, result in unexpected exposure of xxxxx in excess of the ceiling limit.

"OSHA Area Office" means the Area Office of the Occupational Safety and Health Administration having jurisdiction over the geographic area where the affected workplace is located.

(c) *Permissible exposure limits.* (1) *Inhalation.* (i) *Time-weighted average limit (TWA).* The employer shall assure that no employee is exposed to an airborne concentration of xxxxx in excess of: (insert appropriate exposure limit representing: (a) the lowest feasible level, except as modified by paragraph (c) (3) of this section or (b) when it is determined by the Secretary that there are available substitutes for all uses or classes of uses that are less hazardous to humans, the proposal shall permit no occupational exposure) as an eight (8) hour time-weighted average.

(ii) *Ceiling limit.* (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of xxxxx in excess of: (insert appropriate exposure limit representing the lowest feasible level, which shall however, not be more than five (5) times the TWA as averaged over any: (insert appropriate time period) during the working day.

(2) *Dermal and eye exposure.* The employer shall assure that no employee is exposed to eye contact or skin contact with xxxxx.

(3) *Other restrictions.* The employer shall assure that there is no occupational exposure to xxxxx from the following uses or classes of uses: (Where the Secretary determines, in the proposal or upon the record of the public rulemaking, that there are materials less hazardous to employees and that those materials are suitable substitutes in certain applications where xxxxx might otherwise be used, the Secretary here shall specify that no occupational exposure to xxxxx be permitted in those circumstances and uses, listing those circumstances or uses.)

(d) *Notification of use and emergencies.*

(1) *Use.* Within (insert appropriate time), or within fifteen (15) days following the introduction of xxxxx into the workplace, every employer shall report, unless he has done so pursuant to the emergency temporary standard issued pursuant to 29 CFR 190.150(d) here-in, the following information to the OSHA Area Office for each such workplace:

(i) The address and location of each workplace in which xxxxx is present;

(ii) A brief description of each process or operation which may result in employee exposure to xxxxx;

(iii) The number of employees engaged in each process or operation who may be exposed to xxxxx and an estimate of the frequency and degree of exposure that occurs;

(iv) A brief description of the employer's safety and health program as it relates to limitation of employee exposure to xxxxx; and

(v) Whenever there has been a significant change in the information required by this paragraph or 29 CFR 190.150(d), the employer shall promptly amend such information previously provided to the OSHA area office.

(2) *Emergencies and remedial action.* Emergencies, and the facts obtainable at that time, shall be reported within twenty-four (24) hours of the initial occurrence to the OSHA Area Office. Upon request of the OSHA Area Office, the employer shall submit additional information in writing relevant to the nature and extent of employee exposures and measures taken to prevent future emergencies of a similar nature.

(e) *Exposure monitoring.* (1) *General.* (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to xxxxx over an eight (8) hour period.

(11) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

(2) *Initial monitoring.* Each employer who has a place of employment in which *xxxxx* is present shall monitor each such workplace and work operation to accurately determine the airborne concentrations of *xxxxx* to which employees may be exposed.

(3) *Frequency.* (1) If the monitoring, required by this section, reveals employee exposure to be below the permissible exposure limits, the employer shall repeat such monitoring at least quarterly.

(2) If the monitoring, required by this section, reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat these determinations for each such employee at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.

(4) *Additional monitoring.* Whenever there has been a production, process, control or personnel change which may result in new or additional exposure to *xxxxx*, or whenever the employer has any other reason to suspect a change which may result in new or additional exposures to *xxxxx*, additional monitoring which complies with this paragraph shall be conducted.

(5) *Employee notification.* (1) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employee's exposure.

(2) Whenever the results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice a statement that the permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

(6) *Accuracy of measurement.* The method of measurement shall be accurate, to a confidence level of 95 percent, to within plus or minus (insert appropriate value) for concentrations of *xxxxx* at or above the permissible exposure limits.

(7) *Type of monitoring.* (Where applicable, specific mandatory monitoring devices and techniques may be required.)

(1) *Regulated areas.* (1) The employer shall establish regulated areas where *xxxxx* concentrations are in excess of the permissible exposure limits.

(2) Regulated areas shall be demarcated and segregated from the rest of the workplace, in any manner that minimizes the number of persons who will be exposed to *xxxxx*.

(3) Access to regulated areas shall be limited to authorized persons or to persons otherwise authorized by the Act or regulations issued pursuant thereto.

(4) The employer shall assure that in the regulated area, food or beverages are not present or consumed, smoking products are not present or used, and cosmetics are not applied (except that these activities may be conducted in the lunchroom, change rooms and showers required under paragraphs (m)(1)-(m)(3) of this section.)

(g) *Methods of compliance.* (1) *Engineering and work practice controls.* (1) The employer shall institute engineering or work practice controls to reduce and maintain employee exposures to *xxxxx* to or below the permissible exposure limits, except to the extent that the employer establishes that such controls are not feasible.

(2) Wherever the engineering and work practice controls which can be instituted are not sufficient, to reduce employee exposures to or below the permissible exposure limits, the employer shall nonetheless use them to reduce exposures to the lowest levels achievable by these controls and shall supplement them by the use of respiratory protection which complies with the requirements of paragraph (h) of this section.

(2) *Compliance program.* (1) The employer shall establish and implement a written program to reduce exposures to or below the permissible exposure limits solely by means of engineering and work practice controls, as required by paragraph (g)(1) of this section.

(2) Written plans for these compliance programs shall include at least the following:

(A) A description of each operation or process resulting in employee exposure to *xxxxx*;

(B) Engineering plans and other studies used to determine the controls for each process;

(C) A report of the technology considered in meeting the permissible exposure limits;

(D) A detailed schedule for the implementation of engineering or work practice controls; and

(E) Other relevant information.

(3) Written plans for such a program shall be submitted, upon request, to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, or any affected employee or representative.

(4) The plans required by this paragraph shall be revised and updated at least every six (6) months to reflect the current status of the program.

(h) *Respiratory protection.* (1) *General.* The employer shall assure that respirators are used where required pursuant to this section to reduce employee exposures to within the permissible exposure limits and in emergencies. Compliance with the permissible exposure limits may not be achieved by the use of respirators except:

(i) During the time period necessary to install or implement feasible engineering and work practice controls; or

(ii) In work operations such as maintenance and repair activities in which the employer establishes that engineering and work practice controls are not feasible; or

(iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; or

(iv) In emergencies.

(2) *Respirator selection.* (1) Where respiratory protection is required under this section, the employer shall select and provide at no cost to the employee, the appropriate type of respirator from Table 1 below and shall assure that the employee wears the respirator provided.

TABLE 1

RESPIRATORY PROTECTION FOR XXXXX

(The table will contain a listing of the appropriate type of respirator for various conditions of exposure to *xxxxx*.)

(2) The employer shall select respirators from those approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.

(3) *Respirator program.* (1) The employer shall institute a respiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e), and (f).

(2) Employees who wear respirators shall be allowed to wash their face and respirator

facepiece to prevent potential skin irritation associated with respirator use.

(1) *Emergency situations.* (1) *Written plans.* (1) A written plan for emergency situations shall be developed for each workplace where *xxxxx* is present. Appropriate portions of the plan shall be implemented in the event of an emergency.

(2) The plan shall specifically provide that employees engaged in correcting emergency conditions shall be equipped as required in paragraph (h) of this section until the emergency is abated.

(2) *Alerting employees.* (1) *Alarms.* Where there is the possibility of employee exposure to *xxxxx* in excess of the ceiling limit due to the occurrence of an emergency, a general alarm shall be installed and maintained to promptly alert employees of such occurrences.

(2) *Evacuation.* Employees not engaged in correcting the emergency shall be restricted from the area and shall not be permitted to return until the emergency is abated.

(j) *Protective clothing and equipment.* (1) *Provision and use.* Where eye or skin contact with *xxxxx* may occur, the employer shall provide at no cost to employee, and assure that employees wear, appropriate protective clothing or other equipment in accordance with 29 CFR 1910.132 and .133 to protect the area of the body which may come in contact with *xxxxx*.

(2) *Cleaning and replacement.* (1) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this paragraph, as needed, to maintain their effectiveness. In addition, the employer shall provide clean protective clothing and equipment at least (insert appropriate time) to each affected employee.

(2) The employer shall assure that the employee removes all protective clothing and equipment at the completion of a work shift and only in change rooms as required by paragraph (m)(1) of this section.

(3) The employer shall assure that *xxxxx*-contaminated protective clothing and equipment is placed and stored in closed containers which prevent dispersion of *xxxxx* outside the container.

(4) The employer shall assure that no employee removes *xxxxx*-contaminated protective equipment or clothing from the change room, except for those employees authorized to do so for the purpose of laundering, maintenance, or disposal.

(5) The employer shall inform any person who launders or cleans *xxxxx* contaminated protective clothing or equipment of the potentially harmful effects of exposure to *xxxxx*.

(6) The employer shall assure that the containers of contaminated protective clothing and equipment which are to be removed from the workplace for any reason are labeled in accordance with paragraph (p)(3)(ii) of this section.

(7) The employer shall prohibit the removal of *xxxxx* from protective clothing or equipment by blowing or shaking.

(k) *Housekeeping.* (1) *Surfaces.* (1) All surfaces shall be maintained free of accumulations of *xxxxx*.

(2) Dry sweeping and the use of compressed air for the cleaning of floors and other surfaces where *xxxxx* dust or liquids are found is prohibited.

(3) Where vacuuming methods are selected, either portable units or a permanent system may be used.

(4) If a portable unit is selected, the exhaust shall be attached to the general workplace exhaust ventilation system or collected within the vacuum unit, equipped with high efficiency filters or other appropriate means of contaminant removal, so that *xxxxx* is not reintroduced into the work place air; and

(B) Portable vacuum units used to collect *xxxxx*, may not be used for other cleaning purposes and shall be labeled as prescribed by paragraph (p)(3) of this section.

(iv) Cleaning of floors and other contaminated surfaces may not be performed by washing down with a hose, unless a fine spray has first been laid down.

(2) *Liquids.* Where *xxxxx* is present in a liquid form, or as a resultant vapor, all containers or vessels containing *xxxxx* shall be enclosed to the maximum extent feasible and tightly covered when not in use.

(3) *Dust collection systems.* Periodic cleaning of dust collection systems; i.e., ducts and filters, shall be performed to reduce *xxxxx* dust buildup and to maintain the effectiveness of the system.

(4) *Waste disposal.* *xxxxx* waste, scrap, debris, bags, containers or equipment, shall be disposed of in sealed bags or other closed containers which prevent dispersion of *xxxxx* outside the container.

(m) *Hygiene facilities and practices.* Where employees are exposed to airborne concentrations of *xxxxx*, or where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, or where otherwise found to be appropriate, the facilities required by 29 CFR 1910.141 shall be provided by the employer for the use of those employees and the employer shall assure that the employees use the facilities provided. In addition, the following additional facilities or requirements are mandated.

(1) *Change rooms.* The employer shall provide clean change rooms in accordance with 29 CFR 1910.141(e).

(2) *Showers.* (1) The employer shall provide shower facilities in accordance with 29 CFR 1910.141(d)(3).

(2) In addition, the employer shall also assure that employees exposed to *xxxxx* shower at the end of the work shift.

(3) *Lunchrooms.* (1) Whenever food or beverages are consumed in the workplace, the employer shall provide lunchroom facilities which have a temperature controlled, positive pressure, filtered air supply, and which are readily accessible to employees exposed to *xxxxx*.

(2) In addition the employer shall also assure that employees exposed to *xxxxx* wash their hands and face prior to eating.

(n) *Medical Surveillance.* (1) *General.* (1) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to *xxxxx*. The employer shall provide each such employee with an opportunity for medical examinations and tests in accordance with this paragraph.

(2) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and shall be provided without cost to the employee.

(3) *Initial examinations.* At the time of initial assignment, or upon institution of the medical surveillance program, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(A) A work history, a medical history, and a physical examination with direct emphasis towards the pulmonary, renal and hepatic systems, and shall include the personal history of the employee, family, and occupational background, including genetic and environmental factors. Additionally, such factors as the current systems review, pregnancy, current treatment with steroids or cytotoxic agents, and smoking habits should be considered.

(B) The medical examination shall also include the following: (insert appropriate medical protocol).

(3) *Periodic examinations.* (1) The employer shall provide examinations specified in this paragraph at least (insert appropriate time) for all employees specified in paragraph (n)(1) of this section.

(2) If an employee has not had the examinations prescribed in paragraph (n)(2) of this section within 6 months of termination of employment, the employer shall make such examination available to the employee upon such termination.

(4) *Additional examinations.* If the employee for any reason develops signs or symptoms commonly associated with exposure to *xxxxx*, the employer shall provide appropriate examination and emergency medical treatment.

(5) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(1) A copy of this standard and its appendices;

(2) A description of the affected employee's duties as they relate to the employee's exposure;

(3) The employee's representative exposure level;

(4) The employee's anticipated or estimated exposure level (for preplacement examinations or in cases of exposure due to an emergency);

(5) A description of any personal protective equipment used or to be used; and

(6) Information from previous medical examinations of the affected employee, which is not otherwise available to the examining physician.

(7) *Physician's written opinion.* (1) The employer shall obtain a written opinion from the examining physician which shall include:

(A) The results of the medical tests performed;

(B) The physician's opinion as to whether the employee has any detected medical condition which would place the employee at an increased risk of material impairment of the employee's health from exposure to *xxxxx*;

(C) Any recommended limitations upon the employee's exposure to *xxxxx* or upon the use of protective clothing and equipment such as respirators; and

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further examination or treatment.

(2) The employer shall instruct the physician not to reveal in the written opinion specific findings or diagnoses unrelated to occupational exposure to *xxxxx*;

(3) The employer shall provide a copy of the written opinion to the affected employee.

(o) *Employee Information and Training.* (1) *Training Program.* (1) The employer shall institute a training program for all employees where there is occupational exposure to *xxxxx* and shall assure their participation in the training program.

(2) The training program shall be provided at the time of initial assignment, or upon institution of the training program, and at least annually thereafter, and the employer shall assure that each employee is informed of the following:

(A) The information contained in Appendices A, B and C;

(B) The quantity, location, manner of use, release or storage of *xxxxx* and the specific nature of operations which could result in exposure to *xxxxx*, as well as any necessary protective steps;

(C) The purpose, proper use, and limitations of the respirators;

(D) The purpose and a description of the medical surveillance program required by paragraph (n) of this section;

(E) The emergency procedures developed, as required by paragraph (1) of this section; and

(F) The engineering and work practice controls, their function and the employee's relationship thereto; and

(G) A review of this standard.

(2) *Access to Training Materials.* (1) The employer shall make a copy of this standard and its appendices readily available to all affected employees.

(3) The employer shall provide, upon request, all materials relating to the employee information and training program to the Assistant Secretary and the Director.

(p) *Signs and Labels.* (1) *General.* (i) The employer may use labels or signs required by other statutes, regulations, or ordinances in addition to, or in combination with, signs and labels required by this paragraph.

(ii) The employer shall assure that no statement appears on or near any sign or label, required by this paragraph, which contradicts or detracts from such effects of the required sign or label.

(2) *Signs.* (1) The employer shall post signs to clearly indicate all workplaces where *xxxxx* may be present. The signs shall bear the following legend:

DANGER

XXXXXX

(insert appropriate trade or common names)

CANCER HAZARD

AUTHORIZED PERSONNEL ONLY

(2) The employer shall assure that signs required by this paragraph are illuminated and cleaned as necessary so that the legend is readily visible.

(3) Where airborne concentrations of *xxxxx* exceed the permissible exposure limits, the signs shall bear the additional legend: "Respirator Required"

(3) *Labels.* (1) The employer shall assure that precautionary labels are affixed to all containers of *xxxxx* and of products containing *xxxxx*, and that the labels remain affixed when the *xxxxx* or products containing *xxxxx* are sold, distributed or otherwise leave the employer's workplace.

(2) The employer shall assure that the precautionary labels required by this paragraph are readily visible and legible. The labels shall bear the following legend:

DANGER

CONTAINS XXXXX

CANCER HAZARD

(q) *Recordkeeping.* (1) *Exposure Monitoring.* (1) The employer shall establish and maintain an accurate record of all monitoring required by paragraph (e) of this section.

(2) This record shall include:

(A) The dates, number, duration, and results of each of the samples taken, including a description of the sampling procedure used to determine representative employee exposure;

(B) A description of the sampling and analytical methods used;

(C) Type of respiratory protective devices worn, if any; and

(D) Name, social security number and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent.

(3) The employer shall maintain this record for at least 40 years or the duration of employment plus 20 years, whichever is longer.

(2) *Medical Surveillance.* (1) The employer shall establish and maintain an accurate

§ 1900.170 Section 6(b) Model Standard for a Category II Toxic Substance.

OCCUPATIONAL EXPOSURE TO XXXXXX

NOTICE OF PROPOSED OR FINAL RULEMAKING

§ 1910.0000 XXXXX.

(a) *Scope and application.* This section applies to all occupational exposures to *xxxxx* (Chemical Abstracts Service Registry Number 00000), except that this section does not apply to: (to be filled in as applicable.)

(b) *Definitions.* "xxxxx" means (definition of substance to be regulated). "Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education, and Welfare, or designee.

"Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which is likely to, or does, result in unexpected exposure, of *xxxxx* in excess of the ceiling limit.

"OSHA Area Office" means the Area Office of the Occupational Safety and Health Administration having jurisdiction over the geographic area where the affected workplace is located.

(c) *Permissible exposure limits.* (1) *Inhalation.* (i) *Time-weighted average limit (TWAL).* The employer shall assure that no employee is exposed to an airborne concentration of *xxxxx* in excess of: (insert appropriate exposure limit representing (a) the present OSHA standard found in 29 CFR 1910.1000 or (b) where none exists, an appropriate level based upon acute or chronic effects of exposure to *xxxxx* other than carcinogenicity or (c) where acute or chronic effects other than carcinogenicity indicate that the present OSHA standard is inadequate, the exposure level shall be lowered from the present OSHA standard to the level found appropriate by the Secretary to protect against such effects) as an eight (8)-hour time-weighted average.

(ii) *Ceiling limit.* (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of *xxxxx* in excess of: (insert the appropriate exposure limit) as averaged over any: (insert appropriate time period) during the working day.

(2) *Dermal and eye exposure.* The employer shall assure that no employee is exposed to eye contact or skin contact with *xxxxx*.

(d) *Notification of use and emergencies.* (1) *Use.* Within (insert appropriate time), or within fifteen (15) days the introduction of *xxxxx* into the workplace, every employer shall report the following information to

the OSHA Area Office for each such workplace:

(i) The address and location of each workplace in which *xxxxx* is present;

(ii) A brief description of each process or operation, which may result in employee exposure to *xxxxx*;

(iii) The number of employees engaged in each process or operation who may be exposed to *xxxxx* and an estimate of the frequency and degree of exposure that occurs;

(iv) A brief description of the employer's safety and health program as it relates to limitation of employee exposure to *xxxxx*; and

(v) Whenever there has been a significant change in the information required by this paragraph, the employer shall promptly amend such information previously provided to the OSHA area office.

(2) *Emergencies and Remedial Action.* Emergencies, and the facts obtainable at that time, shall be reported within twenty-four (24) hours of the initial occurrence to the OSHA Area Office. Upon request of the OSHA Area Office, the employer shall submit additional information in writing relevant to the nature and extent of employee exposures and measures taken to prevent future emergencies of a similar nature.

(e) *Exposure monitoring.* (1) *General.* (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to *xxxxx* over an eight (8) hour period.

(ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.

(2) *Initial monitoring.* Each employer who has a place of employment in which *xxxxx* is present shall monitor each such workplace and work operation to accurately determine the airborne concentration of *xxxxx* to which employees may be exposed.

(3) *Frequency.* (i) If the monitoring, required by this section, reveals employee exposure to be below the permissible exposure limits, the employer shall repeat such monitoring at least quarterly.

(ii) If the monitoring, required by this section, reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat the determinations for each such employee at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.

(4) *Additional monitoring.* Whenever there has been a production, process, control or personnel change which may result in new or additional exposure to *xxxxx*, or whenever the employer has any other reason to suspect a change which may result in new or additional exposure to *xxxxx*, additional monitoring which complies with this paragraph shall be conducted.

(5) *Employee notification.* (i) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employee's exposure.

(ii) Whenever such results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice

a statement that the permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

(6) *Accuracy of measurement.* The method of measurement shall be accurate, to a confidence level of 95 percent, to within plus or minus (insert appropriate value) for concentrations of *xxxxx* at or above the permissible exposure limit.

(7) *Type of monitoring.* (Where applicable, specific mandatory monitoring and techniques may be required.)

(i) *Regulated areas.* (Deleted.)

(g) *Methods of compliance.* (1) *Engineering and work practice controls.* (i) The employer shall institute engineering or work practice controls to reduce and maintain employee exposures to *xxxxx* to or below the permissible exposure limits, except to the extent that the employer establishes that such controls are not feasible.

(ii) Wherever the engineering and work practice controls which can be instituted are not sufficient to reduce employee exposures to or below the permissible exposure limits, the employer shall nonetheless use them to reduce exposures to the lowest levels achievable by those controls and shall supplement them by the use of respiratory protection which complies with the requirements of paragraph (h) of this section.

(2) *Compliance program.* (i) The employer shall establish and implement a written program to reduce exposures to or below the permissible exposure limits solely by means of engineering and work practice controls, as required by paragraph (g)(1) of this section.

(ii) Written plans for these compliance programs shall include at least the following:

(A) A description of each operation or process resulting in employee exposure to *xxxxx*;

(B) Engineering plans and other studies used to determine the controls for each process;

(C) A report of the technology considered in meeting the permissible exposure limits;

(D) A detailed schedule for the implementation of engineering or work practice controls; and

(E) Other relevant information.

(iii) Written plans for such a program shall be submitted, upon request, to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, or any affected employee or representative.

(iv) The plans required by this paragraph shall be revised and updated at least every six (6) months to reflect the current status of the program.

(h) *Respiratory protection.* (1) *General.* The employer shall assure that respirators are used where required pursuant to this section to reduce employee exposure to within the permissible exposure limits and in emergencies. Compliance with the permissible exposure limits may not be achieved by the use of respirators except:

(i) During the time period necessary to install or implement feasible engineering and work practice controls; or

(ii) In work operations such as maintenance and repair activities in which the employer establishes that engineering and work practice controls are not feasible; or

(iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; or

(iv) In emergencies.

(2) *Respirator selection.* (i) Where respiratory protection is required under this sec-

PROPOSED RULES

TABLE 1

RESPIRATORY PROTECTION FOR XXXXX

(The table will contain a listing of the appropriate type of respirator for various conditions of exposure to *xxxxx*.)

(ii) The employer shall select respirators from those approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.

(3) *Respirator program.* (i) The employer shall institute a respiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e), and (f).

(ii) Employees who wear respirators shall be allowed to wash their face and respirator facepiece to prevent potential skin irritation associated with respirator use.

(i) *Emergency situations.* (1) *Written plans.* (i) A written plan for emergency situations shall be developed for each workplace where *xxxxx* is present. Appropriate portions of the plan shall be implemented in the event of an emergency.

(ii) The plan shall specifically provide that employees engaged in correcting emergency conditions shall be equipped as required in paragraph (h) of this section until the emergency is abated.

(2) *Alerting employees.* (i) *Alarms.* Where there is the possibility of employee exposure to *xxxxx* in excess of the ceiling limit due to the occurrence of an emergency, a general alarm shall be installed and maintained to promptly alert employees of such occurrences.

(ii) *Evacuation.* Employees not engaged in correcting the emergency shall be restricted from the area and shall not be permitted to return until the emergency is abated.

(j) *Protective clothing and equipment.* (1) *Provision and use.* Where eye or skin contact with *xxxxx* may occur, the employer shall provide at no cost to the employee, and assure that employees wear, appropriate protective clothing or equipment in accordance with 29 CFR 1910.132 and .133 to protect the area of the body which may come in contact with *xxxxx*.

(2) *Cleaning and replacement.* (i) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this paragraph, as needed, to maintain their effectiveness. In addition the employer shall provide clean protective clothing and equipment at least (insert appropriate time) to each affected employee.

(ii) The employer shall assure that the employee removes all protective clothing and equipment at the completion of a work shift and only in change rooms as required by paragraph (m)(1) of this section.

(iii) The employer shall assure that *xxxxx*-contaminated protective clothing and equipment is placed and stored in closed containers which prevent dispersion of *xxxxx* outside the container.

(iv) The employer shall assure that no employee removes contaminated protective equipment or clothing from the change room except for those employees authorized to do so for the purpose of laundering, maintenance, or disposal.

(v) The employer shall inform any person who launders or cleans *xxxxx* contaminated protective clothing or equipment of the potentially harmful effects of exposure to *xxxxx*.

(vi) The employer shall assure that the containers of contaminated protective

clothing and equipment which are to be removed from the workplace for any reason are labeled in accordance with paragraph (p)(3)(ii) of this section.

(vii) The employer shall prohibit the removal of *xxxxx* from protective clothing or equipment by blowing or shaking of work clothing.

(k) *Housekeeping.* (1) *Surfaces.* (i) All surfaces shall be maintained free of accumulations of *xxxxx*.

(ii) Dry sweeping and the use of compressed air for the cleaning of floors and other surfaces where *xxxxx* dust or liquids are found is prohibited.

(iii) Where vacuuming methods are selected, either portable units or a permanent system may be used.

(A) If a portable unit is selected, the exhaust shall be attached to the general workplace exhaust ventilation system or collected within the vacuum unit, equipped with high efficiency filters, or other appropriate means of contaminant removal, so that *xxxxx* is not reintroduced into the work place air; and

(B) Portable vacuum units used to collect *xxxxx* may not be used for other cleaning purposes and shall be labeled as prescribed by paragraph (p)(3) of this section.

(iv) Cleaning of floors and other contaminated surfaces may not be performed by washing down with a hose, unless a fine spray has first been laid down.

(2) *Liquids.* Where *xxxxx* is present in a liquid form, or as a resultant vapor, all containers or vessels containing *xxxxx* shall be enclosed to the maximum extent feasible and tightly covered when not in use.

(3) *Dust collection systems.* Periodic cleaning of dust collection systems, i.e. ducts and filters, shall be performed to reduce *xxxxx* dust buildups and to maintain the effectiveness of the system.

(1) *Waste disposal.* *xxxxx* waste, scrap, debris, bags, containers or equipment, shall be disposed of in sealed bags or other closed containers which prevent dispersion of *xxxxx* outside the container.

(m) *Hygiene facilities and practices.* Where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, or where otherwise found to be appropriate, the facilities required by 29 CFR 1910.141 or in this paragraph shall be provided by the employer for the use of those employees and the employer shall assure that the employees use the facilities provided. In addition, the following additional facilities or requirements are mandated.

(1) *Change rooms.* The employer shall provide clean change rooms in accordance with 29 CFR 1910.141(e).

(2) *Showers.* (i) The employer shall provide shower facilities in accordance with 29 CFR 1910.141(d)(3).

(ii) In addition, the employer shall also assure that employees exposed to *xxxxx* shower at the end of the work shift.

(3) *Lunchrooms.* (i) The employer shall provide appropriate facilities for eating and drinking in accordance with 29 CFR 1910.141(g) and (h).

(ii) The employer shall assure that employees exposed to *xxxxx* wash their hands and face prior to eating.

(n) *Medical Surveillance.* (1) *General.* (i) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to *xxxxx*. The employer shall provide each employee with an opportunity for medical examinations and tests in accordance with this paragraph.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a

licensed physician, and shall be provided without cost to the employee.

(2) *Initial examinations.* At the time of initial assignment, or upon institution of the medical surveillance program, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history, a medical history, and a physical examination with direct emphasis towards the pulmonary, renal and hepatic systems, and shall include the personal history of the employee, family, and occupational background, including genetic and environmental factors. Additionally, such factors as the current systems review, pregnancy, current treatment with steroids or cytotoxic agents, and smoking habits should be considered.

(ii) The medical examination shall also include the following: *(insert appropriate medical protocol)*

(3) *Periodic examinations.* (i) The employer shall provide examinations specified in this paragraph at least *(insert appropriate time)* for all employees specified in paragraph (n)(1) of this section.

(ii) If an employee has not had the examinations prescribed in paragraph (n)(2) of this section within 6 months of termination of employment, the employer shall make such examination available to the employee upon such termination.

(4) *Additional examinations.* If the employee for any reason develops signs or symptoms commonly associated with exposure to *xxxx*, the employer shall provide appropriate examination and emergency medical treatment.

(5) *Information provided to the physician.* The employer shall provide the following information to the examining physician:

(i) A copy of this standard and its appendices;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level;

(iv) The employee's anticipated or estimated exposure level (for preplacement examinations or in cases of exposure due to an emergency);

(v) A description of any personal protective equipment used or to be used; and

(vi) Information from previous medical examinations of the affected employee, which is not otherwise available to the examining physician.

(6) *Physician's written opinion.* (i) The employer shall obtain a written opinion from the examining physician which shall include:

(A) The results of the medical tests performed;

(B) The physician's opinion as to whether the employee has any detected medical condition which would place the employee at an increased risk of material impairment of the employee's health from exposure to *xxxx*;

(C) Any recommended limitations upon the employee's exposure to *xxxx* or upon the use of protective clothing and equipment such as respirators; and

(D) A statement that the employee has been informed by the physician of the results of the medical examination and any medical conditions which require further examination or treatment.

(ii) The employer shall instruct the physician not to reveal in the written opinion specific findings or diagnoses unrelated to occupational exposure to *xxxx*.

(iii) The employer shall provide a copy of the written opinion to the affected employee.

(c) *Employee information and training.*

(1) *Training program.* (i) The employer shall institute a training program for all employees where there is occupational exposure to *xxxx* and shall assure their participation in the training program.

(ii) The training program shall be provided at the time of initial assignment, or upon institution of the training program, and at least annually thereafter, and the employer shall assure that each employee is informed of the following:

(A) The information contained in Appendices A, B, and C;

(B) The quantity, location, manner of use, release or storage of *xxxx* and the specific nature of operations which could result in exposure to *xxxx*, as well as any necessary protective steps;

(C) The purpose, proper use, and limitations of respirators;

(D) The purpose and a description of the medical surveillance program required by paragraph (n) of this section;

(E) The emergency procedures developed, as required by paragraph (i) of this section;

(F) The engineering and work practice controls, their function and the employee's relationship thereto; and

(G) A review of this standard.

(2) *Access to training materials.* (i) The employer shall make a copy of this standard and its appendices readily available to all affected employees.

(ii) The employer shall provide, upon request, all materials relating to the employee information and training program to the Assistant Secretary and the Director.

(p) *Signs and labels.* (1) *General.* (i) The employer may use labels or signs required by other statutes, regulations, or ordinances in addition to, or in combination with, signs and labels required by this paragraph.

(ii) The employer shall assure that no statement appears on or near any sign or label, required by this paragraph, which contradicts or detracts from the effects of such required sign or label.

(2) *Signs.* (i) The employer shall post signs to clearly indicate all work areas where *xxxx* may be present. The signs shall bear the following legend:

CAUTION
XXXXXX
(insert appropriate trade or common names)
POTENTIAL CANCER HAZARD
AUTHORIZED PERSONNEL ONLY

(ii) The employer shall assure that signs required by this paragraph are illuminated and cleaned as necessary so that the legend is readily visible.

(iii) Where airborne concentrations of *xxxx* exceed the permissible exposure limits, the signs shall bear the additional legend:

RESPIRATOR REQUIRED
(3) *Labels.* The employer shall assure that precautionary labels are affixed to all containers of *xxxx* and of products containing *xxxx* and that the labels remain affixed when the *xxxx* or products containing *xxxx* are sold, distributed or otherwise leave the employer's workplace. The label shall bear the following legend:

CAUTION
CONTAINS XXXXX
POTENTIAL CANCER HAZARD

(q) *Recordkeeping.* (1) *Exposure monitoring.* (i) The employer shall establish and maintain an accurate record of all monitoring required by paragraph (e) of this section.

(ii) This record shall include:

(A) The dates, number, duration, and results of each of the samples taken, including

a description of the sampling procedure used to determine representative employee exposure;

(B) A description of the sampling and analytical methods used;

(C) Type of respiratory protective devices worn, if any; and

(D) Name, social security number and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent.

(iii) The employer shall maintain this record for at least 40 years or the duration of employment plus 20 years, whichever is longer.

(2) *Medical surveillance.* (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.

(ii) This record shall include:

(A) A copy of the physicians' written opinions;

(B) Any employee medical complaints related to exposure to *xxxx*;

(C) A copy of the information provided to the physician as required by paragraph (n) (6) of this section; and

(D) A copy of the employee's work history.

(iii) The employer shall assure that this record be maintained for at least forty (40) years, or for the duration of employment plus twenty (20) years, whichever is longer.

(3) *Availability.* (i) The employer shall assure that all records required to be maintained by this section be made available upon request to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall assure that employee exposure measurement records, as required by this section, be made available, upon request, for examination and copying, to the affected employee, former employee, or designated representative.

(iii) The employer shall assure that employee medical records required to be maintained by this section, be made available, upon request, for examination and copying to the affected employee or former employee, or to a physician designated by the affected employee, former employee, or designated representative.

(4) *Transfer of records.* (i) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by this section.

(ii) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records for the prescribed period, these records shall be transmitted to the Director.

(iii) At the expiration of the retention period for the records required to be maintained pursuant to this section, the employer shall transmit these records to the Director.

(r) *Observation of monitoring.* (1) *Employee observation.* The employer shall provide affected employees, or their designated representatives, an opportunity to observe any monitoring of employee exposure to *xxxx* conducted pursuant to paragraph (e) of this section.

(2) *Observation procedures.* (i) Whenever observation of the monitoring of employee exposure to *xxxx* requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide the observer with personal protective clothing or equipment required to be worn by employees working in the area, assure the use of such clothing and equipment, and require the observer to comply with all other applicable safety and health procedures.

(ii) Without interfering with the monitoring observers shall be entitled to:

(A) Receive an explanation of the measurement procedures;

(B) Observe all steps related to the measurement of airborne concentrations of *xxxx* performed at the place of exposure; and

(C) Record the results obtained.

(s) *Effective dates.* This section shall become effective *(insert appropriate period)* following publication.

(t) *Appendices.* The information contained in the appendices is not intended, by itself, to create any additional obligations not otherwise imposed or to detract from any existing obligations.

Section 1990.170. Section 6(b) Model Standard for a Category II Toxic Substance

Emergency Temporary Standard

Section 1910.0000 xxxxx

(a) Scope and application. This section applies to all occupational exposures to xxxxx, (Chemical Abstracts Service Registry Number 0000), except that this section does not apply to: (to be filled in as applicable.)

Notice of Proposed or Final Rulemaking

Section 1910.0000 xxxxx

(a) Scope and application. This section applies to all occupational exposures to xxxxx, (Chemical Abstracts Service Registry Number 0000), except that this section does not apply to: (to be filled in as applicable.)

Notice of Proposed or Final Rulemaking

Section 1910.0000 xxxxx

(a) Scope and application. This section applies to all occupational exposures to xxxxx (Chemical Abstracts Service Registry Number 0000), except that this section does not apply to: (to be filled in as applicable.)

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(b) Definitions.

"xxxxx" means (definition of substance to be regulated).

"Authorized person" means any person specifically authorized by the employer and whose duties require the person to be a present in areas where xxxxx is present; and any person entering such an area as a designated representative of employees for the purpose of exercising the opportunity to observe monitoring procedures under paragraph (r) of this section.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education and Welfare, or designee.

(b) Definitions.

"xxxxx" means (definition of substance to be regulated).

"Authorized person" means any person specifically authorized by the employer whose duties require the person to enter a regulated area or any person entering such an area as a designated representative of employees for the purpose of exercising the opportunity to observe monitoring procedures under paragraph (r) of this section.

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education and Welfare, or designee.

(b) Definitions.

"xxxxx" means (definition of substance to be regulated).

"Assistant Secretary" means the Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, or designee.

"Director" means the Director, National Institute for Occupational Safety and Health, U.S. Department of Health, Education and Welfare, or designee.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

"Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which is likely to, or does, result in unexpected exposure of ~~xxxxx~~ in excess of the ceiling limit.

"OSHA Area Office" means the Area Office of the Occupational Safety and Health Administration having jurisdiction over the geographic area where the affected workplace is located.

"Emergency" means any occurrence such as, but not limited to, equipment failure, rupture of containers, or failure of control equipment which is likely to, or does, result in unexpected exposure, of ~~xxxxx~~ in excess of the ceiling limit.

"OSHA Area Office" means the Area Office of the Occupational Safety and Health Administration having jurisdiction over the geographic area where the affected workplace is located.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(c) Permissible exposure limits.

(1) Inhalation.

(i) Time-

weighted average limit (TWA). Within (insert appropriate time) from the effective date of this emergency temporary standard, the employer shall assure that no employee is exposed to an airborne concentration of ~~xxxxx~~ in excess of: (insert appropriate exposure limit representing the lowest feasible level that can be complied with immediately) as an eight (8)-hour time-weighted average.

(c) Permissible exposure limits.

(1) Inhalation.

(i) Time-

weighted average limit (TWA). The employer shall assure that no employee is exposed to an airborne concentration of ~~xxxxx~~ in excess of: (insert appropriate exposure limit representing: (a) the lowest feasible level, except as modified by paragraph (c)(3) of this section or (b) when it is determined by the Secretary that there are available substitutes for all uses or classes of uses that are less hazardous to humans, the proposal shall permit no occupational exposure) as an eight (8)-hour time-weighted average.

(c) Permissible exposure limits.

(1) Inhalation.

(i) Time-

weighted average limit (TWA). The employer shall assure that no employee is exposed to an airborne concentration of ~~xxxxx~~ in excess of: (insert appropriate exposure limit representing (a) the present OSHA standard found in 29 CFR 1910.1000 or (b) where none exists, an appropriate level based upon acute or chronic effects of exposure to ~~xxxxx~~ other than carcinogenicity or (c) where acute or chronic effects other than carcinogenicity indicate that the present OSHA standard is inadequate, the exposure level shall be lowered from the present OSHA standard to the level found appropriate by the Secretary to protect against such effects) as an eight (8)-hour time-weighted average.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (ii) Ceiling limit. (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of xxxxx in excess of: (insert appropriate exposure limit) as averaged over any: (insert appropriate time period) during the working day.
- (2) Dermal and eye exposure. The employer shall assure that no employee is exposed to eye contact or skin contact with xxxxx.
- (3) Other restrictions. The employer shall assure that there is no occupational exposure to xxxxx from the following uses or classes of uses: (where the Secretary determines, in the proposal or upon the record of the public rulemaking, that there are materials less hazardous to employees and that those materials are suitable substitutes in certain applications
- (ii) Ceiling limit. (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of xxxxx in excess of: (insert appropriate exposure limit representing the lowest feasible level, which shall however, not be more than five (5) times the TWA) as averaged over any: (insert appropriate time period) during the working day.
- (2) Dermal and eye exposure. The employer shall assure that no employee is exposed to eye contact or skin contact with xxxxx.
- (3) Other restrictions. The employer shall assure that there is no occupational exposure to xxxxx from the following uses or classes of uses: (where the Secretary determines, in the proposal or upon the record of the public rulemaking, that there are materials less hazardous to employees and that those materials are suitable substitutes in certain applications
- (ii) Ceiling limit. (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of xxxxx in excess of: (insert appropriate exposure limit representing the lowest feasible level that can be complied with immediately) as averaged over any: (insert appropriate time period) during the working day.
- (2) Dermal and eye exposure. The employer shall assure that no employee is exposed to eye contact or skin contact with xxxxx.
- (ii) Ceiling limit. (If appropriate.) The employer shall assure that no employee is exposed to an airborne concentration of xxxxx in excess of: (insert the appropriate exposure limit) as averaged over any: (insert appropriate time period) during the working day.
- (2) Dermal and eye exposure. The employer shall assure that no employee is exposed to eye contact or skin contact with xxxxx.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

where xxxxx might otherwise be used, the Secretary here shall specify that no occupational exposure to xxxxx shall be permitted in those circumstances and uses, listing those circumstances or uses.)

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (d) Notification of Use. Within (insert appropriate time) of the effective date of this section, or within fifteen (15) days following the introduction of xxxxx into the workplace, every employer shall report the following information to the nearest OSHA Area Office for each such workplace:
- (1) Use. Within (insert appropriate time), or within fifteen (15) days the introduction of xxxxx into the workplace, every employer shall report the following information to the OSHA Area Office for each such workplace:
- (i) The address and location of each workplace in which xxxxx is present;
- (ii) A brief description of each process or operation which may result in employee exposure to xxxxx;
- (iii) The number of employees engaged in each process or operation who may be exposed to xxxxx and an estimate of the frequency and degree of exposure that occurs; and
- (i) The address and location of each workplace in which xxxxx is present;
- (ii) A brief description of each process or operation which may result in employee exposure to xxxxx;
- (iii) The number of employees engaged in each process or operation who may be exposed to xxxxx and an estimate of the frequency and degree of exposure that occurs;

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (4) A brief description of the employer's safety and health program as it relates to limitation of employee exposure to xxxxx:
- (v) Whenever there has been a significant change in the information required by this paragraph or 29 CFR 1990.150(d), the employer shall promptly amend such information previously provided to the OSHA area office.
- (2) Emergencies and Remedial Action. Emergencies, and the facts obtainable at that time, shall be reported within twenty-four (24) hours of the initial occurrence to the OSHA Area Office. Upon request of the OSHA Area Office, the employer shall submit additional information in writing relevant to the nature and extent of employee exposures and measures taken to prevent future emergencies of a similar nature.
- (iv) A brief description of the employer's safety and health program as it relates to limitation of employee exposure to xxxxx; and
- (v) Whenever there has been a significant change in the information required by this paragraph, the employer shall promptly amend such information previously provided to the OSHA area office.
- (2) Emergencies and Remedial Action. Emergencies, and the facts obtainable at that time, shall be reported within twenty-four (24) hours of the initial occurrence to the OSHA Area Office. Upon request of the OSHA Area Office, the employer shall submit additional information in writing relevant to the nature and extent of employee exposures and measures taken to prevent future emergencies of a similar nature.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (e) Exposure monitoring.
- (1) General.
- (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to xxxxx over an eight (8) hour period.
- (ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.
- (2) Initial monitoring. Each employer who has a place of employment in which xxxxx is present shall monitor within thirty (30) days of the effective date of this standard, each such workplace and work operation to accurately determine the airborne concentrations of xxxxx to which employees may be exposed.
- (e) Exposure monitoring.
- (1) General.
- (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to xxxxx over an eight (8) hour period.
- (ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.
- (2) Initial monitoring. Each employer who has a place of employment in which xxxxx is present shall monitor, in which xxxxx is present shall monitor each such workplace and work operation to accurately determine the airborne concentrations of xxxxx to which employees may be exposed.
- (e) Exposure monitoring.
- (1) General.
- (i) Determinations of airborne exposure levels shall be made from air samples that are representative of each employee's exposure to xxxxx over an eight (8) hour period.
- (ii) For the purposes of this section, employee exposure is that exposure which would occur if the employee were not using a respirator.
- (2) Initial monitoring. Each employer who has a place of employment in which xxxxx is present shall monitor in which xxxxx is present shall monitor each such workplace and work operation to accurately determine the airborne concentrations of xxxxx to which employees may be exposed.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (3) Frequency.
- (i) If the monitoring, required by this section, reveals employee exposure to be below the permissible exposure limits, the employer shall repeat such monitoring at least quarterly.
- (ii) If the monitoring, required by this section, reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat these determinations for each such employees at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.
- (4) Additional monitoring.
- Whenever there has been a production, process, control or personnel change which may result in new or additional exposure to xxxxx, or whenever the
- (3) Frequency.
- (i) If the monitoring, required by this section, reveals employee exposure to be below the permissible exposure limits, the employer shall repeat such monitoring at least quarterly.
- (ii) If the monitoring, required by this section, reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat these determinations for each such employees at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.
- (4) Additional monitoring.
- Whenever there has been a production, process, control or personnel change which may result in new or additional exposure to xxxxx, or whenever the
- (3) Frequency.
- (i) If the monitoring, required by this section, reveals employee exposure to be below the permissible exposure limits, the employer shall repeat such monitoring at least quarterly.
- (ii) If the monitoring, required by this section, reveals employee exposure to be in excess of the permissible exposure limits, the employer shall repeat these determinations for each such employees at least monthly. The employer shall continue these monthly measurements until at least two consecutive measurements, taken at least seven (7) days apart, are below the permissible exposure limits, and thereafter the employer shall monitor at least quarterly.
- (4) Additional monitoring.
- Whenever there has been a production, process, control or personnel change which may result in new or additional exposure to xxxxx, or whenever the

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

employer has any other reason to suspect a change which may result in new or additional exposures to xxxxx, additional monitoring which complies with this paragraph shall be conducted.

(5) Employee notification.

(i) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employee's exposure.

(ii) Whenever the results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice a statement that permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

employer has any other reason to suspect a change which may result in new or additional exposures to xxxxx, additional monitoring which complies with this paragraph shall be conducted.

(5) Employee notification.

(i) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employees exposure.

(ii) Whenever the results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice a statement that the permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

employer has any other reason to suspect a change which may result in new or additional exposure to xxxxx, additional monitoring which complies with this paragraph shall be conducted.

(5) Employee notification.

(i) Within five (5) working days after the receipt of monitoring results, the employer shall notify each employee in writing of the results which represent that employee's exposure.

(ii) Whenever such results indicate that the representative employee exposure exceeds the permissible exposure limits, the employer shall include in the written notice a statement that the permissible exposure limits were exceeded and a description of the corrective action being taken to reduce exposure to or below the permissible exposure limits.

PROPOSED RULES

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(6) Accuracy of measurement. The method of measurement shall be accurate, to a confidence level of 95 percent, to within plus or minus (insert appropriate value) for concentrations of xxxxx at or above the permissible exposure limits.

(7) Type of monitoring. (Where applicable, specific mandatory monitoring devices and techniques may be required.)

(6) Accuracy of measurement. The method of measurement shall be accurate, to a confidence level of 95 percent, to within plus or minus (insert appropriate value) for concentrations of xxxxx at or above the permissible exposure limits.

(7) Type of monitoring. (Where applicable, specific mandatory monitoring devices and techniques may be required.)

(6) Accuracy of measurement. The method of measurement shall be accurate, to a confidence level of 95 percent, to within plus or minus (insert appropriate value) for concentrations of xxxxx at or above the permissible exposure limit.

(7) Type of monitoring. (Where applicable, specific mandatory monitoring and techniques may be required.)

PROPOSED RULES

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(f) Regulated areas. (deleted.)(f) Regulated areas.

- (1) The employer shall establish regulated areas where ~~xxxx~~ concentrations are in excess of the permissible exposure limits.
- (2) Regulated areas shall be demarcated and segregated from the rest of the workplace, in any manner that minimizes the number of persons who will be exposed to ~~xxxx~~.
- (3) Access to regulated areas shall be limited to authorized persons or to persons otherwise authorized by the Act or regulations issued pursuant thereto.
- (4) The employer shall assure that in the regulated area, food or beverages are not present or consumed, smoking products are not present or used, and cosmetics are not applied, (except that these activities may be conducted in the lunchroom, change rooms and showers required under paragraphs (m) (1) - (m) (3) of this section.)

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(g) Methods of compliance.(1) General policy. OSHA's

general policy as to methods of compliance for permanent standards has traditionally required that employee exposures to a substance be reduced to the permissible exposure limits solely by use of engineering and work practice controls. OSHA has permitted reduction of employee exposures by use of respiratory protection only where the employer proves that engineering and work practice controls are not feasible to reduce such exposures to the permissible exposure limits. This general policy is inherent in the model standards found in 29 CFR 1990.160 and 1990.170. However, during the effective period of this emergency temporary standard, OSHA recognizes the need to permit employee exposures to airborne concentrations of ~~xxxx~~ to be controlled by any practicable combination of engineering controls, work practices and personal protective devices and

(g) Methods of compliance.(1) Engineering and work practice controls. (1) Engineering and work practice controls.

(i) The employer shall institute engineering or work practice controls to reduce and maintain employee exposures to ~~xxxx~~ to or below the permissible exposure limits, except to the extent that the employer establishes that such controls are not feasible.

(ii) Wherever the engineering and work practice controls which can be instituted are not sufficient to reduce employee exposures to or below the permissible exposure limits, the employer shall nonetheless use them to reduce exposures to the lowest levels achievable by these controls and shall supplement them by the use of respiratory protection which complies with the requirements of paragraph (h) of this section.

(g) Methods of compliance.(1) Engineering and work practice controls. (1) Engineering and work practice controls.

(i) The employer shall institute engineering or work practice controls to reduce and maintain employee exposures to ~~xxxx~~ to or below the permissible exposure limits, except to the extent that the employer establishes that such controls are not feasible.

(ii) Wherever the engineering and work practice controls which can be instituted are not sufficient to reduce employee exposures to or below the permissible exposure limits, the employer shall nonetheless use them to reduce exposures to the lowest levels achievable by those controls and shall supplement them by the use of respiratory protection which complies with the requirements of paragraph (h) of this section.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

equipment as follows. OSHA recognizes that the immediate reduction of exposure to xxxxx may generally be achieved primarily through the use of respiratory protection and the institution of good work practices during the effective period of this emergency temporary standard, such as the prohibitions against the blowing of dust containing xxxxx or the permitting of open xxxxx containers and vessels of liquids containing xxxxx. On the other hand, OSHA believes that where engineering or work practice controls can reduce exposure, they should be used, even where such controls by themselves do not reduce the exposures to the permissible exposure limits.

Thus, engineering controls to reduce the airborne concentration of xxxxx shall be instituted, if practicable, as soon as possible. Examples of such controls include substitution of a less hazardous material, enclosure of the process, and use of local exhaust

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

ventilation systems. The employer should also examine each work area in which xxxxx is present and institute, as soon as possible, work practices to reduce employee exposures to xxxxx to or below the permissible exposure limits. Examples of such work practices include, among other things, limiting access to work areas where xxxxx is present to authorized personnel only; written procedures and work practices for each operation which may result in employee exposure to xxxxx; prohibiting smoking and the consumption of food and beverages in work areas where xxxxx is present; requiring the use of appropriate personal protective clothing and equipment to minimize eye and skin contact with xxxxx; use of signs, labels, or other means to clearly designate all work areas where xxxxx may be present; and institution of good housekeeping practices as set forth in paragraph (k) of this section.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

V 4 2 1 9 2 OCT 4 7 7 UMI

Finally, as pointed out, whenever the engineering and work practice controls described are not sufficient to reduce employee exposures to or below the permissible exposure limits, the employer should supplement them by the use of respiratory protection which complies with the requirements of the emergency temporary standard.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(2) Engineering and work practice control plan.

(i) Within ninety (90) days of the effective date of this emergency temporary standard, the employer shall develop a written plan describing proposed means to reduce employee exposures to the lowest feasible level solely by means of engineering and work practice controls (which will be eventually required by a permanent standard for occupational exposure to ~~xxxxx~~, issued pursuant to section 1990.160 (g) of this subpart).

(ii) Written plans required by this paragraph shall be submitted, upon request, to the Assistant Secretary and the Director and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, and any affected employee or designated representative.

(2) Compliance program.

(i) The employer shall establish and implement a written program to reduce exposures to or below the permissible exposure limits solely by means of engineering and work practice controls, as required by paragraph (g) (1) of this section.

(2) Compliance program.

(i) The employer shall establish and implement a written program to reduce exposures to or below the permissible exposure limits solely by means of engineering and work practice controls, as required by paragraph (g) (1) of this section.

(ii) Written plans for these compliance programs shall include at least the following:

(A) A description of each operation or process resulting in employee exposure to ~~xxxxx~~;
(B) Engineering plans and other studies used to determine the controls for each process;
(C) A report of the technology considered in meeting the permissible exposure limits;

(ii) Written plans for these compliance programs shall include at least the following:

(A) A description of each operation or process resulting in employee exposure to ~~xxxxx~~;
(B) Engineering plans and other studies used to determine the controls for each process;
(C) A report of the technology considered in meeting the permissible exposure limits;

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

V 4 2 1 9 2 O C T 4 7 7 UMI

- (D) A detailed schedule for the implementation of engineering or work practice controls; and
- (E) Other relevant information.
- (iii) Written plans for such a program shall be submitted, upon request, to the Assistant Secretary and the Director, and shall be available at the worksite for examination and copying by the Assistant Secretary, the Director, or any affected employee or representative.

- (iv) The plans required by this paragraph shall be revised and updated at least every six (6) months to reflect the current status of the program.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(h) Respiratory Protection.

- (1) Required use. The employer shall assure that respirators are used where required pursuant to this section to reduce employee exposures to within the permissible exposure limits and in emergencies.

(h) Respiratory Protection.

- (1) General. The employer shall assure that respirators are used where required pursuant to this section to reduce employee exposures to within the permissible exposure limits and in emergencies. Compliance with the permissible exposure limits may not be achieved by the use of respirators except:

- (i) During the time period necessary to install or implement feasible engineering and work practice controls; or

- (ii) In work operations such as maintenance and repair activities in which the employer establishes that engineering and work practice controls are not feasible; or

- (iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; or

(h) Respiratory Protection.

- (1) General. The employer shall assure that respirators are used where required pursuant to this section to reduce employee exposure to within the permissible exposure limits and in emergencies. Compliance with the permissible exposure limits may not be achieved by the use of respirators except:

- (i) During the time period necessary to install or implement feasible engineering and work practice controls; or

- (ii) In work operations such as maintenance and repair activities in which the employer establishes that engineering and work practice controls are not feasible; or

- (iii) In work situations where feasible engineering and work practice controls are not yet sufficient to reduce exposure to or below the permissible exposure limits; or

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (2) Respirator selection.
- (i) Where respiratory protection is required or permitted under this section, the employer shall select and provide at no cost to the employee, the appropriate respirator from Table 1 below and shall assure that the employee wears the respirator provided.
- (iv) In emergencies.
- (2) Respirator selection.
- (1) Where respiratory protection is required under this section, the employer shall select and provide at no cost to the employee, the appropriate type of respirator from Table 1 below and shall assure that the employee uses the respirator provided.

Table 1

RESPIRATORY PROTECTION FOR XXXXX

RESPIRATORY PROTECTION FOR XXXXX

* * *

(The table will contain a listing of the appropriate type of respirator for various conditions of exposure to XXXXX).

(ii) The employer shall select respirators from those approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.

(The table will contain a listing of the appropriate type of respirator for various conditions of exposure to XXXXX).

(ii) The employer shall select respirators from those approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.

(ii) The employer shall select respirators from those approved by the National Institute for Occupational Safety and Health under the provisions of 30 CFR Part 11.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (3) Respirator program.
- (i) The employer shall institute a respiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e) and (f).
- (ii) Employees who wear respirators shall be allowed to wash their face and respirator facepiece to prevent potential skin irritation associated with respirator use.
- (3) Respirator program.
- (i) The employer shall institute a respiratory protection program in accordance with 29 CFR 1910.134 (b), (d), (e), and (f).
- (ii) Employees who wear respirators shall be allowed to wash their face and respirator facepiece to prevent potential skin irritation associated with respirator use.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(1) Emergency situations.
(deleted.)

(i) Emergency situations.

(1) Written Plans.

(i) A written plan for emergency situations shall be developed for each workplace where ~~xxxx~~ is present. Appropriate portions of the plan shall be implemented in the event of an emergency.

(ii) The plan shall specifically provide that employees engaged in correcting emergency conditions shall be equipped as required in paragraph (h) of this section until the emergency is abated.

(2) Alerting employees.

(i) Alarms. Where there is the possibility of employee exposure to ~~xxxx~~ in excess of the ceiling limit due to the occurrence of an emergency, a general alarm shall be installed and maintained to promptly alert employees of such occurrences.

PROPOSED RULES

(1) Emergency situations.

(1) Written Plans.

(i) A written plan for emergency situations shall be developed for each workplace where ~~xxxx~~ is present. Appropriate portions of the plan shall be implemented in the event of an emergency.

(ii) The plan shall specifically provide that employees engaged in correcting emergency conditions shall be equipped as required in paragraph (h) of this section until the emergency is abated.

(2) Alerting employees.

(i) Alarms. Where there is the possibility of employee exposure to ~~xxxx~~ in excess of the ceiling limit due to the occurrence of an emergency, a general alarm shall be installed and maintained to promptly alert employees of such occurrences.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

PROPOSED RULES

(ii) Evacuation. Employees not engaged in correcting the emergency shall be restricted from the area and shall not be permitted to return until the emergency is abated.

(ii) Evacuation. Employees not engaged in correcting the emergency shall be restricted from the area and shall not be permitted to return until the emergency is abated.

(j) Protective clothing and equipment.

- (1) Provision and use. Where eye or skin contact with ~~xxxxx~~ may occur, the employer shall provide, at no cost to the employee, and assure that employees wear, appropriate protective clothing or other equipment in accordance with 29 CFR 1910.132 and .133 to protect the area of the body which may come in contact with ~~xxxxx~~.

(2) Cleaning and replacement.

- (i) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this paragraph, as needed, to maintain their effectiveness. In addition the employer shall provide clean protective clothing and equipment at least ~~(insert appropriate time)~~ to each affected employee.

(j) Protective clothing and equipment.

- (1) Provision and use. Where eye or skin contact with ~~xxxxx~~ may occur, the employer shall provide at no cost to the employee, and assure that employees wear, appropriate protective clothing or other equipment in accordance with 29 CFR 1910.132 and .133 to protect the area of the body which may come in contact with ~~xxxxx~~.

(2) Cleaning and replacement.

- (i) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this paragraph, as needed, to maintain their effectiveness. In addition, the employer shall provide clean protective clothing and equipment at least ~~(insert appropriate time)~~ to each affected employee.

(j) Protective clothing and equipment.

- (1) Provision and use. Where eye or skin contact with ~~xxxxx~~ may occur, the employer shall provide at no cost to the employee, and assure that employees wear, appropriate protective clothing or equipment in accordance with 29 CFR 1910.132 and .133 to protect the area of the body which may come in contact with ~~xxxxx~~.

(2) Cleaning and replacement.

- (i) The employer shall clean, launder, maintain, or replace protective clothing and equipment required by this paragraph, as needed, to maintain their effectiveness. In addition the employer shall provide clean protective clothing and equipment at least ~~(insert appropriate time)~~ to each affected employee.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (ii) The employer shall assure that the employee removes all protective clothing and equipment at the completion of a workshift.

- (iii) The employer shall assure that ~~xxxxx~~-contaminated protective clothing and equipment is placed and stored in closed containers which prevent dispersion of ~~xxxxx~~ outside the container.

- (ii) The employer shall assure that the employee removes all protective clothing and equipment at the completion of a work shift and only in change rooms as required by paragraph (m) (1) of this section.

- (iii) The employer shall assure that ~~xxxxx~~-contaminated protective clothing and equipment is placed and stored in closed containers which prevent dispersion of ~~xxxxx~~ outside the container.

- (iv) The employer shall assure that no employee removes ~~xxxxx~~-contaminated protective equipment or clothing from the change room, except for those employees authorized to do so for the purpose of laundering, maintenance, or disposal.

- (ii) The employer shall assure that the employee removes all protective clothing and equipment at the completion of a work shift and only in change rooms as required by paragraph (m) (1) of this section.

- (iii) The employer shall assure that ~~xxxxx~~-contaminated protective clothing and equipment is placed and stored in closed containers which prevent dispersion of ~~xxxxx~~ outside the container.

- (iv) The employer shall assure that no employee removes contaminated protective equipment or clothing from the change room except for those employees authorized to do so for the purpose of laundering, maintenance, or disposal.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(iv) The employer shall inform any person who launders or cleans ~~xxxx~~ contaminated protective clothing or equipment of the potentially harmful effects of exposure to ~~xxxx~~.

(v) The employer shall assure that the containers of contaminated protective clothing and equipment which are to be removed from the workplace for any reason are labeled in accordance with paragraph (p) (3) of this section.

(vi) The employer shall prohibit the removal of ~~xxxx~~ from protective clothing or equipment by blowing or shaking.

(v) The employer shall inform any person who launders or cleans ~~xxxx~~ contaminated protective clothing or equipment of the potentially harmful effects of exposure to ~~xxxx~~.

(vi) The employer shall assure that the containers of contaminated protective clothing and equipment which are to be removed from the workplace for any reason are labeled in accordance with paragraph (p) (3) (ii) of this section.

(vii) The employer shall prohibit the removal of ~~xxxx~~ from protective clothing or equipment by blowing or shaking.

(v) The employer shall inform any person who launders or cleans ~~xxxx~~ contaminated protective clothing or equipment of the potentially harmful effects of exposure to ~~xxxx~~.

(vi) The employer shall assure that the containers of contaminated protective clothing and equipment which are to be removed from the workplace for any reason are labeled in accordance with paragraph (p) (3) (ii) of this section.

(vii) The employer shall prohibit the removal of ~~xxxx~~ from protective clothing or equipment by blowing or shaking of work clothing.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(k) Housekeeping.

(1) Surfaces.

(i) All surfaces shall be maintained free of accumulations of ~~xxxx~~.

(ii) Dry sweeping and the use of compressed air for the cleaning of floors and other surfaces where ~~xxxx~~ dust or liquids are found is prohibited.

(iii) Where vacuuming methods are selected, either portable units or a permanent system may be used.

(A) If a portable unit is selected, the exhaust shall be attached to the general workplace exhaust ventilation system or collected within the vacuum unit, equipped with high efficiency filters or other appropriate means of contaminant removal, so that ~~xxxx~~ is not reintroduced into the work place air; and

(k) Housekeeping.

(m) Hygiene facilities and practices. Where employees are exposed to airborne concentrations of ~~xxxxx~~, or where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, or where otherwise found to be appropriate, the facilities required by 29 CFR 1910.141 shall be provided by the employer for the use of those employees, and the employer shall assure that the employees use the facilities provided.

(m) Hygiene facilities and practices. Where employees are exposed to airborne concentrations of ~~xxxxx~~, or where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, or where otherwise found to be appropriate, the facilities required by 29 CFR 1910.141 shall be provided by the employer for the use of those employees and the employer shall assure that the employees use the facilities provided. In addition, the following additional facilities or requirements are mandated.

(1) Change rooms. The employer shall provide clean change rooms in accordance with 29 CFR 1910.141(e).

(2) Showers.

(i) The employer shall provide shower facilities in accordance with 29 CFR 1910.141(d)(3).

(m) Hygiene facilities and practices. Where employees are required to wear protective clothing or equipment pursuant to paragraph (j) of this section, or where otherwise found to be appropriate, the facilities required by 29 CFR 1910.141 or in this paragraph shall be provided by the employer for the use of those employees and the employer shall assure that the employees use the facilities provided. In addition, the following additional facilities or requirements are mandated.

(1) Change rooms. The employer shall provide clean change rooms in accordance with 29 CFR 1910.141(e).

(2) Showers.

(i) The employer shall provide shower facilities in accordance with 29 CFR 1910.141(d)(3).

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(ii) In addition, the employer shall also assure that employees exposed to ~~xxxxx~~ shower at the end of the work shift.

(3) Lunchrooms.

(i) Whenever food or beverages are consumed in the workplace, the employer shall provide lunchroom facilities which have a temperature controlled, positive pressure, filtered air supply, and which are readily accessible to employees exposed to ~~xxxxx~~.

(ii) In addition the employer shall also assure that employees exposed to ~~xxxxx~~ wash their hands and face prior to eating.

(ii) In addition, the employer shall also assure that employees exposed to ~~xxxxx~~ shower at the end of the work shift.

(3) Lunchrooms.

(i) The employer shall provide appropriate facilities for eating and drinking in accordance with 29 CFR 1910.141 (g) and (h).

(ii) The employer shall assure that employees exposed to ~~xxxxx~~ wash their hands and face prior to eating.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(n) Medical surveillance.(1) General.

(i) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to ~~xxxxx~~. The employer shall provide each such employer with an opportunity for medical examinations and tests in accordance with this paragraph.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and shall be provided without cost to the employee.

(n) Medical surveillance.(1) General.

(i) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to ~~xxxxx~~. The employer shall provide each such employee with an opportunity for medical examinations and tests in accordance with this paragraph.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and shall be provided without cost to the employee.

(n) Medical surveillance.(1) General.

(i) The employer shall institute a program of medical surveillance for each employee who is or will be exposed to ~~xxxxx~~. The employer shall provide each employee with an opportunity for medical examinations and tests in accordance with this paragraph.

(ii) The employer shall assure that all medical examinations and procedures are performed by or under the supervision of a licensed physician, and shall be provided without cost to the employee.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(2) Initial examinations. Within thirty (30) days of the effective date of this section, or thereafter at the time of initial assignment, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history, a medical history, and a physical examination with direct emphasis towards the pulmonary, renal, and hepatic systems, and shall include the personal history of the employee, family, and occupational background, including genetic and environmental factors. Additionally, such factors as the current systems review, pregnancy, current treatment with steroids or cytotoxic agents, and smoking habits should be considered.

(ii) The medical examination shall also include the following: (insert appropriate medical protocol).

(2) Initial examinations. At the time of initial assignment, or upon institution of the medical surveillance program, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history, a medical history, and a physical examination with direct emphasis towards the pulmonary, renal and hepatic systems, and shall include the personal history of the employee, family, and occupational background, including genetic and environmental factors. Additionally, such factors as the current systems review, pregnancy, current treatment with steroids or cytotoxic agents, and smoking habits should be considered.

(ii) The medical examination shall also include the following: (insert appropriate medical protocol).

(2) Initial examinations. At the time of initial assignment, or upon institution of the medical surveillance program, the employer shall provide each affected employee an opportunity for a medical examination, including at least the following elements:

(i) A work history, a medical history, and a physical examination with direct emphasis towards the pulmonary, renal and hepatic systems, and shall include the personal history of the employee, family, and occupational background, including genetic and environmental factors. Additionally, such factors as the current systems review, pregnancy, current treatment with steroids or cytotoxic agents, and smoking habits should be considered.

(ii) The medical examination shall also include the following: (insert appropriate medical protocol).

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(3) Periodic examinations. (Insert appropriate medical protocol and time.)

(3) Periodic examinations.
(i) The employer shall provide examinations specified in this paragraph at least (insert appropriate time) for all employees specified in paragraph (n) (1) of this section.

(ii) If an employee has not had the examinations prescribed in paragraph (n) (2) of this section within 6 months of termination of employment, the employer shall make such examination available to the employee upon such termination.

(4) Interim examinations. If the employee for any reason develops signs or symptoms commonly associated with exposure to ~~xxxxx~~, the employer shall provide appropriate examination and emergency medical treatment.

(4) Additional examinations. If the employee for any reason develops signs or symptoms commonly associated with exposure to ~~xxxxx~~, the employer shall provide appropriate examination and emergency medical treatment.

(3) Periodic examinations.
(i) The employer shall provide examinations specified in this paragraph at least (insert appropriate time) for all employees specified in paragraph (n) (1) of this section.

(ii) If an employee has not had the examinations prescribed in paragraph (n) (2) of this section within 6 months of termination of employment, the employer shall make such examination available to the employee upon such termination.

(4) Additional examinations. If the employee for any reason develops signs or symptoms commonly associated with exposure to ~~xxxxx~~, the employer shall provide appropriate examination and emergency medical treatment.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(5) Information provided to the physician. The employer shall provide the following information to the examining physician:
(i) A copy of this emergency temporary standard and its appendices;
(ii) A description of the affected employee's duties as they relate to the employee's exposure;
(iii) The employee's representative exposure level; and

(iv) A description of any personal protective equipment used or to be used.

(5) Information provided to the physician.
The employer shall provide the following information to the examining physician:
(i) A copy of this standard and its appendices;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;
(iii) The employee's representative exposure level;

(iv) The employee's anticipated or estimated exposure level (for preplacement examinations or in cases of exposure due to an emergency);

(v) A description of any personal protective equipment used or to be used; and

(vi) Information from previous medical examinations of the affected employee, which is not otherwise available to the examining physician.

(5) Information provided to the physician.
The employer shall provide the following information to the examining physician:
(i) A copy of this standard and its appendices;

(ii) A description of the affected employee's duties as they relate to the employee's exposure;

(iii) The employee's representative exposure level;

(iv) The employee's anticipated or estimated exposure level (for preplacement examinations or in cases of exposure due to an emergency);

(v) A description of any personal protective equipment used or to be used; and

(vi) Information from previous medical examinations of the affected employee, which is not otherwise available to the examining physician.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (6) Physician's written opinion.
- (i) The employer shall obtain a written opinion from the examining physician which shall include:
- (A) The results of the medical tests performed;
- (B) The physician's opinion as to whether the employee has any detected medical condition which would place the employee at an increased risk of material impairment of the employee's health from exposure to xxxxx;
- (C) Any recommended limitations upon the employee's exposure to xxxxx or upon the use of protective clothing and equipment such as respirators; and
- (6) Physician's written opinion.
- (i) The employer shall obtain a written opinion from the examining physician which shall include:
- (A) The results of the medical tests performed;
- (B) The physician's opinion as to whether the employee has any detected medical condition which would place the employee at an increased risk of material impairment of the employee's health from exposure to xxxxx;
- (C) Any recommended limitations upon the employee's exposure to xxxxx or upon the use of protective clothing and equipment such as respirators; and
- (6) Physician's written opinion.
- (i) The employer shall obtain a written opinion from the examining physician which shall include:

- (g) Recordkeeping.
- (1) Exposure monitoring.
- (i) The employer shall establish and maintain an accurate record of all monitoring required by paragraph (e) of this section.
- (ii) This record shall include:
- (A) The dates, number, duration and results of each of the samples taken, including a description of the sampling procedure used to determine representative employee exposure;
- (B) A description of the sampling and analytical methods used;
- (C) Type of respiratory protective devices worn, if any; and
- (D) Name, social security number and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent.
- (g) Recordkeeping.
- (1) Exposure monitoring.
- (i) The employer shall establish and maintain an accurate record of all monitoring required by paragraph (e) of this section.
- (ii) This record shall include:
- (A) The dates, number, duration, and results of each of the samples taken, including a description of the sampling procedure used to determine representative employee exposure;
- (B) A description of the sampling and analytical methods used;
- (C) Type of respiratory protective devices worn, if any; and
- (D) Name, social security number and job classification of the employee monitored and of all other employees whose exposure the measurement is intended to represent.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

- (iii) The employer shall maintain this record for the effective period of this emergency temporary standard, and for any additional period required by the permanent standard.
- (2) Medical surveillance.
- (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.
- (ii) This record shall include:
- (A) A copy of the physicians' written opinions;
- (B) Any employee medical complaints related to exposure to ~~xxxx~~;
- (C) A copy of the information provided to the physician as required by paragraph (n) (6) of this section; and
- (D) A copy of the employee's work history.
- (iii) The employer shall maintain this record for at least 40 years or the duration of employment plus 20 years, whichever is longer.
- (2) Medical surveillance.
- (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.
- (ii) This record shall include:
- (A) A copy of the physicians' written opinions;
- (B) Any employee medical complaints related to exposure to ~~xxxx~~;
- (C) A copy of the information provided to the physician as required by paragraph (n) (6) of this section; and
- (D) A copy of the employee's work history.
- (iii) The employer shall maintain this record for at least 40 years or the duration of employment plus 20 years, whichever is longer.
- (2) Medical surveillance.
- (i) The employer shall establish and maintain an accurate record for each employee subject to medical surveillance as required by paragraph (n) of this section.
- (ii) This record shall include:
- (A) A copy of the physicians' written opinions;
- (B) Any employee medical complaints related to exposure to ~~xxxx~~;
- (C) A copy of the information provided to the physician as required by paragraph (n) (6) of this section; and
- (D) A copy of the employee's work history.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(iii) The employer shall assure that this record be maintained for the effective period of this emergency temporary standard, and for any additional period required by the permanent standard.

(3) Availability.

(i) The employer shall assure that all records required to be maintained by this section be made available upon request to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall assure that employee exposure measurement records, as required by this section, be made available, upon request, for examination and copying to the affected employee, former employee, or designated representative.

(iii) The employer shall assure that this record be maintained for at least forty (40) years, or for the duration of employment plus twenty (20) years, whichever is longer.

(3) Availability.

(i) The employer shall assure that all records required to be maintained by this section be made available upon request to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall assure that employee exposure measurement records, as required by this section, be made available, upon request, for examination and copying to the affected employee, former employee, or designated representative.

(iii) The employer shall assure that this record be maintained for at least forty (40) years, or for the duration of employment plus twenty (20) years, whichever is longer.

(3) Availability.

(i) The employer shall assure that all records required to be maintained by this section be made available upon request to the Assistant Secretary and the Director for examination and copying.

(ii) The employer shall assure that employee exposure measurement records, as required by this section, be made available, upon request, for examination and copying, to the affected employee, former employee, or designated representative.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(iii) The employer shall assure that employee medical records required to be maintained by this section, be made available, upon request, for examination and copying to the affected employee or former employee, or to a physician designated by the affected employee, former employee, or designated representative.

(iii) The employer shall assure that employee medical records required to be maintained by this section, be made available, upon request, for examination and copying, to the affected employee or former employee, or to a physician designated by the affected employee, former employee, or designated representative.

(iii) The employer shall assure that employee medical records required to be maintained by this section, be made available, upon request, for examination and copying to the affected employee or former employee, or to a physician designated by the affected employee, former employee, or designated representative.

(4) Transfer of records.

(i) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by this section.

(ii) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records for the prescribed period, these records shall be transmitted to the Director.

(4) Transfer of records.

(i) Whenever the employer ceases to do business, the successor employer shall receive and retain all records required to be maintained by this section.

(ii) Whenever the employer ceases to do business and there is no successor employer to receive and retain the records for the prescribed period, these records shall be transmitted to the Director.

FEDERAL REGISTER, VOL. 42, NO. 192—TUESDAY, OCTOBER 4, 1977

(iii) At the expiration of the retention period for the records required to be maintained pursuant to this section, the employer shall transmit these records to the Director.

(iii) At the expiration of the retention period for the records required to be maintained pursuant to this section, the employer shall transmit these records to the Director.

(r) Observation of monitoring.

(1) Employee observation. The employer shall provide affected employees, or their designated representatives, an opportunity to observe any monitoring of employee exposure to ~~xxxxx~~ conducted pursuant to paragraph (e) of this section.

(2) Observation procedures.

(i) Whenever observation of the monitoring of employee exposure to ~~xxxxx~~ requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide the observer with personal protective clothing or equipment required to be worn by employees working in the area, assure the use of such clothing and equipment, and require the observer to comply with all other applicable safety and health procedures.

(r) Observation of Monitoring.

(1) Employee observation. The employer shall provide affected employees, or their designated representatives, an opportunity to observe any monitoring of employee exposure to ~~xxxxx~~ conducted pursuant to paragraph (e) of this section.

(2) Observation procedures.

(i) Whenever observation of the monitoring of employee exposure to ~~xxxxx~~ requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide the observer with personal protective clothing or equipment required to be worn by employees working in the area, assure the use of such clothing and equipment, and require the observer to comply with all other applicable safety and health procedures.

(r) Observation of monitoring.

(1) Employee observation. The employer shall provide affected employees, or their designated representatives, an opportunity to observe any monitoring of employee exposure to ~~xxxxx~~ conducted pursuant to paragraph (e) of this section.

(2) Observation procedures.

(i) Whenever observation of the monitoring of employee exposure to ~~xxxxx~~ requires entry into an area where the use of protective clothing or equipment is required, the employer shall provide the observer with personal protective clothing or equipment required to be worn by employees working in the area, assure the use of such clothing and equipment, and require the observer to comply with all other applicable safety and health procedures.

- (ii) Without interfering with the monitoring observers shall be entitled to:
- (A) Receive an explanation of the measurement procedures;
- (B) Observe all steps related to the measurement of airborne concentrations of xxxxx performed at the place of exposure; and
- (C) Record the results obtained.
- (ii) Without interfering with the monitoring observers shall be entitled to:
- (A) Receive an explanation of the measurement procedures;
- (B) Observe all steps related to the measurement of airborne concentrations of xxxxx performed at the place of exposure; and
- (C) Record the results obtained.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

Title 3—The President

Executive Order 12012

October 3, 1977

White House Fellowships

By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, Executive Order No. 11183, as amended, is further amended as follows:

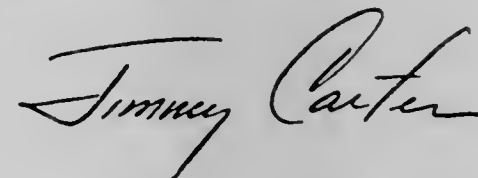

SECTION 1. The word "young" is deleted wherever it appears in the preamble and in Section 2(a).

SEC. 2. Section 2(b) (2) is amended to read:

"(2) Are presently early in their chosen careers and show exceptional promise of future development;"

SEC. 3. Section 2(b) (4) is deleted, the word "and" is added at the end of Section 2(b) (3), and Section 2(b) (5) is redesignated as Section 2(b) (4).

SEC. 4. Section 2(c) is amended by adding "age" after "national origin,".

THE WHITE HOUSE,
October 3, 1977.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 1—General Provisions

CHAPTER III—ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

PART 305—RECOMMENDATIONS OF THE ADMINISTRATIVE CONFERENCE OF THE UNITED STATES

Miscellaneous Amendments

AGENCY: Administrative Conference of the United States.

ACTION: Recommendations.

The Administrative Conference of the United States was established by the Administrative Conference Act, 5 U.S.C. 571-576, to study the efficiency, adequacy and fairness of the administrative procedure used by administrative agencies in carrying out administrative programs, and to make recommendations for improvement to administrative agencies, collectively or individually, to the President, Congress, and the Judicial Conference of the United States (5 U.S.C. 574 (1)).

The Administrative Conference of the United States at its Sixteenth Plenary Session, held September 15-16, 1977, adopted three Recommendations. Recommendation 77-1 urges that Congress should not, in general legislation or as a routine practice, provide for prior submission of agency rules for Congressional review and possible veto. Recommendation 77-2 makes a series of recommendations for legislation concerning the judicial review of actions taken by the U.S. Customs Service. Recommendation 77-3 prescribes guidelines for agency handling of those ex parte communications which may occur in the course of an informal rulemaking proceeding.

DATES: These recommendations were adopted September 15-16, 1977, and issued September 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard K. Berg, Executive Secretary, (202-254-7065).

1. The table of contents to Part 305 of Title I, Chapter III, CFR is amended to add the following sections:

- Sec.
305.77-1 Legislative Veto of Administrative Regulations (Recommendation No. 77-1).
305.77-2 Judicial Review of Customs Service Actions (Recommendation No. 77-2).
305.77-3 Ex parte Communications in Informal Rulemaking Proceedings (Recommendation No. 77-3).

2. Section 305.77-1 is added to Part 305 to read as follows:

§ 305.77-1 Legislative Veto of Administrative Regulations (Recommendation No. 77-1).

Congress has by statute occasionally required that certain agency actions be subject to Congressional approval or disapproval before they became effective. Several proposals have now been advanced which would apply this procedure to all substantive rules issued pursuant to the notice-and-comment procedures of 5 U.S.C. § 553 (which are not subject to 5 U.S.C. §§ 556 and 557). These proposals typically would provide that if either house of Congress disapproved a proposed rule within a specified period, such as 60 days, it would not take effect.

The Conference believes that this kind of legislative veto would not further the ability of Congress to direct agency policy; moreover, it would bring about undesirable changes in the rulemaking process and in relationships among the agencies, Congress, and the courts.

1. Agencies. Legislative veto proposals contemplate postponing the effective date of most agency rules for two months beyond the present statutory period of thirty days that must elapse between their publication in the FEDERAL REGISTER and their taking effect. This additional period is prescribed so that Congress may have opportunity to exercise the power of review. The volume of existing agency rulemaking and the technical or noncontroversial nature of many rules suggest, however, that few proposed rules would in fact receive specific Congressional attention. Nevertheless the operation of the great mass of rules, whether or not actually considered by Congress, would be postponed without corresponding benefit and often with unfortunate public consequences. In instances when Congress did undertake review, it would risk engaging in piecemeal examination of particular rules, in isolation from an agency's program as a whole, and without benefit of the experience and specialized knowledge that had shaped the elements of that program. Of great concern is the possibility that Congressional review of administrative agencies' rules would significantly diminish the importance of the procedures now prescribed by law to assure public participation in rulemaking. Rules that survive active legislative review are likely to be based upon negotiations with Congressional units rather than upon the information, expression of opinion, research materials, and background experience that shaped the agency's policy.

2. Congress. Legislative review of substantive rules would increase the workload of Congress substantially. Review of complex, technical rules would be difficult, time consuming, and often impracticable. Yet, in the belief that each agency's work product would have to undergo later scrutiny by Congress or its committee staffs, Congress might be more ready even than at present to delegate power in broad terms and to avoid specificity and precision in formulating legislative policies that guide agency discretion. Piecemeal review, moreover, might create a misleading impression that Congress has endorsed by implication whatever it has not explicitly disapproved. Were that impression to become widespread, Congress might be deemed to

have accepted a responsibility of unforeseen dimensions.

3. Courts. A procedure for Congressional review of agency rules may also imply legislative ratification of rules not disapproved by Congress. If legislative approval is inferred from inaction by Congress under the proposed procedure, then the scope of judicial review may be reduced without provision of an adequate substitute. Existing constraints on agency rulemaking discretion would therefore be lessened in a manner not intended by Congress.

The objectives of a generic requirement of legislative review of administrative rules can be realized by careful delineations of basic Congressional policy, by particularized statutes addressed to specific issues, and by Congressional hearings focused on review of agency policy rather than on details. Careful attention to appointments and appropriations constitutes a further effective means of maintaining Congressional oversight of agencies' use of delegated power.

RECOMMENDATION

The Conference urges that Congress should not, in general legislation or as a routine practice, provide for prior submission of agency rules for Congressional review and possible veto.

3. Section 305.77-2 is added to Part 305 to read as follows:

§ 305.77-2 Judicial Review of Customs Service Actions (Recommendation No. 77-2).

A. *Jurisdiction and Powers of the Customs Court.* The Customs Court has exclusive jurisdiction to review decisions of the Customs Service (1) denying protests of importers relating to certain enumerated matters and (2) rejecting petitions of United States manufacturers, producers or wholesalers to challenge certain actions taken with respect to merchandise imported by others. Actions of the Customs Service suspending or revoking customs brokers licenses are reviewable, by statute, in the courts of appeals.¹ There are other actions of the Customs Service that are administratively final but for which no specific statutory provision for review has been made. These include decisions made by the Service to suspend or discontinue permits for immediate delivery of merchandise as well as decisions to exclude certain types of merchandise from entry. Such actions are now reviewable, if at all, in the district courts pursuant to their general or special jurisdiction.

Moreover, the Customs Court does not have power at present to "compel agency action unlawfully withheld or unreasonably delayed," as can district courts under the APA, 5 U.S.C. § 706(1). The Customs Service sometimes fails to act on significant matters

¹ The Conference has not studied the advisability of a change in the reviewing forum for such action. Nor does the Conference intend that the current method of reviewing personnel actions of the Customs Service or its determinations under the Freedom of Information Act or like statutes be disturbed.

for such extended periods that its inaction may amount to agency action, as defined by 5 U.S.C. § 551(13) to include "failure to act." An example is the failure or refusal of the Service to complete the final assessment of duties payable on an importation. Finally, the Customs Court has no power at present to provide relief until after the protest or petition process has run its course even though the Customs Service has taken action with such immediate and drastic impact on a person that a district court considering comparable action of another agency would treat it as final for purposes of review. The recommendation would provide for review by the Customs Court of the final actions and failures to act just described.

Decisions to exclude merchandise may be made either by the Customs Service or another agency, such as the Food and Drug Administration. All exclusion decisions pursuant to a customs law (i.e., a law applicable only to imported merchandise, usually codified in Title 19 of the United States Code), whether made by the Customs Service or some other agency, are now reviewable in the Customs Court. This review would be unaffected by the recommendation. Exclusion decisions under a law that is not a customs law are never reviewed in the Customs Court. When such an exclusion decision is made by an agency other than the Customs Service, the Customs Court does not, and under the recommendation would not, review the decision. However, when such an exclusion decision is made by the Customs Service, the recommendation would give the Customs Court exclusive jurisdiction to review it.

The Customs Court has sometimes been said not to have "equity powers." What is meant by this is not clear, but the recommendation would give the Customs Court all powers, injunctive and other, of the district courts.

The Customs Court is unique among Article III courts in being subject to a requirement that not more than five of its nine judges be appointed from the same political party and in having a chief judge selected from time to time by the President. These requirements, appropriate perhaps for multi-member administrative agencies, are not consonant with the Article III judicial role of the Customs Court, especially as that role would be expanded by these recommendations.

1. *Jurisdiction Without a Protest or Petition.* Congress should amend 28 U.S.C. § 1582 to broaden the jurisdiction of the Customs Court by giving the court exclusive jurisdiction of any civil action brought to challenge final agency action (as defined in the Administrative Procedure Act) of the Customs Service except (1) action specifically subject to review in another court and (2) action pertaining to the exclusion of merchandise, under a law that is not a customs law, and taken by the Customs Service on the request or at the direction of a court or another federal agency.

2. *Remedial Powers.* Congress should amend 28 U.S.C. § 1581 to confer upon the Customs Court in respect of actions properly pending before it the remedial powers of a United States district court.

3. *Political Affiliation of Court Appointees and Selection of Chief Judge.* Congress should amend 28 U.S.C. § 251 to delete the requirement that not more than five of the nine judges of the Customs Court be appointed from the same political party and to provide that the chief judge is appointed by the President with the advice and consent of the Senate, as in the case of the

Court of Claims and the Court of Customs and Patent Appeals.

B. *Standing to Seek Administrative and Judicial Review.* Under Section 516 of the Tariff Act of 1930, 19 U.S.C. § 1516, an "American manufacturer, producer, or wholesaler" may ask for and receive information on the duty imposed on imported merchandise of a kind manufactured, produced or dealt in by him and, thereafter, contest the appraised value of, classification of, or the rate of duty assessed upon, that merchandise by petition to the Customs Service. As stated under heading A, a decision concerning such a petition may be reviewed in the Customs Court. The recommendation is that Congress consider broadening the category of persons entitled to seek this sort of administrative relief and, thereafter, review in the Customs Court to include all persons adversely affected by an incorrect determination by the Customs Service. The Conference believes that the category of persons eligible to challenge such determinations by the Customs Service should thus conform with modern administrative practice, unless Congress determines that overriding considerations of economic policy make this undesirable.

Only the importer of excluded merchandise may now protest within the Customs Service the exclusion of merchandise and have denial of that protest reviewed by the Customs Court. The recommendation contemplates a broadening of the standing provision to enable any adversely affected person to seek administrative and judicial review of action either to exclude or to admit merchandise (unless the action is taken under a law that is not a customs law upon the request or at the direction of a court or another agency).

Under A(1) final actions of the Customs Service other than the denial of protests or petitions relating to classification, appraisal, duty and admission of merchandise, such as the suspension of immediate delivery permits, would be subject to review in the Customs Court. The recommendation contemplates conferring upon any adversely affected person who has exhausted his administrative remedies standing to seek review of such actions. The recommendation does not specify what procedures must be exhausted.

1. *Decisions Concerning Duties.* Congress should consider amending Section 518 of the Tariff Act of 1930, 19 U.S.C. § 1518, to allow any person adversely affected by an incorrect determination of the appraised value of, classification of, or rate of duty assessed upon, imported merchandise to obtain from the Customs Service information concerning such appraisal, classification or rate and to petition for a change. Denials of such petitions should be reviewable in the Customs Court.

2. *Exclusion Cases.* Congress should consider enacting a new provision giving any person adversely affected by an action of the Customs Service, concerning merchandise that is, or should be, excluded from entry or delivery, a means of seeking administrative review of such action, with subsequent review in the Customs Court. Such a procedure should not be available to challenge action pertaining to the exclusion of merchandise, under a law that is not a customs law, and taken by the Customs Service on the request or at the direction of a court or another federal agency.

3. *Other Actions.* If Congress broadens the jurisdiction of the Customs Court as recommended in A(1), it should also consider providing that actions within the broadened jurisdiction may be brought by any adversely affected person who has exhausted his administrative remedies.

C. Burden of Proof in the Customs Court.

The Customs Court operates under a statute that establishes a presumption that a Customs Service decision under review is correct and places upon a party seeking review the burden of proving the decision incorrect. Trial in the Customs Court is had on a record made in the court although 28 U.S.C. § 2632 (f) provides that, upon the service of a summons, the Customs Service is to transmit certain documents underlying the Customs Service decision to the court "as part of the official record of the court action." The Customs Court and the Court of Customs and Patent Appeals have inferred from the statute a further requirement, that in order to prevail the party seeking review must prove, in addition to the incorrectness of the agency's decision, what the correct decision should be. The recommendation would do away with that unorthodox further requirement and make Customs Court review of Customs Service actions conform in this respect with the review of actions of other agencies by other courts. The mode of review would continue to be a de novo trial (in the sense indicated above), which is considered appropriate because of the high degree of informality of most Customs Service procedures.

1. *Elimination of the Plaintiff's Double Burden.* Congress should amend 28 U.S.C. § 2635(a) to revise the Customs Court's standard of review in the following way: The presumption of correctness of Customs Service decisions and the imposition upon a party challenging a decision the burden of proving otherwise would be retained, but an additional requirement read into the statute by the Customs Court and the Court of Customs and Patent Appeals would be eliminated. The additional requirement is that the challenging party prove not only that the Customs Service was wrong but also what a correct decision would be or risk suffering affirmance of the incorrect adverse decision.

Specifically, the amended statute should provide that, if the Customs Court determines that action taken by the Customs Service is erroneous, the court should modify or set aside such action; if the court is able to determine what action is correct, it should so determine and order that the correct action be taken; if the court, after exhausting its processes and procedures, cannot determine what action is correct, it should remand the case to the Customs Service with instructions to take action consistent with the decision of the court; any redetermination made by the Customs Service pursuant to a remand should be subject to a new protest or petition; a decision by the Customs Court to remand a case should be appealable.

D. *Review of Decisions to Exclude Merchandise.* Exclusion of merchandise is a severe remedy. The recommendation would attempt to ensure expedited review of exclusion decisions and would delete the extraordinary authority of the Customs Service to detain and seize imported merchandise that allegedly infringes a United States trademark or copyright in the absence of the same sort of court order that is required before action may be taken against allegedly infringing domestic merchandise.

1. *Expedited Review.* Congress should amend the statutes giving preference to certain types of cases in the Customs Court, 28 U.S.C. § 2633, and the Court of Customs and Patent Appeals, 28 U.S.C. § 2602, to ensure a similar preference for cases properly before either court involving the exclusion of merchandise from entry or delivery.

2. *The Customs Service's Authority Under the Trademark and Copyright Statutes.* Con-

gress should amend the statutes under which the Customs Service is authorized to detain and seize merchandise that allegedly infringes a United States trademark, 19 U.S.C. § 1526, or copyright, 17 U.S.C. § 603, to provide that the Customs Service may take no such action until after the owner of the trademark or copyright has obtained an order in a United States district court enjoining the importation. Alternatively, Congress should amend the trademark statute, as it has the copyright statute, to authorize the Customs Service to establish by regulation such a condition precedent to its acting to detain and seize allegedly infringing merchandise, and the Customs Service should promulgate such a regulation. In either event, the Customs Service should then adopt express procedures that would enable the owner of a trademark or copyright to identify imported merchandise that may infringe his mark or copyright.

E. *Imposition of Civil Penalties.* The penalty for violations of Section 592 of the Tariff Act of 1930, 19 U.S.C. § 1592, and some other import statutes is forfeiture of imported merchandise or its value. These penalty provisions are unsatisfactory. The statutory forfeiture penalty is likely to be disproportionate to the gravity of the alleged offense. Although the Customs Service is usually prepared to mitigate the penalty, the statutes pose the following dilemma: If the alleged violator does not wish to accept the proffered mitigation because he believes he did not violate the statute or because he believes that he is entitled to a greater degree of mitigation, he is subject to suit in the district court for the full forfeiture value. Moreover, he will lose the benefit of any mitigation if the government can prove a violation, however insignificant, on his part. The recommendation would rationalize penalty procedures.

1. *The Rationalization of Section 592.* Section 592 of the Tariff Act of 1930, 19 U.S.C. § 1592, prohibiting fraudulent or false statements or practices respecting imports, should be revised to make it fairer and more rational in its operation.

(a) Section 592 should be amended to provide for civil money penalties against the person violating the statute rather than for forfeiture of the merchandise or the full value thereof. Congress should establish maximum penalties based upon the revenue deficiency, if any, resulting from the violation and upon the degree of culpability of the violator. In any case in which the violation does not result in a revenue deficiency, the maximum penalties should be based upon a percentage of the value of the imported merchandise and upon the degree of culpability of the violator. If the violator is an importer, he should be given the option of surrendering his merchandise in lieu of payment of any penalty assessed.

(b) The Customs Service should continue to have the authority to mitigate civil penalties. If an assessment is contested, an action by the government to enforce the penalty should be in the Customs Court. In such an action, the government should have the burden of proving the act or omission constituting a violation and, if so alleged, the intentional nature thereof. The Customs Court should be authorized to determine de novo the amount of the penalty.

(c) In order to ensure that those subject to possible penalties under Section 592 know what is expected of them under the laws administered and enforced by the Customs Service, the Service should, to the maximum extent feasible, adopt and publish standards that will guide its determinations under such laws.

(d) The authority of the Customs Service to seize and hold merchandise under Section 592, other than prohibited or restricted merchandise, should be limited to instances

where such seizure and holding are necessary to protect its ability to collect any revenue deficiency or penalty, and the Customs Service should be required to release the merchandise to the owner upon his provision of security for payment of such revenue deficiency or penalty. Where no such release is effected by the owner, the Customs Service should be required to release the merchandise not later than 60 days after seizure unless the government has initiated an action in the Customs Court within that period and obtained an extension for good cause from the court. In instances where the Customs Court permits the Service to hold merchandise for sale by the Service to satisfy any revenue deficiency or penalty determined by the judgment of the court, the net proceeds of such sale, after allowance for the judgment and costs of the sale, should be paid to the owner.

2. *Other Statutes.* Each of the other penalty provisions enforced by the Customs Service should be reviewed and, if appropriate, revised in a manner consistent with the foregoing recommendations for the revision of Section 592.

4. Section 305.77-3 is added to Part 305 to read as follows:

§ 305.77-3 Ex parte Communications in Informal Rulemaking Proceedings (Recommendation No. 77-3).

In Recommendation 72-5 the Conference expressed the view that, generally, agency rulemaking is preferably carried out through the simple, flexible and efficient procedures of 5 U.S.C. § 553. That statute requires publication of notice of proposed rulemaking and provision of opportunity for submission of written comments; additional procedures may be utilized by the agencies as they deem necessary or appropriate. Recommendation 72-5 counseled that Congress ordinarily should not impose mandatory procedural requirements going beyond those of § 553 in the absence of special reasons for doing so. In Recommendation 76-3 the Conference amplified its 1972 recommendation by suggesting ways in which agencies might usefully supplement the minimum procedures required by § 553 in appropriate circumstances.

The primary purposes of rulemaking procedures under § 553 are to enhance the agency's knowledge of the subject matter of the proposed rule and to afford all interested persons an adequate opportunity to provide data, views, and arguments with respect to the agency's proposals and any alternative proposals of other interested persons. Section 553 procedures, in some instances, also serve to provide the basis for judicial review. To the extent consistent with all of these purposes, the agencies should have broad discretion to fashion procedures appropriate to the nature and importance of the issues in the proceeding, in order to make rules without undue delay or expense. Informal rulemaking should not be subject to the constraints of the adversary process. Ease of access to information and opinions, whether by recourse to published material, by field research and empirical studies, by consultation with informed persons, or by other means, should not be impaired.

While the foregoing considerations militate against a general prohibition upon ex parte communications in rulemaking subject only to Section 553, certain restraints upon such communications may be desirable. Ex parte communications during the rulemaking process may give rise to three principal types of concerns. First, decision makers may be influenced by communications made privately, thus creating a situation seemingly at odds with the widespread demand for open government; second, significant information may be unavailable to reviewing courts; and

third, interested persons may be unable to reply effectively to information, proposals or arguments presented in an ex parte communication. In the context of Section 553 rulemaking, the first two problems can be alleviated by placing written communications addressed to a rule proposal in a public file, and by disclosure of significant oral communications by means of summaries or other appropriate techniques. The very nature of such rulemaking, however, precludes any simple solution to the third difficulty. The opportunity of interested persons to reply could be fully secured only by converting rulemaking proceedings into a species of adjudication in which such persons were identified, as parties, and entitled to be, at least constructively, present when all information and arguments are assembled in a record. In general rulemaking, where there may be thousands of interested persons and where the issues tend to be broad questions of policy with respect to which illumination may come from a vast variety of sources not specifically identifiable, the constraints appropriate for adjudication are neither practicable nor desirable.

RECOMMENDATION

In rulemaking proceedings subject only to the procedural requirements of § 553 of the APA:

1. A general prohibition applicable to all agencies against the receipt of private oral or written communications is undesirable, because it would deprive agencies of the flexibility needed to fashion rulemaking procedures appropriate to the issues involved, and would introduce a degree of formality that would, at least in most instances, result in procedures that are unduly complicated, slow and expensive, and, at the same time, perhaps not conducive to developing all relevant information.

2. All written communications addressed to the merits, received after notice of proposed rulemaking and in its course, from outside the agency by an agency or its personnel participating in the decision should be placed promptly in a file available for public inspection.

3. Agencies should experiment in appropriate situations with procedures designed to disclose oral communications from outside the agency of significant information or argument respecting the merits of proposed rules, made to agency personnel participating in the decision on the proposed rule, by means of summaries promptly placed in the public file, meetings which the public may attend, or other techniques appropriate to their circumstances. To the extent that summaries are utilized they ordinarily should identify the source of the communications, but need not do so when the information or argument is cumulative. Except to the extent the agencies expressly provide, the provisions of this paragraph and the preceding paragraph should not be construed to create new rights to oral proceedings or to extensions of the periods for comment on proposed rules.

4. An agency may properly withhold from the public file, and exempt from requirements for making summaries, information exempt from disclosure under the Freedom of Information Act, 5 U.S.C. § 552.

5. Agencies or the Congress or the courts might conclude of course that restrictions on ex parte communications in particular proceedings or in limited rulemaking categories are necessitated by considerations of fairness or the needs of judicial review arising from special circumstances.

Dated: September 28, 1977.

RICHARD K. BERG,
Executive Secretary.

Title 4—Accounts

CHAPTER III—COST ACCOUNTING
STANDARDS BOARD

PART 331—CONTRACT COVERAGE

AGENCY: Cost Accounting Standards Board.

ACTION: Final rule.

SUMMARY: This modification of the Cost Accounting Standards Board's rules and regulations provides criteria for determining the materiality of costs in given circumstances, in applying words or phrases of materiality used in Cost Accounting Standards, and to limit price adjustments to material amounts of cost.

EFFECTIVE DATE: October 4, 1977.

FOR FURTHER INFORMATION CONTACT:

James L. DiGiuseppe, Project Director,
Cost Accounting Standards Board,
Washington, D.C. 20548 (202-275-6113).

SUPPLEMENTARY INFORMATION: A discussion of the background and public comments received in response to the initial publication of these regulations and of the principal issues considered in preparing the final promulgation precedes the regulations.

The purpose of this publication by the Cost Accounting Standards Board is to adopt a modification to Part 331, Contract Coverage, of its rules and regulations. The modification will provide criteria for determining the materiality of amounts of cost in given circumstances. The Board initially considered publishing a definition of the terms "cost accounting practice" and "change to either a disclosed cost accounting practice or an established cost accounting practice" along with the modification dealing with materiality. That definition is being handled separately by the Board, however, and will be considered at a later date.

The Board is authorized by Pub. L. 91-379 to prescribe rules and regulations for implementing Cost Accounting Standards. Pursuant to this authority, the Board is today issuing a modification to its regulations. Contractors and procurement agencies engaged in the implementation and administration of CASB rules, regulations, and Standards have recommended that the Board provide guidance concerning materiality in the administration of the Board's rules, regulations, and Standards.

Representatives from various organizations affected by Standards have pointed out that guidance in this area will facilitate the implementation and administration of CASB pronouncements. A similar recommendation was also received by the Board at an Evaluation Conference in June 1975. The General Accounting Office's Status Report on the Cost Accounting Standards Program—Accomplishments and Problems (PSAD-76-154, Aug. 20, 1976), also referred to the need for guidance on this subject.

Research in this area included a review of data submitted by participants in the Evaluation Conference, an analysis of papers submitted by various contractors, professional groups, trade associations, and Government agencies, as well as a review of existing procurement regulations, and existing CASB promulgations. A Staff draft of an amendment dealing with materiality criteria and price adjustments was distributed on August 13, 1976. Responses from 53 sources contributed to the Board's further consideration of the issues involved in this proposed amendment.

A proposed amendment to the Board's regulations was published in the *FEDERAL REGISTER* on February 3, 1977 (42 FR 6591). A total of 45 responses were received from individual companies, Government agencies, professional associations, industry associations, universities, and others. The Board takes this opportunity to express its appreciation for the helpful suggestions and criticisms which have been furnished. The comments furnished by the organizations and individuals have resulted in a number of changes in the amendment being promulgated today. The following material summarizes the issues regarding materiality that were discussed by respondents in connection with the proposed modification and explains the changes made to the proposal published February 3, 1977. The still relevant portions of the comments which accompanied the February 3, 1977, publication have been incorporated in this material.

MATERIALITY CRITERIA

Generally, commentators felt the proposed materiality criteria were a necessary, positive and useful step. However, some commentators suggested that the proposed criteria were not sufficiently specific and would not resolve the materiality questions that currently exist. Some commentators suggested that quantitative criteria be added to the proposed regulation; others suggested that the criteria proposed were suitable.

At the present time, the Board is of the opinion that quantitative limits should not be established for materiality determinations. The essence of materiality criteria is to allow for the exercise of judgment; an absolute dollar amount in one case may be material while in another case the same amount may be immaterial. Accordingly, quantitative limits have not been added to the proposed amendment.

The materiality criteria being promulgated are designed for use in a variety of situations and to resolve issues which have been raised by various sources. Cost Accounting Standards establish the cost accounting appropriate for the determination of contract costs. Departure from the requirements of these Standards may occur and the cost effects of such departure may be immaterial. The criteria serve to limit price adjustments to material amounts of cost. The regulation also describes the actions to be taken when immaterial amounts of cost are involved in noncompliance with

Standards. The criteria for materiality are also to be used in applying words or phrases of materiality used in Cost Accounting Standards. In particular Standards, the Board will continue to give consideration to defining materiality in a specific manner as to either the entire Standard or any provision thereof, whenever it appears feasible and desirable to do so.

ADMINISTRATIVE COSTS

Commentators proposed that the administrative cost of processing a change in cost accounting practice to both the Government and the contractor should be one of the criteria used in determining materiality. The Board's initial publication did not provide for consideration of these costs in determining materiality. Generally, such costs on the part of both the Government and the contractor are absorbed as part of their routine operations. On a conceptual basis, the determination of materiality should be made considering only the amount of costs affected by the proposed change. As a practical matter, however, the administrative cost to process a contract price adjustment is a factor in a materiality decision.

The Board is persuaded that the administrative cost of processing a change in cost accounting practice should influence a decision as to materiality. For example, if it is estimated that costs would be changed by \$10,000 through processing a change at a Government-contractor administrative cost of \$10,000, then processing the change would be nonproductive whether or not, considering all materiality factors, the estimated change in costs of \$10,000 would be judged material. Accordingly, the Board has added a provision to this modification dealing with such costs.

MEASUREMENT OF COST IMPACT

Commentators suggested that the Board's regulations provide that initially the determination of materiality should be done on a gross, overall, basis rather than on an in-depth cost impact study. These commentators asserted that a provision of this type would help to reduce the time and cost of evaluating and processing proposed changes which are judged to have an immaterial impact. Procedures for measuring and processing cost impact due to both changes in cost accounting practice and noncompliances with Cost Accounting Standards have been developed by the procurement agencies, and they now require an estimate of the general dollar magnitude of the change as a first step in the process. The Board encourages the use of the materiality criteria promulgated today in conjunction with the existing two-stage cost impact evaluation procedure provided in procurement agency regulations. The Board believes that the effective use of procedures established in agency regulations will accomplish the saving in time and cost desired.

Some Government commentators proposed that subparagraph 331.71(b)(2) be deleted. They expressed the view that

it dealt with administrative matters and not criteria for the determination of materiality. The question of both the contractor's and the Government's responsibility in situations where noncompliance with Cost Accounting Standards resulted in a cost impact which is immaterial has frequently arisen. The Board believes that the implementation and administration of cost accounting rules, regulations, and Standards will be facilitated by a statement of the Board's position on this matter. Accordingly, the Board believes that the subparagraph in question should be retained in its regulations.

RETROACTIVE APPLICATION

Commentators expressed concern that subparagraph 331.71(b)(2) would be applied retroactively to immaterial items. The language of this subparagraph requires that it be applied to the accounting period for which the cost impact of a noncompliance becomes material and to succeeding cost accounting periods. In any cost accounting period prior to that, by reason of the provisions of this requirement, the cost impact of the noncompliance would have been determined to be immaterial. Thus, no contract modification was or is required.

ILLUSTRATIONS

The February 3, 1977, proposal contained two illustrations of the application of the materiality criteria. A number of commentators stated that the illustrations were too basic to be useful, and that the problems related to the determination of materiality are too numerous and too complex to be adequately illustrated in a regulation of this type. The commentators suggested that the illustrations be eliminated. The Board agrees, and has eliminated the examples in this section.

Amend Part 331 by adding a new § 331.71 as follows:

§ 331.71 Materiality.

(a) In determining whether amounts of cost are material or immaterial, the following criteria shall be considered where appropriate; no one criterion is necessarily determinative.

(1) The absolute dollar amount involved. The larger the dollar amount, the more likely that it will be material.

(2) The amount of contract cost compared with the amount under consideration. The larger the proportion of the amount under consideration to contract cost the more likely it is to be material.

(3) The relationship between a cost item and a cost objective. Direct cost items, especially if the amounts are themselves part of a base for allocation of indirect cost, will normally have more impact than the same amount of indirect costs.

(4) The impact on Government funding. Changes in accounting treatment will have more impact if they influence the distribution of costs between Government and non-Government cost objectives than if all cost objectives have Government financial support.

(5) The cumulative impact of individually immaterial items. It is appropriate to consider whether such impacts (a) tend to offset one another, or (b) tend to be in the same direction and hence to accumulate into a material amount.

(6) The cost of administrative processing of the price adjustment modification shall be considered. If the cost to process exceeds the amount to be recovered, it is less likely the amount will be material.

(b)(1) A contract modification for price adjustment or cost allowance under paragraphs (a)(4) and (a)(5) of the Cost Accounting Standards clause set forth in section 331.50 is required only if the cost impact is material.

(2) Where a contractor is in noncompliance and does not change a cost accounting practice because the cost impact is immaterial, the contracting agency is not relieved of its responsibilities to assure that an appropriate price adjustment is obtained if the cost impact of the noncompliance subsequently becomes material. The contractor shall be notified that the Government's decision to forbear action for noncompliance is solely because the cost impact at the time of the notice is immaterial. If at any time thereafter, the Government determines that the cost impact of noncompliance with respect to the practice in question is material, the Government then must require action under paragraph (a)(5) of the contract clause for any cost accounting period in which the cost impact is material. The fact that the Government does not pursue a price adjustment does not excuse the contractor from his obligation to comply with the Standard involved.

(3) Whether cost impact is recognized by modifying a single contract, several but not all contracts, or all contracts, or any other suitable technique, is a contract administration matter. The Standards, rules, and regulations of the Board do not in any way restrict the capacity of the parties to select the method by which the cost impact attributable to a change in cost accounting practice is recognized.

ARTHUR SCHOENHAUT,
Executive Secretary.

Title 10—Energy

CHAPTER II—FEDERAL ENERGY
ADMINISTRATIONPART 205—ADMINISTRATIVE
PROCEDURES AND SANCTIONS

Amendments to Guidelines for Granting Exception Relief From the Oil Import Regulations

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes guidelines for granting exception relief to all persons required to pay license fees to import residual fuel oil into the East

Coast (PAD District I) under the Oil Import Regulations. This amendment is intended to alleviate dislocations in the distribution of fee-exempt licenses which might otherwise impair competition among residual fuel oil marketers and increase costs to consumers during the upcoming heating season.

EFFECTIVE DATE: Date of Issuance.

eral Counsel), 12th and Pennsylvania
Ave. NW., Room 5116, Washington,
D.C. 20461, (202-566-9380).

SUPPLEMENTARY INFORMATION:

I. Proposed Amendment.
II. Discussion of Comments.
III. Regulations Prescribed.

I. PROPOSED AMENDMENT

In order to avoid the dislocations in the distribution of fee exemptions for imports of residual fuel oil into District I, which have developed under the Oil Import Program since the fee system was established, FEA proposed by notice issued August 29, 1977 (42 FR 44244, Sept. 2, 1977) to amend the "Guidelines for the Disposition of Requests for Exceptions from Part 213", Appendix II of Subpart D of Part 205, by adding Special Guideline I. This special guideline provides that for the allocation period of May 1, 1977, through April 30, 1978, any person desiring to import residual fuel into District I would be deemed to be experiencing extreme hardship to the extent that his available fee-exempt licenses, if any, are less than his contractual obligations or other projected needs for that period. Under the proposal, in order to meet those obligations and needs, such persons would be authorized to obtain additional fee-exempt licenses by certifying the amount of their incremental requirements to the Director of Oil Imports. The Director would issue the additional licenses except where he determines that issuance thereof would not be in accordance with the objectives of the Proclamation. Once issued, such licenses would be subject to the applicable provisions of Part 213, including the prohibition on sale or transfer of product licenses at § 213.22. Any licenses remaining unused at the end of the allocation period would expire. In order to facilitate this procedure, FEA also proposed to amend § 205.52 to provide an exception to the general rule that applications for relief from Part 213 be filed with the Office of Exceptions and Appeals. Instead, applications for an allocation would be filed directly with the Director of Oil Imports.

Under the proposal, firms not currently eligible for allocations under § 213.15 would be able to receive allocations under Special Guideline I. This was

intended to prevent any economic hardship that would result with respect to such persons if FEA's remedial action were limited to historical importers.

The proposal elicited comments from many sources and a public hearing was held on September 28, 1977.

II. DISCUSSION OF COMMENTS

Most of the comments received strongly endorsed the proposed amendment. Many cited as the basis for their approval the rationale expressed by FEA in its proposal, i.e., the elimination of inequities in the distribution of fee-exempt licenses which have been caused by drastic changes in residual oil markets during the last four years and the unnecessary increase in cost to the consumer which would result therefrom. Other comments noted that even though they could expect to be granted exemptions under the present allocation system, they favored the proposed amendment in order to avoid uncertainty and to reduce the cost of applying for exemptions. A final reason advanced in the comments in support of the proposed amendment was that it would eliminate the anticompetitive aspect of the current allocation system which results from the fact that fee-exempt licenses are allocated on the basis of an importer's 1973 level of imports to the detriment of more recent suppliers who are now attempting to enter the market or expand their market share.

Some comments, however, expressed objections to the proposed amendments. The first, and most serious of the objections raised, was the contention that FEA was without authority to amend the regulations in the manner proposed. One comment asserted that section 232 of the Trade Expansion Act of 1962, as amended, required a determination of the national security consequences by the Secretary of the Treasury and the President before any action could be taken by FEA. However, section 232(a) explicitly pertains only to foreign trade agreements, while the terms of section 232(b), which require a national security determination with respect to imposition of import limitations, have been fulfilled. This determination was originally made in 1959 by President Eisenhower and succeeding Presidents have reaffirmed the finding when they have amended the Proclamation. See, e.g., Pres. Proc. No. 4412, January 3, 1976. Regulations promulgated pursuant to authority delegated to the Administrator by the Proclamation do not require subsequent investigations by the Secretary of the Treasury or national security determinations by the President.

The proposed amendment is clearly within the delegated authority of the FEA. Section 3 of Proclamation No. 3279, as amended, provides:

The Administrator is authorized to refund or reduce fees, whether in whole or in part, . . .

(1) Where refunds or reductions, whether in whole or in part, are ordered pursuant to Section 5.

Section 5 of the Proclamation provides:

(b) The Appeals Board may be empowered [by the Administrator] . . . without regard to the limits of the maximum levels of imports established in section 2 of this Proclamation: . . .

(2) To modify, on the grounds of exceptional hardship, any allocation made to any person under such regulations; . . .

(4) To grant allocations of imports of finished products on grounds of exceptional hardship; . . .

(c) The Administrator . . . may modify or alter the composition of the Appeals Board or abolish the Board and establish such other appellate procedures as he deems appropriate.

It is clear, therefore, that the Administrator is fully authorized to amend the regulations in the manner proposed.

Other comments challenged the legal authority of the Administrator on the ground that the proposed amendment did not comport with the requirements of the Emergency Petroleum Allocation Act of 1973 (Pub. L. 93-159) and the Federal Energy Administration Act of 1974 (Pub. L. 93-275). The sections of those statutes which were cited are general in nature and are applicable to the programs established under these statutes. They are neither in conflict with nor do they supersede the specific provisions of the Proclamation.

The second major objection to the proposed amendment was that it discriminates against other PAD districts. However, as already noted, the basic purpose of the proposal is to alleviate existing competitive dislocations among firms because of the differing availability of fee-exempt licenses for importation of residual fuel oil.

Because of the method by which fee-exempt licenses were initially distributed, some firms in PAD District I have a surplus of fee-exempt licenses in the current allocation period, while other firms will be required to purchase varying amounts of fee-paid licenses at \$0.63 per barrel in order to meet contractual obligations. FEA has calculated that for the current allocation period, the ratio of imports to allocations made pursuant to § 213.15 ranges from 0 percent to 130 percent. Similarly the ratio of projected 1977 imports to 1973 actual imports ranges from 0 percent to 366 percent. Hence, the maldistribution of fee-exempt licenses among District I importers is exceptionally severe. Under any assumption as to residual fuel oil prices, holders of fee-exempt licenses would possess a real competitive advantage. In the comments and the hearing there was no information developed with respect to similar types of disparities existing in other PAD districts. Should information which indicates that other regions are suffering similar inequities be developed, FEA will consider extending the application of these amendments to those regions. However, the record does not warrant such action at the current time.

The final objection which was raised in several comments was that long term, rather than short term, solutions are needed to resolve current problems which exist not only in the Oil Import Regulations but in the Domestic Entitlements Program as well. FEA recognizes the need to address the long term problems. The lack of a long range plan alone, however, is an insufficient reason to delay rectifying those short term dislocations in the distribution of fee-exempt licenses in PAD District I which presently produce inequitable results.

III. REGULATIONS PRESCRIBED

After careful consideration of all comments, both written and oral, FEA has decided not to make any changes in the amendment as originally proposed. The regulations prescribed today are therefore identical to those proposed by notice issued August 29, 1977 (42 FR 44244, September 2, 1977).

In consideration of the foregoing, Part 205, Chapter II of Title 10, Code of Federal Regulations, is amended as set forth below.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 205.52 is amended in paragraph (b) by adding a new subparagraph (3) to read as follows:

§ 205.52 Where to file.

(b) . . .

(3) All applications for exemption to § 213.15 by persons seeking to import residual fuel oil into District I in order to satisfy contractual obligations or other projected needs for the allocation period May 1, 1977, through April 30, 1978, shall be filed with the Director of Oil Imports in accordance with Special Guideline I in Appendix II of this subpart.

2. Appendix II of Subpart D of Part 205 is amended by adding a new Special Guideline I to read as follows:

SPECIAL GUIDELINE I

For the allocation period May 1, 1977 through April 30, 1978, any person desiring to import residual fuel oil into District I shall be deemed to be experiencing an exceptional hardship to the extent that his available fee-exempt licenses, if any, are less than his contractual obligations or other projected needs for that period. Any person so deemed may receive additional fee-exempt licenses in the amount required to meet such obligations or needs by certifying his additional requirements to the Director of Oil Imports. The Director shall issue a license for the amount certified, except where he determines that issuance thereof would not be in accordance with the objectives of Proclamation No. 3279, as amended.

Any license issued pursuant to this Special Guideline shall be subject to the limitations contained in § 213.15(e). Licenses which remain unused at the end of the allocation period shall expire at that time.

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Further Amendments To Crude Oil Buy/Sell Program

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: The Federal Energy Administration ("FEA") hereby adopts amendments to the Mandatory Crude Oil Allocation Program (the "buy/sell program") set forth in 10 CFR 211.65, to modify the pricing provision for sales of allocated crude oil to reflect more accurately the actual market value of crude oil sold under the program and to permit small refiners that are excluded from the program to re-enter the program in the event that they experience a significant reduction in domestic crude oil supplies.

DATES: Effective October 1, 1977. Further comments due on or before October 21, 1977 (see Supplementary Information).

ADDRESS: Send comments to: Executive Communications, Room 3317, Federal Energy Administration, Box NO, Federal Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

- I. Background.
- II. Discussion of Comments: A. Pricing of allocated crude oil;
B. Re-entry provision;
C. Newly constructed refining capacity.
- III. The Amendments Adopted: A. Pricing of allocated crude oil;
B. Re-entry into the buy/sell program;
C. Technical amendments.
- IV. Request for Further Comments.

I. BACKGROUND

On August 19, 1977, following a notice of proposed rulemaking and public hearing (42 FR 37406, July 1977), FEA issued a final rule amending the crude oil buy/sell program effective October 1, 1977 to simplify the administration of the program and to limit the scope of the program to those refiner-buyers that

have a demonstrated necessity for allocations of crude oil based on their lack of access to adequate supplies of domestic and foreign crude oil (42 FR 42770, August 24, 1977). FEA stated in the preamble to the August 19 amendments that it was reserving for further consideration and would issue in September a final rule with respect to the pricing provision governing buy/sell program sales and, in particular, a provision for transportation cost adjustments. FEA invited further comments on the proposed pricing provision and the following additional issues: whether small refiners that are not eligible to apply for an allocation under the revised program should be permitted to re-enter the program and, if so, under what circumstances re-entry should be permitted; and whether small refiners that make a commitment for construction of a new refinery or expanded refining capacity after the publication on August 24, 1977 of the regulation implementing the revised buy/sell program should be permitted to apply for an allocation.

II. DISCUSSION OF COMMENTS

In response to the request in the August 19 notice, thirty written comments were received by FEA. These comments, as they relate to specific outstanding proposals, are discussed in this section.

A. PRICING OF ALLOCATED CRUDE OIL

FEA proposed in the July 21 notice that each refiner-seller determine a weighted average landed cost separately for high sulfur and for low sulfur imported crude oil, respectively. High sulfur crude oil would be defined as crude oil that has a sulfur content of .6% or more by weight and low sulfur crude oil as crude oil that has a sulfur content of less than .6% by weight. The maximum permissible price in each sale of allocated crude oil of a particular category (high or low sulfur) would be determined by applying the current sulfur differential (plus or minus three cents per barrel per one tenth percent sulfur by weight) and gravity differential (plus or minus three cents per barrel per API) against the weighted average landed cost for the refiner-seller of that category of crude oil. With respect to transportation expenses, the proposal provided that refiner-buyers could be charged only actual additional expenses incurred by a refiner-seller to move crude oil to a refiner-buyer's refinery over and above the average transportation expenses included in the refiner-seller's weighted average per barrel landed costs.

As indicated in the preamble to the August 19 amendments, the majority of refiner-sellers and refiner-buyers supported FEA's proposal to permit refiner-sellers to determine their costs separately for high sulfur and low sulfur imported crude oil. As explained in more detail below, FEA is adopting this aspect of the July 21 proposal.

In light of the comments addressed to the July 21 proposal regarding transportation cost adjustments, FEA requested further comments in the August 19 no-

tice on the following proposed provisions concerning transportation cost adjustments. The first three alternative provisions pertain to transportation cost adjustments in the case of sales of domestic crude oil and the fourth to sales of imported crude oil:

A refiner-seller would be required to reduce the transportation charge for crude oil sold under the program by an amount equal to its average cost of transporting imported crude oil from the port of entry to the seller's refinery and would be permitted to increase the transportation charge by an amount equal to the cost of transporting domestic crude oil from the lease to the buyer's refinery. For example, if a refiner-seller's average domestic transportation cost for imported crude oil was \$0.40 per barrel, and the cost of transporting the domestic crude oil sold to the refiner-buyer from the lease to the buyers' refinery is \$0.52 per barrel, then the seller could charge the buyer \$0.12 per barrel over the seller's average landed cost for crude oil of that category.

A refiner-seller would be required to sell domestic crude oil to a refiner-buyer at the lease at the refiner-seller's average landed cost less the refiner-seller's average domestic transportation cost. The buyer would be required to arrange for the transportation of the crude oil from the lease to its refinery.

A refiner-seller would be required to reduce its average landed cost by its actual savings, if any, in moving domestic crude oil from the lease to its own refinery. The domestic crude oil would be sold to the refiner-buyer at the lease at this reduced cost.

A refiner-seller would be required to reduce its average landed cost by its average cost of transporting imported crude oil to its refineries from the port of entry and add actual domestic transportation costs from the point of entry to the point of delivery to the refiner-buyer when imported crude oil is actually delivered to the refiner-buyer.

In addition, FEA solicited further comments on: (1) whether the pricing provision should provide for a one-month period in which to make the required calculations rather than the proposed three-month period, and (2) an appropriate pricing provision for sales of allocated crude oil applicable to refiner-sellers which import only high sulfur crude oil (or only low sulfur crude oil) and are required to sell a different quality domestic crude oil.

1. *Adjustments for transportation expenses.* The majority of refiner-sellers and refiner-buyers submitting further comments generally supported FEA's fourth proposal concerning transportation expenses in the case of sales of imported crude oil. Accordingly, FEA has adopted a rule that provides that, if imported crude oil is sold to the refiner-buyer, the price adjustment for transportation expenses shall not exceed the actual transportation costs incurred by the refiner-seller in moving the imported crude oil from the United States port of entry to the refiner-buyer's refinery.

With respect to sales of domestic crude oil under the program, however, most refiner-sellers and refiner-buyers opposed FEA's proposals as unworkable, contending that "average domestic costs" would be difficult to calculate and could be unfair to both refiner-buyers and refiner-sellers. In addition, refiner-sellers were nearly unanimous in recommending that the refiner-buyer should bear the cost of moving replacement foreign crude oil from the port of entry to the refiner-seller's refinery. Relatively few refiner-buyers submitted specific comments with respect to adjustments for transportation expenses in the case of sales of domestic crude oil.

On the basis of all the comments received in this proceeding, FEA has concluded that all of its alternative proposals as to the proper transportation costs allowable for sales of domestic crude oil fall short of achieving the goal of assuring that refiner-buyers are charged only actual transportation costs incurred by refiner-sellers. FEA also has concluded that any provision that would permit refiner-sellers to recover the transportation cost incurred in replacing domestic crude oil sold under the program with imported crude oil would be extremely complex and might, in many cases, result in inequitable prices to refiner-buyers. Accordingly, FEA is adopting a provision which provides that, in the case of sales of domestic crude oil, refiner-buyers may be charged only the actual transportation costs incurred by the refiner-seller in moving the domestic crude oil to the refiner-buyer's refinery.

2. *Period for calculation of maximum sale price.* The majority of refiner-sellers submitting further comments recommended that FEA's proposed pricing provision be modified to provide that the price of allocated crude oil be based on a one-month period rather than a three-month average. Refiner-sellers generally contended that refiner-buyers purchasing crude oil in the two months following a price increase receive a price advantage under the three-month formula and that sellers are unable to recover fully their costs during those two months.

Although the comments addressed to this issue urged the adoption of a one-month period, FEA has determined to retain the three-month period for calculating the maximum permissible price in light of the data available to the Agency. As FEA has previously stated, these data demonstrate that some refiner-sellers experience significant fluctuations in their costs of imported crude oil from month to month. Although under a one-month calculation period these fluctuations may not result in an appreciable difference in prices for large volumes sold over several months, the possibility continues to exist that refiner-buyers purchasing small quantities of allocated crude oil would pay significantly higher prices if a one-month calculation period rather than a three-month average were used. In the event there is a substantial increase in world market crude oil prices, FEA will evaluate the desirability of utilizing a

one-month average on a temporary basis as it has in the past.

3. *Refiner-sellers importing only low sulfur or high sulfur crude oil.* The July 21 pricing proposal failed to provide a procedure for refiner-sellers which import only high sulfur (or only low sulfur) crude oil and are required to sell only low sulfur (or only high sulfur) crude oil. In the August 19 notice FEA requested comments on a proposal which would allow refiner-sellers that import only one category of crude oil to calculate their maximum price for crude oil sold under the program by utilizing its weighted average per-barrel port of entry cost for the category of crude oil imported and applying the proposed adjustments for sulfur and gravity differentials. Firms commenting on this issue generally supported this proposal, and FEA is adopting it substantially as proposed.

B. RE-ENTRY PROVISION

The amendments to the buy/sell program adopted on August 19, 1977, exclude from the program small refiners that have had allocations shown on the buy/sell list during the last year but have not exercised their purchase opportunities. The large refiners submitting further comments were divided on the issue whether this provision should be modified. Several large refiners opposed relaxation of the provision, contending that re-entry should be available only upon a finding of extreme hardship in the context of a request for exception. Some large refiners, however, recommended that any small refiner that is able to demonstrate a significant reduction in crude oil supply due to factors over which it has no control—such as, for example, termination of Federal Royalty or Naval Petroleum Reserve crude oil supplies—and that does not have access to imported crude oil should be eligible for an allocation. All of the small refiners commenting strongly urged that provision be made for re-entry into the buy/sell program. Several small refiners pointed out that FEA premised its revision of the buy/sell program on the finding that "supplies of crude oil for small and independent refiners were adequate, taking into account allocations under the crude oil supplier/purchaser freeze (10 CFR 211.62) and the general availability of crude oil in the world market . . ." (42 FR at 37407, July 21, 1977.) However, as these firms noted, this premise does not reflect the fact that some small refiners are dependent upon supply sources that are exempt from the supplier/purchaser rule, such as the Federal Royalty oil program, and therefore could experience a substantial reduction in their current supply below base period levels in the event these supplies should be terminated.

It is FEA's conclusion from the record in this proceeding that small refiners that experience a substantial reduction in their supplies of domestic crude oil and that do not have access to imported crude oil should be eligible for an allocation under the buy/sell program, notwithstanding the fact that such refiners did not exercise their purchase opportunities in the past. FEA believes that a provision for re-entry on this basis is consistent with the objective of limiting the scope of the program to small refiners that lack access to adequate supplies of domestic and imported oil. In addition, the re-entry provision should ensure that all small refiners are treated equitably with regard to access to supplies under the program.

C. NEWLY CONSTRUCTED REFINING CAPACITY COMMITTED FOR AFTER AUGUST 23, 1977

The revised buy/sell program provides that small refiners that have expended or are irrevocably committed to expend prior to the publication of the amendments on August 24 an amount equal to at least twenty percent of the total cost of newly constructed refining capacity are eligible for an allocation not to exceed twenty-five percent of such capacity. FEA invited further comments as to whether and under what circumstances small refiners that make a commitment after August 24, 1977, for new capacity should be eligible for an allocation.

The large refiners that commented were unanimous in their opposition to any provision that would permit new capacity committed for after the publication of the revised buy/sell program to receive an allocation on the ground that such a provision would serve only to encourage investment in potentially uneconomic refining capacity that would depend for its viability on the continuation of crude oil allocation programs. Small refiners commenting generally contended that such new capacity should not be unconditionally excluded from the buy/sell program. None of the refiners commenting offered specific guidelines for determining the eligibility of such new refining capacity for participation in the buy/sell program.

On the basis of the evidence presented in this rulemaking proceeding, and in light of the uncertainties regarding regulatory incentives for small refiners in the future, FEA has determined to continue this aspect of the rulemaking pending final action by the Congress on the President's National Energy Plan. Subsequent to final Congressional action, FEA intends to review the crude oil supply situation as it affects small refiners and the needs of the nation with respect to additional refining capacity. Following that review, FEA will determine whether such new refining capacity should be eligible for allocations under the buy/sell program.

III. THE AMENDMENTS ADOPTED

A. PRICING OF ALLOCATED CRUDE OIL

Under the amendments adopted today, a refiner-seller shall determine its weighted average port of entry cost for imported high sulfur crude oil and its weighted average port of entry cost for imported low sulfur crude oil in the month in which the particular allocated crude oil sale is made and the

two months preceding that month, excluding any costs associated with transporting such crude oil from the ports of entry ("domestic transportation costs"). FEA is adopting the provisions for calculation of gravity and sulfur content differentials substantially as proposed. With respect to transportation expenses recoverable by refiner-sellers in each allocated crude oil sale, the amendments provide that, in the event a refiner-seller sells and delivers imported crude oil to a refiner-buyer, the refiner-buyer may be charged only the actual costs associated with transporting the imported crude oil from the United States port of entry to the refiner-buyer's refinery. With respect to transportation cost adjustments for allocated sales in which domestic crude oil is delivered, the refiner-buyer may be charged only the actual costs associated with transporting the domestic crude oil from the wellhead, if the refiner-seller owns the crude oil, or the point of purchase or exchange, if the refiner-seller purchases or acquires pursuant to an exchange the crude oil sold, to the refiner-buyer's refinery. When Alaskan crude oil is sold, the refiner-buyer may be charged the cost of transporting the Alaskan crude oil from the port of entry into the lower forty-eight states to the refiner-buyer's refinery.

As indicated above, FEA also is adopting substantially as proposed the pricing provision applicable to refiner-sellers that receive deliveries of only imported low sulfur (or only imported high sulfur) crude oil and are required to sell high sulfur (or low sulfur) crude oil under the program. The amendment permits such refiner-sellers to utilize their weighted average per barrel port of entry cost for the particular category of imported crude oil and to apply the gravity and sulfur adjustments adopted today.

B. RE-ENTRY INTO THE BUY/SELL PROGRAM

As discussed above, the amendments adopted today provide that any small refiner that is excluded from the revised buy/sell program because it did not exercise its purchase opportunities in the past year may apply for an allocation if it has experienced in the preceding six-month period or will experience in the six-month period following the application a twenty-five percent reduction in its domestic crude oil supplies for one or more of its refineries due to factors over which the small refiner has no control. In the event that FEA determines that the refinery in question does not have access to imported crude oil under 10 CFR 211.65(a)(3) and thus is eligible for an allocation, FEA may assign the refinery a maximum allocation equal to the amount of such reduction in crude oil supplies.

C. TECHNICAL AMENDMENTS

In addition to the substantive amendments discussed above, FEA is also adopting three technical amendments to the revised buy/sell program regulations adopted on August 19, 1977, and effective October 1, 1977. The first amendment

substitutes the defined term "refining capacity" for the term refinery capacity in § 211.65(a)(1), since the definition of "refinery capacity" was deleted by the August 19 amendments. The second technical amendment revises 10 CFR 211.65(a)(4) to make clear that small refiners that are eligible to apply for an allocation under the program but which chose not to apply for an allocation for the period commencing October 1, 1977, may apply for an allocation by the specified filing deadline for subsequent allocation periods. The third amendment adds a new subparagraph (2) to paragraph (g) of 10 CFR 211.65 to make clear that, following the issuance of a buy/sell notice, FEA may make adjustments to allocations and increase sales obligations in accordance with the regulations without recalculating all refiner-sellers' sales obligations and issuing a supplemental buy/sell notice.

IV. REQUEST FOR FURTHER COMMENTS

10 CFR 211.65(b)(4) establishes a ceiling on the purchase opportunities of refiner-buyers that own first priority refineries under the Canadian Allocation Program set forth in 10 CFR Part 214. As indicated in the buy/sell notice for the allocation period commencing October 1, 1977, (42 FR 41866, September 22, 1977) only one first priority refinery, the Laurel, Mont., refinery of Farmers Union Central Exchange (CENEX), is presently affected by this ceiling. However, in light of the substantial reduction in the export levels of Canadian crude oil and the petroleum product shortages projected for Montana beginning in early 1978, FEA is requesting comments on the following options for the purpose of determining whether to initiate a rulemaking proceeding on this issue: (1) eliminate the ceiling and the provisions of 10 CFR 211.65(f)(2)(ii) that limit the sales obligations of refiner-sellers that own first priority refineries; (2) eliminate the ceiling but retain the limitation on sales obligations of refiner-sellers in 10 CFR 211.65(f)(2)(ii); (3) retain the ceiling but permit any refiner-buyer affected by the ceiling to purchase its full allocation of crude oil through negotiated sales, provided that FEA would not direct a refiner-seller to sell crude oil in excess of the ceiling level; or (4) retain the ceiling but permit purchases of allocated crude oil in excess of the ceiling only if the supply-to-capacity ratio of the refiner-buyer does not exceed that of the seller from which the crude oil was purchased.

Written comments will be accepted and considered if received by the date specified in the "Dates" section of this notice. Comments should be submitted to Executive Communications, Room 3317, Federal Energy Administration, Box NO, the Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Comments should be identified on the outside of the envelope and on documents submitted with the designation "Crude Oil Buy/Sell Program." Fifteen copies should be submitted.

As indicated in the August 19 notice, FEA is adopting these final amendments

effective October 1, 1977, to provide immediate guidance and information with respect to the allocation of crude oil for the allocation period commencing October 1, 1977.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Parts 211 and 212 of Chapter II, Title 10, Code of Federal Regulations, are amended as set forth below, effective October 1, 1977.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

1. Section 211.65 is amended by revising subparagraphs (1) and (4) of paragraph (a), by adding a new subparagraph (5) to paragraph (a), and by designating existing paragraph (g) as subparagraph (1) thereof and by adding a new subparagraph (2) to paragraph (g) to read as follows:

§ 211.65 Method of allocation.

(a) *Eligibility for allocation.* (1) Any small refiner may apply to FEA for an allocation for one or more of its refineries; *Provided*, That the small refiner (i) purchased crude oil under the provisions of this section during the period September 1, 1976, through August 31, 1977, (ii) was listed on the buy/sell notices during the period September 1, 1976, through August 31, 1977, with an allocation of zero (0) barrels in all four allocation quarters in that period, or (iii) as to small refiners not shown on such buy/sell notices and other small refiners with newly constructed refining capacity or reactivated refineries or refining capacity, had completed the process design basis for the refining capacity concerned and had expended or were irrevocably committed to expend prior to August 24, 1977, an amount equal to at least twenty (20%) percent of the total cost of such refining capacity, in which latter case the FEA may assign such refining capacity a maximum allocation of twenty-five (25%) percent of the capacity. Such allocation will be in effect for a period not to exceed two allocation periods, following which the allocation for such refining capacity shall be calculated in accordance with the provisions of paragraph (b) of this section.

(4) Small refiners eligible under subparagraph (1) of this paragraph to apply for allocations for one or more of their refineries shall submit applications by September 1, 1977, for a determination of the refineries' eligibility for an allocation for the allocation period commencing October 1, 1977. For subsequent allocation periods, applications must be submitted no less than 60 days or more than 90 days prior to the beginning of

the allocation period. Applications shall be addressed to the Program Manager, Crude Oil Allocation, FEA, in accordance with the procedures established in Subpart G of Part 205 of this chapter. Each application shall contain the information (including documentation where appropriate) necessary for the FEA to evaluate the application under the criteria specified in subparagraph (3) of this paragraph and the data on crude oil sales to which necessary to calculate an allocation under paragraph (b) of this section, including the information specified in § 211.65(d) for the months of June and July 1977. Documentation should include copies of correspondence with pipeline companies, as well as any published requirements of pipeline companies as to required minimum shipments. Separate applications must be submitted for each refinery. The FEA may request additional information if necessary for evaluation of the application and shall notify each applicant of its determination as to eligibility of the refinery or refineries concerned by September 30, 1977, for the allocation period commencing October 1, 1977, and, for subsequent allocation periods, 15 days prior to the beginning of the period.

(5) Notwithstanding the provisions of subparagraph (1) of this paragraph (a), any small refinery that did not purchase crude oil under the provisions of this section during the period September 1, 1976, through August 31, 1977 may apply to FEA at any time for an allocation for one or more of its refineries; *Provided*, That such refinery shall be required to demonstrate that it has incurred in the preceding six-month period or will incur in the six-month period following the application a reduction, due to circumstances over which such refinery had no control, in its supply of domestic crude oil for the refinery for which an allocation is sought equal to at least twenty-five (25%) percent of such crude oil supply. In the event FEA determines that such refinery is eligible for an allocation under subparagraphs (2) and (3) of this paragraph (a), the FEA may assign the refinery a maximum allocation equal to the amount of the reduction in its domestic crude oil supplies. In granting a request of such a refinery for an allocation, the FEA may direct one or more refinery-sellers to sell a suitable type of crude oil to such refinery pursuant to paragraph (j) of this section.

(g) *Buy/sell notice.* . . .

(2) Following the issuance of a buy/sell notice pursuant to subparagraph (1) of this paragraph (g), the FEA may: (i) grant an allocation to a refinery-buyer pursuant to subparagraph (5) of paragraph (a) of this section; (ii) grant an emergency supplemental allocation pursuant to paragraph (c) of this section; (iii) adjust any allocation shown on such buy/sell notice; or (iv) issue one or more directed sales orders that would result in one or more refinery-sellers selling more than their published

sales obligations for that allocation period pursuant to subparagraph (3) of paragraph (j) of this section, without issuing a supplemental buy/sell notice listing such allocations, adjustments to allocations or increased sales obligations.

2. Section 212.94 is revised to read as follows:

§ 212.94 Allocated crude pricing.

(a) *Scope.*—(1) *General.* This section applies to each sale of crude oil made pursuant to the provisions of § 211.65 of Part 211 of this chapter, effective for sales obligations for the allocation periods commencing on or after October 1, 1977.

(2) *Definitions.* For the purposes of this section—

"High sulfur crude oil" means crude oil the sulfur content of which is equal to or greater than 0.6% (six-tenths of one percent) by weight.

"Low sulfur crude oil" means crude oil the sulfur content of which is less than 0.6% (six-tenths of one percent) by weight.

"Lower forty-eight states" means the forty-eight contiguous states of the United States.

(b) *Rule.* (1) Notwithstanding the general rules described in this subpart, the price at which low sulfur and high sulfur crude oil, respectively, shall be sold when required pursuant to § 211.65 of Part 211 of this chapter shall not exceed the refinery-seller's weighted average per barrel landed cost (as defined in § 212.82, but utilizing the volumes of imported crude oil at the time of importation thereof into the United States), less the average cost of domestic transportation to the refinery-seller's refinery(s), of all low sulfur or high sulfur imported crude oil, respectively (other than crude oil imported from Canada), delivered to the refinery-seller in the month in which the sale is made and the two months preceding that month, plus a handling fee of five cents per barrel, and any transportation, gravity and sulfur content adjustments as specified in subparagraphs (2) through (4), respectively, of this paragraph (b). Each refinery-seller making such a sale shall maintain records, which shall be made available to the FEA upon request, listing the volumes and costs of all imported low sulfur and high sulfur crude oil delivered to it.

(2) (i) A price adjustment shall be made for transportation expenses for crude oil offered for sale under § 211.65 of Part 211 of this chapter by adding to the weighted average costs as calculated under paragraph (b) (1) of this section: (A) where domestic crude oil (other than Alaskan crude oil) is sold, the actual cost of transporting the domestic crude oil from the (1) the wellhead, in the event the refinery-seller owns the crude oil so sold or (2) the point of purchase or exchange in the event the refinery-seller acquires the crude oil so sold pursuant to a purchase or exchange, to the refinery-buyer's refinery; (B) where Alaskan crude oil is sold, the actual cost of trans-

porting the Alaskan crude oil from the port of entry into the lower forty-eight states to the refinery-buyer's refinery; (C) where imported crude oil is sold, the actual cost of transporting the crude oil from the U.S. port of entry to the refinery-buyer's refinery.

(ii) For purposes of calculating transportation adjustments under this subparagraph (2) (i) a refinery-seller shall include pipeline tariffs, water transportation and terminalling costs, exchange differentials, insurance and taxes paid to deliver the domestic or imported crude oil to the refinery-buyer's refinery.

(iii) Each refinery-seller making a sale of domestic crude oil under § 211.65 of Part 211 of this chapter shall maintain records, which shall be made available to the FEA upon request, listing the volumes of domestic crude oil sold, the acquisition cost of such crude oil, and the transportation expenses incurred in transporting the domestic crude oil to the refinery-buyer's refinery.

(3) A price adjustment shall be made for gravity differential of crude oil offered for sale under § 211.65 of Part 211 of this chapter by adding to or subtracting from the weighted average costs as calculated under paragraph (b) (1) of this section three cents per barrel for each °API that the crude oil being offered for sale under § 211.65 of Part 211 of this chapter is above or below, respectively, the weighted average °API of imports of crude oil of the same sulfur content category (other than crude oil imported from Canada) for the applicable three month period specified in paragraph (b) (1) of this section for the refinery-seller.

(4) A further price adjustment shall be made for sulfur content differential of crude oil offered for sale under § 211.65 of Part 211 of this chapter by adding to or subtracting from the weighted average costs as calculated under paragraph (b) (1) of this section three cents per barrel per one tenth percent that the sulfur content by weight of the crude oil being offered for sale under § 211.65 of Part 211 of this chapter is either below or above, respectively, the percentage representing the weighted average sulfur content of imports of crude oil of the same sulfur content category (other than crude oil imported from Canada) for the applicable three months period specified in paragraph (b) (1) of this section for the refinery-seller.

(5) To calculate a refinery-seller's maximum permitted sale price under subparagraph (1) of this paragraph where the refinery-seller receives deliveries of only imported low sulfur crude oil (or only imported high sulfur crude oil) and sells high sulfur crude oil (or low sulfur crude oil) pursuant to § 211.65 of Part 211 of this chapter, such refinery-seller shall utilize its weighted average per barrel cost of imported crude oil as determined under subparagraph (1) of this paragraph for the particular category of crude oil so imported, and apply the gravity and sulfur adjustments specified in subparagraphs (3) and (4), respectively, of this paragraph (b).

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Amendments to Crude Oil Supplier/Purchaser Rule

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: Effective December 1, 1977, this final rule amends the Federal Energy Administration's (FEA) Mandatory Petroleum Allocation Regulations (10 CFR 211.63), to provide greater flexibility as to the termination of crude oil supplier/purchaser relationships between crude oil producers and crude oil resellers. In general, the amendments permit a crude oil supplier/purchaser relationship between a producer and a reseller to be terminated by the producer, and a new reseller substituted, with respect to crude oil being delivered to refineries other than small refineries, if the new reseller offers to continue to supply these refineries with such crude oil. The amendments also permit a substitution of resellers with respect to crude oil being delivered to small refineries, if the new reseller offers to continue to supply the small refinery with such crude oil and the small refinery consents to the substitution.

EFFECTIVE DATE: The amendments adopted hereby are effective December 1, 1977.

SUPPLEMENTARY INFORMATION:

- I. Background.
- II. Discussion of amendments:
 - A. Amendments adopted;
 - B. Effective date;
 - C. General purpose of amendments.
- III. Additional matters.

I. BACKGROUND

On July 28, 1977, the FEA issued a Notice of Proposed Rulemaking and Public Hearing concerning proposed amendments to the crude oil supplier/purchaser rule (42 FR 39395, August 4, 1977). In that Notice, the FEA set forth the history and purposes of the crude oil supplier/purchaser rule, and of the Agency's prior attempts to ameliorate the restrictive effects of this rule upon competition in the crude oil reseller industry.

Basically, the purpose of the July Notice was to ascertain whether the proposed amendments would further effectuate the goal of facilitating competition in the crude oil reselling industry while providing adequate crude oil supply protection to refineries, and in particular small refineries.

Public hearings on the proposal were held in Washington, D.C., on September 1, 1977, at which 12 persons presented oral statements. In addition, the FEA received a total of 61 written comments, including 18 late comments, in response to its proposal.

II. DISCUSSION OF AMENDMENTS

A. AMENDMENTS ADOPTED

The amendments adopted hereby are substantially as proposed in the July 1977 Notice of Proposed Rulemaking. However, certain changes have been made, to assure that the procedural rights and obligations of all parties affected by a proposed termination are clear.

In general, the amendments adopted permit a crude-oil supplier/purchaser relationship between a producer and reseller to be terminated with respect to crude oil being delivered to refineries other than small refineries, if the new reseller offers to continue to supply these refineries with such crude oil. Termination of such a supplier/purchaser relationship with respect to crude oil being delivered to small refineries is also permitted, subject to the same conditions applicable to other terminations and provided also that the small refinery consents. Prices charged in sales by the new reseller are subject to the Mandatory Petroleum Price Regulations.

The amendments set forth the procedural requirements for accomplishing a substitution of resellers. Thus, a producer that proposes to terminate a supplier/purchaser relationship with a given reseller and to substitute a new reseller shall provide the existing reseller with a written termination notice, not later than 30 days prior to the date of termination. Such notice shall set forth the termination date, the source, quality and estimated volume of crude oil involved (including the portions of that volume that are lower tier, upper tier, and uncontrolled crude oil), and the name and address of the proposed new reseller.

The existing reseller must then (within 10 days) provide copies of the termination notice to all purchasers whose deliveries of crude oil would be affected by the termination notice, together with a statement of the volume, quality and pricing category (i.e., whether upper- or lower-tier or uncontrolled) of crude oil involved for that purchaser. At the same time, the existing reseller must provide copies of the notices sent to its purchasers to the proposed new reseller, so that the new reseller can make timely offers to supply such purchasers as a substituted reseller. Proposed § 211.63(d) (1) (iv) (B) (2) has been revised to make clear that the existing reseller must provide these copies to the proposed new reseller simultaneously with the provision of the relevant notices to the existing reseller's purchasers.

If the existing reseller has more than one purchaser whose volumes are potentially affected by the termination notice, an order of priority of providing notice to such purchasers is established. First, the reseller must provide notice to that refinery other than a small refinery that purchases the largest amount of such crude oil, to the extent of the entire volume of such crude oil purchased by that refinery or 1,000 barrels per day, whichever is less. If the proposed termination involves an amount of crude oil that is greater than the amount specified above, then the reseller must notify that refinery other than a small refinery that is the purchaser of the next largest amount of such crude oil, again up to that refinery's volume of purchases of such crude oil or 1,000 barrels per day, whichever is less. This process continues, until all refineries that are not small refineries have been notified. Thus, the termination must be spread among affected refineries other than small refineries in amounts of not more than 1,000 barrels per day.

If notices to refineries other than small refineries in the amounts established in the above manner are not sufficient to account for the total volume of crude oil subject to the termination notice, then the existing reseller must notify any reseller receiving crude oil subject to the termination notice (that is, any immediate purchaser from the existing reseller that is also a reseller). Such a reseller is subject, in turn, to the same notice requirements with respect to its purchasers as apply to the prime reseller.

Finally, if the crude oil subject to the termination notice is in excess of the amounts that can be accounted for in the above fashion, the existing reseller must notify small refineries, in the same order as provided for refineries other than small refineries.

The new reseller—who will have received copies of the notices sent to the existing reseller's purchasers—must then make a written offer to continue to supply the same volumes of such crude oil to such purchasers, at prices consistent with the crude oil reseller pricing rules of Part 212.

The provisions establishing the order of priority of notification of the existing reseller's purchasers have been altered to some degree from the proposed provisions, in order to make clear the notification obligations of the existing reseller. In brief, the existing reseller is to notify all refineries other than small refineries, in the order of the magnitude of their purchases but only up to 1,000 barrels per day for any such refinery; and if the termination notice involves greater volumes than can be so accounted for, then notification must be given to any purchasers from the existing reseller that are themselves resellers; and if any volumes subject to the termination notice still remain unaccounted for, then notice must be given to small refineries in the same order of priority as for refineries that are not small refineries.

The purposes of these changes are two-fold. First, they should make clear that an existing reseller cannot fragment

7
U
M
I

its notices in such a way as practically to frustrate the substance of these amendments, by spreading small volumes among many diverse purchasers. Thus, they establish that notification to any refiner must be for a minimum volume, equal to 1,000 barrels per day or the amount of that refiner's purchases of crude oil subject to the termination notice, whichever is less; and they require that the reseller first notify the purchasers of the largest amounts of crude oil subject to the termination notice. Second, they should also make clear, in the regulatory provisions, the policy set forth in the July Notice of Proposed Rulemaking on this subject, viz., that no one refiner shall be subject to termination with respect to more than 1,000 barrels per day under any particular termination notice issued to the existing reseller.

The FEA has also determined that it is desirable to revise the original proposal to provide greater specificity as to the timing of the acceptance or rejection of offers from the new reseller, so that refiners are given adequate opportunity to determine whether to accept the offer and so that the supply obligations of the existing and new reseller are clearly determined prior to any substitution. Therefore, the amendments provide that each refiner shall have 10 days from the receipt of the offer to accept or reject such offer. For purposes of these provisions, if notice of acceptance is not provided within 10 days, the offer shall be deemed to have been rejected. Upon the acceptance or rejection of all such offers, the new reseller may be substituted for the existing reseller, except with regard to volumes supplied to small refiners that have rejected such offers. If a small refiner rejects such an offer, the producer must continue the supplier/purchaser relationship with the existing reseller to the extent of the volumes involved for such small refiner. Of course, where an offer is accepted by any offeree, whether the offeree is a small refiner or a refiner other than a small refiner, a supplier/purchaser relationship between the new reseller and the accepting offeree will thereby be established.

As proposed in the July Notice, the amendments provide that the new substitution rule is not to be construed as authorizing the breach of an existing contract. However, this provision has been reworded slightly to make clear that it applies only to contracts that the producer may have with the existing reseller. It does not apply to contracts which another reseller that purchases from the existing "prime" reseller may have with its own purchasers. Thus, these substitution provisions might provide a "second" reseller with a defense to an action for breach of contract, to the extent such breach is necessitated in order to effectuate these provisions, but they would not authorize breach of a contract between the producer and the existing "prime" reseller.

Finally, copies of all notices, offers, acceptances and rejections must be sent

to the FEA (Department of Energy) National Office by the new reseller. (A more specific address will be provided, when available, prior to the effective date of these amendments.)

B. EFFECTIVE DATE

As indicated above, the FEA has determined to adopt the proposed amendments substantially in the form proposed, with some changes designed to assure that the termination notice provisions operate in such a way that the relative rights and obligations between the existing and new resellers and any of the existing resellers' purchasers are clear.

However, the comments received by the FEA in this proceeding have led it to the conclusion that the effective date of these amendments should be postponed until December 1, 1977, in order to permit the FEA to amend the pricing rules applicable to crude oil resellers to address a number of specific issues which have arisen in that industry. A number of commenters stated that competition in the reseller industry is not practicable under current FEA price regulations applicable to crude oil resellers. Some also opined that the cost of crude oil to refiners could increase significantly as a result of the proposed amendments, under the current crude oil reseller pricing rules. With a view to these concerns, expressed by both refiners and resellers, the FEA has concluded that the reseller substitution amendments should not be made effective prior to December 1, 1977, by which time it is anticipated that amendments to the pricing rules under which such resellers are required to operate will have been adopted. FEA has therefore provided for an effective date of December 1, 1977, in order to permit appropriate amendments to the pricing rules applicable to crude oil resellers to address a number of specific pricing problems which have arisen in that industry.

On August 9, 1977, the FEA issued a Notice of Proposed Rulemaking and Public Hearing concerning proposed amendments to the Mandatory Petroleum Price Regulations pertaining to the resale of crude oil (42 FR 41256, August 15, 1977). In that Notice, the FEA outlined the issues which had arisen under the price regulations applicable to crude oil resellers, and it set forth proposed amendments and possible alternatives to address these matters. Public hearings on this proposed rulemaking were held in Dallas, Tex., on September 15, 1977, and Washington, D.C., on September 20, 1977. The FEA is presently considering the comments received in response to its proposals, and it anticipates that amendments to the crude oil reseller price rules will be issued by December 1, 1977. Therefore, the FEA believes that any uncertainties generated by the pendency of that rulemaking proceeding, which might otherwise affect the decisions of producers, resellers and refiners under the amendments adopted today, should be resolved by December 1.

At the same time, the FEA has concluded that it should adopt today the basic procedural mechanism by which termination of the supplier/purchaser relationship between crude oil producers and crude oil resellers can be accomplished. In this way, producers, resellers and refiners will be apprised of their relative rights and obligations concerning substitutions in advance of the effective date of the rule, which is fixed as December 1.

C. GENERAL PURPOSE OF AMENDMENTS

The FEA believes that the reseller substitution method set forth in the amendments adopted today is reasonably well adapted to accomplishing the goal of permitting greater flexibility on the part of producers to select the resellers with which they do business, while at the same time avoiding undue disruption in the crude oil supply system and protecting the crude oil supply of refiners. As stated in the July Notice, the principal purpose of the basic crude oil supplier/purchaser rule is to assure continued supply of crude oil to refiners, and particularly small refiners. The amendments adopted today reflect this basis for the rule, by permitting small refiners to refuse the substitution of resellers as to them. Moreover, by providing all refiners the right of first refusal as to their volumes of crude oil, the amendments provide a means for all refiners to assure continuation of their supplies of domestic crude oil.

The FEA recognizes the concerns of those commenters that were opposed to the proposed amendments. A few resellers feared that they might be forced out of the market by large integrated companies. However, a majority of resellers commenting on the proposal, either individually or through associations, generally favored the proposal. Moreover, the FEA will monitor developments in the crude oil reselling industry as a result of these amendments, and it will consider adopting appropriate additional measures in the event that there appears to be any significant adverse effect upon competition in the crude oil reselling industry, especially with regard to independent crude oil marketers.

As previously indicated, some resellers and refiners expressed concern over the possibility of significant increased costs and unfair competition as a result of this proposal. Some commenters stated that the proposal would be likely to result in the offer of illegal inducements to producers by potential new resellers, in order to gain access to the crude oil sold by such producers. However, the FEA believes that these concerns, and the possible uncertainties prevailing as a result of the pendency of a rulemaking proceeding concerning crude oil reseller price regulations, should be substantially alleviated upon the issuance of amended crude oil reseller price regulations. For this reason, as stated above, the effective date of the amendments adopted hereby is December 1, 1977, by which time the new pricing regulations should have been issued.

Moreover, the FEA will monitor the activities of resellers, producers and refiners under these amendments, and is prepared to take appropriate action in the event of any abuses by any segment of the crude oil distribution chain. The FEA believes that it has adequate authority, for example, to prevent or redress the acceptance of consideration by producers which would have the effect of circumventing first sale ceiling prices of crude oil under Subpart D of Part 212 of the price regulations.

Finally, the FEA wishes to make very clear its position that the amendments adopted today are intended to operate as a mechanism for the substitution of resellers, and not for the multiplication (or "layering") of resellers in the distribution chain. FEA will closely monitor, and vigorously audit, any situation in which it may appear that these provisions are being utilized in such a manner as to inflate prices artificially.

III. ADDITIONAL MATTERS

In the July Notice, the FEA requested comments concerning whether it should permit the substitution of refiners for resellers that have an existing supplier/purchaser relationship with a crude oil producer, and conversely whether it should permit the substitution of resellers for refiners that have a supplier/purchaser relationship with a crude oil producer. Comments were also requested concerning the criteria which should apply to any such substitutions.

The FEA received several comments in response to its request, some of which favored the idea of permitting such substitutions generally, some of which favored the idea of permitting only refiner displacement of resellers, and some of which opposed such substitutions altogether. However, the comments received were not sufficiently specific as to the criteria and safeguards to be applied in permitting such substitutions, and the FEA has determined that it is necessary to explore the implications of such substitutions further.

For example, several commenters suggested that the substitution rule should be applicable to any supplier/purchaser relationship between a crude oil producer and any "firm." This language would have permitted a substitution not only among resellers, but also between resellers and refiners. Thus, it would have permitted a reseller to be inserted between a producer and a refiner that had a direct supplier/purchaser relationship, as well as permitting a refiner to "eliminate" a reseller. However, several refiners expressed the concern that allowing a reseller to be inserted (against the refiner's wishes) would be likely to result in higher costs, by introducing a middleman's margin where none previously existed. Of course, whether increased costs would in fact result would be partly dependent upon the relative efficiencies of the refiner and the reseller in the performance of the same functions; but the possibility of increased costs occurring simply as a result of the introduction of

a third party must be recognized and addressed.

FEA continues to be of the view that it would be generally desirable to further open up the crude oil distribution chain to competition, and thus to provide further flexibility in supplier/purchaser relationships in this chain, to the extent that this can be done consistent with the need to protect crude oil supplies to refiners and in a manner that does not result in unjustified increases in crude oil prices. Therefore, the FEA will attempt to formulate specific criteria and necessary safeguards under which such substitutions might be permitted. (As an example, the FEA may be able to devise some means to avoid specific adverse consequences such as increased costs resulting from the introduction of resellers into a producer-refiner relationship, without prohibiting such substitutions altogether.)

When the preliminary formulation of such criteria is accomplished, the FEA anticipates that it will issue a notice of proposed rulemaking requesting comments upon whether it would be feasible to permit certain additional substitutions under certain specified conditions.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 211 of Chapter II of Title 10 of the Code of Federal Regulations is amended as set forth below, effective December 1, 1977.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

Section 211.63 is amended by revising paragraph (d) (1) (iv) to read as follows:

§ 211.63 Domestic crude oil supplier/purchaser relationships.

(d) Termination of Supplier/purchaser relationships

(1)
(iv) By a producer (as defined in Part 212 of this chapter) as to a reseller purchasing crude oil from that producer: Provided, That:

(A) At least thirty days in advance of any termination under this subdivision (iv), the producer shall give to the reseller purchasing from it whose supplier/purchaser relationship is proposed to be terminated a written termination notice stating the date of termination, the source, quality, and estimated volume of crude oil involved (including the portions of that volume that are priced as lower tier crude oil, upper tier crude oil and uncontrolled crude oil under Part 212 of this chapter), and the name and address of the new reseller to which such crude oil is proposed to be sold.

(B) Any reseller that has received a termination notice from a producer as

provided in subclause (A) of this subdivision, which proposed termination would effect a reduction in deliveries of crude oil by that reseller, either directly or through exchanges, to any refiner or other reseller shall:

(i) Within 10 days of receipt of the termination notice, provide a copy of the termination notice, together with a statement as to the volume, quality, and price level of crude oil involved for the particular purchaser, to the purchasers of the crude oil subject to such termination notice. To the extent that such reseller has any option in deciding which of its customers is to be regarded as the purchaser of the crude oil subject to such termination notice, the following priorities shall apply:

(i) To that refiner other than a small refiner purchasing the greatest volume of crude oil subject to the termination notice, but only to the extent of the lesser of such purchaser's purchases or 1,000 barrels per day;

(ii) If the proposed termination would affect crude oil deliveries to crude oil refiners by more than the amount determined under subclause (B) (1) (i), of this subdivision, to additional refiners other than small refiners in the order determined under the criteria set forth in subclause (B) (1) (i), of this subdivision;

(iii) If the proposed termination would affect crude oil deliveries beyond that which could be accounted for as provided above in sales to refiners other than small refiners, to any reseller receiving crude oil subject to the termination notice. (Any reseller receiving such notice shall, in turn, comply with the requirements of this § 211.63(d) (1) (iv) (B); and

(iv) If only small refiners remain as purchasers of the crude oil subject to the termination notice, to such small refiners in the same order as provided in subclauses (B) (1) (i) and (B) (1) (ii), of this subdivision, for refiners other than refiners.

(2) At the same time that the notices required under subclause (B) (1), of this subdivision, are provided, provide copies of such notices to the proposed new purchaser, including the name and address of each person to which a copy of the termination notice was provided and the volume, quality, and price level of the crude oil affected for each such person.

(C) The proposed new purchaser of the crude oil shall make written offer to continue to supply the volume of that crude oil to each refiner provided with a copy of the termination notice as that refiner would otherwise lose as a result of the proposed termination. Such offer or offers shall be at prices consistent with the provisions of Part 212 of this chapter; Provided, That, no firm that resells that crude oil may charge a price in any sale of that crude oil in excess of the actual price paid for that crude oil, where such firm does not provide a service or other function traditionally and historically associated with the resale of crude oil. Each refiner receiving an offer under this subclause (C) of this subdivision have 10 days within which to accept or reject such offer. For purposes of these

provisions, if notice of acceptance is not provided within 10 days, the offer shall be deemed to have been rejected. Acceptance of any such offer shall not constitute a waiver of any rights which the refiner may have under Part 212 of this chapter.

(D) Upon the acceptance or rejection of the offer or offers under subclause (C) of this subdivision by the refiner or refiners concerned, the proposed new purchaser may be substituted by the producer for the purchaser whose supplier/purchaser relationship has been proposed to be terminated; *Provided*, That, if a small refiner that was notified as to a proposed termination does not accept the offer of the proposed new purchaser, the proposed termination shall not be effective as to the volume of the crude oil being delivered to that small refiner.

(E) Nothing in this paragraph (d) shall be construed as authorizing a producer to terminate a supplier/purchaser relationship in breach of a contract or agreement it may have with another firm.

(F) Copies of all notices, offers, acceptances, and rejections required under this subdivision (iv) shall be sent by the new reseller to the National Office of the Department of Energy (Economic Regulatory Administration, Office of Fossil Fuels).

PART 430—ENERGY CONSERVATION PROGRAM FOR APPLIANCES

Procedural Regulations for the Submission and Disposition of Petitions for Prescription of a Rule to Supersede a State Appliance Energy Use or Efficiency Regulation

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: This rule prescribes procedures for the submission and disposition of petitions requesting the Administrator to prescribe a rule to supersede a State appliance energy use or efficiency regulation. These petitions may be submitted under the Energy Policy and Conservation Act.

EFFECTIVE DATE: November 10, 1977.

FOR FURTHER INFORMATION CONTACT:

James A. Smith, (Office of Conservation), Room 307, Old Post Office Bldg., 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, (202-566-4635).

Elliott D. Light, (Office of the General Counsel), Room 7150, Federal Building, 12th and Pennsylvania Ave., NW., Washington, D.C. 20461, (202-566-9380).

SUPPLEMENTARY INFORMATION:

A. BACKGROUND

The Federal Energy Administration (FEA) hereby amends Part 430, Chapter

II, Code of Federal Regulations, in order to prescribe procedural regulations governing the submission and disposition of petitions requesting that the Administrator issue a rule to supersede a State energy efficiency or use regulation. Such petitions are authorized by section 327 (b) (1) of the Energy Policy and Conservation Act (Act) (Pub. L. 94-163). The regulations prescribed today will appear in subpart D of Part 430. A number of other regulations have been prescribed under Part 430, including a number of definitions contained in Subpart A which are applicable to Subpart D.

Proposed regulations governing petitions submitted under section 327 were issued June 8, 1977 (42 FR 30206, June 13, 1977). A hearing was held on July 15, 1977. Additional public comments were requested by notice issued August 3, 1977 (42 FR 40217, August 9, 1977).

B. DISCUSSION OF COMMENTS

Comments were received from a State, a private citizen, industry associations, and a retailer. The major issues raised by the comments to the proposed procedures are discussed below.

1. DETAILED INFORMATION REQUIREMENTS

(a) Burden on interstate commerce. The majority of comments were directed at section 430.43(d) of the proposed regulations. That section enumerated a number of factors which, at minimum, were considered to be necessary to any determination by the Administrator that the State regulations against which a petition was submitted unduly burden interstate commerce. Many of these factors were stated to be too stringent, possibly unknown, and not within the knowledge of many of the small retailers, manufacturers, and other parties subject to the State regulations. Trade associations argued that while individual manufacturers could not provide the required information because of a lack of resources and expertise, the associations could not provide such information because of antitrust and trade secret problems. In essence, the comments suggested that the "minimum" requirements would foreclose participation by many persons affected by the State regulations. While the comments suggested ways in which the language of section 430.43(d) might be made advisory rather than "a minimum" requirement there were no suggestions as to what constituted the facts necessary to demonstrate an "undue burden on interstate commerce."

In evaluating the comments to section 430.43(d) of the proposed regulations, it has become clear that no minimum evidentiary requirement can adequately define the factual proof necessary to demonstrate whether a particular State regulation "unduly burdens" interstate commerce. Further, the legal standard for preempting a State regulation is not affected by a minimum filing requirement. The confusion of these two concepts appears to have affected both the proposal and the comments to the proposal. Meeting the "filing requirements" in no way assures demonstration of the

statutory requirements. On the other hand, it is possible that the burden question could turn on a single fact. Thus, a petition which failed to meet the minimum filing requirements of the proposed regulations might actually meet the requirements of the Act.

The final regulations have been changed to reflect these concerns by deleting the minimum evidentiary requirements and replacing them with a list of factual items considered particularly relevant to the burden question. The new information items have been included in a new paragraph (e) to section 430.43 entitled "Information Guidelines." The change from "minimum requirements" to "guidelines" is intended to provide a broader opportunity for consideration of petitions of those subject to State appliance efficiency regulations. The change to more general statements of the subject matter considered by FEA to be relevant to the burden question is in response to comments concerning the extreme detail of the proposal.

While the final regulations provide only "guidelines" as to the evidentiary requirements of petitions, the statement that FEA considers these items as "particularly relevant" should be underscored. While FEA solicits any information a petitioner believes would prove that a State regulation unduly burdens interstate commerce, the subject areas enumerated in section 430.43(e) of the final regulations should be given particular attention by a petitioner. Where a petitioner believes that a particular subject area is not relevant to the burden question and does not address that subject in its petition, a statement as to why the subject was not discussed would be appropriate.

b. State interest. Comments were also critical of section 430.43(d) (2) (x) of the proposed regulation in the handling of the requirements for demonstrating the lack of a State interest sufficient to justify the State regulation. A number of comments suggested that the proposal was too general. It was also argued that petitioner should not be required to argue the State's case for its regulations. Further, it was noted that much of the information necessary to evaluate the State interest was possessed by the State and could be best presented by the State.

The Act clearly places the burden on the petitioner to demonstrate that the State's interest in the regulations does not justify the burden imposed by the regulations on interstate commerce. A petition must, therefore, provide information regarding the State interest and a discussion comparing the State interest to the burden on commerce.

Section 430.43(e) of the final regulations include guidelines as to the nature of the information required to make this showing. Again, these are not minimum filing requirements. The State interest question is less susceptible to quantification than the burden question. The final regulations reflect this conceptual difference by delineating the matters which can be quantified (e.g., the energy which would be saved by the State regulation, the ability of the industry to finance the

implementation of the State requirements) and leaving other areas (e.g., the State interest in the regulations as they reflect environmental concerns) more general.

In adopting this approach, FEA has rejected a State comment which included detailed economic factors which a petitioner should present in demonstrating the lack of a State interest. (A number of statements very critical of these factors were received from commenters who reviewed the State proposal). The fact that these detailed factors were not incorporated in the final regulations is not to suggest that FEA considers them irrelevant. However, as in the case of the evidentiary requirements regarding the burden issue, requiring detailed information concerning the State interest question to be submitted in all cases could foreclose participation in the petition process.

The guideline approach requires the prospective petitioner to judge, in the first instance, the evidence needed to prevail on the merits. Thus, while the changes in the final regulations with respect to the undue burden and State interest questions increase the likelihood that a petition will be accepted for filing, the changes do not affect the legal standards established by the Act. A petitioner must still "demonstrate to the satisfaction of the Administrator" the factors delineated by the Act or the petition will be denied.

A commenter took issue with FEA's interpretation of section 327(b) (1) of the Act insofar as that provision is affected by the Supremacy Clause of the Constitution. It was suggested that the evidentiary requirements relating to the State interest be modified to reflect the position that only a State interest which is unique could support the regulation of energy-related characteristics of appliances. Otherwise, such regulation would be an undue burden on interstate commerce.

FEA has taken the position that section 327 of the Act defines the roles of the States in the regulation of appliance energy efficiency. Section 327(a) clearly speaks to protecting the federal interest against intrusion by State regulation. Section 327(b) (1) addresses the interest of the private sector, not the federal interest. Since section 327(a) reflects the extent of Congressional concern with State action, it follows that State action which does not contravene section 327(a) is permitted unless a person subject to the state regulation can show that the State interest in the regulations is not sufficient to justify the burden the regulations impose on interstate commerce. The State interest is not to be compared with the federal interest in appliance energy efficiency regulations because federal interests are already protected. Section 327 does not support requiring a State which desires to regulate appliance energy efficiency to have an interest different from other States. The question posed by section 327(b) (1) is whether the regulation can be justified on the particular interests of that State. Thus,

the Supremacy Clause arguments are out of place with respect to section 327(b) (1).

No changes have been made in the regulation in response to this comment.

2. CONFIDENTIALITY

A number of comments asserted that some of the information necessary to demonstrate the impact of a State regulation on interstate commerce would be proprietary. The proposed regulations quite clearly provided for a public forum for the review of petitions filed under the Act. The impact of the outcome of any such proceedings could substantially affect a large number of persons, States, and industries. Given the extreme importance of a petition proceeding, it seems antithetical to protect from disclosure and comment evidence which would be crucial to an ultimate decision. It should be pointed out that if State regulations were attacked in the courts a plaintiff could not deny the defendant (i.e., the State) an opportunity to rebut the evidence which the plaintiff asserts supports the negotiation of the State law. The final regulations are also consistent with the practice of other administrative agencies which, as here, applications are filed at the applicants' discretion.

For these reasons, and in view of changes made in response to other comments, the final regulations do not provide for confidential treatment of information.

3. DENIAL OF A PETITION PRIOR TO ISSUANCE OF A PROPOSED RULE

Under section 430.44(a) of the proposed regulations, a petition accepted for filing would be made available for public comment. Based upon the petition and the comments received, on the petition, a petition would be denied (without a formal hearing) or a proposed rule superseding the State regulation would be issued. A hearing would be held on the proposed rule. One commentator took issue with this procedure because it would allow for the denial of a petition prior to a hearing.

Section 327(b) (1) provides that "the Administrator shall . . . either deny a petition or prescribe a rule under this subsection superseding such State regulation." Section 336 of the Act requires that a rule issued under section 327(b) (1) be proposed and that "interested persons shall be afforded an opportunity to present written and oral data, views, and arguments with respect to any proposed rules . . ." While a right to present oral testimony on any proposed preemptory rule is specifically provided for, a petition can clearly be denied prior to this stage in the petition process. There is, therefore, no requirement that a hearing be held before a petition is denied.

No changes have been made to the final regulations in response to this comment.

The comment served to demonstrate, however, that section 430.44 of the proposed regulations failed to state the standard by which it will be determined

whether a petition is denied or a proposed rule preempting the state regulations is issued. This standard is not whether a petition makes out a prima facie case since this judgment could have been made prior to the solicitation of comments on a petition. Further, under section 430.43(b) (1) of the regulations, only petitions which contain sufficient information for the purpose of a substantive decision will be accepted for filing. Since a petition could be denied after a proposed rule is issued, issuance of a proposed rule is also not a conclusive judgment as to the merits of the petition. The decision to issue a proposed preemptory rule should, therefore, be viewed as preliminary determination that the petition is likely to prevail on the merits. Section 430.44(a) (2) has been amended to provide that if the Administrator determines that a petition, in light of all the comments received, is likely to prevail with regard to the undue burden-state interest issues, a proposed rule will be issued. All other petitions will be denied. If a proposed rule is issued, interested persons will be afforded an opportunity to present their views both in writing and by oral testimony on the proposed rule and the decision to issue the proposed rule.

4. PUBLIC PARTICIPATION IN RECONSIDERATION

Section 430.44(a) (3) of the proposed regulations provided for reconsideration of a petition which was denied following the public comment period but before a preemptory rule was issued. The comments reflected some concern that interested persons were not allowed to participate in the decision to reconsider the denial of a petition. The primary basis of this concern was that a petitioner might submit new evidence to justify reconsideration of the petition and that this evidence would not be subject to public scrutiny.

The disposition of this comment clearly depends on the purpose for reconsideration. Upon reflection, FEA has concluded that the fault lies not in the exclusion of the public from participation in reconsideration but in the lack of guidance as to the scope of that review. Section 430.44(b) of the final regulations explicitly limit the function of reconsideration to errors of fact or law which can be demonstrated from review of the record of the petition proceeding. No new evidence will be considered in this process. New evidence will, however, be considered if petitioner chooses to submit a new petition.

5. ENVIRONMENTAL REPORT

Section 430.43(e) of the proposed regulations required a petition to include a report of the environmental impact of either a denial of a petition or the issuance of a preemptory rule. One comment questioned the purpose of this report and suggested that the requirement was burdensome.

The environmental report requirement stems from the duty of FEA under the

U
M
I

National Environmental Policy Act (NEPA) to reconsider the environmental impact of "major federal actions." Because FEA is charged with considering these impacts before a decision is made, it is appropriate that petitioner provide, in the first instance, an assessment of these impacts. In considering this comment, it has become clear that the proposed regulation was potentially burdensome in requiring a report which contained the information outlined in FEA's NEPA procedures. Section 430.44 (e) (4) of the final regulations has been modified to require that FEA's NEPA regulations be used as guidelines.

6. MISCELLANEOUS COMMENTS

It was suggested that at least one hearing should be held in the State whose regulations are the subject of the petition. Because any proceedings under section 327(b)(1) are of particular interest to the State whose regulations are the subject of those proceedings, FEA will make every effort to schedule at least one hearing in that State.

Other changes of a minor nature were made in the proposed regulations for the purpose of clarity and continuity.

C. REGULATIONS PRESCRIBED

The final regulations are substantially the same as those proposed with the exception of the deletion of the minimum filing requirement and the inclusion of a new information guidelines provision. Under the final regulations a petition accepted for filing will be made available for public comment. Following review of the comments, a petition either will be denied or a proposed rule preempting the State regulations will be issued. The issuance of a proposed rule will be followed by an opportunity for written and oral comment on the basis of the decision to issue a proposed rule and on the appropriateness of the proposed rule. After all comments have been received and evaluated, the petition either will be denied or a final rule preempting the State regulations will be issued.

The final regulations provide for the reconsideration of any petition which is deemed after the public comment period but before the issuance of a proposed preemptory rule. Reconsideration will lie only where it is alleged and proven that the denial was based on an error of fact or law which is clear in the record.

(Energy Policy and Conservation Act, Pub. L. 94-163, as amended by Pub. L. 94-383; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E. O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 430 of Chapter II of Title 10, Code of Federal Regulations is amended by adding a new Subpart D as set forth below, effective November 10, 1977.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYCI,
Acting General Counsel,
Federal Energy Administration.

Subpart D—Petitions for Prescription of a Rule To Supersede a State Appliance Energy Use or Efficiency Regulation

Sec.

- 430.40 Purpose.
- 430.41 Definitions.
- 430.42 General requirements.
- 430.43 Petitions.
- 430.44 Disposition of petitions.

AUTHORITY: Energy Policy and Conservation Act, Pub. L. 94-163 as amended by Pub. L. 94-383; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended by Pub. L. 94-385; E.O. 11790, 39 FR 23185.

Subpart D—Petitions for Prescription of a Rule To Supersede a State Appliance Energy Use or Efficiency Regulation

§ 430.40 Purpose.

Subpart D establishes procedures for the submission and disposition of petitions for prescription of a rule to supersede a consumer appliance energy efficiency or energy use State regulation pursuant to section 327(b)(1) of the Energy Policy and Conservation Act (42 U.S.C. 6297(b)(1)).

§ 430.41 Definitions.

- For the purpose of this subpart—
- (1) "Day" means calendar day.
- (2) "Petition" means a petition filed pursuant to section 327(b)(1) of the Act.
- (3) "State regulation" means a law or regulation of a State or political subdivision thereof.

§ 430.42 General requirements.

(a) *Scope.* Unless otherwise noted, the provisions of this section apply to all documents required or permitted to be submitted under this subpart.

(b) *Copies.* An original, which shall be signed, and five copies of each document shall be submitted to:

Assistant Administrator,
Office of Conservation,
Attn: Appliance Program-Petition to Supersede,
Federal Energy Administration,
12th and Pennsylvania Ave., NW.,
Washington, D.C. 20461.

All submissions become part of the FEA's files and will not be returned.

(c) *Service.* All documents required to be served under this subpart shall, if mailed, be served by first class mail. Service upon a person's duly authorized representative shall constitute service upon that person.

(d) *Obligation to supply information.* A person who submits a petition is under a continuing obligation to provide any new or newly discovered information relevant to that petition. Such information includes, but is not limited to, information regarding any other petition or request for action subsequently submitted by that person.

(e) *The same or related matters.* A person who submits a petition or other request for action shall state whether, to the best knowledge of that person, the same or related issue, act, or transaction has been or presently is being considered or investigated by the FEA; by any other Federal agency, department, or instrumentality; by any Federal court; by a

State or municipal agency, department, or instrumentality; or by a State court.

(f) *Computation of time.* (1) In computing any period of time prescribed by or allowed under this subpart, the day of the act of which the designated period of time begins to run is not to be included. If the last day of the period is a Saturday, Sunday, or Federal legal holiday, the period runs until the end of the next day that is neither a Saturday, Sunday, nor Federal legal holiday.

(2) Saturdays, Sundays, and intervening Federal legal holidays shall be excluded from the computation of time when the period of time allowed or prescribed is 7 days or less.

(3) When a submission is required to be made within a prescribed time, the FEA may grant an extension of time upon good cause shown.

(4) Documents received after regular business hours are deemed to have been submitted on the next regular business day. Regular business hours for the FEA's National Office, Washington, D.C., are 8 a.m. to 4:30 p.m.

(5) The FEA reserves the right to refuse to accept, and not to consider, untimely submissions.

§ 430.43 Petitions.

(a) *Petition requirements.* (1) A petition shall conform to the General Requirements of § 430.42 of this subpart and, in addition, shall (i) state the name and address of the petitioner, (ii) contain a brief description of the interest of the petitioner, (iii) designate a person to be contacted by the FEA regarding disposition of the petition, (iv) include a copy of each State regulation for which a rule to supersede is sought, (v) identify each product covered by the State regulation for which a rule to supersede is sought, (vi) contain a summary of the position of the petitioner, and (vii) state whether the petitioner seeks a rule prescribing a State regulation in whole or in part and, if in part, which part or parts.

(2) The petitioner shall serve a copy of the petition, all supporting documents, and all future submissions on each State agency, department, or instrumentality whose regulation the petitioner seeks to supersede. The petition shall contain a certification of this service which states the name and mailing address of the served parties, and the date of service.

(3) A petition may be submitted on behalf of more than one person. A joint petition shall indicate each person participating in the submission. A joint petition shall provide the information required by subparagraph (a)(1) of this section 430.43 for each person on whose behalf the petition is submitted.

(4) All petitions shall be signed by the person submitting the petition or by a duly authorized representative. If submitted by a duly authorized representative, a petition shall certify this authorization.

(b) *Acceptance for filing.* (1) Within fifteen (15) days of the receipt of a petition by the FEA, the FEA will either accept it for filing or reject it, and the

petitioner will be so notified in writing. FEA will serve a copy of this notification on the affected State agency, department, or instrumentality. Only such petitions which conform to the requirements of this subpart and which contain sufficient information for the purposes of a substantive decision will be accepted for filing. Petitions which do not so conform will be rejected and an explanation provided to petitioner in writing.

(2) For purposes of the Act and this subpart, a petition is deemed to be filed on the date it is accepted for filing.

(c) *Docket.* A petition accepted for filing will be assigned an appropriate docket designation. Petitioner shall use the docket designation in all subsequent submissions.

(d) *Specific information requirements.* The petition shall provide information sufficient to demonstrate to the satisfaction of the Administrator that—

(1) The petitioner is a person subject to the State regulation sought to be superseded (or is the duly authorized representative of that person);

(2) Each product for which a rule to supersede is sought is a covered product under the Act;

(3) There is no significant State or local interest sufficient to justify the State regulation; and

(4) Such State regulation unduly burdens interstate commerce.

(e) *Informational guidelines.* The following information is considered particularly relevant to the demonstration required by paragraph (d) of this section:

(1) In demonstrating that the State regulation unduly burdens interstate commerce, an analysis of the effect of complying with the State regulation on

- (i) Labor and capital costs;
- (ii) Material costs;
- (iii) Transportation costs;
- (iv) Distribution, inventory, and other associated costs;
- (v) Economies of scale;

(vi) The relationship of the investment capital necessary to comply with the State regulations to the size of a typical manufacturer of the product to which the State regulation applies and an estimate of the number of manufacturers which cannot meet the investment requirements; and

(vii) Retail price, sales volume, and employment.

(2) In demonstrating that there is no significant State or local interest sufficient to justify the State regulation—

(i) An estimate of the number of appliances meeting the State regulation which would be purchased in the State over a period of 10 years;

(ii) An estimate of the aggregate amount of energy saved by implementation of the State regulation over a period of 10 years;

(iii) A comparison of the present value of the energy saved by appliances meeting the State regulation and the increase in the retail cost of such appliances;

(iv) An estimate of the number of years of operation necessary to recoup

the estimated increase in the cost of appliances;

(v) An evaluation of the environmental, health, safety, and economic interests of the State in its regulations; and

(vi) An explanation of why the State interest in the regulations is not sufficient to justify the burden imposed by the regulations on interstate commerce.

(3) Any of analysis of the effect of the State regulations shall include a discussion of the bases of the analysis.

(4) *Environmental report.* Each petition shall contain a report containing petitioner's assessment of the environmental consequences both of denial of the petition and of publication of a rule superseding the State regulation. This environmental report shall be guided by the requirements of § 208.7 of FEA's Regulations, as applicable, 10 CFR 208.7.

§ 430.44 Disposition of petitions.

(a) *Initial public comment period.* (1) The FEA will publish a notice in the FEDERAL REGISTER of the submission and acceptance for filing of a petition. The notice will include a summary of the State regulation at issue and the petitioner's objection to the regulation. The notice will provide instructions on how copies of the petition may be obtained and will invite on how copies of the petition may be obtained and will invite public comments by all interested persons.

(2) A reasonable time after the close of the initial public comment period, the FEA will either deny the petition or propose a rule to supersede the State regulation. If, on the basis of the petition, and in light of all information submitted as comments to the petition, the Administrator determines that petitioner is likely to prevail on the merits of the petition, a proposed rule to supersede the State regulations will be issued. Otherwise, the petition will be denied. Written notice of the decision and the reasons therefore will be served on the petitioner, the affected State agency, department, or instrumentality, and all persons who submitted comments, and will be published in the FEDERAL REGISTER.

(b) *Reconsideration of the denial of a petition.* (1) If the petition is denied, any interested person may, within twenty (20) days from the date of issuance of the decision, submit an application for reconsideration to the Assistant Administrator, Office of Conservation. An application is deemed accepted when received by the FEA. The applicant shall serve a copy of the application on all persons who submitted comments on the petition. The FEA will publish a notice of submission of an application in the FEDERAL REGISTER. The applicant shall clearly and concisely state the basis for the application and the relief sought.

(2) The denial of a petition will be reconsidered only where it is alleged and demonstrated that the denial was based on an error in law or fact and that the evidence of the error is in the record of the proceedings on the petition. Argument that new information is available

which would reverse the denial of the petition may be considered if the petition is resubmitted but will not support reconsideration of the denied petition.

(3) The FEA will either deny the application for reconsideration or propose a rule to supersede the State regulation. Written notice of the decision and the reasons therefore will be served on the applicant, the affected State agency, the petitioner (if petitioner is not the applicant), and all persons who submitted comments in the initial public comment period, and will be published in the FEDERAL REGISTER.

(4) The denial of an application for reconsideration is a final decision and action for all purposes under section 327(b)(1), including judicial review. There is no other administrative appeal or review under this subpart.

(c) *Proposed rulemaking.* (1) The FEDERAL REGISTER notice of a proposed rulemaking for prescription of a rule to supersede a State regulation will invite written comments on the proposed rule from all interested persons, and will provide for a public hearing. This rulemaking will be conducted pursuant to 5 U.S.C. 553 and section 7(i) of the Federal Energy Administration Act of 1974, 15 U.S.C. § 767(i).

(2) A reasonable time after the close of the public hearing held pursuant to a notice of proposed rulemaking but no later than six months after acceptance for filing, the FEA will either deny the petition and withdraw the proposed rule, or prescribe a final rule which supersedes the State regulation in whole or in part. Written notice of the decision and the reasons therefore will be published in the FEDERAL REGISTER and served on the petitioner, the affected State agency, and all persons who submitted comments in the proposed rulemaking proceeding. The decision is a final decision and action for all purposes under section 327(b)(1) of the Act, including judicial review. There is no administrative appeal or application for reconsideration.

(c) *Consolidation.* Whenever two or more petitions are filed with respect to the same State regulation, the FEA may consolidate two or more proceedings under this subpart for the purpose of resolving one or more issues whenever it appears that such consolidation will expedite or simplify consideration of such issues. Consolidation shall not affect the running of any time period with respect to any petition.

(d) *Finality of decision.* A decision to prescribe a rule superseding a State regulation is final on the day the rule is issued, that is, signed at the FEA. A decision to deny a petition is final following the initial public comment period § 430.44(a) on the day a denial of an application for reconsideration is issued, that is, signed at the FEA, and is final following a proposed rulemaking proceeding (§ 40.44(b)) on the day the denial is issued, that is, signed at the FEA.

[3128-01]

**PART 440—WEATHERIZATION
ASSISTANCE FOR LOW-INCOME PERSONS**
Final Rulemaking; Correction

AGENCY: Federal Energy Administration.

ACTION: Final rulemaking; correction.

SUMMARY: This document makes two corrections in § 440.30 of the final rulemaking regarding the program of weatherization assistance for low-income persons, which was published in the FEDERAL REGISTER (42 FR 27899) on June 1, 1977. Paragraph (e)(1) is corrected to require that the notice sent by the Regional Administrator informing a grantee of his or her intent to terminate its grant include a statement of reasons. Paragraph (h) is corrected to require that a grantee may appeal from an adverse final determination made by the Regional Administrator.

FOR FURTHER INFORMATION CONTACT:

Mary M. Bell, Director, Office of Weatherization Assistance, Room 6447, Federal Energy Administration, Washington, D.C. 20461 (202-566-3091).

SUPPLEMENTARY INFORMATION: Two changes are made to correct § 440.30. Administrative review, of the final rulemaking regarding the program of weatherization assistance for low-income persons in order to clarify the procedures for denial of a grant, application and for termination of a grant. These two changes correct § 440.30 to achieve FEA's original intent that a grantee whose grant is terminated be accorded the same right of administrative review as an applicant whose application is denied.

As published, paragraph (e)(1) required that only the notice sent by the Regional Administrator informing a State or local applicant of his or her intent to deny its application include a statement of reasons for the Regional Administrator's determination. As corrected, paragraph (e)(1) requires that the notice sent by the Regional Administrator informing a grantee of his or her intent to terminate its grant include a statement of reasons as well. As published, paragraph (h) provided that only a State or local applicant could appeal from an adverse final determination made by the Regional Administrator. As corrected, paragraph (h) provides that a grantee may appeal from an adverse final determination made by the Regional Administrator as well.

Since the references to a grantee whose grant is terminated were omitted by oversight from paragraphs (e)(1) and (h) of the final rulemaking for the weatherization program, FEA is not offering an opportunity for public comment on these technical corrections.

(Part A of Title IV of the Energy Conservation and Production Act, Pub. L. 94-385, 90 Stat. 1125 (42 U.S.C. 6326); Pub. L. 93-

275, as amended, 15 U.S.C. 761; E.O. 11790, 39 FR 23185.)

Accordingly, § 440.30, Chapter II of Title 10, Code of Federal Regulations, is corrected as set forth below.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

§ 440.30 [Amended]

1. Paragraph (e)(1) of 10 CFR 440.30 is corrected by adding the words, "or (d)", immediately following the words, "paragraph (c)".

2. Paragraph (h) of 10 CFR 440.30 is corrected by adding the words, "or grantee", immediately following the word, "applicant," and immediately before the word, "may", in the first sentence.

[FR Doc. 77-29235 Filed 10-3-77; 8:45 am]

[3128-01]

**1977 PRICE AND ALLOCATION
INTERPRETATIONS**

AGENCY: Federal Energy Administration.

ACTION: Notice of interpretations.

SUMMARY: Attached are the interpretations issued by the General Counsel and Regional Counsels of the Federal Energy Administration (FEA) during the period September 1 through September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Kathleen Williams, Federal Energy Administration, 12th and Pennsylvania Avenue NW., Room 7132, Washington, D.C. 20461 (202-566-2454).

SUPPLEMENTARY INFORMATION: FEA interpretations issued pursuant to 10 CFR Part 205, Subpart F, are published in the FEDERAL REGISTER from time to time in accordance with the editorial and classification criteria set forth in 42 FR 7923, February 8, 1977, as modified in 42 FR 46270, September 15, 1977.

FEA Interpretations depend for their authority on the accuracy of the factual statement used as a basis for the Interpretation (10 CFR 205.84(a)(2)) and may be rescinded or modified at any time (§ 205.85(d)). Only the persons to whom Interpretations are addressed and other persons upon whom Interpretations are served are entitled to rely on them (§ 205.85(c)). An Interpretation is modified by a subsequent amendment to the regulation(s) or ruling(s) interpreted thereby to the extent that the Interpretation is inconsistent with the amended regulation(s) or ruling(s) (§ 205.85(e)). In addition, Interpretations are subject to appeal. The Interpretations appended hereto are published today only for general guidance in accordance with the reasons set forth in the FEA Notice first cited above.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

FACTS

Mobil Oil Corp. ("Mobil") is a refiner-seller as that term is defined in 10 CFR 211.62 and is required to offer crude oil for sale to those refiners classified as refiner-buyers under the Federal Energy Administration (FEA) domestic crude oil allocation program (the "buy/sell program") set forth at 10 CFR 211.65. The sales obligations of refiner-sellers are computed generally with reference to their respective refining capacities as reported to the Bureau of Mines as of January 1, 1973.

Mobil's total refining capacity reported to the Bureau of Mines as of that date was 918,000 barrels per day, including a 47,000 barrel per day refinery owned by Mobil located in East Chicago, Ind. Based on this report and when considered as a portion of the total refining capacity of all refiner-sellers as of January 1, 1973, Mobil's fixed percentage share under 10 CFR 211.65(d) was calculated to be 0.089 of the total allocation obligation for each allocation quarter, subject to the other adjustments provided for by the pertinent FEA regulations applicable to the buy/sell program. In July 1974, Mobil suspended operations of its East Chicago refinery and, for the allocation quarter commencing September 1, 1974, reported a resulting reduction of 47,000 barrels per day in its operable refining capacity.

ISSUE

The issue presented for interpretation is whether a 47,000 barrel per day reduction of Mobil's refining capacity from that reported by Mobil to the Bureau of Mines on January 1, 1973, results in a decrease in Mobil's fixed percentage share as a refiner-seller under 10 CFR 211.65(d).

INTERPRETATION

For the reasons set forth below, it has been concluded that decrease in a refiner-seller's refining capacity from that reported by the refiner-seller to the Bureau of Mines on January 1, 1973, is not a basis for a reduction of that refiner-seller's fixed percentage share under 10 CFR 211.65(d)(2)(iii).

Each refiner-seller's sales obligation under the buy/sell program is determined with reference to its fixed percentage share of the total refining capacity of all refiner-sellers. 10 CFR 211.65(d)(iii) provides in relevant part that:

¹ The FEA Office of Exceptions and Appeals reached the same conclusion in *Atlantic Richfield Co.*, 3 FEA ¶ 83.177 (May 14, 1976).

A refiner-seller's fixed percentage share is its proportionate share of the total refining capacity of all refiner-sellers as reported to the Bureau of Mines on January 1, 1973, as certified by the FEA. New refining capacity or future refining capacity shall not subject a refiner-seller to any increase in its fixed percentage share. . . .

Under 10 CFR 211.65(d)(2)(iii), as stated above, a refiner-seller's fixed percentage share is its proportionate share of the total refining capacity of all refiner-sellers as reported to the Bureau of Mines on January 1, 1973. In Mobil's request, it was contended that the use of the defined term "refining capacity" incorporates, in accordance with the provisions of the definition of that term, subsequent reductions in the actual refining capacity as reported to the Bureau of Mines on January 1, 1973, into the calculation of refiner-sellers' fixed percentage shares. Refining capacity is defined in 10 CFR 211.62 as follows:

"Refining capacity" means, for each refinery, the capacity reported to the Bureau of Mines as of January 1, 1973, as certified by the FEA. Any capacity of a refinery which has ceased to be operated continuously in the normal course of business since the January 1973 report to the Bureau of Mines shall be deducted from refining capacity.²

The reference to the Bureau of Mines report on January 1, 1973, in the context of the provisions for a refiner-seller's fixed percentage share, however, indicates that refinery capacity is not used in its defined sense, but rather specifically fixes refiner-sellers' percentage shares by reference to a historical event. Without this additional reference, the provisions of the definition would have been incorporated in their entirety in 10 CFR 211.65(d)(2)(iii). Thus, the context in which the term "refining capacity" appears in 10 CFR 211.65(d)(2)(iii) renders inapplicable the provision of 10 CFR 211.62 with regard to subsequent reduction in a seller's 1972 capacity.

The clear intent behind the additional reference to the January 1, 1973, report date was to establish permanent sales obligations for refiner-sellers and not permit fluctuations in a refiner-seller's share from allocation quarter to allocation quarter as a result of increases or decreases in its refining capacity.

² Prior to the August 26, 1976, amendment to 10 CFR 211.65(d) (40 FR 39847, August 29, 1975), 10 CFR 211.65(d)(1) contained provisions identical to those of 10 CFR 211.65(d)(2)(iii) as set forth above. Revisions to the buy/sell program were adopted on August 19, 1977 (42 FR 42770, August 24, 1977), to be effective October 1, 1977. In the revised program, a refiner-seller's percentage share is defined in 10 CFR 211.65(f)(2)(ii). That section provides, in relevant part, that:

A refiner-seller's fixed percentage share is its proportionate share of the total refining capacity of all refiner-sellers as reported to the Bureau of Mines on January 1, 1973, as certified by the FEA. Changes in refining capacity shall not subject a refiner-seller to any change in its fixed percentage share over the share identified for the first allocation period.

Thus the recently adopted revisions to the buy/sell program eliminate any ambiguity in the regulations with regard to a refiner-seller's fixed percentage share and are fully consistent with this interpretation.

³ In the revised program, the definition of refining capacity will be amended to read as follows:

"Refining capacity" means, for each refinery, the capacity thereof as certified by the FEA. Any capacity of a refinery which has ceased to be operated continuously in the normal course of business shall be deducted from refining capacity.

In addition, the explicit language of the regulation consistently refers to the refiner-seller's fixed percentage share which is further indicative of the intent to establish unvarying supply obligations under the buy/sell program.

The preamble to the revision of the Mandatory Crude Oil Allocation Program (30 FR 17288, May 14, 1974) further describes the general intent in so structuring the sales obligations of refiner-sellers:

Fixed share for allocating refiners . . . A refiner-seller's allocation obligation would be basically a fixed percentage share of the total amount to be allocated to all refiner-buyers in an allocation quarter. Each refiner-seller's percentage share would be its proportional share of the reported refinery capacity of all refiner-sellers as of January 1, 1973. It is important to note that a refiner-seller's relative share of the total allocation obligation would not increase as the refiner-seller acquires additional crude oil since the percentage share is fixed by reference to an event in the past. *Id.* (Emphasis added.)

Each refiner-seller's proportionate share of the total sales obligation was fixed as of a certain date for the purpose of lending predictability to the amount of that obligation and removing any disincentives to increase supplies through imports or to develop additional refining capacity. Refiners were specifically put on notice that since their percentage share was fixed with respect to a historic date that their proportionate share of the sales obligation could not be increased.

Finally, allowing decreases in actual refining capacity to reduce a refiner-seller's sales obligation under the buy/sell program would be inconsistent with the general intent of the regulations with regard to increases in sales obligations because any decreases in one refiner-seller's obligation would result in increases in all other refiner-sellers' obligations. Although most references are to increases in obligations, it is evident that increases or decreases are interrelated and neither is contemplated within the context of the buy/sell program.

[INTERPRETATION 1977-35]

To: Oil Transit Corp.
Date: September 27, 1977.
Rule interpreted: § 210.62(a).
Code: GCW—PI—Normal business practices.

FACTS

Oil Transit Corp. ("Oil Transit"), a supplier of motor gasoline, is a wholesale purchaser-reseller under Federal Energy Administration (FEA) Mandatory Allocation Regulations and is subject to FEA price regulations applicable to resellers. On May 15, 1973, Oil Transit sold motor gasoline to its purchasers based upon credit terms which required full payment within 30 days and allowed a one percent (1%) discount for payment within 10 days. No letter of credit or other financial assurance guaranteeing payment was required by Oil Transit of its purchasers on May 15, 1973. Since May 15, 1973, Oil Transit's accounts receivable have increased substantially because of the rising prices of the motor gasoline it sells. In light of this fact, Oil Transit proposes to require all motor gasoline purchasers to obtain a letter of credit in an amount reflecting increases in the sales price over May 15, 1973, price levels as a precondition to its sales of the product.

ISSUE

Would Oil Transit violate the provisions of 10 CFR 210.62(a) precluding the imposition of more stringent credit terms if Oil Transit required its motor gasoline purchasers to submit letters of credit or similar financial assurances guaranteeing payment to

Oil Transit of any portion of the purchase price of motor gasoline since such letters of credit or other similar financial assurances were not imposed as a purchase prerequisite by Oil Transit on May 15, 1973?

INTERPRETATION

If Oil Transit required, as a prerequisite to the sale of motor gasoline to its purchasers, that such purchasers obtain letters of credit or other similar financial assurances not required by Oil Transit on May 15, 1973, Oil Transit would be imposing more stringent credit terms than those in effect on May 15, 1973, in violation of 10 CFR 210.62(a).

10 CFR 210.62(a) provides in pertinent part:

Suppliers will deal with purchasers of an allocated product according to normal business practices in effect during the base period specialized in Part 211 for that allocated product Credit terms other than those associated with seasonal credit programs are included as a part of the May 15, 1973, price charged to a class of purchaser under Part 212 of this Chapter. Nothing in this paragraph shall be construed to require suppliers to sell to purchasers who do not arrange proper credit or payments for allocated products, as customarily associated with that class of purchaser . . . on May 15, 1973 However, no supplier may require or impose more stringent credit terms . . . on purchasers than those in effect for that class of purchaser . . . on May 15, 1973

FEA has previously addressed the impact of 10 CFR 210.62(a) upon credit terms. In *Crystal Oil Co.*, 1 FEA ¶ 20.161 (October 8, 1974), the FEA Office of Exceptions and Appeals affirmed an April 9, 1974, Interpretation issued by the Regional Administrator of FEA Region VI. In that case, the FEA concluded that a supplier's requirement of letters of credit as a precondition for the sales of covered products would be a violation of 10 CFR 210.62, if that practice had not been followed on May 15, 1973. The FEA further found that the imposition by a supplier of more stringent credit terms than those in effect for the class of purchaser on May 15, 1973, is in fact an impermissible price increase.⁴

It is clear then that Oil Transit is proposing a change in a credit term in the sale of a covered product more stringent than that which was in effect on May 5, 1973. On May 15, 1973, purchasers of Oil Transit's motor gasoline were not required to incur the additional cost of obtaining (solely for Oil Transit's benefit) letters of credit or other similar financial assurances guaranteeing payment to Oil Transit of any portion of the purchase price within the payment period specified. The effect of the imposition of this more stringent credit term would be to increase the cost of the motor gasoline to Oil Transit purchasers. Restricting the applicability of such financial assurances to the amount of the increase in the sales price of the covered product between May 15, 1973, and the present does not alter this conclusion, since any such requirement by Oil Transit was wholly absent on May 15, 1973. See FEA Ruling 1974-10, Federal Energy Guidelines (CCH) ¶ 16,020.

Oil Transit has asserted that it is exposed to greater financial risks because of increases in the magnitude of the firm's accounts receivable attributable to the substantial increase in the sales prices of motor gasoline

⁴ Since the Temporary Emergency Court of Appeals' decision in *Marathon Oil Co. v. FEA*, 547 F.2d 1140 (1976) there can be no doubt concerning the authority of the FEA to regulate credit terms as an incident to FEA price regulations.

that has occurred since May 15, 1973. A similar argument was noted and rejected in *Crystal Oil Co., supra*, which established that 10 CFR 210.62(a) did not contemplate the imposition of more stringent credit terms than those in existence on May 15, 1973 "based upon a change in general economic conditions."

Of course, if Oil Transit can show that a particular purchaser exhibits a pattern of late payment of financial instability, Oil Transit may request permission from FEA to impose stricter credit terms with regard to that purchaser, although "the burden of establishing the necessity of a change in credit practice with respect to any purchaser rests with the supplier." *Crystal Oil Co., supra* at 20,266.

[INTERPRETATION 1977-36]

To: Guam Oil & Refining Co. (GORCO).
Date: September 27, 1977.
Rules interpreted: §§ 211.67(d)(2) and 212.53(a).

Code: GCW—AI—Export sales deduction.

FACTS

Guam Oil & Refining Co. (GORCO) operates a refinery located in Guam. GORCO proposes to enter into a time exchange with Firm X. Pursuant to the proposed agreement, GORCO would deliver to Firm X, f.o.b. Guam, a specified quantity of high-sulphur residual fuel oil for shipment to a destination outside the United States. In exchange for this oil, within seven months of the delivery referred to above, Firm X would deliver to GORCO, f.o.b. Guam, an approximately equal volume of high-sulphur residual fuel oil originating from a source outside the United States. If the quantities of residual fuel oil exchanged are not exactly the same, the party receiving delivery of the larger volume would compensate the other party at the rate of \$xxx per barrel. Firm X would compensate GORCO for the time exchange by payment of a monthly fee computed at the rate of xxx percent per annum multiplied by the number of barrels of residual fuel oil delivered by GORCO to Firm X, each barrel being valued at \$xxx.

ISSUE

Is this exchange of residual fuel oil by GORCO an export sale within the meaning of 10 CFR 212.53(a), which requires GORCO to deduct the volume of residual fuel oil exchanged from its crude oil runs to stills pursuant to the export sales deduction requirement under the domestic crude oil allocation program (the "entitlements program") as set forth at 10 CFR 211.67(d)(2)?

INTERPRETATION

For the reasons set forth below, it has been concluded that the volume of residual fuel oil exchanged by GORCO for export pursuant to this agreement would not be an export sale within the meaning of 10 CFR 212.53(a), and therefore the volumes exchanged are not required to be deducted from GORCO's crude oil runs to stills under 10 CFR 211.67(d)(2), provided that the volumes of residual fuel oil exchanged are equal. If the volume of residual fuel oil delivered by GORCO to Firm X exceeds the volume of residual fuel oil received in exchange by it, the difference in volume would constitute an export sale by GORCO to be deducted from its crude oil runs to stills under the entitlements program by means of a retroactive adjustment.

10 CFR 211.67(d)(2) provides, in pertinent part, that:

The volume of a refiner's crude oil runs to stills in a particular month for purposes of the calculations in paragraph (a)(1) of this section (issuance of entitlements) and the calculations for the national domestic crude

oil supply ratio shall be reduced by that refiner's volume of export sales under § 212.53 of Part 212 of this chapter in that month of refined petroleum products . . . and residual fuel oil, including sales to a domestic purchaser which certifies the product is for export

10 CFR 212.53(a) exempts "export sales" from the Federal Energy Administration's price regulations but does not define the term "export sales."

In FEA Interpretation 1977-16 (42 FR 31151, June 20, 1977), it was pointed out that export sales under 10 CFR 212.53(a) are those which produce revenues from foreign sources. The Interpretation also found that the export sales exemption was adopted to allow export sales to be made at the highest possible prices.² Thus, if GORCO and Firm X exchange the same volumes of residual fuel oil over time, no export sale will occur because GORCO will have received no sales revenue from a foreign source.

Moreover, the policy underlying the loss of entitlements for export sales under 10 CFR 211.67(d)(2), does not apply in this case. That statement of policy, set forth in the preamble to the amendments to that section issued on March 29, 1976 (41 FR 13899, April 1, 1976), notes that the entitlements program was established to equalize among all segments of the petroleum industry the benefits of access to lower priced domestic crude oil whose ceiling price is low in comparison to uncontrolled domestic or imported crude oil. Thus, the export deduction provision of the entitlements program is designed first to ensure that cost equalization benefits are not granted to the extent that a firm exports refined petroleum products or residual fuel oil and sells these products in the world market at uncontrolled prices and further to preserve the advantages of these cost benefits for domestic purchasers of petroleum products (Id. at 13902). Allowing exported refinery products to earn entitlements would, in effect, constitute a subsidy to foreign oil consumers.

Since GORCO does not propose any net export of residual fuel oil in this case, the cost equalization benefits of any and all entitlements it receives will be retained in the domestic economy. Therefore, no export sales deduction is required. However, if a net export of a small volume of such oil results from the failure of Firm X to deliver in exchange to GORCO as much residual fuel oil as GORCO delivers to Firm X, GORCO will be required to make a retroactive adjustment to its Form P-102-M-1 and reduce its crude oil runs to stills under the entitlements program by the net volume of residual fuel oil exported pursuant to the agreement.

If Firm X fails to deliver to GORCO the volume of residual fuel oil specified in the time exchange agreement and Firm X accordingly pays GORCO for that residual fuel oil, GORCO's receipt of such payment would constitute an export sale under 10 CFR 211.67(d)(2), requiring the retroactive adjustment outlined above.

[INTERPRETATION 1977-44]

To: Joseph J. C. Paine & Associates.

Date: -----
Rules interpreted: § 212.72, Ruling 1977-1.
Code: GCR (VIII)—PI—Definition of BPCL property.

FACTS

Joseph J. C. Paine & Associates ("Paine"), a crude oil producer, is a working interest owner with Chandler & Associates

² See also CLC Phase IV Price Ruling 1974-3, issued March 14, 1974 (39 FR 10152, March 18, 1974), which dealt with a regulatory provision analogous to 10 CFR 212.53(a).

("Chandler") in the section 10 sublease. The section 10 sublease is the site of an abandoned well, located in the larger 1,920 acre Kimball County, Nebr., base lease which has been producing crude oil since 1950. The base lease consists of five sections, only one of which, section 20, a stripper well property, is currently producing crude oil. The section 10 and section 20 subleases were developed separately, accounted for separately during the time both were producing crude oil, encompass separate reservoirs and are non-contiguous.

As part of its operations, Paine proposes to reactivate the section 10 sublease by drilling a new well in the place of one which was abandoned in October 1971 by a former working interest owner. No crude oil has been produced from section 10 since October 1971.

ISSUE

Does section 10 constitute a separate property pursuant to 10 CFR 212.72 and Ruling 1977-1? If so, is the crude oil produced from the well on the property subject to the upper tier ceiling price in accordance with 10 CFR 212.74(b)?

INTERPRETATION

For the reasons set forth below, it has been concluded that the section 10 sublease constitutes a separate property pursuant to section 212.72 and Ruling 1977-1 and that the crude oil produced from the sublease is subject to the upper tier ceiling price rule set forth in section 212.74(b).

The term "property" is defined in section 212.72 as: "Property" means the right to produce domestic crude oil, which arises from a lease or from a fee interest. A producer may treat as a separate property each separate and distinct producing reservoir subject to the same right to produce crude oil, provided that such reservoir is recognized by the appropriate governmental regulatory authority as a producing formation that is separate and distinct from, and not in communication with, any other producing formation.

This concept of property was further interpreted by the Federal Energy Administration in Ruling 1977-1.

In this Ruling it was stated in part: "In all cases in which it can be shown that since non-contiguous tracts were developed and produced separately, and where they have historically and consistently been accounted for as separate properties, FEA will permit them to be so regarded." (16,065 at 16,777).

This property concept is considered by FEA to be "generally synonymous with the concept of 'working interest.'" Id., at 16,176. Thus, since production of crude oil from a producing area under one lease may constitute a "working interest" separate from that of another producing area subject to a different lease, that production area is a separate property for purposes of Part 212, Subpart D. Furthermore, then a large base lease such as the Kimball County base lease, containing a number of underlying reservoirs, has been divided into several production areas which are non-contiguous or were accounted for and developed separately or even developed by different working interest owners, the separate producing areas of the base lease are separate properties for purposes of Part 212, Subpart D.

Based upon the facts presented by Paine, section 10 meets all of these criteria. The section 10 lease appears to encompass a reservoir distinct from that of the remainder of the Kimball County base lease. In addition, the section 10 lease has historically been treated as distinct from the remaining producing area on the base lease, section 20, and must accordingly be treated as separate from the section 20 lease. Therefore, section 10

must establish selling prices for crude oil based upon its status as a separate property.

The appropriate ceiling price for crude oil produced from the section 10 lease may be determined by calculating the property's base production control level. "Base production control level is defined in section 212.72 as: "Base production control level" means: (1) with respect to months ending prior to February 1, 1976:

(A) If crude oil was produced and sold from the property concerned in every month of 1972, the total number of barrels of domestic crude oil produced and sold from the property in the same month of 1972;

(B) If crude oil was not produced and sold from the property concerned in every month of 1972, the total number of barrels of crude oil produced and sold from that property in 1972, divided by 12;

(2) With respect to months commencing after January 31, 1976, except as provided in § 212.76, either:

(A) The total number of barrels of old crude oil produced and sold from the property concerned during calendar year 1975, divided by 365, multiplied by the number of days in the month in 1975 which corresponds to the month concerned;

Since no crude oil was produced from the section 10 property subsequent to October 1971, the section 10 sublease has no base production control level.

"New" crude oil is defined in section 212.72 to mean: with respect to a specific property: (1) Prior to February 1, 1976, the total number of barrels of domestic crude oil produced and sold in a specific month, less (A) the base production control level for that month, and less (B) the current cumulative deficiency;

(2) Effective February 1, 1976, the total number of barrels of domestic crude oil produced and sold in a specific month, less (A) the property's base production control level for that month and less (B) the current cumulative deficiency since February 1, 1976;

Thus, all crude oil produced from the section 10 property will, upon proven certification pursuant to section 212.131(a), be classified as new crude oil and will therefore be subject to the upper tier ceiling price rule set forth in section 212.74.

[INTERPRETATION 1977-38]

To: Damson Oil Corp.
Date: September 30, 1977.
Rule interpreted: § 212.72.
Code: GCW—PI—Definition of first sale.

FACTS

Damson Oil Corp. ("Damson") is a working interest owner and operator of the Avoca No. 3 producing well* in the Wyandotte Field in St. Mary's Parish, La. All production from this property is sold to Koch Oil Co. ("Koch"), a division of Koch Industries, Inc. Sales from the property are subject to the price regulations applicable to producers of crude oil in 10 CFR Part 212, Subpart D.

Damson measures production from the property concerned by meter prior to entry into its storage tank. Koch takes delivery of all of the production which is stored in Damson's storage tank at the tank site at regular intervals (approximately every 10 days). The property is located in the marshes of southern Louisiana and is accessible only by boat.

On January 28, 1976, Koch arranged with Damson for Koch to take delivery of crude oil on January 31, 1976. Due to fog, the barge

*For purposes of this Interpretation, the Avoca No. 3 producing well will be referred to as the "property" to which price controls apply under 10 CFR Part 212, Subpart D.

which was to pick up the crude oil was unable to arrive on January 31. A subsequent meeting was arranged for 6:30 a.m., February 1, 1976. Damson's guager was present at 6:30 a.m. to witness the delivery, but the barge operator would not commence receiving the load of crude oil until Koch's guager arrived to check the tanks and the barge. Koch's guager arrived at approximately 7 a.m., but the loading valve was not opened until 7:40 a.m. Damson states that the sale would have constituted a sale occurring in January 1976 under the terms of the contract between the parties, "[h]ad sale been completed prior to 7 a.m.," February 1, 1976.

The first stage of regulations issued under the Energy Policy and Conservation Act, Pub. L. 94-163, December 22, 1975, became effective February 1, 1976. These regulations eliminated the "released" crude oil regulatory classification, under which sales of such crude oil were permitted at uncontrolled prices. They also subjected crude oil that formerly had been sold at market price levels as "new" crude oil to an "upper tier" ceiling price set at levels somewhat below the formerly uncontrolled price. As a result of these regulatory changes effective February 1, 1976, Damson claims that it will suffer a loss in excess of \$56,000 on the sale of crude oil described above if this sale is deemed to have occurred after January 31, 1976.

ISSUE

Where crude oil is metered upon production and all such production is sold to a single purchaser, may the "first sale" under 10 CFR 212.72 be deemed to have occurred upon production even though delivery was not completed until the following month?

INTERPRETATION

Mere production of crude oil generally does not constitute a "first sale" under FEA price regulations applicable to producers of crude oil. On the facts presented to FEA in this instance, Damson may not treat the production of crude oil from the property concerned as the "first sale" of that crude oil.

Section 212.2 of 10 CFR provides that Part 212 of the FEA regulations "applies to each sale or purchase of a covered product in the United States" (emphasis added). Section 212.71 states that Subpart D of Part 212, applicable specifically to producers of crude oil, applies to "each first sale of domestic crude oil" (emphasis added), as distinct from subsequent sales of crude oil which are subject to the reseller rules in Subpart F of Part 212.

Further, § 212.72 defines "first sale" as "the first transfer for value by the producer or royalty owner." Thus, the applicability of the FEA's price regulations for producers relates to the first "sale" of crude oil.

The FEA price regulations applicable to producers sometimes refer to crude oil "produced and sold," or "production and sale" of crude oil, reflecting in part the usual concurrence or close temporal relationship between the production and initial sale of crude oil. See, e.g., the definition of "base production control level" and "current cumulative deficiency" in § 212.72. In Interpretation 1976-16, August 26, 1976, FEA followed the interpretation of "produced and sold" originally adopted by the Cost of Living Council in Phase IV Question and Answer No. 15-1, October 1, 1973. The Council stated that "[i]f crude petroleum was produced in one month, but sold in another, that amount is considered 'produced and sold' in the month of sale for purposes of determining the base production control level." Thus, even in situations in which crude oil may have been produced in one month and sold in another, the time of sale

is used for purposes of applying the FEA price regulations applicable to producers.

As indicated above, the "first sale" is defined by FEA as "the first transfer for value." It is clear from the facts that there was no transfer of physical possession of the crude oil concerned to Koch upon production in January 1976 and it is not alleged by Damson that the bare title to the crude oil passed at that time. On the contrary, the interpretation request admits that "sale" was not completed prior to 7 a.m. on February 1, 1976. In the absence of a clear showing to the contrary, FEA presumes that the first transfer for value—i.e., the first sale—occurs upon delivery, in accordance with normal business practice. FEA cannot conclude, therefore, as a matter of interpretation, that the sale in question occurred upon production.

The fact that the delay in the sale until February 1 was unintended and inadvertent, or that the crude oil was metered upon production and that all production was sold to a single purchaser, does not alter the fact that the crude oil in question was sold in February 1976. The economic consequences resulting to Damson in this case because of the effectiveness of new price regulations applicable to first sales of crude oil beginning February 1, 1976, while possibly forming the basis for a request for exception from FEA price regulations applying to producers, are not relevant to an interpretation of the meaning or applicability of those regulations.

[FR Doc. 77-29241 Filed 10-3-77; 8:45 am]

[8025-01]

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 5, Amdt. 10]

PART 107—SMALL BUSINESS INVESTMENT COMPANIES

Limited Partnership Small Business Investment Companies

AGENCY: Small Business Administration.

ACTION: Final rule.

SUMMARY: This rule adopts regulations, published in proposed form on October 29, 1976 (41 FR 47502), authorizing small business investment companies (SBICs) to be organized as limited partnerships. The Small Business Investment Act (SBI Act) was amended on June 4, 1976 to permit unincorporated SBICs to be licensed by SBA (Pub. L. 94-305, sec. 106, 90 Stat. 663 et seq.). On June 25, 1976, technical amendments were incorporated into the SBIC Regulation accommodating existing regulatory provisions to limited partnerships (13 CFR Part 107, Rev. 5, Amdt. 5, 41 FR 26201). The present implementing policy regulations enable the limited partnership SBIC program to become operative.

EFFECTIVE DATE: The amendments will become effective on November 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Peter F. McNeish, Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416, (202-653-6584).

SUPPLEMENTARY INFORMATION: A substantial number of comments were received following publication of the Notice of Proposed Rulemaking on October 29, 1976. Major subjects covered were: (1) restrictions on use of funds by, and outside activities of, the corporate general partner (CGP); (2) the CGP's liability for leverage indebtedness to SBA; (3) limitation to a sole CGP as distinguished from multiple general partners (including individuals); (4) aggregation of CGP's separate corporate capital with SBIC's partnership capital for leverage purposes; (5) prohibition against removal of CGP by limited partners without SBA's prior approval; and (6) conversion of limited partnership SBIC to corporate form without SBA prior approval.

(1) *Restrictions on Use of Funds and Outside Activities of CGP.* Section 107.4(b) requires the limited partnership SBIC to have a sole corporate general partner, "organized under State law solely for service as such, which shall not serve in such capacity for any other Licensee." Under § 107.4(d), the CGP's corporate capital not invested in the partnership Licensee "shall be invested only as permitted by the last sentence of section 308(b) of the [SBI] Act [U.S. Government and Government-guaranteed obligations, pursuant to § 107.808] and § 107.1004(c) [joint Financing of small concerns with the Licensee]." The limited partnership SBIC organized under applicable State law, is licensed by SBA under Section 301 of the SBI Act and is eligible to receive from SBA leverage funds in an amount up to four times its private capital, but not to exceed \$35 million. Pursuant to the SBI Act, limited partnership as well as corporate SBICs are subject to SBA examination, reporting, conflicts of interest, disciplinary, and other enforcement and administrative requirements under the statute, and regulations thereunder.

The CGP will be vested with sole management powers over the affairs of the limited partnership SBIC; it will represent for all practical purposes the SBIC in actual operation. Accordingly, consistent with its management authority and fiduciary relationship, obligations, and accountability under the Uniform Limited Partnership Act, SBA considers it administratively necessary to the practicable administration of the SBIC program, to subject the CGP to the same examination, reporting, self-dealing, administrative, enforcement, and other requirements applicable to the Licensees themselves. It would impose a virtually impossible administrative burden on SBA to examine and regulate, from SBA's standpoint as creditor and supervisory authority, the CGP's Licensee-related activities as distinguished from its outside business interests and operations assertedly separate from, and unrelated to, the Licensee.

(2) *Corporate General Partner's (CGPs) Liability for Leverage Indebtedness to SBA.* The comments assert that partnership SBIC debentures issued

to SBA evidencing leverage pursuant to Section 303(b) of the SBI Act, should be non-recourse loans, recovery of which is limited to SBIC assets, without recourse (in case of deficiency) against the CGP's separate corporate assets. In effect, the claim is that SBA should relinquish its creditor's rights pursuant to Section 9(1) of the Uniform Limited Partnership Act, which renders a general partner in a limited partnership liable for partnership debts and obligations. It is asserted that subjection of the CGP to such liability, will discourage the formation of partnership SBICs and substantially impede implementation of the limited partnership SBIC program contemplated by Congress.

As explained in the preamble to the Notice of Proposed Rulemaking (41 FR 47502), SBA is considering its legal authority as well as the administrative desirability of not looking to the CGP's separate assets. Accordingly, SBA invited written comments to be submitted on the merits of this question. The matter is still under active consideration; a formal submission has been made by SBA to the Comptroller General for his decision concerning SBA's legal authority to make such non-recourse loans. His decision is now being awaited before SBA's final determination.

(3) *Limitation to Sole CGP as Distinguished from Multiple General Partners (including individuals).* The comments assert that the limitation to a sole corporate general partner, excluding multiple corporate general partners as well as individuals, is unduly restrictive and prevents the entrance into the SBIC program of financially stable, well-managed corporations with added resources and management expertise. It is also asserted that multiple general partners will assure continuity of operation, without termination of the partnership in the event of removal or dissolution of the sole CGP.

The matter of permitting limited partnership SBICs to have multiple general partners, with one vested with active management authority, is under current review. After full consideration, SBA will make its final determination of this issue.

(4) *Aggregation of CGP's Separate Corporate Capital with SBIC's Partnership Capital for Leverage Purposes.* Some of the comments submitted assert that since the CGP's separate assets will be dedicated to the SBIC program under § 107.4(d), its corporate capital should be aggregated with the SBIC's capital for leverage purposes. There is no present explicit legal basis in the June 4, 1976 legislation or its legislative history, for the extension of leverage in the manner suggested. Nevertheless, SBA is now considering the advisability of submitting to the Comptroller General for decision, the question of SBA's statutory authority to leverage the corporate capital of the CGP (after receipt from the Internal Revenue Service of its advice concerning possible tax consequences to the partnership and its investors of such leverage).

(5) *Prohibition Against Removal of CGP by Limited Partners Without SBA's Prior Approval.* Section 107.4(b) prohibits the removal or replacement of the CGP by action of the limited partners, without SBA's prior written approval. The point is made in the comments that the limited partners should have power of removal, free of SBA control, in order to assure continuity of operation if it becomes necessary to replace the CGP. SBA, however, deems it essential to its responsibility as creditor and supervisory authority to retain an effective administrative hold over the CGP as fiduciary-manager of the partnership SBIC. If circumstances warrant removal or replacement, SBA approval will be forthcoming; its consent will not be unreasonably withheld. The CGP's removal and replacement do not merely involve matters of concern to the general and limited partners, but also SBA's vital interests in the context of leverage extended, and SBIC management in conformity with the SBI Act and regulations thereunder. An exit-examination of the CGP's affairs, for example, may be appropriate before terminating its existing relationship to the SBIC.

(6) *Conversion of Limited Partnership SBIC to Corporate Form Without SBA Prior Approval.* Under § 107.903 of the SBIC Regulation, merger, consolidation or reorganization of a Licensee requires prior SBA approval. This provision applies to both corporate Licensees and limited partnership SBICs. The contention that a partnership SBIC should be allowed to convert freely to the corporate form, without the necessity of SBA approval, is based on the unwarranted assumption that its consent may be unreasonably withheld. In any event, to permit partnership SBICs to convert, without SBA review and approval, would unfairly discriminate against corporate Licensees desiring to reorganize into the partnership form, with SBA consent.

Section 107.805, which restricts eligible consideration for the issuance of SBIC securities to cash, U.S. Government obligations, and certain types of non-cash property and services, was not made explicitly applicable to the CGP's corporate capital under the technical amendments to the SBIC Regulation adopted on June 25, 1976 (41 FR 26201). It is not now necessary to do so in view of the fact that § 107.4(d) of the present amendments requires such corporate capital to be invested as Idle Funds (U.S. Government obligations) or in joint financing of small concerns with the partnership SBIC, pursuant to §§ 107.808 and 107.1004(c). Accordingly, its corporate capital must consist of funds available for such investment.

Certain miscellaneous minor corrections are made in §§ 107.103, 107.701(b) (2), 107.702, 107.1102 (a) and (b) (1) (iii), and 107.1105(a). They were listed in the October 29, 1976 Notice and no objections or other comments were submitted concerning them.

Pursuant to the authority contained in section 308 of the Small Business Investment Act of 1958, 15 U.S.C. 661, et seq., Part 107 is amended as follows:

1. Section 107.3 Definition of terms is amended as follows:

(1) The definition of "Associate of a Licensee" is amended by amending paragraph (b);

(2) The definition of "Licensee" is amended; and

(3) Section 107.3 Definition of terms is further amended by inserting at the appropriate alphabetical places the definitions of "Corporate Licensee" and "Unincorporated Licensee."

§ 107.3 Definition of terms.

"Associate of a Licensee" . . .

(b) Any Person owning or Controlling, directly or indirectly ten or more percent of any class of stock of such Corporate Licensee, or ten or more percent of the partnership capital of such Unincorporated Licensee.

"Corporate Licensee" see "Licensee."

"Licensee." "Licensee" means either a corporation ("Corporate Licensee"), or a limited partnership organized pursuant to § 107.4 ("Unincorporated Licensee"), to which a license has been granted pursuant to the Act. For sections deeming "Licensee" to include the corporate general partner of an Unincorporated Licensee, see § 107.4(c).

"Unincorporated Licensee" see "Licensee."

2. A new § 107.4 is added reading as follows:

§ 107.4 Limited Partnership SBIC.

(a) *General.* A limited partnership organized under State law solely for the purpose of performing the functions and conducting the activities contemplated under the Act may apply for a license pursuant to section 301(c) of the Act.

(b) *Application.* Such application shall include the Articles, providing for a sole corporate general partner organized under State law solely for service as such, which shall not serve in such capacity for any other Licensee, and which may not be removed or replaced by action of the limited partners without prior written approval of SBA.

(c) *Obligations of the corporate general partner.* Such general partner shall be subject to the same examination and reporting requirements as a Corporate Licensee under section 310(b), the disciplinary provisions of sections 313 and 314, and its officers, directors and shareholders shall be bound by the conflict of interest rules under section 312 of the Act. Moreover, the events of default specified in § 107.203(b) (1) (ii) and (iii) and (b) (2), relating to contractual and regulatory violations and to insolvency and bankruptcy, and § 107.203(b) (3) (iii) and (4), relating to salaries and to the employment of former SBA personnel, shall apply to the corporate general partner and be deemed to have been agreed to by the Unincorporated Licensee, "Licensee" in (1) the definition of "Associate of a Licensee" in § 107.3, and (2)

§§ 107.701, 107.702, 107.703, 107.801, 107.802, 107.803, 107.806, 107.809, 107.901, 107.902, 107.903, 107.1005, 107.1101, 107.1102, 107.1105, 107.1203 and 107.1301 shall be deemed to include the corporate general partner of an Unincorporated Licensee.

(d) *Capital of corporate general partner.* The corporate capital of such general partner which is not invested in the Unincorporated Licensee shall be invested only as permitted by the last sentence of section 308(b) of the Act, pursuant to §§ 107.808 and 107.1004(c), or any of them.

(e) *Reorganization of Corporate Licensee.* A Corporate Licensee wishing to reorganize as an Unincorporated Licensee, or an Unincorporated Licensee wishing to reorganize as a Corporate Licensee, may apply to SBA for approval pursuant to § 107.903 of these Regulations.

3. Miscellaneous minor amendments are as follows:

(1) Section 107.103 Public notice is amended to read as follows:

§ 107.103 Public notice.

SBA shall publish notice of the license application in the FEDERAL REGISTER. It shall include such appropriate information as the name and location of the proposed Corporate Licensee, its areas of operation, the names and addresses of its officers, directors, and owners of ten or more percent of its voting stock; and, in the case of an Unincorporated Licensee, its name, location and areas of operation and the names and addresses of the officers, directors and owners of ten or more percent of any class of stock of the corporate general partner, the corporate general partner's name and address, and each partner owning ten percent or more of the Unincorporated Licensee's Private Capital, and shall provide an opportunity for the submission of written comments. The proposed Licensee shall publish a similar notice in a newspaper of general circulation in the city or proposed areas of operation, and a certified copy shall be furnished to SBA within ten days.

§ 107.701 [Amended]

(2) Section 107.701(b) (2) is amended by inserting the word "or" after the semicolon at the end thereof.

§ 107.702 [Amended]

(3) Section 107.702 Common Control is amended by replacing the upper-case "P" with a lower-case "p" in the word "partner" appearing in the lead-in paragraph and paragraph (a) thereof.

§ 107.1102 [Amended]

(4) Section 107.1102(a) is amended by inserting a comma after the words "Unincorporated Licensee."

§§ 107.1102 and 107.1105 [Amended]

(5) Section 107.1102(b) (1) (iii) Preservation of records and § 107.1105(a) Changes to be reported are amended by replacing the lower-case "a" with an upper-case "A" in the word "Articles."

Title 16—Commercial Practices

CHAPTER II—CONSUMER PRODUCT SAFETY COMMISSION

PART 1505—REQUIREMENTS FOR ELECTRICALLY OPERATED TOYS OR OTHER ELECTRICALLY OPERATED ARTICLES INTENDED FOR USE BY CHILDREN

Electrically Operated Toys (Labeling); Interpretation

AGENCY: Consumer Product Safety Commission.

ACTION: Interpretation of regulation.

SUMMARY: The Commission publishes a Letter of Advice, approved by the Commissioners, from the Associated Executive Director for Compliance and Enforcement, concerning lettering height requirements for marking on electrically operated toys and accompanying instruction sheets and outer packaging. The Letter of Advice, issued September 26, 1977, responds to a petition from Hasbro Industries, Inc., requesting clarification of the lettering requirements. The Commission is publishing the Letter of Advice to inform all interested persons of its interpretation of the regulation.

FOR FURTHER INFORMATION CONTACT:

Dale Miller, Director, Regulatory Management, Directorate for Compliance and Enforcement, Consumer Product Safety Commission, Washington, D.C. 20207; (301-492-6617).

SUPPLEMENTARY INFORMATION: On September 19, 1974, Hasbro Industries, Inc., petitioned the Commission (HP 75-8) to amend the lettering height provisions of the regulation entitled "Requirements for Electrically Operated Toys or Other Electrically Operated Articles Intended for Use by Children" (16 CFR Part 1505). Specifically, the petitioner sought amendment of the lettering height requirement in 16 CFR 1505.3(d) (2) which pertains to all markings on electrically operated toys and accompanying instruction sheets and outer packaging required by 16 CFR 1505.3(b).

The petitioner stated that the minimum lettering height provision is unclear because it does not specify whether the upper or lower case letter is to be used as the guide in measuring the minimum lettering height. The petitioner suggested that 16 CFR 1505.3(d) (2) be amended to state:

Minimum lettering height, as delineated by the height of the riser in the lower case alphabet, shall be as follows: . . .

Title 19—Customs Duties

[T.D. 77-241]

CHAPTER I—UNITED STATES CUSTOMS SERVICE

VESSELS IN FOREIGN AND DOMESTIC TRADES; TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT; CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE; ENTRY OF MERCHANDISE; PERSONAL DECLARATIONS AND EXEMPTIONS

AGENCY: United States Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This rule revises the Customs Regulations setting forth the general provisions relating to the operation of the United States Customs Service. This revision, which is part of the general revision of the Customs Regulations, follows a new format and contains changes or additions to language to clarify the former provisions.

EFFECTIVE DATE: November 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard M. Belanger, Attorney, Regulations and Legal Publications Division, United States Customs Service, 1301 Constitution Ave., NW., Washington, D.C. 20229, (202-566-8237).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 13, 1976, a notice of proposed rulemaking which would revise the Customs Regulations setting forth general provisions relating to the operation of the Customs Service was published in the *Federal Register* (41 FR 34261). The revision is part of the general revision of the Customs Regulations, and replaces Part 1 with a new Part 101. Part 101 follows a new format, and contains changes or additions to language to clarify the former provisions. No substantive changes were proposed. Interested parties were given until October 12, 1976, to submit data, views, or arguments in regard to the proposal.

DISCUSSION OF COMMENTS

The Customs Service received comments which pointed out several clerical or typographical errors. These have been corrected. Other comments involved substantive changes to the Customs Regulations and, consequently, were beyond the scope of this revision. These comments will be considered separately at a later time as possible amendments to new Part 101.

After review of the proposed revision, the following changes have been made:

1. The table in section 101.4 is updated to include the following changes in Customs regions, districts, and ports: Orlando, Fla., Battle Creek, Mich., and Grand Rapids, Mich., have been designated ports of entry; the port limits of Charleston, S.C., Mobile, Ala., Progreso, Tex., Dayton, Ohio, and Erie, Pa., have been extended; Richmond County N.J., has been transferred from Region III to

Region II; and the district of St. Albans, Vt., has been reorganized.

2. The table in § 101.4 is updated to reflect the transfer of supervision over the Customs station at Los Ebanos, Tex., from Hidalgo to Rio Grande City, and the reorganization of the St. Albans, Vt., district.

3. Sections 101.6 (Assignment of Customs regions to regional directors, internal affairs), 101.7 (Office of Investigations), and 101.8 (Customs laboratories) of the proposed revision are deleted. The matter formerly contained in these sections will be published annually in a notice in the *Federal Register* in accordance with 5 U.S.C. 552(a) (1).

4. Section 101.0, relating to the scope of this part of the Customs Regulations, is changed to eliminate references to the subject matter of the deleted sections referred to in the previous paragraph.

5. Sections 101.9, 101.10, and 101.11 of the proposed revision are respectively redesignated §§ 101.6, 101.7, and 101.8. The index and Appendix I to Part 101 are changed to reflect these deletions and redesignations. Appendix I is further changed by adding a parallel reference table listing in order the old section numbers and their corresponding new section numbers.

In addition to the above changes, a number of editorial corrections have been made to the text of the provisions originally proposed. Further, conforming changes have been made to other sections of the Customs Regulations necessitated by this revision.

Accordingly, Part 1 is deleted, conforming changes are made to Parts 4, 18, and 24, and new Part 101 is adopted, as set forth below.

DRAFTING INFORMATION

The primary author of this revision was Richard M. Belanger, Attorney, Regulations and Legal Publications Division, Office of Regulations and Rulings, United States Customs Service (202-566-8237). However, personnel from other offices of the United States Customs Service participated in the development of the revision, both in matters of substance and style.

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: September 22, 1977.

BETTE B. ANDERSON,
Under Secretary of the Treasury.

PART 1—GENERAL PROVISIONS

Chapter I of Title 19, Code of Federal Regulations, is amended by deleting Part 1.

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

§ 4.6 [Amended]

Section 4.6(b) is amended by substituting "101.1(b)" for "1.1".

§ 4.81 [Amended]

Section 4.81(g) (6) is amended by substituting "101.4 (a) and (b)" for "1.3 (b) and (c)".

§ 4.96 [Amended]

Sections 4.96 (d) and (e) are amended by substituting "101.4" for "1.2(b)" wherever it appears therein.

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 18—TRANSPORTATION IN BOND AND MERCHANDISE IN TRANSIT

§ 18.13 [Amended]

Section 18.13(a) is amended by substituting "101.4" for "1.2".

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

§ 24.17 [Amended]

Section 24.17(a) (4) is amended by substituting "101.4" for "1.2" and "101.4 (b)" for "1.2(c)".

(R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 101—GENERAL PROVISIONS

Chapter I of Title 19, Code of Federal Regulations, is amended by adding a new Part 101 to read as follows:

- Sec.
- 101.0 Scope.
 - 101.1 Definitions.
 - 101.2 Authority of Customs officers.
 - 101.3 Customs regions, districts and ports.
 - 101.4 Entry and clearance of vessels at Customs stations.
 - 101.5 Customs preclearance offices in foreign countries.
 - 101.6 Hours of business.
 - 101.7 Customs seal.
 - 101.8 Identification cards.

AUTHORITY: R.S. 251, as amended, sec. 624, 46 Stat. 759, 774 Stat. 14, 79 Stat. 1317; 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnote 11), 1624, Reorganization Plan 1 of 1965; 3 CFR 1965 Supp. Additional authority and statutes interpreted or applied are cited in the text or following the section affected.

§ 101.0 Scope.

This part sets forth general regulations governing the authority of Customs officers, and the location of Customs regions, districts, and ports of entry, and of Customs stations. It further sets forth regulations concerning the entry and clearance of vessels at Customs stations and a listing of Customs preclearance offices in foreign countries. In addition, this part contains provisions concerning the hours of business of Customs offices, the Customs seal, and the identification cards issued to Customs officers and employees.

§ 101.1 Definitions.

As used in this chapter, the following terms shall have the meanings indicated unless either the context in which they are used requires a different meaning or a different definition is prescribed for a particular part or portion thereof:

(a) *Area*. "Area" refers to any of the three administrative areas created in the Customs district of New York City, New

York, which is coextensive with Customs Region II, New York City, New York, and identified as Kennedy Airport Area, Newark Area, and New York Seaport Area, each of which is under the jurisdiction of an area director of Customs.

(b) *Customs district*. A "Customs district" is the geographical area under the jurisdiction of a district director of Customs.

(c) *Customs region*. A "Customs region" is the geographical area under the jurisdiction of a regional commissioner of Customs.

(d) *Customs station*. A "Customs station" is any place, other than a port of entry, at which Customs officers or employees are stationed, under the authority contained in article IX of the President's Message of March 3, 1913 (T.D. 33249), to enter and clear vessels, accept entries of merchandise, collect duties, and enforce the various provisions of the Customs and navigation laws of the United States.

(e) *Customs territory of the United States*. "Customs territory of the United States" includes only the States, the District of Columbia, and Puerto Rico.

(f) *Date of entry*. The "date of entry" or "time of entry" of imported merchandise shall be the effective time of entry of such merchandise, as defined in § 141.68 of this chapter.

(g) *Date of exportation*. "Date of exportation" or "time of exportation" shall be as defined in § 152.1(c) of this chapter.

(h) *Date of importation*. "Date of importation" means, in the case of merchandise imported otherwise than by vessel, the date on which the merchandise arrives within the Customs territory of the United States. In the case of merchandise imported by vessel, "date of importation" means the date on which the vessel arrives within the limits of a port in the United States with intent then and there to unload such merchandise.

(i) *Duties*. "Duties" means Customs duties and any internal revenue taxes which attach upon importation.

(j) *Entry or withdrawal for consumption*. "Entry or withdrawal for consumption" means entry for consumption or withdrawal from warehouse for consumption.

(k) *Importer*. "Importer" means the person primarily liable for the payment of any duties on the merchandise, or an authorized agent acting on his behalf. The importer may be:

- (1) The consignee, or
- (2) The importer of record, or
- (3) The actual owner of the merchandise, if an actual owner's declaration and superseding bond has been filed in accordance with § 141.20 of this chapter, or
- (4) The transferee of the merchandise, if the right to withdraw merchandise in a bonded warehouse has been transferred in accordance with subpart C of Part 144 of this chapter.

(l) *Port and port of entry*. The terms "port" and "port of entry" refer to any place designated by Executive order of the President, by order of the Secretary of the Treasury, or by Act of Congress, at which a Customs officer is authorized to accept entries of merchandise to collect duties, and to enforce the various

provisions of the Customs and navigation laws. The terms "port" and "port of entry" incorporate the geographical area under the jurisdiction of a port director when such port is one other than a district headquarters port. (The Customs District of the Virgin Islands, although under the jurisdiction of the Secretary of the Treasury, has its own Customs laws (48 U.S.C. 1406(i)). This district, therefore, is outside the Customs territory of the United States and the ports thereof are not "ports of entry" within the meaning of these regulations.)

(m) *Principal field officer*. A "Principal field officer" is an officer in the field service whose immediate supervisor is located at Customs Service Headquarters.

§ 101.2 Authority of Customs officers.

(a) *Supremacy of delegated authority*. Action taken by any person pursuant to authority delegated to him by the Secretary of the Treasury, whether directly or by subdelegation, shall be valid despite the existence of any statute or regulation, including any provision of this chapter, which provides that such action shall be taken by some other person. Any person acting under such delegated authority shall be deemed to have complied with any statute or regulation which provides or indicates that it shall be the duty of some other person to perform such action.

(b) *Consolidation of functions*. Any reorganization of the Customs Service or consolidation of the functions of two or more persons into one office which results in the failure of a designated customs officer to perform an action required by statute or regulation, shall not invalidate the performance of that action by any other Customs officer.

§ 101.3 Customs regions, districts and ports.

(a) *Redesignation of Customs districts and ports of entry*. The Under Secretary of the Treasury, pursuant to authority delegated by the Secretary of the Treasury, is authorized from time to time, as the needs of the Customs Service may require, to rearrange or consolidate the Customs districts, to discontinue ports of entry by abolishing them and establishing others in their place, and to change the location of the headquarters in any Customs district as the needs of the Customs Service may require.

(b) *Customs regions, districts and ports of entry listed*. The following is a list of Customs regions and districts, with a list of the ports in each district. (The Customs region of New York City, New York, is coextensive with the Customs district of New York City, New York). The first-named port in each district, listed in capital letters, is the headquarters port. Many of the ports listed were created by the President's message of March 3, 1913, concerning a reorganization of the Customs Service pursuant to the Act of August 24, 1912 (37 Stat. 434; 19 U.S.C. 1). Subsequent orders of the President or of the Secretary of the Treasury which affected these ports, or which created (or subsequently affected) additional ports, are cited following the name of the ports.

Region		Districts		
No.	Head-quarters	Name and head-quarters	Area	Ports of entry
I	Boston, Mass.	Portland, Maine.	The States of Maine and New Hampshire except the county of Coos.	Portland, Maine, including territory described in E.O. 9297, Feb. 1, 1943; 8 F.R. 1479.
				Bangor, Maine, including Brewer, Maine (E.O. 9297, Feb. 1, 1943; 8 F.R. 1479).
				Bar Harbor, Maine, including Mount Desert Island, the city of Ellsworth, and the townships of Hancock, Sullivan, Sorrento, Gouldsboro, and Winter Harbor (E.O. 4572, Jan. 27, 1927).
				Bath, Maine, including Booth Bay and Wiscasset (E.O. 4356, Dec. 15, 1925).
				Belfast, Maine, including Searsport (E.O. 6754, June 28, 1934).
				Bridgewater, Maine (E.O. 8079, Apr. 4, 1939; 4 F.R. 1475).

§ 101.4 Entry and clearance of vessels at Customs stations.

(a) *Entry at Customs station.* A vessel shall not be entered or cleared at a Customs station, or any other place that is not a port of entry, unless entry or clearance is authorized by the district director for the district in which such station or place is located pursuant to the provisions of section 447, Tariff Act of 1930, as amended (19 U.S.C. 1447).

(b) *Authorization to enter.* Authorization to enter or be cleared at a Customs station shall be granted by the district director for the district in which such station or place is located provided the district director is notified in advance of the arrival of the vessel concerned and the following conditions are met:

- (1) Such Customs supervision as may be necessary can be provided.
- (2) All applicable Customs and navigation laws and regulations are complied with.

(3) The owner, master or agent of a vessel sought to be entered at a Customs station reimburses the Government for the salary and expenses of the Customs officer or employee stationed at or sent to such Customs station or other place which is not a port of entry for services rendered in connection with the entry or clearance of such vessel, and

(4) Except as otherwise provided by these regulations, the Government is reimbursed by the interested parties for the expenses, including any per diem allowed in lieu of subsistence, but not the salary of a Customs officer or employee for services rendered in connection with the entry or delivery of merchandise.

(c) *Customs stations designated.* The Customs stations and the ports of entry having supervision thereof are listed below:

District	Customs stations	Port of entry having supervision
Portland, Maine	Bucksport, Maine	Belfast.
	Coulburn Gore, Maine	Jackman.
	Easton, Maine	Fort Fairfield.
	Forest City, Maine	Houlton.
	Hamlin, Maine	Van Buren.
St. Albans, Vt.	Knoxford Line (Mars Hill)	Bridgewater.
	Monticello, Maine	Houlton.
	Orrville, Maine	Do.
	Beebe Plaine, Vt.	Derby Line.
	Beebe Plaine, Vt.	Derby Line.
Boston, Mass.	Canaan, Vt.	Beecher Falls.
	East Richford, Vt.	Richford.
	Newport, Vt.	Derby Line, Vt.
	North Troy, Vt.	Do.
	Pittsburg, N.H.	Beecher Falls.
Ogdensburg, N.Y.	West Berkshire, Vt.	Richford.
	Provincetown, Mass.	Plymouth.
	Camions Corners, N.Y.	Moors.
	Churubusco, N.Y.	Chateaugay.
	Hogansburg, N.Y.	Massena.
Philadelphia, Pa.	Jamieson's Line, N.Y.	Trout River.
	Morristown, N.Y.	Ogdensburg.
	Waddington, N.Y.	Do.
	Atlantic City, N.J.	Philadelphia.

	Hyder, Alaska	Ketchikan.
	Tok, Alaska	Fairbanks.
Great Falls, Mont.	Wild Horse, Mont.	Great Falls.
	Willow Creek, Mont.	Do.
	Grand Forks, N. Dak.	Pembina.
	Lancaster, Minn.	Noyes.
	Oak Island, Minn.	Warroad.

District	Customs stations	Port of entry having supervision
Duluth, Minn.	Crane Lake, Minn.	International Falls/Ranier.
	Ely, Minn.	Grand Portage.
Cleveland, Ohio.	Fairport, Ohio.	Cleveland.
	Huron, Ohio.	Sandusky.
	Lorain, Ohio.	Cleveland.
	Marblehead-Lakeside, Ohio.	Sandusky.
	Put-in-Bay, Ohio.	Do.
Detroit, Mich.	Algonac, Mich.	Port Huron.
	Alpena, Mich.	Saginaw-Bay City.
	Detour, Mich.	Sault Ste. Marie.
	Escanaba, Mich.	Do.
	Grand Haven, Mich.	Muskegon.
	Houghton, Mich.	Sault Ste. Marie.
	Marine City, Mich.	Port Huron.
	Marquette, Mich.	Sault Ste. Marie.
	Roberts Landing, Mich. (mail Route 1, Algonac, Mich.).	Port Huron.
	Rogers City, Mich.	Saginaw-Bay City.

(d) *Temporary Customs stations.* Customs stations may be designated for a temporary time only, to provide Customs facilities where needed because of certain large-scale operations. Because these designations change from time to time they are not listed. However, current information as to the existence of such stations in any district may be obtained from the district director.

§ 101.5 Customs preclearance offices in foreign countries.

Listed below are the preclearance offices in foreign countries where United States Customs officers are stationed and the Customs districts under which they function:

Customs office:	Customs district having supervision
Montreal, Quebec.	St. Albans, Vt.
Toronto, Ontario.	Buffalo, N.Y.
Kindley Field, Bermuda.	Kennedy Airport area, Jamaica, N.Y.
Nassau, Bahama Islands.	Miami, Fla.
Vancouver, British Columbia.	Seattle, Wash.
Prince Rupert, British Columbia.	Anchorage, Alaska.
Winnipeg, Manitoba.	Pembina, N. Dak.

§ 101.6 Hours of business.

Except as specified in paragraphs (a)-(g) of this section, each Customs office shall be open for the transaction of general Customs business between the hours of 8:30 a.m. and 5 p.m. on all days of the year:

(a) *Saturdays, Sundays and national holidays.* In addition to Saturdays, Sundays, and any other calendar day designated as a holiday by Federal statute or Executive order, Customs offices shall be closed on the following national holidays:

- (1) The first day of January.
- (2) The third Monday of February.
- (3) The last Monday of May.
- (4) The fourth day of July.
- (5) The first Monday of September.
- (6) The second Monday of October.
- (7) The fourth Monday of October.
- (8) The fourth Thursday of November.
- (9) The twenty-fifth day of December.

If a holiday falls on Saturday, the day immediately preceding such Saturday will be observed. If a holiday falls on Sunday, the day immediately following such Sunday will be observed. (5 U.S.C. 6103(b) (1); (E.O. No. 11582, January 1, 1971; 34 FR 2957; 3 CFR Ch. 11)

(b) *Local conditions requiring different hours.* If, because of local conditions, different but equivalent hours are required to maintain adequate service, such hours shall be observed provided the Commissioner of Customs approves them and provided further that a notice of business hours is prominently displayed at the principal entrance and in each public room of the Customs office.

(c) *Fixing of hours.* At each port or station where there is no full-time Customs employee, the appropriate district director shall, with the approval of the regional commissioner of Customs, fix the hours during which the Customs office will be open for the transaction of general Customs business. Notice of such hours shall be prominently displayed at the principal entrance of the office.

(d) *State and local holidays.* Each Customs office shall be open for the transaction of business on all state and local holidays occurring on days other than Saturdays, Sundays, and national holidays listed in paragraph (a) of this section. The appropriate principal field office may excuse any employee(s) without charge to leave when a state or local holiday interferes with the performance of his work in a Customs office.

(e) *Services performed outside a Customs office.* Customs services required to be performed outside a Customs office shall be furnished between the hours of 8 a.m. and 5 p.m. (or between the corresponding hours at ports where different but equivalent hours are required for the maintenance of adequate service and are approved by the Commissioner of Customs) on all days when the Customs office is open for the transaction of general Customs business. The regional commissioner of Customs shall, from time to time, and upon reasonable advance notice to the principal local officer concerned, issue instructions for the furnishing of such services on Saturdays.

(f) *Customs services not within prescribed hours.* Where there is a regularly recurring need for Customs services outside the hours prescribed in paragraphs (a)-(e) of this section and the volume and duration of the required services are uniformly such as to require, of themselves or in immediately consecutive combination with other essential Customs activities of the port, the full time of one or more Customs employees, the necessary number of regular tours of duty to furnish such services on all days of the

year except Sundays and national holidays may be established with the approval of the Commissioner of Customs.

(g) *Customs services furnished private interests.* Other than as specified in this section, Customs services shall be furnished private interests only in accordance with the provisions of section 24.16 of this chapter.

§ 101.7 Customs seal.

(a) *Design.* According to the design furnished by the Department of the Treasury, the Customs seal of the United States shall consist of the seal of the Department of the Treasury surrounded by an outer circle in which appear the words "Treasury" at the top and "U.S. Customs Service" at the bottom.

(b) *Use of the Customs seal.* The Customs seal currently in official use, including the dies, rolls, plates, and like devices now in the possession of the Bureau of Engraving and Printing, shall continue to be equally effective as the official seal of the United States Customs Service and shall continue to be so used by each Customs officer and employee having possession of the seal until that particular device requires replacing and is replaced. Use of the United States Customs seal shall be restricted in the following manner:

(1) The Customs seal of the United States shall be impressed upon all official documents requiring the impress of a seal. It shall be impressed upon all marine documents and landing certificates, certificates of weight, gauge, or measure, and similar classes of documents for outside interests.

(2) The impress of the seal is not necessary on documents passing within the Customs Service nor shall the seal be used in the manner of a notary seal to indicate authority to administer oaths.

§ 101.8 Identification cards.

Each Customs employee shall be issued an appropriate identification card with that employee's photograph and signature, signed by the appropriate issuing officer.

PART 141—ENTRY OF MERCHANDISE

§ 141.62 [Amended]

Section 141.62(a) is amended by substituting "101.6" for "1.7". (R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 148—PERSONAL DECLARATIONS AND EXEMPTIONS

§ 148.22 [Amended]

Section 148.22 is amended by substituting "101.5" for "1.4". (R.S. 251, as amended, sec. 624, 46 Stat. 759 (19 U.S.C. 66, 1624).)

PART 22—DRAWBACK

PART 111—CUSTOMHOUSE BROKERS

Delegations of Authority

AGENCY: United States Customs Service, Treasury.

ACTION: Final rule.

SUMMARY: This rule amends the Customs Regulations by authorizing the regional commissioners of Customs to perform certain functions relating to drawback entries and reprimands of customhouse brokers now performed either by the Commissioner of Customs or other Customs officials at Headquarters of the U.S. Customs Service. The necessity of referring the relevant matters to either the Commissioner or Headquarters has unnecessarily delayed those matters. The changes are intended to facilitate the affected procedures.

EFFECTIVE DATE: October 5, 1977.

FOR FURTHER INFORMATION CONTACT:

George C. Stewart, Attorney, Carriers, Drawback and Bonds Division, United States Customs Service, 1301 Constitution Ave., NW., Washington, D.C. 20229 (202-566-5856).

SUPPLEMENTARY INFORMATION:

BACKGROUND

1. "Drawback" denotes a situation in which a duty or tax, lawfully collected, is refunded or remitted, wholly or partially, because of a particular use made of the merchandise on which the duty or tax was collected. One of the more common types of drawback is that allowed upon the exportation of articles manufactured or produced in the United States with the use of imported merchandise (section 313(a), Tariff Act of 1930 (19 U.S.C. 1313(a))). Part 22 of the Customs Regulations (19 CFR Part 22) contains the provisions regarding drawback claims.

In support of a claim for drawback of duties, a landing certificate, which is a document used to show that merchandise has been exported from the United States and landed in a foreign country, is required in certain stated circumstances as provided by section 22.17 of the Customs Regulations (19 CFR 22.17). Under paragraph (e) of that section (19 CFR 22.17(e)), when a landing certificate is required and cannot be produced, an application for its waiver may be made to Headquarters, U.S. Customs Service, accompanied by such evidence of exportation and landing abroad as may be available. The application will be granted if Headquarters is satisfied by the evidence submitted that the merchandise has been exported.

Section 22.29(d) of the Customs Regulations (19 CFR 22.29(d)) provides that, to complete a drawback entry, a bill of lading issued by the proper representative of the exporting carrier and covering the merchandise described in the

entry must be filed within 2 years after the merchandise is exported. However, paragraph (g) of that section (19 CFR 22.29(g)) provides that if the person making the drawback entry cannot produce the required bill of lading, he may submit a statement explaining why he cannot produce the bill of lading along with whatever evidence of exportation and of his right to make the drawback entry as may be obtainable. If Headquarters is satisfied from the evidence submitted that the failure to produce the bill of lading is justified, that the merchandise has been exported, and that the person making the drawback entry has the right to do so, the statement and accompanying evidence are accepted in place of the bill of lading.

A review of the procedures under §§ 22.17(e) and 22.29(g) of the Customs Regulations has resulted in the determination that it would be beneficial to the public and to Customs to authorize the regional commissioners of Customs to grant the waiver under § 22.17(e), or to accept the substituted documents under § 22.29(g). In the majority of cases, this will speed up the processing of drawback entries. If the regional commissioner is not satisfied by the evidence submitted that the pertinent facts have been established, the matter will be transmitted to Headquarters, U.S. Customs Service for final determination. It has also been determined that, for the sake of clarity and consistency, the language and format of § 22.29(g) should be amended to parallel those of § 22.17(e).

2. Section 111.78 of the Customs Regulations (19 CFR 111.78) provides that if a licensed customhouse broker fails to observe and fulfill his duties and responsibilities, but the failure is not serious enough to warrant initiation of proceedings to suspend or revoke his license, the Commissioner of Customs, or the district director of Customs with the approval of the Commissioner, may serve the broker with a written reprimand. The reprimand and the facts on which it is based may be considered in connection with any future disciplinary proceeding that may be initiated against the broker.

The Commissioner of Customs has determined that authorizing the regional commissioner of Customs to serve reprimands, or approve reprimands served by the district director, will facilitate the reprimand proceedings.

Inasmuch as these amendments are matters of agency organization, procedure, or practice, notice and public procedure thereon are unnecessary and good cause exists for dispensing with a delayed effective date under 5 U.S.C. 553.

DRAFTING INFORMATION

However, personnel from other offices of the Customs Service participated in developing the document, both on matters of substance and style.

RULES AND REGULATIONS

[4830-01]

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7511]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Industrial Development Bonds

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document provides final regulations relating to whether substantially all of the proceeds of an issue of industrial development bonds are used for designated purposes. Changes to the applicable tax law were made by the Revenue and Expenditure Control Act of 1968. These regulations provide necessary guidance to the public for compliance with the law.

DATE: In general, the regulations are effective with respect to obligations issued after April 30, 1968.

FOR FURTHER INFORMATION CONTACT:

John P. MacMaster, of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention CC:LR:T) (202-566-3516, not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

On August 20, 1975, the FEDERAL REGISTER published proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 103(c) of the Internal Revenue Code of 1954 (40 FR 36371). The amendments were proposed to revise the regulations under then section 103(c), as added by section 107(a) of the Revenue and Expenditure Control Act of 1968 (82 Stat. 266). Under section 1901(a)(17) of the Tax Reform Act of 1976 (Pub. L. 94-455, 90 Stat. 1765), section 103(c) was redesignated as section 103(b). A public hearing was held on November 21, 1975. After consideration of all comments regarding the portion of the proposed amendments revising § 1.103-8(a)(1)(i) of the Income Tax Regulations, that portion is adopted by this Treasury decision with certain changes. The other portions of the proposed amendment which revise § 1.103-8(g) of the Income Tax Regulations remain outstanding.

Additionally, certain revisions made by this Treasury decision indicate that certain rules prescribed in § 1.103-8 of the Income Tax Regulations also apply for §§ 1.103-9 and 1.103-10. These rules

are either of a clarifying nature or favorable to taxpayers. For this reason and because there is a need for immediate guidance for taxpayers, the relevant provisions of the Administrative Procedure Act (5 U.S.C. 553) requiring further notice of proposed rulemaking, opportunity for public participation, and delay in effective date are found to be inapplicable.

IN GENERAL

Interest on an industrial development bond, subject to certain exceptions, does not qualify for the exclusion from gross income under section 103(a)(1) for interest on State or local governmental obligations. Section 103(b)(4) allows an exclusion for the interest on industrial development bonds substantially all of the proceeds of which are used to provide specified exempt facilities, e.g., residential real property for family units.

This document adopts the proposed amendment (40 FR 36371) to § 1.103-8(a)(1)(i) subject to the revisions discussed below. Section 1.103-8(a)(1)(i) provides rules used in determining whether substantially all of the proceeds of an issue of obligations are used to provide an exempt facility. The amendment as proposed would revise § 1.103-8(a)(1)(i) to provide that "substantially all" of the proceeds of an issue are used to provide an exempt facility if 90 percent or more of the proceeds are so used. Further, the proposed amendment stated that certain expenditures which were deducted pursuant to section 266 of the Code would not be considered as expenditures to provide an exempt facility.

The proposed rule regarding the meaning of the phrase "substantially all" is adopted. However, this document strikes that portion of the proposed amendment concerning expenditures which are deducted pursuant to section 266 of the Code. As amended § 1.103-8(a)(1)(i) states that amounts paid or incurred to provide an exempt facility include amounts which are properly chargeable to the facility's capital account including those amounts which in fact are deducted but otherwise could have been properly charged to capital account.

Many comments questioned whether the term "substantially all" has identical meaning in sections 103(b)(5) and (6) of the Code. Therefore, this document also makes the rules in § 1.103-8(a)(1)(i) apply to §§ 1.103-9(a)(1) and 1.103-10(b)(1)(ii).

DRAFTING INFORMATION

The principal author of this regulation was John P. MacMaster of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulation, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE REGULATIONS

Accordingly, the proposed amendment to § 1.103-8(g) remains outstanding and 26 CFR Part 1 is amended as follows:

PARAGRAPH 1. Section 1.103-8 is amended by adding the following at the end of paragraph (a)(1)(i):

§ 1.103-8. Interest on bonds to finance certain exempt facilities.

(a) *In general.*—(1) *General rule.* (i) Substantially all of the proceeds of an issue of governmental obligations are used to provide an exempt facility if 90 percent or more of such proceeds are so used. For purposes of this "substantially all" test, two rules apply. First, proceeds are reduced by amounts properly allocable on a pro rata basis between providing the exempt facility and other uses of the proceeds. Second, amounts used to provide an exempt facility include amounts paid or incurred which are chargeable to the facility's capital account or would be so chargeable either with a proper election by a taxpayer (for example, under section 266) or but for a proper election by a taxpayer to deduct such amounts.

PAR. 2. Section 1.103-9 is amended by adding the following at the end of paragraph (a)(1):

§ 1.103-9. Interest on bonds to finance industrial parks.

(a) *General rule.* (1) Whether substantially all of the proceeds of an issue of governmental obligations are used to finance an industrial park is determined consistently with the rules for exempt facilities in § 1.103-8(a)(1)(i).

PAR. 3. Section 1.103-10(b)(1)(ii) is amended by revising the second sentence and adding immediately thereafter a new sentence. These sentences read as follows:

§ 1.103-10. Exemption for certain small issues of industrial development bonds.

(b) *Small issue exemption.* . . .

(1) \$1 million or less. . . .

(ii) . . . Proceeds which are loaned to a borrower for use as working capital or to finance inventory are not used in the manner described in the preceding sentence. Whether substantially all of the proceeds of an issue of governmental obligations are used in such manner is determined consistently with the rules for exempt facilities in § 1.103-8(a)(1)(i).

This Treasury decision is issued under the authority contained in section 7805

RULES AND REGULATIONS

of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

JEROME KURTZ,
Commissioner of
Internal Revenue.

Approved: September 30, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary
of the Treasury.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE
PART 16—PRODUCTION OR DISCLOSURE OF MATERIAL OR INFORMATION

Delegations of Authority

AGENCY: Department of Justice, Federal Bureau of Investigation.

ACTION: Final rule.

SUMMARY: This directive delegates the authority to deny requests under the Freedom of Information Act and the Privacy Act of 1974 to the occupant of the position of Chief, Freedom of Information/Privacy Acts Branch (FOI/PA), Records Management Division, Federal Bureau of Investigation. This delegation is also made to the Special Agent In Charge of each field office of the Federal Bureau of Investigation for records under the custody and control of that individual.

EFFECTIVE DATE: Upon signature (March 17, 1977).

FOR FURTHER INFORMATION CONTACT:

James M. Powers, Chief, Freedom of Information/Privacy Acts Branch, Records Management Division, Federal Bureau of Investigation, J. Edgar Hoover Building, Washington, D.C. 20535, (202-324-5520).

Part 16 is amended by adding the following Appendix to Subpart A:

APPENDIX—DELEGATION OF AUTHORITY

1. By virtue of the authority vested in me by Section 16.5(b) of Title 28 of the Code of Federal Regulations, the authority to deny requests under the Freedom of Information Act is delegated to the occupant of the position of Chief, Freedom of Information/Privacy Acts Branch, Records Management Division, Federal Bureau of Investigation. This same authority is delegated to the occupant of the position of Special Agent In Charge of each of the field offices of the Federal Bureau of Investigation for records in their custody and control.

2. This directive is effective March 17, 1977. Dated: September 19, 1977.

CLARENCE M. KELLEY,
Director, Federal Bureau
of Investigation.

Part 16 is amended by adding the following Appendix to Subpart D:

APPENDIX—DELEGATION OF AUTHORITY

1. By virtue of the authority vested in me by Section 16.45 of Title 28 of the Code of Federal Regulations, the authority to deny requests under the Privacy Act of 1974 is delegated to the occupant of the position of Chief, Freedom of Information/Privacy Acts Branch, Records Management Division, Federal Bureau of Investigation. This same authority is delegated to the occupant of the position of Special Agent In Charge of each of the field offices of the Federal Bureau of Investigation for records in their custody and control.

2. This directive is effective March 17, 1977.

Dated: September 19, 1977.

CLARENCE M. KELLEY,
Director, Federal Bureau
of Investigation.

Title 33—Navigation and Navigable Waters

CHAPTER II—CORPS OF ENGINEERS,
DEPARTMENT OF THE ARMY

[ER 1105-2-32]

PART 257—APPROVAL OF PHASE I
GENERAL DESIGN MEMORANDA

AGENCY: Corps of Engineers, DOD.

ACTION: Final rule.

SUMMARY: This regulation changes the approval authority for selected planning reports prepared by Corps of Engineers field offices after Congress has authorized a water resources project for construction. According to established guidelines within the Corps of Engineers, the next step after Congress authorizes a project for construction and after Congress appropriates funds for advance engineering and design, is the preparation of a Phase I General Design Memorandum. This report is the product of a study which re-evaluates the authorized project under any changed conditions or changed Federal evaluation criteria since the Corps completed its survey (feasibility) report. If Congress funds a project soon after it is authorized, this Phase I stage of advance engineering and design may be very brief. The Chief of Engineers has determined that unless certain conditions exist, the division engineers (heads of Corps regional offices) may approve the Phase I reports and file any associated Environmental Impact Statements with the Council on Environmental Quality (CEQ). In the past, the division engineer would forward these documents to the Chief of Engineers for approval and filing with CEQ. The change will expedite approval actions in those cases where there are no unresolved issues and for which full review at the Washington level had

been accomplished prior to Congress authorizing the project for construction.

EFFECTIVE DATE: October 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Dr. Robert D. Wolff, (DAEN-CWP-A), Planning Division, Directorate of Civil Works, Office, Chief of Engineers, Washington, D.C. 20314 (202-693-7187).

SUPPLEMENTARY INFORMATION: This regulation modifies those portions of 33 CFR 209.410 which designate the Corps of Engineers official responsible for filing with the Council on Environmental Quality (CEQ) Environmental Impact Statements for selected Phase I General Design Memoranda. The Office of the Chief of Engineers will be amending 33 CFR 209.410 to reflect this change. Since this regulation only relates to changes in procedure, notice of proposed rulemaking and the procedures thereto are considered unnecessary.

NOTE:—The U.S. Army Corps of Engineers has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 15, 1977.

JAMES E. ELLIS,
Colonel, Corps of Engineers,
Executive Director, Engineer Staff.

The following new Part 257, Approval of Phase I General Design Memoranda, is added to 33 CFR Chapter II:

- Sec.
257.1 Purpose.
257.2 Applicability.
257.3 References.
257.4 Delegation of Authority.
257.5 Conditions for Approval of a Phase I GDM.
257.6 Information to OCE.
257.7 Intensive Management.
257.8 Effective Date.

AUTHORITY: The provision of this Part 257 issued under R.S. 161; 5 U.S.C. 301.

§ 257.1 Purpose.

This regulation delegates authority to division engineers to approve Phase I General Design Memoranda (GDMs) and file Environmental Impact Statements (EIS) with the Council on Environmental Quality (CEQ) unless certain conditions exist.

§ 257.2 Applicability.

This regulation is applicable to all field operating agencies and all OCE elements having civil works responsibilities.

§ 257.3 References.

- Engineer Regulation No. 1105-2-10, Intensive Management.
- Engineer Regulation No. 1105-2-507, Environmental Impact Statements (33 CFR 209.410).
- Engineer Regulation No. 1110-2-1150, Post-Authorization Studies.

§ 257.4 Delegation of authority.

Division engineers, with the exception of Pacific Ocean and New England, are

delegated the authority to approve Phase I GDMs and file associated EISs with CEQ unless any of the following conditions exist:

(a) The Phase I GDM has been prepared pursuant to specific Congressional authorization which requires the Secretary of the Army to transmit the Phase I report to Congress.

(b) The plan recommended by the district engineer includes significant post-authorization changes for which Congressional authorization is required.

(c) Coordination of the Phase I GDM and EIS with States, regional offices of Federal agencies, or the public has revealed issues which cannot be resolved by the district or division engineer.

(d) The Report of the Board of Engineers, the Report of the Chief of Engineers or the transmittal letter of the Secretary of the Army raised issues which required resolution in the Phase I stage of advance engineering and design, and the resolution of these issues has not subsequently been approved by the Chief of Engineers.

(e) A preauthorization report for the project was not reviewed at the Washington level nor transmitted to Congress by the Secretary of the Army.

(f) The Phase I GDM has been combined with the Phase II GDM.

§ 257.5 Conditions for Approval of a Phase I GDM.

The division engineer shall meet all of the following conditions prior to approving a Phase I GDM:

- Checkpoint conference shall be held in accordance with ER 1105-2-10.
- If an EIS, or a supplement to a previous EIS, has been prepared, requirements of Part 209-410 of this chapter for coordination and filing with CEQ shall be met. The division engineer's approval shall not precede the end of the 30-day waiting period following FEDERAL REGISTER publication of the notice of availability of the EIS.

(c) If the Phase I GDM includes post-authorization changes for which an information summary must be submitted to Office of Management and Budget (OMB), the division engineer's approval shall not precede notification from OCE that OMB has no objection. Notification will be made by DAEN-CWP.

(d) The recommended plan of improvement shall be feasible based on applicable economic, engineering, environmental, and social evaluation criteria.

(e) Engineering investigations and resolution of design problems shall be determined by the division engineer to be compatible with the stage of project development.

§ 257.6 Information to OCE.

After final approval, the division engineer shall transmit 2 copies of the Phase I report; the EIS, if there is one; and the approving indorsement to HQDA (DAEN-CWP) WASH DC 20314, and 5 copies of the Phase I report and approving indorsement to DAEN-CWE-BB for information. Exempt report under paragraph 7-2aa, AR 335-15.

§ 257.7 Intensive Management.

The purposes of the Intensive Management Program in the Phase I stage of advance engineering and design are to assure quality in the accomplishment of the Phase I study, to assist the district engineer in decisions required to complete the Phase I GDM, and to expedite the final Phase I GDM review and approval process. The division engineer is responsible for organizing an intensive management program for each Phase I study and for assuring appropriate OCE and BERH participation, in accordance with ER 1105-2-10.

§ 257.8 Effective Date.

This regulation is effective 5 Oct 1977 as published in the FEDERAL REGISTER, and codified as 33 CFR Part 257.

Title 45—Public Welfare CHAPTER XII—ACTION

PART 1224—IMPLEMENTATION OF THE PRIVACY ACT OF 1974

Final Adoption

AGENCY: Action.

ACTION: Final adoption.

SUMMARY: ACTION published a notice in the FEDERAL REGISTER, Vol. 40, pages 39434 through 39438 on August 27, 1975 which proposed to amend Title 45 of the Code of Federal Regulations by adding a new Part 1224 to implement the provisions of the Privacy Act of 1974 (Pub. L. 93-579) (hereinafter referred to as the Act). No comments were received, but amendments were published pursuant to recommendations of an OMB task force. These were published for comment in 41 FR 19671 on May 13, 1976. No other comments were received during the notice period.

Part 1224—Implementation of the Privacy Act of 1974, is herein published as adopted with the above mentioned amendments incorporated.

EFFECTIVE DATE: October 5, 1977.

FOR FURTHER INFORMATION CONTACT:

John F. Nolan, Director, Administrative Services Division, ACTION, Washington, D.C. 20525.

Title 45, Code of Federal Regulations, is amended by establishing a new Part 1224 as follows:

- Sec.
1224.1-1 Purpose.
1224.1-2 Policy.
1224.1-3 Definitions.
1224.1-4 Disclosure of records.
1224.1-5 Annual notices.
1224.1-5a New uses of information.
1224.1-6 Reports regarding changes in systems.
1224.1-7 Use of social security account number in records system [Reserved].
1224.1-8 Rules of conduct.
1224.1-9 Records systems-management and control.

- Sec.
1224.1-10 Security of records systems—manual and automated systems.
1224.1-11 Accounting for disclosure of records.
1224.1-12 Contents of records systems.
1224.1-13 Access to records.
1224.1-14 Specific exemptions.
1224.1-15 Identification of requestors.
1224.1-16 Amendment of records and appeals with respect thereto.
1224.1-17 Denial of access and appeals with respect thereto.
1224.1-18 Fees.

AUTHORITY: Pub. L. 93-579, 5 U.S.C. 552a.

§ 1224.1-1 Purpose.

The purpose of this part is to set forth the basic policies of ACTION governing the maintenance of systems of records containing personal information as defined in the Privacy Act (5 USC 552a). Records included in this part are those described in aforesaid Act and maintained by ACTION and/or any component thereof.

§ 1224.1-2 Policy.

It is the policy of ACTION to protect, preserve and defend the right of privacy of any individual as to whom the agency maintains personal information in any system records and to provide appropriate and complete access to such records including adequate opportunity to correct any errors in said records. It is further the policy of the agency to maintain its records in such a fashion that the information contained therein is and remains material and relevant to the purposes for which it is received in order to maintain its records with fairness to the individuals who are the subject of such records.

§ 1224.1-3 Definitions.

(a) "Record" means any document or other information about an individual maintained by the agency whether collected or grouped and including but not limited to information regarding education, financial transactions, medical history, criminal or employment history, or any other personal information which contains the name or other personal identification number, symbol, etc. assigned to such individual.

(b) "System of Records" means a group of any records under the control of the agency from which information is retrieved by use of the name of an individual or by some identifying number, symbol, or other identifying particular of whatsoever kind or nature.

(c) "Routine Use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

(d) The term "agency" means ACTION and/or any component thereof.

(e) The term "individual" means any citizen of the United States or an alien lawfully admitted to permanent residence.

(f) The term "maintain" includes the maintenance, collection, use or dissemination of any record.

§ 1224.1-4 Disclosure of records.

The agency will not disclose any personal information from systems of records it maintains to any individual other than the individual to whom the record pertains, or to another agency, without the express written consent of the individual to whom the record pertains, or his agent or attorney, except in the following instances:

(a) To officers or employees of ACTION having a need for such record in the official performance of their duties.

(b) With respect to records which should follow an employee in transfer situations, to the personnel office of a different agency as a result of a transfer or a potential transfer of the individual to whom the record pertains.

(c) When required under the provisions of the Freedom of Information Act (5 U.S.C. 552).

(d) For routine uses as appropriately published in the annual notice of the FEDERAL REGISTER.

(e) To the Bureau of the Census for uses pursuant to Title 13.

(f) To an individual or agency having a proper need for such record for statistical research provided that such record is transmitted in a form which is not individually identifiable and that an appropriate written statement is obtained from the person to whom the record is transmitted stating the purpose for the request and a certification under oath that the records will be used only for statistical purposes.

(g) To the National Archives of the United States as a record of historical value under rules and regulations of the Archives as may be established by the Administrator of General Services or his designee.

(h) To an agency or instrumentality of any governmental jurisdiction within the control of the United States for civil or criminal law enforcement purposes provided however that the head of any such agency instrumentality has made a written request for such records specifying the particular portion desired and the law enforcement activity for which the record is sought. Such a record may also be disclosed by the agency to the law enforcement agency on its own initiative in situations in which criminal conduct is suspected provided that such disclosure has been established as a routine use or in situations in which the misconduct is directly related to the purpose for which the record is maintained.

(i) In emergency situations upon a showing of compelling circumstances affecting the health or safety of any individual provided that after such disclosure notification of such disclosure must be promptly sent to the last known address of the individual to whom the record pertains.

(j) To either House of Congress or to a subcommittee or committee (joint or of either house) to the extent the subject matter falls within their jurisdiction.

(k) To the comptroller general or any of his authorized representatives in the

course of the performance of his duties of that of the General Accounting Office.

(l) Pursuant to an order of a court of competent jurisdiction provided that if any such record is disclosed under such compulsory legal process and subsequently made public by the court which issued it, the agency must make a reasonable effort to notify the individual to whom the record pertains of such disclosure.

§ 1224.1-5 Annual notices.

The agency shall publish annually a notice of all systems of records maintained by it as defined herein in the format prescribed by the General Services Administration in the FEDERAL REGISTER, *Provided however*, That such publication shall not be made for those systems of records maintained by other agencies though in the temporary custody of this agency.

§ 1224.1-5a New uses of information.

At least 30 days prior to publication of information under the preceding section, the agency shall publish in the FEDERAL REGISTER a notice of its intention to establish any new routine use of any system of records maintained by it with an opportunity for public comments on such use. Such notice shall contain the following:

- The name of the system of records for which the routine use is to be established.
- The authority for the system.
- The purpose for which the record is to be maintained.
- The proposed routine use(s).
- The purpose of the routine use(s).
- The categories of recipients of such use. In the event of any request for an addition to the routine uses of the systems which the agency maintains, such request may be sent to the following officer: Director, A&F/AS, ACTION, 806 Connecticut Avenue NW., Washington, D.C. 20525.

§ 1224.1-6 Reports regarding changes in systems.

The agency shall provide to Congress, the Office of Management and Budget, and the Privacy Protection Commission advance notice of any proposal to establish or alter any system of records as defined herein. This report will be submitted in accord with guidelines to be provided by the Office of Management and Budget.

§ 1224.1-7 Use of social security account number in records systems. [Reserved]

§ 1224.1-8 Rules of conduct.

(a) The Head of the agency shall assure that all persons involved in the design, development operation or maintenance of any systems of records as defined herein are informed of all requirements necessary to protect the privacy of individuals who are the subject of such records. All employees shall be informed of all implications of the

RULES AND REGULATIONS

Act in this area including the criminal penalties provided under 5 U.S.C. 552a and the fact that agency may be subject to civil suit for failure to comply with the provisions of the Privacy Act and these regulations.

(b) The Head of the agency shall also ensure that all personnel having access to records receive adequate training in the protection of the security of personal records and that adequate and proper storage is provided for all such records with sufficient security to assure the privacy of such records.

§ 1224.1-9 Records systems—Management and control.

(a) The Director of Administrative Services (A&F) shall have overall control and supervision of the security of all records keeping systems and shall be responsible for monitoring the security standards set forth in these regulations.

(b) A designated official (System Manager) shall be named who shall have management responsibility for each record system maintained by the agency and who shall be responsible for providing protection and accountability for such records at all times and for insuring that such records are secured in appropriate containers whenever not in use or in the direct control of authorized personnel.

§ 1224.1-10 Security of records systems—Manual and automated systems.

The Head of the agency has the responsibility of maintaining adequate technical, physical, and security safeguards to prevent unauthorized disclosure or destruction of manual and automatic record systems. These security safeguards shall apply to all systems in which identifiable personal data are processed or maintained including all reports and outputs from such systems which contain identifiable personal information. Such safeguards must be sufficient to prevent negligent, accidental, or unintentional disclosure, modification or destruction of any personal records or data and must furthermore minimize the extent practicable the risk that skilled technicians or knowledgeable persons could improperly obtain access to modify or destroy such records or data and shall further insure against such casual entry by unskilled persons without official reasons for access to such records or data.

(a) *Manual systems.* (1) Records contained in records systems as defined herein may be used, held or stored only where facilities are adequate to prevent unauthorized access by persons within or without the agency.

(2) All records systems when not under the personal control of the employees authorized to use same must be stored in an appropriate metal filing cabinet. Where appropriate, such cabinet shall have three position dial-type combination lock, and/or be equipped with a steel lock bar secured by a GSA approved changeable combination padlock or in some such other securely

locked cabinet as may be approved by GSA for the storage of such records. Certain systems are not of such confidential nature that their disclosure would harm an individual who is the subject of such record. Records in this category shall be maintained in steel cabinets without the necessity of combination locks.

(3) Access to and use of systems of records shall be permitted only to persons whose official duties require such access within the agency, for routine uses as defined in subpart B herein as to any given system, or for such other uses as may be provided herein.

(4) Other than for access within the agency to persons needing such records in the performance of their official duties or routine users as defined in subpart B herein or such other uses as provided herein, access to records within systems of records shall be permitted only to the individual to whom the record pertains or upon his or her written request to a designated personal representative.

(5) Access to areas where records systems are stored will be limited to those persons whose official duties require work in such areas and proper accounting of removal of any records in storage areas in the form directed by the Director, A&F/AS, shall be maintained at all times.

(6) The agency shall assure that all persons whose official duties who require access to and use of records contained in records systems are adequately trained to protect the security and privacy of such records.

(7) The disposal and destruction of records within records systems shall be in accord with rules promulgated by the General Services Administration.

(b) *Automated systems.* (1) Identifiable personal information may be processed, stored or maintained by automatic data systems only where facilities or conditions are adequate to prevent unauthorized access to such system in any form. Whenever such data whether contained in punch cards, magnetic tapes or discs are not under the personal control of an authorized person such information must be stored in a metal filing cabinet having a built-in three position combination lock, a metal filing cabinet equipped with a steel lock bar secured with a GSA approved combination padlock, or in adequate containers or in a secured room or in such other facility having greater safeguards than those provided for herein.

(2) Access to and use of identifiable personal data associated with automated data systems shall be limited to those persons whose official duties require such access. Proper control of personal data in any form associated with automated data systems shall be maintained at all times including maintenance of accountability records showing disposition of input and output documents.

(3) All persons whose official duties require access to processing and main-

tenance of identifiable personal data and automated systems shall be adequately trained in the security and privacy of personal data.

(4) The disposal and disposition of identifiable personal data and automated systems shall be carried on by shredding, burning or in the case of tapes or discs, degaussing, in accord with any regulations now or hereafter proposed by the GSA or other appropriate authority.

§ 1224.1-11 Accounting for disclosure of records.

Each office maintaining a system of records shall account for all records within such system by keeping a written log in the form prescribed by the Director, A&F/AS, containing the following information:

(a) The date, nature, and purpose of each disclosure of a record to any person or to another agency. Disclosures made to employee of the agency in the normal course of their official duties, or pursuant to the provisions of the Freedom of Information Act need not be accounted for.

(b) Such accounting shall contain the name and address of the person or agency to whom the disclosure was made.

(c) The accounting shall be maintained in accord with a system approved by the Director, A&F/AS, as sufficient for the purpose but in any event sufficient to permit the construction of a listing for all disclosures at appropriate periodic intervals.

(d) The accounting shall reference any justification or basis upon which any release was made including any written documentation required when records are released for statistical or law enforcement purposes under the provisions of subsection (b) of the Privacy Act of 1974 (5 U.S.C. 552a).

(e) For the purpose of this part, the system of accounting for disclosures is not a system of records under the definitions hereof and no accounting need be maintained for the disclosure of accounting of disclosures.

§ 1224.1-12 Contents of records systems.

The agency shall maintain in any records contained in any records system hereunder only such information about an individual as is accurate, relevant, and necessary to accomplish the purpose for which the agency acquired the information as authorized by statute or Executive Order.

(a) In situations in which the information may result in adverse determinations about such individuals' rights, benefits and privileges under any Federal program, all information placed in records systems shall, to the greatest extent practicable, be collected from the individual to whom the record pertains.

(b) Each form or other document which an individual is expected to complete in order to provide information for any records system shall have ap-

ended thereto, or in the body of the document:

(1) An indication of the authority authorizing the solicitation of the information and whether the provision of the information is mandatory or voluntary.

(2) The purpose or purposes for which the information is intended to be used.

(3) Routine uses which may be made of the information and published pursuant to § 1224.1-6 of this regulation.

(4) The effect on the individual if any of not providing all or part of the required or requested information.

(c) Records maintained in any system of record used by the agency to make any determination about any individual shall be maintained with such accuracy, relevancy, timeliness, and completeness as is reasonably necessary to assure fairness to the individual in the making of any determination about such individual, provided however, that the agency shall not be required to update or keep current retired records.

(d) Before disseminating any record about any individual to any person other than an agency, unless the dissemination is made pursuant to the provisions of the Freedom of Information Act (5 U.S.C. 552) the agency shall make reasonable efforts to assure that such records are, or were at the time they were collected, accurate, complete, timely and relevant for agency purposes.

(e) Under no circumstances shall the agency maintain any record about any individual with respect to or describing how such individual exercises rights guaranteed by the first amendment of the Constitution of the United States unless expressly authorized by statute or by the individual about whom the record is maintained, or unless pertinent to and within the scope of an authorized law enforcement activity.

(f) In the event any record is disclosed as a result of the order of a court of appropriate jurisdiction, the agency shall make reasonable efforts to notify the individual whose record was so disclosed after the process becomes a matter of public record.

§ 1224.1-13 Access to records.

(a) Upon request of any individual about whom a record is maintained addressed to the Director of Administrative Services, 806 Connecticut Avenue NW., Washington, D.C. 20525, in person during regular business hours, or by mail, access to his record or to any information contained therein shall be provided.

(b) If the request is made in person, such individual may, upon his request, be accompanied by a person of his choosing to review the record and shall be provided an opportunity to have a copy made of all or any portion of any record about such individual.

(c) A record may be disclosed to a representative chosen by the individual as to whom a record is maintained upon proper written consent of such individual.

(d) Request made in person will be promptly complied with if the records sought are in the immediate custody of

RULES AND REGULATIONS

ACTION. Mailed requests or personal requests for documents in storage or otherwise not immediately available, will be acknowledged within ten working days, and the information requested will be promptly provided thereafter.

(e) With regard to any request for disclosure of record the following procedure shall apply:

(1) Medical or psychological records shall be disclosed to an individual unless in the judgment of the agency, access to such records might have an adverse effect upon such individual. When such determination has been made, the agency may require that the information be disclosed only to a physician chosen by the requesting individual. Such physician shall have full authority to disclose all or any portion of such record to the requesting individual in the exercise of his professional judgment.

(2) Test material and copies of certificates or other lists of eligibles or any other listing, the disclosure of which would violate the privacy of any other individual, or be otherwise proscribed by the provision of the Privacy Act of 1974, shall be removed from the record before disclosure to any individual to whom the record pertains.

§ 1224.1-14 Specific exemptions.

Records or portions of records specified below shall be exempt from disclosure provided however that no such exemption shall apply to the provisions of § 1224.1-16(d)(3) hereof (informing prior recipient of corrected or disputed records); § 1224.1-12(a) (collecting information directly from the individual to whom it pertains); § 1224.1-12(b) (informing individuals asked to supply information of the purposes for which it is collected and whether it is mandatory); § 1224.1-12(c) (maintaining records with accuracy, completeness, etc. as reasonably necessary for agency purposes); § 1224.1-12(f) (notifying the subjects of records disclosed under compulsory court process); § 1224.1-16(g) (civil remedies). With the above exceptions the following material shall be exempt from disclosure to the extent indicated:

(a) Material considered classified and exempt from disclosure under the provisions of section 552(b)(1) of the Freedom of Information Act (5 U.S.C. 552).

(b) Investigatory material compiled for the purposes of law enforcement provided, however, that if such information is to be used for the basis for denial of any right, privilege or benefit to which such individual would be entitled by Federal law or otherwise, such material shall be provided to the such individual except to the extent necessary to protect the identity of a source who furnished information to the government under an express promise that his or her identity would be held in confidence, or prior to the effective date of the Privacy Act of 1974, under an implied promise of such confidentiality of the identity of such source.

(c) Required by statute to be maintained and used solely as statistical records.

(d) Investigatory material compiled solely for the purpose of determining suitability, eligibility or qualification for service as an employee or volunteer or for the obtaining of a Federal contract or for access to classified information; provided, however, that such material shall be disclosed to the extent possible without revealing the identity of a source who furnished information to the government under an express promise of the confidentiality of his identity or, prior to the effective date of the Privacy Act of 1974, under an implied promise of such confidentiality of identity.

(e) Testing or examination material used solely to determine individual qualifications for appointment or promotion in the Federal service, disclosure of which would compromise the objectivity or fairness of the testing or examination process.

(f) An individual shall not have a right of access to any information compiled by the agency in reasonable anticipation of a civil action or proceeding.

The above specific exemptions from disclosure are made for the purpose of protecting the confidentiality of classified information, sources who furnish information for law enforcement purposes or selection purposes for volunteer service or employment, and to protect the integrity of any system of tests or examinations for Federal service or advancement therein.

§ 1224.1-15 Identification of requestors.

The agency shall require reasonable identification of all individuals who request access to records to assure that records are disclosed to the proper person.

(a) In the event an individual requests disclosure in person, such individual shall be required to show an identification card such as a drivers license etc., containing a photo and a sample signature of such individual. Such individual may also be required to sign a statement under oath as to his or her identity acknowledging that he or she is aware of the penalties for improper disclosure under the provisions of the Privacy Act of 1974.

(b) In the event that disclosure is requested by mail, the agency may request such information as may be necessary to reasonably assure that the individual making such request is properly identified. In certain cases, the agency may require that a mail request be notarized with an indication that the notary received an acknowledgment of identity from the individual making such request.

(c) In the event an individual is unable to provide suitable documentation or identification, the agency may require a signed notarized statement asserting the identity of the individual and stipulating that the individual understands that knowingly or willfully seeking or

RULES AND REGULATIONS

obtaining access to records about another person under false pretenses is punishable by a fine of up to \$5,000.

(d) In the event a requestor wishes to be accompanied by another person while reviewing his or her records, the agency may require a written statement authorizing discussion of his or her records in the presence of the accompanying representative or other persons.

§ 1224.1-16 Amendment of records and appeals with respect thereto.

A request for inspection of any record shall be made to the Director, A&F/Administrative Services, 806 Connecticut Avenue NW., Washington, D.C. 20525. Such request may be made by mail or in person provided however that requests made in person may be required to be made upon a form to be provided by the Director of Administrative Services. The Director of Administrative Services shall keep a current list of systems or records maintained by the agency and published in accordance with the provisions of these regulations. Requests as to record systems maintained in Regional Offices may be addressed to the appropriate Regional Office, Attention the Regional Records Officer, in person or by mail. A requesting individual may request that the agency compile all records pertaining to such individual at any named Regional Office or at the Central Office in Washington, D.C., for such individual's inspection and/or copying. In the event an individual makes such request for a compilation of all records pertaining to him in various locations, appropriate time for such compilation shall be provided as may be necessary to promptly comply with such requests.

Any such requests should contain, at a minimum, identifying information needed to locate any given record and a brief description of the item or items of information required in the event the individual wishes to see less than all records maintained about him.

(a) In the event an individual after examination of his record desires to request an amendment of such record, he may do so by addressing such request to the Director of Administrative Services. The Director of Administrative Services shall provide assistance in preparing any such amendment upon request and a written acknowledgement of receipt of such request within 10 working days from the receipt thereof from the individual who requested the amendment. Such acknowledgment may, if necessary, request any additional information needed to make a determination with respect to such request. If the agency makes a determination to comply with such request within such 10-day period, no written acknowledgment is necessary provided however that a certification of such change shall be provided to such individual within such period.

(b) Promptly after acknowledgment of the receipt of a request for an amendment the agency shall take one of the following actions:

(1) Make any corrections of any portion of the record which the individual believes is not accurate, relevant, timely or complete.

(2) Inform the individual of its refusal to amend the record in accord with the request together with the reason for such refusal and the procedures established for requesting review of such refusal by the head of the agency or his designee. Such notice shall include the name and business address of such official.

(3) Refer the request to the agency that has control of and maintains the record in those instances where the record requested remains the property of the controlling agency and not of ACTION.

(c) In reviewing a request to amend the record the agency shall assess the accuracy, relevance, timeliness and completeness of the record with due and appropriate regard for fairness to the individual about whom the record is maintained. In making such determination, the agency shall consult criteria for determining record quality published in pertinent chapters of the Federal Personnel Manual and to the extent possible shall accord therewith.

(d) In the event the agency agrees with the individual's request to amend such record, it shall:

(1) Advise the individual in writing,

(2) Correct the record accordingly, and

(3) Advise all previous recipients of a record which was corrected of the correction and its substance.

(e) In the event the agency, after an initial review of the request to amend a record, disagrees with all or a portion of it, the agency shall:

(1) Advise the individual of its refusal and the reasons therefore,

(2) Inform the individual that he or she may request further review in accord with the provisions of these regulations, and

(3) The name and address to whom the request should be directed.

(f) In the event an individual requestor disagrees with the initial agency determination, he or she may appeal such determination to the Deputy Director of the Agency or his designee. Such request for review must be made within 30 days after receipt by the requestor of the initial refusal to amend.

(g) If after review the Deputy Director or his designee refuses to amend the record as requested he shall advise the individual requester of such refusal and the reasons for same; of his or her right to file a concise statement of the reasons for disagreeing with the decision of the agency in the record; of the procedures for filing a statement of disagreement and of the fact that such statement so filed will be made available to anyone to whom the record is subsequently disclosed together with a brief statement of the agency summarizing its reasons for refusal, if the agency decides to place such brief statement in the record.

The agency shall have the authority to limit the length of any statement to be filed, such limit to depend upon the record involved. The agency shall also inform such individual that prior recipients of the disputed record will be provided a copy of both statements of dispute to the extent that the accounting of disclosures has been maintained and of the individual's right to seek judicial review of the agency's refusal to amend the record.

(h) If after review the official determines that the record should be amended in accordance with the individual's request the agency shall proceed as provided above in the event a request is granted upon initial demand.

(i) Final agency determination of an individual's request for a review shall be concluded within 30 working days from the initial request excluding the period of time between receipt by such individual of the initial denial and his or her filing of a request for review provided however that the Deputy Director or his designee may determine that fair and equitable review cannot be made within that time. If such circumstances occurs, the individual shall be notified of the additional time required in writing and of the approximate date on which determination of the review is expected to be completed.

§ 1224.1-17 Denial of access and appeals with respect hereto.

In the event that the agency finds it necessary to deny any individual access to a record about such individual pursuant to provisions of the Privacy Act or of these regulations, a response to the original request shall be made in writing within ten working days from the date of such initial request. The denial shall specify the reasons for such refusal or denial and advise the individual of the reasons therefore, and of his or her right to an appeal within the agency and/or judicial review under the provisions of the Privacy Act.

(a) In the event an individual desires to appeal any denial of access, he may do so in writing by addressing such appeal to the attention of the Deputy Director, ACTION, c/o the Director, AF/Administrative Services, 806 Connecticut Avenue NW., Washington, D.C. 20525. Although there is no time limit for such appeals, ACTION shall be under no obligation to maintain copies of original requests or responses thereto beyond 180 days from the date of the original request.

(b) The Deputy Director, or his designee, shall review a request from a denial of access and shall make a determination with respect to such appeal within 20 days after receipt thereof. Notice of such determination shall be provided to the individual making the request in writing. If such appeal is denied in whole or in part, such notice shall include notification of the right of the person making such requests to have judicial review of the denial as provided in the Privacy Act (5 U.S.C. 552a).

§ 1224.1-18 Fees.

No fees shall be charged for search time or for any other time expended by the agency to produce a record. Copies of records may be charged for at the rate of 10 cents per page provided that one copy of any record shall be provided free of charge.

This notice is issued in Washington, D.C., on September 28, 1977.

SAM BROWN,
Director, ACTION.

CHAPTER IV—FEDERAL MARITIME COMMISSION

[Gen. Order 16, Amdt. 21; Docket No. 77-14]

PART 502—RULES OF PRACTICE AND PROCEDURE

Subpart B—Appearances and Practices Before the Commission

FORMER EMPLOYEES

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission is amending its Rules of Practice and Procedure governing the appearance and practice before the Commission of former employees to prohibit any former Commission member, officer or employee from practicing, appearing, or representing anyone before the Commission within one year of the termination of their service with the Commission unless it is shown that the particular matter under consideration by the Commission was not under the official responsibility of such former member, officer or employee at any time within a period of one year prior to the termination of such responsibility. These changes are being made to conform the Commission's rule with Federal statute.

DATES: To become effective October 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Francis C. Hurney, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, D.C. 20573.

SUPPLEMENTARY INFORMATION: By Notice published in the FEDERAL REGISTER (42 FR 26664, 26665 May 25, 1977) the Commission proposed revisions in the rules governing the appearance and practice before the Commission of former Commission employees (46 CFR 502.32 (b)). Interested parties were given an opportunity to submit comments on the proposed rules.

No comments or objections were received. Accordingly, the proposed regulations are hereby adopted without change as set forth below.

These amendments have been made to conform the Commission's regulations with 18 U.S.C. 207(b). Because former

RULES AND REGULATIONS

employees must conduct themselves in a manner consistent with 18 U.S.C. 207(b), these regulations will be made effective as of October 5, 1977. Therefore, 46 CFR 502.32(b) is amended as follows:

§ 502.32 Former employees.

(b) *Matters pending; waiver.* (1) No former member, officer, or employee of the Commission shall practice, appear, or represent anyone before the Commission, within one year after the termination of his or her service with the Commission, in connection with any particular Commission matter involving a specific party or parties which was pending before the Commission at any time during the period of his or her service with the Commission, unless prior written consent of the Commission is applied for and obtained. This consent will not be granted unless it appears that the particular matter was not under the applicant's official responsibility as a member, officer, or employee of the Federal Maritime Commission at any time within a period of one year prior to the termination of such responsibility.

(2) Such applicant shall be required to file an affidavit to the effect that the particular Commission matter was not under the applicant's official responsibility as a member, officer or employee of the Federal Maritime Commission at any time within a period of one year prior to the termination of such responsibility; that the applicant is not associated with, and will not in such matter be associated with, any former member, officer, or employee of the Commission who is either permanently or temporarily precluded from practicing, appearing or representing anyone before the Commission in connection with the particular matter; and that the applicant's employment is not prohibited by any law of the United States or by the regulations of the Commission. The statements contained in such affidavit shall not be sufficient if disproved by an examination of the files and records of the case.

(3) Applications for consent should be directed to the Commission, should state the former connection of the applicant with the Commission, and should identify the matter in which the applicant desires to appear. The applicant shall be promptly advised as to his privilege to appear in the particular matter, and the application, affidavit and consent, or refusal to consent, shall be filed by the Commission in its records relative thereto. Separate consents to appear must be obtained to appear in separate cases. (18 U.S.C. 207(b); E.O. 11222 of May 8, 1965 (30 FR 6169; section 43 of the Shipping Act, 1916 (46 U.S.C. 841a); and 5 U.S.C. 553).

Effective date: These regulations are effective October 5, 1977.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1241; Amdt. 3]

PART 1033—CAR SERVICE

Chicago and North Western Transportation Co. Authorized To Operate Over Tracks Formerly Operated by South Omaha Terminal Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 3 to Service Order 1241).

SUMMARY: Amendment No. 3 to Service Order No. 1241 authorizes the Chicago and North Western to operate over tracks of South Omaha Terminal Railway in order to continue service to shippers.

DATES: Effective 12:01 a.m., September 30, 1977. Expires 11:59 p.m., March 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: This order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 29th day of September 1977.

Upon further consideration of Service Order No. 1241 (41 FR 17394, 43723; and 42 FR 17447), and good cause appearing therefor:

It is ordered, That: Service Order No. 1241 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1241 Service Order No. 1241.

(a) Chicago & North Western Transportation Co. authorized to operate over tracks formerly operated by South Omaha Terminal Railway Co. . . .

(e) Expiration date: The provisions of this order shall expire at 11:59 p.m., March 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., September 30, 1977.

(49 U.S.C. 1(12), (15), (16) and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given

[S.O. 1277]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Service Order No. 1277).

SUMMARY: Service Order No. 1277 authorizes the Burlington Northern to substitute two smaller 40-ft. plain boxcars for 50-ft. boxcars ordered for loading lumber and plywood. The Burlington Northern has an adequate supply of 40-ft. narrow-door plain boxcars while at the same time it is encountering shortages of 50-ft. plain boxcars.

DATES: Effective 12:01 a.m., September 30, 1977. Expires 11:59 p.m., November 30, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 29th day of September 1977.

There is an acute shortage of plain boxcars in excess of 40-ft. 6-in. on the lines of the Burlington Northern, Inc. (BN), for transportation of shipments of lumber and plywood subject to tariff provisions that require the use of plain boxcars having lengths in excess of 40-ft. 6-in. The BN has a surplus of 40-ft. 6-in. narrow-door plain boxcars that could be substituted for larger cars if minimum quantity tariff provisions permitted. The economic loss suffered by shippers dependent on the BN for their car supplies can be alleviated by the substitution of smaller cars for the larger cars ordered to transport the shipments offered at the ratio of two smaller cars for each larger car ordered.

In the opinion of the Commission, present regulations and practices with respect to the use and supply of boxcars are ineffective to overcome these shortages of boxcars and an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and

public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1277 Distribution of freight cars.

(a) *Application.* (1) This order shall apply only to cars originating and terminating at stations on the Burlington Northern system and routed only via the lines comprising that system as defined in subsection (2), except that shipments may originate or terminate in terminal switching service on connecting lines which do not participate in the line-haul.

(2) Burlington Northern System: Burlington Northern, Inc.; the Colorado & Southern Railway Co.; Fort Worth & Denver Railway Co.

(3) The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(b) Subject to the concurrence of the shipper, the Burlington Northern, Inc. (BN), may substitute two narrow-door plain boxcars listed in the Official Railway Equipment Register, ICC-R.E.R. No. 404, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM" with inside length 40-ft. 6-in. or less, and with doors less than 8-ft. wide, for each plain boxcar of greater length, but not exceeding 52-ft. 6-in. in length, ordered by the shipper for loading lumber and plywood. (See Exceptions (c), (d), and (e).)

(c) *Exception.* This order shall not apply to shipments subject to tariff provisions requiring the use of twenty-five or more cars per shipment.

(d) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(e) *Exception.* Cars subject to this order may not be diverted or reconsigned for movement via lines other than the BN.

(f) *Rates and minimum weights applicable.* The rates to be applied and the minimum weights applicable to shipments for which cars smaller than those ordered have been furnished and loaded as authorized by section (b) of this order shall be the rates and minimum weights applicable to the larger cars ordered.

(g) *Billing to be endorsed.* The carrier substituting smaller cars for larger cars as authorized by section (b) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Car of (-----) in length, or of (-----) cu. ft. or of (-----) lbs. or greater capacity ordered. Two smaller cars furnished authority ICC Service Order No. 1277

(h) *Concurrence of shipper required.* Smaller cars shall not be furnished in lieu of cars of greater capacity without the consent of the shipper.

(i) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such ex-

ception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(j) *Rules and regulations suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(k) *Effective date.* This order shall become effective at 12:01 a.m., September 30, 1977.

(l) *Expiration date.* This order shall expire at 11:59 p.m., November 30, 1977, unless otherwise modified, changed, or suspended by order of this Commission. (49 U.S.C. 1(12), (15), (16) and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association; and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael. Joel E. Burns not participating.

H. G. HOMME, Jr.,
Acting Secretary.

[7035-01]

[Service Order No. 1278]

PART 1033—CAR SERVICE

Distribution of Freight Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Service Order No. 1278).

SUMMARY: There is a shortage of 180,000 lbs. capacity hopper cars for shipments of phosphate rock from Garrison, Mont., to Kimberly, British Columbia. The Burlington Northern, Inc., the originating carrier, has secured a supply of smaller cars (140,000 lbs. capacity) which are suitable, except for capacity for transporting this traffic. Service Order No. 1278 authorizes the Burlington Northern to substitute these smaller cars for the large cars normally required because of tariff minimum weights of 180,000 lbs. per car. The rates applicable to the larger cars ordered are to be applied to the smaller cars loaded provided the cars are loaded to capacity.

DATES: Effective 12:01 a.m., September 30, 1977. Expires 11:59 p.m., November 30, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 30th day of September 1977.

There is a regular movement of phosphate rock in bulk from Garrison (Phosphate Spur), Mont., to Kimberly, British Columbia, Canada, routed via the Burlington Northern, Inc. (BN), thence CP Rail. These shipments are subject to tariff minimum weights of 180,000 lbs. per car. Because of heavy demands by various shippers, there is an acute shortage on the BN of open hopper cars capable of transporting shipments of these weights resulting in costly delays to the shipper and consignee because of interruptions in the regular flow of this traffic. The BN has secured an adequate supply of cars of 70-tons and greater capacity but less than 90-tons capacity and is willing to transport this traffic in fully loaded cars of at least 70-ton capacity at the rates normally subject to the higher minimum weights specified in the applicable tariffs. Use of these smaller cars in place of 90-ton cars will alleviate the economic loss to shippers caused by the inability of the BN to supply sufficient high capacity cars and will provide the BN with additional hopper cars to meet the requirements of its shippers.

In the opinion of the Commission, present regulations and practices with respect to the use and supply of hopper cars are ineffective to overcome these shortages of hopper cars and an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, That:

§ 1033.1278 Distribution of freight cars.

(a) Subject to the concurrence of the shipper, the Burlington Northern, Inc. (BN), may substitute open hopper cars listed in the Official Railway Equipment Register, ICC-RER No. 404, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation Class "H" and capacity of 140,000 lbs. or greater but less than 180,000 lbs. for open hoppers, Class "H" capacity 180,000 lbs. or greater ordered for transporting shipments of phosphate rock from Garrison (Phosphate Spur), Mont., to Kimberly, British Columbia, Canada, and routed BN-CP Rail subject to the conditions prescribed in sections (b), (c), (d), and (e) of this order.

(b) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(c) *Rates and minimum weights applicable.* The rates to be applied shall be those applicable to the size car ordered provided cars are loaded to the lesser of full visible or marked capacity.

(d) *Billing to be endorsed.* The carrier substituting smaller cars for larger cars as authorized by section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Car of (-----) lb. capacity ordered. Smaller cars furnished authority ICC Service Order No. 1278.

(e) *Concurrence of shipper required.* Smaller cars shall not be furnished in lieu of cars of greater capacity without the consent of the shipper.

(f) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D.C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(g) *Rules and regulations suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order and insofar as they apply within the United States of America.

(h) *Application.* The provisions of this order shall apply to intrastate, interstate, and foreign commerce.

(i) *Effective date.* This order shall become effective at 12:01 a.m., September 30, 1977.

(j) *Expiration date.* This order shall expire at 11:59 p.m., November 30, 1977, unless otherwise modified, changed, or suspended by order of this Commission. (49 U.S.C. 1(12), (15), (16), and 17(2).)

It is further ordered, That copies of this order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association and that notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[Amtd. No. 3 to Service Order No. 1254]

PART 1033—CAR SERVICE

Vermont Northern Railroad Co. Authorized To Operate Over Tracks Owned by State of Vermont and Formerly Operated by St. Johnsbury & Lamoille County Railroad

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 3 to Service Order No. 1254).

SUMMARY: The State of Vermont owns the former St. Johnsbury & Lamoille County Railroad between Swanton, Vt., and St. Johnsbury, Vt., and has leased the line to the Vermont Northern Railroad for operation on behalf of the State. Service Order No. 1254 authorizes the Vermont Northern to operate this line pending disposition of its application for a Certificate of Convenience and Necessity in order to provide uninterrupted rail service to shippers in northern Vermont. Amendment No. 3 extends Service Order No. 1254 for an additional three months.

DATES: Effective 11:59 p.m., September 30, 1977. Expires 11:59 p.m., December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 28th day of September 1977.

Upon further consideration of Service Order No. 1254 (41 FR 48122; 42 FR 3309 and 30841), and good cause appearing therefor:

It is ordered, That: Service Order No. 1254 be, and it is hereby, amended by substituting the following paragraph (f) for paragraph (f) thereof:

§ 1033.1254 Service Order No. 1254.

(a) Vermont Northern Railroad Co. authorized to operate over tracks owned by State of Vermont and formerly operated by St. Johnsbury & Lamoille County Railroad.

(f) *Expiration date:* The provisions of this order shall expire at 11:59 p.m., December 31, 1977, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., September 30, 1977.

(49 U.S.C. 1, 12, 15, and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[Amtd. No. 1 to Service Order No. 1269]

PART 1033—CAR SERVICE

Missouri Pacific Railroad Co. Authorized to Operate Over Tracks of the Atchison, Topeka & Santa Fe Railway Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 1 to Service Order No. 1269).

SUMMARY: The Missouri Pacific's line between Winfield, Kans., and Arkansas City, Kans., has been damaged by flooding and is inoperable. Service Order No. 1269 authorizes the Missouri Pacific to operate over parallel tracks of the Atchison, Topeka and Santa Fe between those points in order to provide continued railroad service to shippers served by the undamaged portions of this line. Amendment No. 1 extends this order for an additional six months.

DATES: Effective 11:59 p.m., September 30, 1977. Expires 11:59 p.m., March 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, telephone 202-275-7840, telex 89-2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 28th day of September 1977.

Upon further consideration of Service Order No. 1269 (42 FR 34883) and good cause appearing therefor:

It is ordered, That: Service Order No. 1269 be, and it is hereby, amended by substituting the following paragraph (c) for paragraph (c) thereof:

§ 1033.1269 Service Order No. 1269.

(a) Missouri Pacific Railroad Co. authorized to operate over tracks of the

Atchison, Topeka & Santa Fe Railway Co. . . .

(c) Expiration date: The provisions of this order shall expire at 11:59 p.m., March 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., September 30, 1977.

(49 U.S.C. 1, 12, 15, and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries**CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE****PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS****Importation of Yellowfin Tuna and Tuna Products**

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

ACTION: Final rule.

SUMMARY: This final regulation is issued under the authority of the Marine Mammal Protection Act of 1972 and extends until January 1, 1978, the effective date of embargo provisions on yellowfin tuna and tuna products originating from vessels engaged in the yellowfin tuna purse seine fishery in the eastern tropical Pacific Ocean.

EFFECTIVE DATE: October 5, 1977.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal and Endangered Species Division, National Fisheries Service, Washington, D.C. 20235. Telephone 202-634-7461.

SUPPLEMENTARY INFORMATION: The National Marine Fisheries Service (NMFS) published regulations in the FEDERAL REGISTER on March 1, 1977 (42 FR 12010-12014) governing the taking of marine mammals incidental to commercial fishing operations.

These regulations include documentation provisions concerning the importa-

tion of yellowfin tuna from nations known to be involved in the purse seine fishery in the eastern tropical Pacific Ocean (hereafter the ETP fishery). Originally effective June 1, 1977, these importation provisions make importation of yellowfin tuna and tuna products from nations known to be involved in the ETP fishery contingent upon certain findings by the Director of NMFS. The Director of NMFS must find either (a) that the fishing operations of the nation concerned . . . are conducted in conformance with U.S. regulations and standards . . . or (b) that, "although not in conformity with these regulations, such fishing is accomplished in a manner which does not result in an incidental mortality and serious injury in excess of that which results from U.S. fishing operations under these regulations." (See 50 CFR 216.24(e)(5)). Either finding will result in an exception from the embargo provisions of the U.S. regulations for the nation concerned.

The Director of NMFS published a notice in the FEDERAL REGISTER on May 16, 1977 (42 FR 24742) which extended the effective date of the import restrictions until August 1, 1977. Subsequently, on August 4, 1977 (42 FR 39394), the effective date was further extended until October 1, 1977.

In view of recent developments which have brought new difficulties to light and confirmed continuing problems, the Director of NMFS has determined that a further extension until December 31, 1977 is necessary. This extension will allow foreign nations a reasonable period of time to conform to U.S. regulations and standards, facilitate the implementation of an international agreement which will reduce porpoise mortality, and avoid an unwarranted disruption or cessation in the flow of tuna and tuna products.

A recent trip by an NMFS representative to several of the nations involved in the ETP fishery sharpened the focus on many of the problems associated with conformance. A fundamental problem was an incomplete understanding by many nations of the intent and requirements of the import provisions. However, all nations which either were visited or have responded are receptive and have taken steps to conform.

Four nations, Canada, Mexico, Ecuador and Netherlands Antilles, are in substantial conformance with U.S. regulations and standards. Panama, Costa Rica, and Nicaragua have indicated an intent to comply, and have undertaken good faith efforts to achieve conformance. The remaining nations, Bermuda, Peru, Senegal, Spain, and Venezuela have been contacted, but, as yet, their position with respect to conformance is unclear.

The ongoing efforts of the Inter-American Tropical Tuna Commission (IATTC) were a major factor considered by the Director of NMFS. The IATTC meeting on June 27-29, 1977 produced a resolution that would establish an international tuna-porpoise research and observer program for IATTC member nations, with provision for inclusion of non-

member nations, operating in the ETP fishery. This resolution represents the first significant step taken by the IATTC to solve the problem of incidental porpoise mortality. The resolution has been approved by all member nations. It is expected that implementation of the resolution will be discussed and clarified at the annual meeting to be held in Mexico City, Mexico on October 17-20, 1977. Implementation of this resolution will be a factor in making findings for various nations. In addition, the meeting will provide a forum in which to clarify doubts, resolve problems, and assess efforts with respect to conformance by both member and interested non-member nations. The present effective date of the embargo provisions, October 1, 1977, does not allow the Director nor the nations concerned sufficient time to perfect their respective roles.

In making the determination for an extension, the Director of NMFS also considered the recommendation of the Department of State and the comments filed in response to the extension appearing in the FEDERAL REGISTER on August 4, 1977 (supra) by Cooperativa de Pescadores del Pacifico R.L. ("Coopeatun") of Costa Rica and Productos Alimenticios del Mar, S.A. ("Palmar") of Mexico, all of which concurred in the need for an extension.

The Director of NMFS will publish in the FEDERAL REGISTER before December

31, 1977 a list of nations for which he has made findings.

§ 216.24 [Amended]

Accordingly, § 216.24 paragraphs (e) (2) (ii), (e) (4), and (e) (5) (i) of 50 CFR Part 216 is amended to read as follows:

(1) Section 216.24 (e) (2) (ii) is amended by deleting the date "September 30, 1977" and inserting the date "December 31, 1977";

(2) Section 216.24(e)(4) is amended by deleting the date "October 1, 1977" in the first line and inserting the date "January 1, 1978", and by deleting the date "September 30, 1977" in the seventh line and inserting the date "December 31, 1977";

(3) Section 216.24(e)(5)(i) is amended by deleting the date "September 30, 1977" in the first line and inserting the date "December 31, 1977."

Dated: September 30, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

Title 5—Administrative Personnel**CHAPTER I—CIVIL SERVICE COMMISSION
PART 213—EXCEPTED SERVICE****Department of Energy**

AGENCY: Civil Service Commission.

ACTION: Final rule.

SUMMARY: This amendment excepts from the competitive service under Schedule C fourteen policy making Executive Level V positions of Staff Officer who are to be used in various executive positions during the organization phase of the establishment of the Department of Energy and who will be assigned to more specific and definitively titled positions when the initial organizational phase of the establishment of the Department is completed.

EFFECTIVE DATE: October 5, 1977.

FOR FURTHER INFORMATION ON POSITION AUTHORITY CONTACT:

John W. McKee, Civil Service Commission, (202-632-4625).

FOR FURTHER INFORMATION ON POSITION CONTENT CONTACT:

Lloyd W. Grable, Director, Transition Personnel Office, Department of Energy, (202-376-4210).

Accordingly, 5 CFR 213.3331(a)(5) is added as set out below:

§ 213.3331 Department of Energy.

(a) Office of the Secretary. . . .

(5) Fourteen Staff Officers.

(5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR 1954-1958 Comp., p. 218.)

[FR Doc.77-29453 Filed 10-4-77; 8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[1610-01]

COST ACCOUNTING STANDARDS BOARD

[4 CFR Part 416]

ACCOUNTING FOR INSURANCE COSTS

Cost Accounting Standards

AGENCY: Cost Accounting Standards Board.

ACTION: Proposed rule.

SUMMARY: This proposed rule would provide criteria for the measurement of insurance costs, the assignment of such costs to cost accounting periods and the allocation of insurance costs to cost objectives. The application of these criteria should increase the probability that insurance costs are allocated to cost objectives in a uniform and consistent manner.

DATE: Written comments must be received on or before December 12, 1977.

ADDRESSES: Written comments should be sent to the Cost Accounting Standards Board, 441 G Street NW., Room 4836, Washington, D.C. 20548.

FOR FURTHER INFORMATION CONTACT:

Robert Straith, Associate Director, Cost Accounting Standards Board, 441 G Street NW., Room 4836, Washington, D.C. 20548 (202-275-6136).

SUPPLEMENTARY INFORMATION: The proposed Standard, if adopted, would be one of a series of Cost Accounting Standards which the Board is promulgating "to achieve uniformity and consistency in the cost accounting principles followed by defense contractors and subcontractors under Federal contracts." (See sec. 719(g) of the Defense Production Act of 1950, as amended.) It is anticipated that any contractor receiving an award of a contract subject to the rules, regulations, and Standards of the Cost Accounting Standards Board on or after the effective date of this Standard will be required to follow it in accordance with the provisions of § 416.80.

The Board solicits comments on the proposed Cost Accounting Standard which will assist the Board in its consideration of the proposal.

NOTE.—All written submissions made pursuant to this Notice will be made available for public inspection at the Board's Office during regular business hours.

Accordingly, it is proposed to publish 4 CFR Part 416 as follows:

PART 416—ACCOUNTING FOR INSURANCE COSTS

Sec.	General applicability.
416.10	Purpose.
416.20	Definitions.
416.30	Fundamental requirement.
416.40	Techniques for application.
416.50	Illustrations.
416.60	Exemptions.
416.70	Effective date.
416.80	

AUTHORITY: Sec. 719 of the Defense Production Act of 1950, as amended, Pub. L. 91-379, 50 U.S.C. App. 2168.

§ 416.10 General applicability.

General applicability of this Cost Accounting Standard is established by § 331.30 of the Board's regulations on applicability, exemption, and waiver of the requirement to include the Cost Accounting Standards in negotiated defense prime contracts and subcontracts (4 CFR 331.30).

§ 416.20 Purpose.

The purpose of this Standard is to provide criteria for the measurement of insurance costs, the assignment of such costs to cost accounting periods, and the allocation of insurance costs to cost objectives. The application of these criteria should increase the probability that insurance costs are allocated to cost objectives in a uniform and consistent manner.

§ 416.30 Definitions.

(a) The following are definitions of terms prominent in this Standard:

Insurance administration expenses. The contractor's costs of administering an insurance program, e.g., the costs of operating an insurance department, processing claims, actuarial fees, and service fees paid to insurance companies or trustees.

Projected average loss. The theoretical long-term average loss per period for periods of comparable exposure to risk of loss.

Self-insurance. The assumption or retention of the risk of loss by the contractor, whether voluntarily or involuntarily. Self-insurance includes the deductible portion of purchased insurance.

Self-insurance charge. An accrued cost which represents the projected average loss under a plan of self-insurance accounting.

(b) The following modifications of definitions set forth in Part 400 of this chapter are applicable to this Standard: None.

§ 416.40 Fundamental requirement.

(a) The amount of insurance cost to be assigned to a cost accounting period is the projected average loss for that period plus insurance administration expenses in that period.

(b) The allocation of insurance costs to cost objectives shall be based on the beneficial or causal relationship between the insurance costs and the benefiting or causing cost objectives.

§ 416.50 Techniques for application.

(a) *Measurement of insurance costs.* (1) For exposure to risk of loss which is covered by the purchase of insurance or by payments to a trusted fund: (i) The premium cost applicable to a given policy period shall be assigned pro rata among the cost accounting periods covered by the policy period, except as provided in paragraphs (a) (1) (ii) through (vi) of this section. A refund, dividend, or additional assessment shall become an adjustment to the pro rata premium costs for the earliest cost accounting period in which the refund or dividend is actually or constructively received or in which the additional assessment is payable.

(ii) Where insurance is purchased specifically for, and directly allocated to, a single final cost objective, the premium need not be prorated among cost accounting periods.

(iii) Any part of a premium or payment to an insurer or trustee, or any part of a dividend or premium refund retained by an insurer or trustee which would be includable as a deposit in published financial statements shall be accounted for as a deposit for the purpose of determining insurance costs.

(iv) Payments to an insurer or to a trustee, or premium refunds or dividends retained by an insurer, for inclusion in a reserve or fund established and maintained on behalf of the insured or the policyholder or trustor, shall be accounted for as deposits unless the following conditions are met:

(A) The objectives of the reserve or fund are clearly stated in writing;

(B) Measurement of the amount required for the reserve or fund is actuarially determined and is consistent with the objectives of the reserve or fund;

(C) Payments and additions to the reserve or fund are made in a systematic and consistent manner; and,

(D) Payments to accomplish the stated objectives of the reserve or fund are made from the reserve or fund or the method of funding accomplishes the same result.

(v) If an objective of an insurance program is to prefund insurance coverage on retired lives, then, in addition to the requirements imposed by paragraph (a) (1) (iv) of this section:

(A) Payments must be made to an insurer or trustee to establish and maintain a fund or reserve for that purpose;

(B) The policyholder or trustor must have no right of recapture of the reserve or fund so long as any active or retired participant in the program remains alive; and,

(C) The amount added to the reserve or fund in any cost accounting period must not be greater than an amount which would be required to fairly allocate the cost of the insurance coverage provided over the working lives of the active employees in the plan.

(vi) The contractor may adopt and consistently follow a practice of determining insurance costs based on the estimated premium and assessments net of estimated refunds and dividends. If this practice is adopted, then any difference between an estimated and actual refund, dividend, or assessment shall become an adjustment to the pro rata net premium costs for the earliest cost accounting period in which the refund or dividend is actually or constructively received or in which the additional assessment is payable.

(2) For exposure to risk of loss which is not covered by the purchase of insurance or by payments to a trusted fund, the contractor shall follow a program of self-insurance accounting according to the following criteria:

(i) Except as provided in paragraph (a) (2) (iii) of this section, the contractor shall make a self-insurance charge for each period which shall represent the projected average loss for that period. Where insurance can be purchased against the self-insured risk, the self-insurance charge plus insurance administration expenses may be equal to, but shall not exceed the cost of comparable purchased insurance plus the associated insurance administration expenses. Where insurance cannot be purchased against the self-insured risk, the amount of the self-insurance charge for each period shall be based on past experience and anticipated conditions.

(ii) In any period where a self-insurance charge is made, actual losses in that period related to the self-insured risk shall not become a part of insurance costs. However, actual loss experience shall be evaluated regularly, and self-insurance charges for subsequent periods shall reflect such experience in accordance with accepted actuarial principles.

(iii) Where it is probable that the actual amount of losses which will occur in a cost accounting period will not differ significantly from the projected average loss for that period, the actual amount of losses in that period may be considered to represent the projected average loss for that period in lieu of a self-insurance charge. Under self-insurance programs on retired lives, only actual losses shall be considered to represent

the projected average loss unless a reserve or fund is established in accordance with § 416.50(a) (1) (v).

(iv) The contractor may elect to follow a consistent practice of recognizing minor self-insured losses as part of other expense categories rather than as "insurance costs."

(v) The self-insurance charge shall be determined in a manner which will give appropriate recognition to any indemnification agreement which exists between the contracting parties.

(3) In measuring the projected average loss under paragraph (a) (2) of this section:

(i) The amount of an incurred loss shall be measured by (A) the net book value of property destroyed, (B) amounts paid or accrued to repair damage, and (C) amounts paid or accrued to compensate claimants, including subrogation. Where the amount of the loss is uncertain, the estimate of the loss shall be the amount includable in published financial statements.

(ii) If a loss has been incurred and the amount of the liability to a claimant is fixed or reasonably certain, but actual payment of the liability will not take place for more than one year after the loss is incurred, the amount of the loss to be recognized currently shall not exceed the present value of the future payments, determined by using a discount rate equal to that prescribed for settling such claims by the State having jurisdiction over the claim. If no such rate is prescribed by the State, then the rate shall be equal to the interest rate as determined by the Secretary of the Treasury pursuant to Pub. L. 92-41, 85 Stat. 97, in effect at the time the loss is recognized. Alternatively, where settlement will consist of a series of payments over an indefinite time period, as in worker's compensation, the contractor may follow a consistent policy of recognizing only the actual amounts paid at the time of payment.

(4) Insurance administration expenses which are material in relation to other insurance costs shall be separately identified and combined with the projected average loss to determine the total insurance cost for the cost accounting period.

(b) *Allocation of insurance costs.* (1) In allocating insurance costs from a home office to segments, in accordance with 4 CFR 403.40(b) (4), the following criteria shall be utilized:

(i) Premiums and assessments paid by, refunds and dividends received by, or a self-insurance charge made by a home office on behalf of a segment shall be allocated directly to that segment. Premiums, assessments, refunds, dividends, and self-insurance charges which can be identified with two or more segments shall be allocated among such segments on a basis which reasonably reflects (A) the factors used to determine the premium, assessment, refund, dividend, or self-insurance charge and (B) the beneficial or causal relationship which exists between the insurance coverage and the

segments. The allocation shall give reasonable weight to both exposure to risk of loss and loss experience by segment.

(ii) Where actual losses are recognized as a part of insurance costs in accordance with § 416.50(a) (2) (iii), or where actual loss experience is determined for the purpose of developing self-insurance charges by segment, a loss which is incurred in given segment shall be identified with that segment. However, if the contractor's home office acts, in effect, as a re-insurer of its segments against catastrophic losses, a portion of such catastrophic losses may be allocated to, or identified with, the home office.

(2) Insurance costs incurred by a segment or allocated to a segment from a home office shall be allocated to intermediate and final cost objectives on a basis which reasonably reflects the factors used to determine the premium, assessment, refund, dividend, or self-insurance charge.

(c) *Records.* The contractor shall maintain such records as may be necessary in the normal course of business to substantiate the amounts of premiums, refunds, dividends, losses, and self-insurance charges, paid or accrued, and the measurement and allocation of insurance costs. Memorandum records may be used to reflect any material differences between insurance costs as determined in accordance with this Standard and as includable in published financial statements.

§ 416.60 Illustrations.

(a) Contractor A pays a company-wide property and casualty insurance premium for the policy term July 1, 1976, to July 1, 1979, and charges the entire amount to expense in its cost accounting period which ended December 31, 1976. This is a violation of § 416.50 (a) (1) (i) in that only one-sixth of the policy term fell within the cost accounting period which ended December 31, 1976, and therefore only one-sixth of the premium should have been charged to expense in that cost accounting period.

(b) (1) Contractor B has a retrospectively rated worker's compensation insurance program. The policy term corresponds with the contractor's cost accounting period. Premium refunds are normally received and applied in the following cost accounting period. The contractor's practice is to charge the entire gross premium to insurance expense in the cost accounting period in which it is paid and to credit the refund against insurance expense in the cost accounting period in which it is received. This practice conforms with § 416.50(a) (1) (i).

(2) Under the provisions of § 416.50(a) (1) (vi), the contractor could have followed a practice of estimating such refunds in advance and charging the estimated net premium to insurance expense. If the contractor were to follow this latter practice, he would recognize the difference between the estimated and the actual refund as an adjustment to insurance expense at the time of receipt.

(c) Contractor C establishes a self-insured program of life insurance for ac-

tive and retired employees. The contractor pay death benefits directly to the beneficiaries of deceased employees and charges such payments to insurance costs at the time of payment. This practice complies with § 416.50(a)(2)(iii) which requires that only the actual losses be recognized unless a properly funded reserve is established.

(d) Instead of paying death benefits directly, Contractor D purchases annual group term life insurance on active and retired employees and charges the premiums to insurance costs (with proper recognition for refunds and dividends). Contractor D's retired employees wish to be protected against possible discontinuance of the program. Contractor D therefore establishes a trustee fund. As each employee retires, Contractor D deposits in the fund an amount which is equal to the premium on a paid-up policy for that employee, and he advises the trustee that the fund is to be used to continue to pay premiums on retired lives in the event the program is discontinued. The contractor also continues to purchase group term insurance on both active and retired employees and charges both the premiums and the deposits to insurance costs. This practice does not comply with § 416.50(a)(1)(iii). The contractor is insured against risk of loss on retired lives by the current purchase of group term insurance. Therefore, the payments to the reserve represent deposits rather than expenses.

NOTE.—In this instance the contractor could comply with the Standard by paying from the fund that portion of the group term premium which represented the retired lives or by reducing the deposits to the fund by an equivalent amount in accordance with § 416.50(a)(1)(iv)(D).

(e) Contractor E wishes to provide assurance of his life insurance program continuance to both active and retired employees. He establishes a trustee fund in accordance with § 416.50(a)(1)(iv) and (v) and thereafter pays into the fund each year for each active employee an actuarially-determined amount which will accumulate to the equivalent of the premium on a paid-up life insurance policy at retirement. He charges the annual payments to insurance costs. Benefits are paid directly from the fund (or the fund is used to pay the annual premiums on group term life insurance for all employees). This practice complies with the Standard.

(f) Contractor F has a fire insurance policy which provides that the first \$50,000 of any fire loss will be borne by the contractor. Because the risk of loss is dispersed among many physical units of property and the average potential loss per unit is relatively low, the actual losses in any period may be expected not to differ significantly from the projected average loss. Therefore, the contractor proposes to let the actual losses represent the projected average loss for this exposure, and the Contracting Officer approves this plan in accordance with existing procurement regulations. Property with a net book value of \$80,000 is destroyed in a fire. The contractor charges \$50,000 of the loss to insurance expense in the year of the loss. The practice complies with the requirement of § 416.50(a)(2). However, had the contractor's plan been to make a self-insurance charge, then any difference between the self-insurance charge and actual losses in that cost accounting period would not have been allocable as an insurance cost.

(g) Contractor G is preparing to enter into a Government contract to produce explosive devices. The contractor is unable to purchase adequate insurance protection and must act as a self-insurer, and the contractor has sufficient financial resources to do so. The risk is concentrated rather than dispersed, and there is a significant possibility of a major loss, against which the Government will not undertake to indemnify the contractor. The contractor must therefore make a self-insurance charge. The contractor may use data obtained from other contractors or any other reasonable method of estimating the projected average loss in order to determine the self-insurance charge.

NOTE.—Had adequate insurance been available but the contractor nevertheless chose to self-insure, and the Contracting Officer approved this plan, then in accordance with § 416.50(a)(2)(i) the amount of the self-insurance charge plus insurance administration expenses could not exceed the cost of the available insurance plus associated insurance administration expenses.

(h) Contractor H has segments located in two different states. Contractor H purchases group insurance for its employees through its home office under a single, company-wide plan and pays a common premium rate for all employees. Periodically Contractor H receives a significant experience rating premium refund from its insurer. Contractor H allocates the refund between segments based on a common percentage of the initial premium, despite the fact that loss experience at one segment has consistently been significantly more favorable than at the other segment and this difference is reflected in the insurer's refund determination. This practice violates § 416.50(b)(1)(i) which provides that the allocation shall give reasonable weight to both exposure to risk of loss and loss experience by segment.

(i) Contractor I purchases liability insurance for all of its motor vehicles in a single, company-wide policy which contains a \$50,000 deductible provision. However, the company's management policy provides that if a loss incurred in a segment, only the first \$5,000 of the loss will be charged to the segment; the balance of the loss will be absorbed at the home-office level and reallocated among all segments. Contractor I does not make a self-insurance charge for the exposure to loss which is represented by the deductible provision.

(1) Contractor I's practice of allocating the loss in excess of \$5,000 to the home office is a violation of § 416.50(b)(1)(ii) unless any loss in excess of \$5,000

can realistically be considered "catastrophic" in relation to the assets of the segment in which it occurs.

(2) The allocation to segments of the cost of losses absorbed by the home office must give reasonable weight to both exposure to risk of loss and actual loss experience by segment, in accordance with § 416.50(b)(1)(i).

§ 416.70 Exemptions.

None for this Standard.

§ 416.80 Effective date.

(a) The effective date of this standard is reserved.

(b) This Standard shall be followed by each contractor on or after the start of his next cost accounting period beginning after the receipt of a contract to which this Cost Accounting Standard is applicable.

ARTHUR SCHOENHAUT,
Executive Secretary.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 211]

SPECIAL SET-ASIDE PROCEDURES FOR MIDDLE DISTILLATES

Proposed Rulemaking and Public Hearing
AGENCY: Federal Energy Administration.

ACTION: Notice of Proposed Rulemaking and Public Hearing.

SUMMARY: FEA proposes to amend the Mandatory Petroleum Allocation Regulations to reinstate, by the adoption of a Special Rule No. 5, a set-aside procedure for middle distillates to be administered by the State Energy Offices and FEA's Regional Offices for the period November 1977 through March 1978. The proposal would permit wholesale purchaser-consumers and end-users who have made unsuccessful efforts to obtain supplies for an emergency or hardship to acquire that volume required to meet their certified current requirements.

DATES: Comments by October 21, 1977; Requests to speak by October 14, 1977; Hearing date: October 21, 1977.

ADDRESSES: Comments and requests to speak to: Executive Communications, Room 3317, Federal Energy Administration, Box PT, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461; Hearing location: Room 2015, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Ed Vilade (Media Relations), 12th and Pennsylvania Ave. NW., Room 3104, Washington, D.C. 20461 (202-566-9833).

Gerald P. Emmer, (Regulatory Programs), 2000 M Street, NW., Room 2304, Washington, D.C. 20461, (202-254-7200).

Michael Paige, (Office of the General Counsel), 12th and Pennsylvania Ave., NW., Room 5134, Washington, D.C. 20461, (202-566-9565).

SUPPLEMENTARY INFORMATION:

- I. Background.
- II. State Set-Aside Proposal.
- III. Comment Procedures.

I. BACKGROUND

DEREGULATION OF MIDDLE DISTILLATES

On June 15, 1976 FEA issued and submitted to the Congress two separate amendments which provided for the exemption of middle distillates from allocation and price controls. These amendments became effective July 1, 1976.

In response to concerns expressed by some members of Congress, FEA informed the Congress that a set-aside procedure administered by FEA's Regional Offices would be established before the end of July 1976 to operate to insure that no marketer would lose its supply source without adequate time to arrange a new supplier during the transitional period following removal of controls.

STATE SET-ASIDE PROCEDURE ADOPTED

On July 9, 1976, FEA issued a notice of proposed rulemaking and public hearing (41 FR 28797, July 13, 1976) concerning establishment of a special set-aside procedure for middle distillates to be in effect from August 1976 through March 1977.

Because this new set-aside program could not be implemented before August 1, 1976, FEA adopted an interim rule (Special Rule No. 2 to Subpart A) on July 1, 1976 which continued the operation of the then existing State set-aside program in a modified form for one month following the exemption.

On August 5, 1976 (41 FR 33881, August 11, 1976), FEA adopted Special Rule No. 3 which provided that, notwithstanding the exemption of middle distillates from controls, a special set-aside procedure for middle distillates would be in effect for the months of August 1976 through March 1977. Under these procedures State Offices were enabled to make assignments to marketers which could demonstrate an inability to obtain adequate supplies of middle distillates after reasonable efforts in this regard and directly to consumers who could meet the same hardship criteria that were in effect for the State set-aside program.

HEARINGS ON FURTHER ACTION WITH REGARD TO MIDDLE DISTILLATES

On May 26, 1977, FEA issued a Further Notice of Proposed Rulemaking and Public Hearing to provide an opportunity for receipt of comments and testimony on the manner in which the FEA middle distillate price monitoring system had operated during the past heating season and on what action, if any, should be taken by FEA with respect to middle distillates during the 1977-1978 winter. In the period July 11, through 15, 1977, FEA held regional hearings in the following cities: Boston, New York, Chi-

cago, Seattle and Atlanta. FEA held a national public hearing in Washington, D.C. from August 2, 1977 through August 4, 1977. On the third day of the national hearing presentations were made by representatives of consumers groups, which FEA funded to promote the acquisition of the technical assistance necessary for the proper preparation of their views.

II. STATE SET-ASIDE PROPOSAL

FEA's review of the public comments received on the State set-aside procedures revealed strong support for this program among the States, consumer groups and trade associations, which viewed the set-aside as an effective device to address emergency situations such as occurred in the 1976-77 winter. State governments argued that since State Energy Offices are in existence, such offices are most aware of local conditions and can move most quickly to get supplies to those who are experiencing an emergency or hardship situation. Refiners stated that the set-aside program only provided another level of bureaucracy and inhibited the transfer of heating oil from one area to another. Moreover, refiners stated that the set-aside procedures had been used sparsely during the 1976-77 winter. FEA has carefully analyzed and evaluated these comments and has decided that the set-aside procedures represent an important means of insuring adequate supplies of middle distillates to consumers to meet emergency and hardship situations.

FEA's initial determination is that adoption of a State set-aside for the 1977-78 winter is necessary to attain, and is consistent with, the objectives specified in section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973, as amended ("EPAA"). In particular, FEA believes that such a regulation would further the objectives set forth in section 4(b)(1) of the EPAA by promoting public health, safety and welfare (including maintenance of residential heating for individual homes, apartments and similar occupied dwelling units) and the equitable distribution of refined petroleum products among all regions and areas of the United States, and sectors of the petroleum industry, and among all users. In reimposing the State set-aside for middle distillates, FEA would be taking action under section 12(f) of the EPAA, which permits the President to prescribe such a regulation upon a determination by him that such regulation is necessary to attain, and is consistent with, the objectives specified in section 4(b)(1) of the EPAA.

FEA proposes to reinstate a set-aside program by adopting a new Special Rule No. 5 for Subpart A of Part 211. The special procedures proposed hereby provide that, notwithstanding the exemption of middle distillates from controls, a special set-aside program for middle distillates would be in effect from November 1, 1977 to March 31, 1978 so as to permit assignments to marketers and consumers by State Energy Offices or by

the appropriate FEA Regional Office if a State Energy Office declines administration of the procedures. Within 10 days after the effective date of this Special Rule, each supplier would designate for each State within which the supplier operates as a prime supplier a representative who would act on behalf of the prime supplier with regard to these special procedures. The set-aside would constitute four (4) percent of a prime supplier's estimated portion of its total supply of middle distillates for the particular month which will be sold into the distribution system of the State (for consumption therein). The set-aside volume for a particular month cannot be accumulated or deferred and may be released totally or partially at any time during the month by order of the State Energy Office. These volumes would be available for assignments to wholesale purchaser-consumers and end-users who have made unsuccessful efforts to obtain supplies for an emergency or hardship. Such assignments would be limited to that volume required to meet certified current requirements and conditioned upon demonstration of the same hardship criteria that were in effect for the State set-aside program. Assignments could also be made to wholesale purchaser-resellers who are unable to obtain a sufficient volume of product to meet the emergency and hardship needs of those wholesale purchaser-consumers and end-users with whom the wholesale purchaser-reseller had a supplier/purchaser relationship on November 1, 1977. Application for these volumes would be made to the appropriate State Energy Office which would approve or disapprove the application. If the State Energy Office approved the application, it would assign a prime supplier to furnish the applicant an amount from the set-aside. The State Energy Office would issue both the applicant and the representative of the prime supplier a document authorizing such assignment. This document would entitle the applicant to receive the assigned volume from any convenient local distributor of the prime supplier from which the set-aside assignment had been made. Such document would expire ten days after issuance unless it had been presented to the prime supplier or a designated local distributor of the prime supplier.

PROPOSED MODIFICATION OF THE CATEGORIES OF ELIGIBLE RECIPIENTS

The proposed operation of the State set-aside under the Special Rule differs in only one aspect from the operation of Special Rule No. 3 during the last heating season. FEA adopted Special Rule No. 3 to insure that during the transitional period following removal of controls on middle distillates no marketer would lose its supply source without adequate time to secure a new supplier. To prevent supply disruptions, Special Rule No. 3 further provided a procedure through which a wholesale purchaser-reseller could obtain a volume of middle distillates equal to its base period use of mid-

dle distillates as determined under Subparts A and G of Part 211. Since the transition to an unregulated market is substantially complete, the proposed Special Rule No. 5 would not provide wholesale purchaser-resellers with a similar guarantee of a volume of middle distillates equal to their base period use, but would limit the eligible recipients to wholesale purchaser-consumers and end-users who are experiencing hardship or emergency conditions and to wholesale purchase-resellers which require middle distillates to meet the emergency needs of such wholesale purchaser-consumers and end-users.

REQUEST FOR SPECIFIC COMMENTS

Since the States play an integral role in the operation of the set-aside procedure, FEA is soliciting their comments as to how the operation of the set-aside might be improved. Comments are particularly sought with respect to the following specific modifications suggested by certain States at the hearings held this past summer.

First, many States experienced problems in the enforcement of their orders. To alleviate this difficulty, some States have proposed that prime suppliers be required to physically store set-aside volumes in each State and to segregate the set-aside volume from other available supplies. Other States have suggested that the regulations specify the response time within which companies must fill orders. FEA believes at this time that requiring separate physical storage in each State for set-aside volumes could entail substantial expense and that it would be impractical to require segregated short-term storage of set-aside volumes. Furthermore, requirements such as these would not necessarily facilitate the distribution of the product. For example, if the product were released from set-aside obligations, suppliers might have logistical problems in transporting and delivering supplies from diverse locations. As to a specified response time for suppliers, FEA recognizes that the appropriate response times will differ depending upon local conditions and that a provision for a delivery deadline in the regulations would be difficult to enforce. However, FEA wishes to make clear that suppliers are required to comply as soon as practicable with the terms of authorizing documents presented to them.

Second, transfers of middle distillates from a prime supplier of one brand to a user of a different brand proved difficult in many States. FEA invites further comments on such occurrences so that the actual areas of concern might be more clearly delineated, and so that the Agency may determine what action, if any, FEA should propose to address this problem.

Many States expressed the opinion that the set-aside program would function more efficiently with provisions for federal enforcement of State set-aside orders and mandatory penalties for non-compliance. However, FEA's tentative conclusion at this time is that State en-

forcement is more appropriate due to the necessity for expedited relief in many instances and the State Offices' familiarity with the documentation underlying and justification for the relief in set-aside orders.

Several States depend heavily on a particular type of middle distillate, and they suggested revising Form FEA 1000 so that the volumes of each type of middle distillate being sold in the State would be disclosed, which would enable the State to accurately calculate the allocable supply for each fuel type. FEA believes that this point has merit and is considering requiring the reporting by prime suppliers of separate volumes for each type of middle distillate.

Finally, most States considered the four percent set-aside figure sufficient under normal winter conditions, but several States thought the rule should allow a State's governor the right to petition FEA to increase the percentage during extreme emergencies. If such an emergency does arise this winter, FEA intends to take whatever further action is necessary to ensure supplies to consumers, which action could include such a procedure for an increase in the set-aside percentage.

III. COMMENT PROCEDURES

Interested persons are invited to participate in this matter by submitting data, views or arguments with respect to the proposals set forth in this notice to Executive Communications, Room 3317, Federal Energy Administration, Box PT, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to FEA Executive Communications with the designation "Proposal for Reinstating Distillate Set-Aside." Fifteen copies should be submitted. All comments received by October 21, 1977, before 4:30 p.m., e.s.t., will be considered by FEA before final action is taken in this matter.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

The public hearing in this proceeding will be held at 9:30 a.m., e.s.t., on October 21, 1977 and will be continued, if necessary, to October 25, 1977, in Room 2105, 2000 M Street, NW., Washington, D.C. 20461, in order to receive comments from interested persons on the matters set forth herein.

Any person who has an interest in this matter, or who is a representative of a group or class of persons that has an interest in this matter, may make a written request for an opportunity to make an oral presentation. Such a request should be directed to Executive Communications, FEA, and must be received before 4:30 p.m., e.s.t., on October 14, 1977. Such a request may be hand delivered to Room 3317, Federal Building, 12th and Penn-

sylvania Avenue, NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through October 21, 1977. Each person selected to be heard will be so notified by FEA before 4:30 p.m., e.s.t., October 18, 1977 and must submit 100 copies of his or her statement to Allocation and Pricing Regulations Development Office, FEA, Room 2214, 2000 M Street, NW., Washington, D.C. 20461, before 4:30 p.m., e.s.t., October 19, 1977.

FEA reserves the right to select the persons to be heard at the public hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing, which will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing, to Executive Communications, FEA, before 4:30 p.m., e.s.t., October 19, 1977. Any person who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Ad-

ministrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332, and Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185; E.O. 11933, 41 FR 36641.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

The Appendix to Subpart A of Part 211 is amended by adding Special Rule No. 5 to read as follows:

SPECIAL RULE NO. 5

SPECIAL SET-ASIDE PROCEDURES FOR MIDDLE DISTILLATES

1. *Scope.* This Special Rule provides for a set-aside program for middle distillates for the months of November 1977 through March 1978, as provided below, notwithstanding the exemption of middle distillates from the Mandatory Petroleum Allocation and Price Regulations effective July 1, 1976.

2. *Provision for middle distillate set-aside.* Notwithstanding the provisions of paragraphs (b) and (c) of § 210.35 and of paragraphs (b) (5) and (6) of § 211.1, a set-aside is hereby established for the months November 1977 through March 1978 for designated middle distillates for assignment by State Offices in accordance with the provisions of this Special Rule.

For purposes of this Special Rule the term middle distillates includes the following, as defined in § 212.31 of this chapter: No. 1 heating oil, No. 1-D diesel fuel, No. 2 heating oil, No. 2-D diesel fuel and kerosene.

3. *Set-aside volume.* A prime supplier shall inform each appropriate State Office monthly of the estimated volume of middle distillates to be sold into a State for consumption within that State. The set-aside volume available in a State for a particular month shall be the sum of the amounts calculated by multiplying four (4%) percent by each prime supplier's estimated portion of its total supply for that month which will be sold into that State's distribution system for consumption within the State. The set-aside for a particular month cannot be accumulated or deferred; it shall be made available from stocks of prime suppliers whether directly or through their wholesale purchaser-resellers.

4. *State representative.* Each supplier shall designate a representative for each State in which the supplier is a prime supplier to act for and on behalf of the prime supplier with respect to set-aside petitions and assignments from the set-aside to be supplied by that prime supplier. Each prime supplier for a State shall designate its representative for that State, and shall notify in writing the appropriate State and FEA Regional Offices of such designation within 10 days after the

effective date of this Special Rule. The State Office shall to the maximum extent possible consult with a prime supplier's representative prior to issuing any authorizing document affecting set-aside volumes to be provided by the prime supplier.

5. *Eligible recipients of set-aside volumes.* The set-aside provided for by this Special Rule shall be utilized by the State Offices in issuing authorizations to applicants for designated middle distillates to be supplied by a prime supplier to meet hardship and emergency requirements of wholesale purchaser-consumers and end-users. To facilitate relief of the hardship and emergency requirements of wholesale purchaser-consumers and end-users, the State Office may also direct that a wholesale purchaser-reseller be supplied from the set-aside to enable the wholesale purchaser-reseller to supply the emergency and hardship needs of wholesale purchaser-consumers and end-users with whom the wholesale purchaser had a supplier/purchaser relationship on November 1, 1977.

6. *Term of assignments.* Assignments to eligible end-users and wholesale purchaser-consumers under section 5 of this Special Rule by a State Office shall be made to meet the emergency or hardship conditions being experienced during that period. Assignments to wholesale purchaser-resellers shall be only for the period necessary to preclude hardship and provide emergency requirements to that wholesale purchaser-reseller's wholesale purchaser-consumers and end-users. No assignments under this Special Rule shall relate to any period subsequent to March 31, 1978.

7. *Application for assignment.* All applications for assignment under this Special Rule shall be made to the appropriate State Office, which Office has jurisdiction over the State in which the applicant conducts its business operations, in accordance with the procedures set forth in §§ 205.211-218 of Subpart Q of Part 205 of this chapter with respect to the State set-aside, except as otherwise provided in this Special Rule and except that all applications by wholesale purchaser-resellers must be in writing.

8. *Transfer of functions to FEA Regional Office.* Any State may elect irrevocably at any time to transfer administration of the middle distillate set-aside established by this Special Rule from its State Office to the FEA Regional Office which has jurisdiction over said State, and will inform the FEA Regional Office in writing of such election. In the event of such an election by a particular State, all applications by applicants conducting business within that State shall be made to the appropriate FEA Regional Office. With respect to applications made to an FEA Regional Office under this section all references to a State Office in this Special Rule and Subpart Q of Part 205 of this chapter shall be deemed to refer to the appropriate FEA Regional Office.

9. *Approval of application.* If a State Office approves an application for assignment, it shall assign a prime supplier an amount to furnish from the set-aside to the applicant to meet the expressed emergency or hardship condition. To determine an appropriate prime supplier, the State Office may coordinate with the State representatives of prime suppliers.

10. *Authorizing document.* The State Office shall issue to an applicant granted an assignment a document authorizing such assignment. A copy of the authorizing document (or a summary) shall also be provided by the State Office to the designated State representative of the prime supplier assigned to the applicant. An authorizing document not presented to either the prime supplier or a designated local distributor of the prime supplier within ten (10) days of issuance shall expire after that ten-day period.

11. *Supplier's Responsibilities.* When presented with an authorizing document, suppliers shall provide the assigned amount of middle distillates to an applicant. The authorizing document shall entitle the applicant to receive product from any convenient local distributor of the prime supplier from which the set-aside assignment has been made. Wholesale purchaser-resellers of prime suppliers shall, as non-prime suppliers, honor such authorizing documents upon presentation and shall not delay deliveries required by the authorizing documents while confirming such deliveries with the prime supplier. Any non-prime supplier which provides middle distillates pursuant to an authorizing document shall in turn receive from its prime supplier an equivalent volume of the product. The requirements of paragraph (b) of § 210.62 of this chapter continue to apply to suppliers to whom an authorizing document is presented pursuant to this Special Rule to prohibit any form of discrimination (including price discrimination) which has the effect of circumventing, frustrating or impairing the objectives, purposes, and intent of this Special Rule.

12. *Prime suppliers.* All prime suppliers shall designate middle distillates from their set-aside volume each month, as directed by the State Offices, not to exceed the total set-aside volume for such middle distillates for that month for the State concerned.

13. *Release of set-aside.* At any time during the month, a State Office may order the release of part or all of a prime supplier's set-aside volume through the prime supplier's normal distribution system in the State.

14. *Orders issued by State offices.* Authorizing documents and other orders issued pursuant to this Special Rule shall be in writing and effective immediately upon presentation to the prime supplier's designated State representative. Authorizing documents shall represent a call on the prime supplier's set-aside volumes for the month of issuance irrespective of the fact that delivery cannot be made until the following month. Any order issued by a State Office pursuant to this Special Rule may be appealed to the FEA Regional Office that has jurisdiction over the State involved, in accordance with the procedures set forth in Subpart H of Part 205 of this chapter. Any appeal from such an order shall be filed within ten (10) days of service of the order from which the appeal is taken. If a State Office fails to take action on an application within ten (10) days of filing, the applicant may treat the application as having been denied in all respects and may appeal therefrom as provided in this section.

[10 CFR Part 212]

COMPUTATION OF LANDED COSTS: TIMING

AGENCY: Federal Energy Administration (FEA).

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: FEA is proposing to amend the definition of landed cost in § 212.82 to provide that with respect to arms-length transactions, the landed cost shall be considered to be incurred when it is recognized as having been incurred by application of the refiner's customary accounting procedures. The amendment would make timing of landed costs in arms-length transactions consistent with the timing of landed costs in inter-affili-

I

ate transactions pursuant to § 212.84(h). Such consistency in FEA's data base facilitates administration of the transfer pricing program under § 212.84, pursuant to which FEA analyzes data from arm's length sales in order to determine the proper cost of crude oil purchased in particular months in inter-affiliate transactions.

DATES: Comments by October 25, 1977, 4:30 p.m.; requests to speak by October 11, 1977, 4:30 p.m.; hearing date October 27, 1977, 9:30 a.m.

ADDRESSES: Comments and requests to speak to: Executive Communications, Room 3317, Federal Energy Administration, Box OH, Washington, D.C. 20461; hearing location: Room 2105, 2000 M Street NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

Robert C. Gillette (Hearing Procedures), 2000 M Street NW., Room 2214B, Washington, D.C. 20461 (202-254-5201).

Ken Workman (Office of Regulatory Programs), 2000 M Street NW., Room B110, Washington, D.C. 20461 (202-634-7610).

Allan P. Weeks (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 5119, Washington, D.C. 20461 (202-566-7541).

SUPPLEMENTARY INFORMATION:

I. BACKGROUND

Section 212.84(h) provides, in pertinent part, that with respect to inter-affiliate transactions, "the landed cost shall be considered to be incurred when that cost is recognized as having been incurred by application of the refiner's customary accounting procedures generally accepted and consistently and historically applied." FEA regulations are silent with respect to the timing of landed costs in arm's-length transactions, although regulations issued by the Cost of Living Council (whose authority was transferred to FEA) required that landed costs be incurred at the time of physical landing, and "landing" is recognized by the current refiner rules at § 212.83. However, since FEA extracts the date of loading from data concerning arm's-length transactions, in order to calculate the proper cost of crude oil in inter-affiliate sales under § 212.84 (the transfer pricing program), FEA has determined that procedures applicable to timing of the landed cost of crude oil can and should be consistent with regard to both arm's-length and inter-affiliate transactions. Accordingly, FEA proposes to amend the definition of "landed cost" in § 212.82 to conform with that in § 212.84(h). Firms will benefit from such consistency, in that it will facilitate a single, more easily auditable accounting system.

II. PROPOSED AMENDMENT

Under FEA's proposal, the definition of "landed cost" in § 212.82 would be amended in paragraph (5), defining the

landed cost of crude oil purchased in arm's-length transactions, by the addition of the following language: "For purposes of this paragraph (5), the landed cost shall be considered to be incurred when that cost is recognized as having been incurred by application of the refiner's customary accounting procedures generally accepted and consistently and historically applied."

Moreover, consistent with the reasoning in FEA Ruling 1977-4 (42 FR 12161, March 3, 1977), FEA will not initiate disallowances or other enforcement procedures against any firm for incurring costs on the basis set forth in this amendment prior to its effective date. Under that ruling FEA exempted firms from compliance action for having incurred costs in inter-affiliate transactions for the period preceding adoption of § 212.84(h), in accordance with the procedures specified therein, i.e., pursuant to their customary accounting procedures generally accepted and consistently and historically applied.

This amendment, and FEA's application of its provisions to periods preceding adoption thereof, are premised on the requirement that a firm's customary accounting procedures have been consistently and historically applied. Moreover, such accounting procedures must be considered to be generally accepted for purposes of reports to stockholders.

III. COMMENT PROCEDURE

1. WRITTEN COMMENTS

Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposal set forth in this notice. Comments should be identified on the outside envelope and on documents submitted with the designation "Landed Costs: Timing," Box OH. Fifteen copies should be submitted. All comments received by FEA will be available for public inspection in the FEA Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

2. PUBLIC HEARING

(a) *Request procedure.* The times and places for the hearings are indicated in the dates section of this preamble. If necessary to present all testimony, the hearing will be continued to 9:30 a.m. of the next business day following the date of the hearing.

Any person who has an interest in today's proposed amendments, may make a written request for an opportunity to make oral presentation. The person mak-

ing the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through the day before the hearing.

Each person selected to be heard will be so notified by the FEA before 4:30 p.m., e.d.s.t., October 13, 1977, and must submit 100 copies of his or her statement to Regulations Management, Room 2214, 2000 M Street NW., Washington, D.C. 20461, before 4:30 p.m., e.d.s.t., October 26, 1977.

(b) *Conduct of the hearings.* The FEA reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the FEA with respect to the subject matter of the hearings will be based on all information available to the FEA. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearings, to Executive Communications, Room 3317, FEA, Box OH, before 4:30 p.m., e.d.s.t., October 11, 1977. Any person who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearings will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue N.W., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

In the event that it becomes necessary for the FEA to cancel a hearing, FEA will make every effort to publish advance notice in the FEDERAL REGISTER of such can-

cellation. Moreover, FEA will notify all persons scheduled to testify at the hearings. However, it is not possible for FEA to give actual notice of cancellations or changes to persons not identified to FEA as participants. Accordingly, persons desiring to attend a hearing are advised to contact FEA on the last working day preceding the date of the hearing to confirm that it will be held as scheduled.

FEA has determined that since this proposal is procedural only, the requirement in section 7(c)(2) of the Federal Energy Administration Act that proposals affecting the environment be reviewed by the Administration of the Environmental Protection Agency, does not apply.

FEA has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended Pub. L. 94-163, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, it is proposed to amend Part 212 of Chapter II of Title 10 of the Code of Federal Regulations as set forth below.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYCH,
Acting General Counsel,
Federal Energy Administration.

Section 212.82 is amended in paragraph (5) of the definition of "landed cost" to read as follows:

§ 212.82 Definitions.

"Landed cost" means:
(5) For purposes of crude oil purchased in an arm's-length transaction or purchased in a transaction to which § 212.84(g) is applicable, the purchase price (or the cost if § 212.84(g) is applicable) plus the cost of transportation, if any, computed pursuant to § 212.85, from the point of delivery to the firm to the U.S. port of entry (or the actual cost of transportation to the U.S. border in the case of crude oil not transported by sea, plus the cost of domestic transportation to the refinery, plus import fees and duties incurred. For purposes of this paragraph (5), the landed cost shall be considered to be incurred when the cost is recognized as having been incurred by application of the refiner's customary accounting procedures generally accepted and consistently and historically applied.

[6320-01] CIVIL AERONAUTICS BOARD [14 CFR Part 234]

[EDR-301A; Docket 27891; Dated: September 29, 1977]

FLIGHT SCHEDULES OF CERTIFICATED AIR CARRIERS: REALISTIC SCHEDULING REQUIRED

Supplemental Advance Notice Concerning Proposed Mandatory On-Time Arrival Standards

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental advance notice of proposed rulemaking.

SUMMARY: This supplemental advance notice invites the submission of detailed comments from members of the general public, air carriers, travel agents, consumer organizations, and interested governmental agencies setting forth, to the extent possible, precise economic data in support of their views favoring or opposing the imposition of mandatory on-time arrival standards. This proceeding was instituted in response to a petition by the Aviation Consumer Action Project.

DATES: Comments by November 21, 1977. Reply comments by December 12, 1977. Request to be placed on service list by October 17, 1977.

ADDRESSES: Comments should be sent to Docket 27891, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Comments may be examined at the Docket Section, Room 711, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Simon J. Eilenberg, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5442).

SUPPLEMENTARY INFORMATION: Sections 234.3-234.4 of the Board's Economic Regulations provide that at least 75 percent of each carrier's scheduled flights, on a calendar quarter basis, must be operated within the elapsed time indicated between origin and destination (plus 15 minutes) published in the carrier's schedule. Section 234.8 establishes a system of reports of on-time arrivals, showing the percentage in each month of each carrier's nonstop flights in each of the largest 200 city-pair markets which arrive within 15 minutes of the scheduled arrival time. The reports are then published each month by the Board.

The Aviation Consumer Action Project (ACAP) filed a petition for rulemaking to amend sections 234.3-234.4 by substituting an on-time arrival standard for the present elapsed-time standard that the Board applies in judging a carrier's adherence to its published schedules. In

response to ACAP's petitions, the Board issued Advance Notice of Proposed Rulemaking, EDR-301, dated July 23, 1976, asking for public comment as to whether the proposed mandatory on-time arrival standard should be adopted, or could be effectively supplemented. The Board stated that unless there was a persuasive showing of need, it was not inclined to overturn established Board policy against such a standard. Comments generally in support of the ACAP proposal were filed by Electro Magnetic Filter, ACAP, the Board's Office of the Consumer Advocate (OCA), and six members of the general public. Comments generally opposed to the proposal were submitted by Hughes Airwest, Eastern Air Lines, General Mills, Braniff Airways, American Airlines, Northwest Airlines, United Airlines, the Air Transport Association of America, and four members of the general public.

Those comments in support of the proposal state that there is presently no government regulation which requires the carriers to meet their published scheduled arrival times, making enforcement almost impossible. The proponents argue that the elapsed-time rule now in Part 234 is misleading to the public and irrelevant to the public's need. ACAP and its supporters do not believe that mandatory on-time arrival standards would in any way impair air safety, since safety-related factors would be considered permissible delay. Nor, since the definition of permissible delay under ACAP's proposal would be the same as is used now for the elapsed-time rule, would there be a problem of enforcement.

Opponents of the proposal argue that no further government regulation is necessary, since carrier on-time performance in most reported city-pair markets already meets or surpasses the standard suggested by ACAP. The carriers contend that economic incentive from competition is sufficient to insure adequate overall arrival performance, including accurate schedules and punctual performance. They believe that carrier on-time performance is best judged by the public itself on the basis of the Board's published on-time arrival reports. Some opponents also argue that the administrative burdens on the Board and the carriers, as well as the increased cost, would outweigh any public benefit that might be gained, and that pressure on the carriers to avoid Board enforcement action might affect flight safety in some cases. Finally, opponents state that it is virtually impossible to define "permissible delay" in a way which permits enforcement, yet allows the necessary tolerance for uncontrollable delays or for management discretion. They argue that these delays also have a greater cumulative effect on on-time performance than on elapsed-time performance. As an example, if the first arrival of a multi-

segment flight is delayed by adverse weather, then each succeeding arrival is also delayed, even though the scheduled time for each segment could remain the same as published.

At a meeting open to the public on July 5, 1977, the Board reviewed the facts and arguments that had been presented in the comments filed in response to the Advance Notice. It also reviewed a novel proposal by the Board's Bureau of Enforcement, made for the first time shortly before the meeting, which would amend Part 234 to require that whenever a carrier fails to perform on-time (within 15 minutes as published in its schedules) 75 percent of all trips on any scheduled flight, in any three calendar months, all references (whether written or oral) to, or publication of, the schedule of that flight, must be asterisked with the notation "Subject to frequent delays." There would be no exception to this notation requirement, and it would apply systemwide. The Bureau of Enforcement argued that whether or not the cause of a delay is the fault of the carrier, the traveler who uses that flight has a right to know that it is frequently delayed.

Also during the meeting, the Board noted that the data submitted by both the proponents and opponents of the proposed rule had been too sparse and ambiguous to enable the Board to reach an informed judgment as to the action which it should take. For example, several carriers had cited specific costs which would be added to their operations if the proposed standard were adopted, and OCA had cited certain results of its Consumer Complaints Survey for 1975 as an indication of the seriousness of the problem which flight delays have become for the public. Yet, neither of these assertions were sufficiently detailed or analyzed in the comments so as to be particularly persuasive.

Although, upon consideration of the petition and comments thus far received, the Board is not persuaded to overturn its long-established policy against imposing the kind of on-time standard proposed by ACAP, we have decided not to terminate this proceeding, until we have given interested persons a further opportunity to present data and analysis in support of their views. While we will carefully review all comments we particularly invite detailed responses to the following questions:

1. What would be the economic costs to the carriers, individually and industrywide and eventually to the air traveler, if the proposed amendments by ACAP were adopted?
2. What is the significance of available statistics on the number and proportion of traveler complaints in regard to flight delay? How many of these complaints involve foreign air transportation, which is not covered by Part 234 and would therefore not be alleviated by the proposed rule?
3. Do individual members of the public view flight delay as such a serious problem as to warrant regulations prohibiting noncompliance with on-time standards?

4. Is there a better means of informing the public of the carriers' on-time performance than merely publishing on-time arrival reports? Would the alternative suggested by the Bureau of Enforcement better serve the public need than either mandatory standards or the present published reports?

5. What would be the relative costs to the carriers of the various proposals for making a meaningful on-time standard?

REQUEST FOR COMMENTS

Interested persons may participate in this proceeding by submitting 20 copies of written data, views, or arguments addressed to: Docket 27891, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. All comments received by November 21, 1977, and reply comments received by December 12, 1977, will be considered by the Board before taking further action.

Those persons planning to participate who wish to be served with the comments of others, and who are willing to serve their own comments and reply comments on others, may, on or before October 17, 1977, request the Docket Section to place them on the Service List. The Service List will be prepared by the Docket Section and mailed to those named on it. Persons filing responsive comments should serve any person whose comment is dealt with in their responsive comment, whether or not either party is on the Service List.

Individual members of the general public who wish to express their interest as consumers may do so by submitting comments in letter form, in the manner and by the dates indicated above, without the necessity of filing additional copies.

(Sections 204, 404, and 411 of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 760, and 769; 49 U.S.C. 1321, 1374, and 1381.)

By the Civil Aeronautics Board,

PHYLLIS T. KAYLOR,
Secretary.

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1013]

PUBLICATIONS AND PUBLICITY

Proposed Application: Consumer Product Safety Act

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: This notice proposes procedures for carrying out the Consumer Product Safety Commission's responsibility under section 6(b) of the Consumer Product Safety Act. The rules are needed to establish procedures for manufacturers and other sellers to comment on Commission publicity and publications about consumer products; or to request retraction of inaccuracies in published information. The rules are intended to publicly express the Commission's interpretation of section 6(b).

DATES: Comments must be received no later than November 21, 1977.

ADDRESS: Office of the Secretary, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Jeanette Wiltse, General Law Division, Office of the General Counsel, Consumer Product Safety Commission, 1111 18th Street NW., Washington, D.C. 20207 (202-634-7770).

SUPPLEMENTARY INFORMATION: In this notice, the Consumer Product Safety Commission (CPSC) proposes procedures to carry out section 6(b) of the Consumer Product Safety Act (CPSA), 15 U.S.C. 2055(b). Section 6(b) of the CPSA requires the Commission to notify a manufacturer or private labeler in advance of publicly disclosing product safety information from which its identity will be readily ascertainable by the public. The manufacturer or private labeler is to be given a reasonable opportunity to comment on the information. The Commission is to take reasonable steps to insure that such information is accurate and that its disclosure is fair in the circumstances and reasonably relates to effectuating the purposes of the Consumer Product Safety Act. This section also requires the Commission to publicly retract published information if it later finds that the information was inaccurate or misleading and reflects adversely on the safety of any consumer product, or the practices of any manufacturer, private labeler, distributor, or retailer of consumer products. Because the requirements and exceptions of section 6(b) are complex, its language is included here for reference.

(b) (1) Except as provided by paragraph (2) of this subsection, not less than 30 days prior to its public disclosure of any information obtained under this Act, or to be disclosed to the public in connection therewith (unless the Commission finds out that the public health and safety requires a lesser period of notice), the Commission shall, to the extent practicable, notify, and provide a summary of the information to, each manufacturer or private labeler of any consumer product to which such information pertains, if the manner in which such consumer product is to be designated or described in such information will permit the public to ascertain readily the identity of such manufacturer or private labeler, and shall provide such manufacturer or private labeler with a reasonable opportunity to submit comments to the Commission in regard to such information. The Commission shall take reasonable steps to assure, prior to its public disclosure thereof, that information from which the identity of such manufacturer or private labeler may be readily ascertained is accurate, and that such disclosure is fair in the circumstances and reasonably related to effectuating the purposes of the Act. If the Commission finds that, in the administration of this Act, it has made public disclosure of inaccurate or misleading information which reflects adversely upon the safety of any consumer product, or the practices of any manufacturer, private labeler, distributor, or retailer of consumer products, it shall, in a manner similar to that in which such disclosure was made, publish a retraction of such inaccurate or misleading information.

(2) Paragraph (1) (except for the last sentence thereof) shall not apply to the public disclosure of (A) information about any consumer product with respect to which the Commission has filed an action under section 12 (relating to imminently hazardous products), or which the Commission has reasonable cause to believe is in violation of section 19 (relating to prohibited acts), or (B) information in the course of or concerning any administrative or judicial proceeding under this Act.

Section 1013.2 of these procedures states that they are applicable to CPSC publications and publicity, including all materials, announcements, or speeches created or adopted by a CPSC officer or employee for dissemination to the general public or distribution to news media. This expresses the Commission's interpretation that section 6(b) of the CPSA is applicable when the CPSC actively and publicly discloses information, but not when the CPSC makes a record available in response to a Freedom of Information Act request (FOIA, 5 U.S.C. 552). The legislative history and the language of section 6(b) show that it was designed to insure against unwarranted damage to the reputation of a product, or of one who sells it, from CPSC publication of misleading or inaccurate information (See, H.R. Rep. No. 1153, 92d Cong., 2d Sess. 32 (1972); 118 Cong. Rec. 31389 (1972) (remarks of Rep. Crane)). Hence the Commission interprets section 6(b) to cover the widespread dissemination of information which could harm the reputation of a product or seller, i.e., dissemination of information in publications and publicity which carry the official approval of the CPSC. This interpretation accords with the intent expressed in the Conference Report accompanying the Consumer Product Safety Commission Improvements Act of 1976; H.R. Rep. 1022, 94th Cong., 2d Sess. 27 (1976). That report states that section 6(b) is not intended to "supercede or conflict with the requirements of the Freedom of Information Act" and that section 6(b) applies to public disclosure initiated by the CPSC and not to disclosure initiated by a specific request from a member of the public under the FOIA. The discussion that follows presents further reasoning of the Commission on this interpretation.

Section 6(b) (1) requires that advance notice and a comment period be given to a manufacturer or private labeler whenever its identity can be readily ascertained from product-related information to be publicly disclosed by CPSC. The Commission is required to take reasonable steps, prior to public disclosure, to assure that the information is accurate, and that its disclosure will be fair in the circumstances and reasonably related to effectuating the purposes of the Consumer Product Safety Act. Many records requested from CPSC under the FOIA are letters, accident reports, petitions for rulemaking, and complaints sent to it by consumers and others concerning the safety of products. The CPSC receives thousands of such communications each year, and, while it attempts to give some attention to all, ascertaining their accuracy and deciding whether their disclosure, pursuant to an FOIA request, would be fair and effectuate the purposes of the CPSA would consume a significant amount of Commission time and resources. Since accuracy cannot usually be determined simply from the face of such a record, the CPSC would have to take time to investigate each record requested in some depth. If information could not be disclosed until after a 30-day notice and comment procedure and a separate investigation of each record requested were carried out, then necessarily, a large proportion of CPSC records and its activities regarding them would remain secret for extended periods of time. That this secrecy would thwart the purposes of the FOIA is obvious, since the basic policy of the FOIA requires liberal and prompt disclosure of information, "EPA v. Mink", 410 U.S. 73, 7980 (1973); H.R. Rep. No. 876, 93d Cong., 2d Sess. 1, reprinted in (1974) U.S. Code Cong. & Ad. News 6267. Extended delays would also directly conflict with the specific requirement in the FOIA that agencies respond to requests within 10 working days by telling the requester whether or not records will be made available, and if not, giving reasons; and the requirement that agencies promptly release non-exempt records 5 U.S.C. 552(a) (6) and (a) (3). Applying section 6(b) (1) to FOIA requests would mean that the decision whether a record would be made available would have to await the conclusion of 6(b) (1) notice and comment and, in many cases, CPSC investigation. The 10-day period for response could become a period of months, and prompt disclosure would be impossible.

These policy and procedural conflicts between section 6(b) (1) and the FOIA can be exemplified by the results of applying section 6(b) (1) in the context of petitions for rulemaking under the CPSA. Under section 10 of the CPSA (15 U.S.C. 2059), any interested person may petition the Commission to issue a consumer product safety rule. Such a petition will contain factual information to support the allegation that there is a product hazard justifying regulation. (See Procedures for Petitioning under Section 10 of the Consumer Product Safety Act, 41 FR 43126, September 29, 1976.) Under section 10, the Commission has 120 days in which to decide whether to grant or deny such a petition. If, before disclosing a petition upon an FOIA request, the Commission must verify its accuracy under section 6(b) (1), then, logically, the decision to disclose the petition or not would have to come at the end of the period (i.e., up to 120 days) during which the Commission considers the petition's merits. If the petition were

eventually granted because the information had been substantiated, it could be released. If it were not substantiated, and were denied, it would have to be corrected or withheld according to section 6(b) (1). The result of applying section 6(b) (1) to an FOIA request for a copy of a petition which had just been filed, would be that the requester would not be informed within 10 days whether the petition could be released, but rather would have to wait for up to four months for an answer; meanwhile the public would not have access to the petition. The Commission does not believe that Congress can have intended it to withhold a petition for rulemaking from the public.

Another reason why section 6(b) (1) cannot be applied to FOIA requests is that the FOIA contains no exemption which would permit withholding records from disclosure on the basis of section 6(b) (1). In order to withhold a record from a requester, the record must fall within an exemption to the FOIA (5 U.S.C. 552(b) (1)-(b) (9)). The only FOIA exemption that provides for withholding on the basis of another statute is exemption 3, 5 U.S.C. 552(b) (3), as amended by the Government in the Sunshine Act, section 5(b) of Pub. L. 94-409, September 13, 1976, which provides that records may be withheld if they are

(3) specifically exempted from disclosure by statute (other than section 552b of this title) provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld.

Section 6(b) (1) contains no direction or discretion for the CPSC to withhold information either temporarily or permanently from an FOIA requester. Thus, it fails to meet the first requirement of exemption 3, that of being a statute which "specifically" (syn. "explicitly") exempts records from disclosure. See *People of the State of California v. Weinberger*, 505 F.2d 767 at 768 (9th Cir. 1974) in which the Court said, "It appears to us that when Congress used the word 'specifically,' it was requiring no more than that the exemption be found in the words of the statute rather than the implication of it." Section 6(b) does not mention "withholding;" nor does it provide any particular criteria or describe particular types of matters to be withheld.

One commentator has suggested that the requirements that the Commission take reasonable steps to assure accuracy of information to be disclosed which identifies a manufacturer or private labeler and to assure that disclosure is fair in the circumstances, and related to effectuating the purposes of the Act, may be "particular criteria" within the meaning of the exemption 3 of the FOIA. "Note, The Effect of the 1976 Amendment to Exemption Three of the Freedom of Information Act," 76 Col. L. Rev. 1027 at n. 100 (1976). The Commission does not consider "accuracy," "fairness," and "reasonably related to effectuating the pur-

poses of the Act" to be any more particular criteria than the "public interest" criterion for withholding contained in Statutes that Congress has stated are not to be considered within the ambit of exemption 3. (H.R. Rep. No. 1441, 84th Cong., 2d Sess. 14 (1976) (Conference Report)). Without either particular criteria or authority for the CPSC to withhold information for the months it will take to complete notice and comment procedures and CPSC investigation, or particular criteria for permanent withholding, section 6(b)(1) cannot qualify as an exemption 3 statute.

It may be argued that the policies and procedures of the FOIA can be altered to accommodate section 6(b)(1) procedures, but the Commission does not believe that this can be done without sacrificing the essentials of the Freedom of Information Act which are liberal and prompt disclosure. The Commission's interpretation that section 6(b)(1) applies only to publications and publicity it disseminates or distributes does not conflict with the purposes and policies of the FOIA. The CPSC controls the eventual content of such materials and can provide for 6(b)(1) notice and comment during their preparation. In fact, the Commission believes that the section 6(b)(1) requirements that CPSC take reasonable steps to assure accuracy of information it discloses which identifies a manufacturer or private labeler, and that disclosure is fair in the circumstances and reasonably related to effectuating the purposes of the Act, only make sense in the context of public disclosure of information through publications or publicity that the CPSC itself initiates. The Congress has recently expressed an interpretation of section 6(b) which agrees with the Commission's interpretation. The Conference Report pertaining to a 1976 amendment of section 29 of the CPSA (section 29 concerns cooperation with States and other Federal agencies) stated:

The requirement that the Commission comply with section 6(b) prior to another Federal agency's public disclosure of information obtained under the Act (CPSA) is not intended by the conferees to supercede or conflict with the requirements of the Freedom of Information Act (5 U.S.C. 552 (a)(3) and (a)(6)). The former relates to public disclosure initiated by the Federal agency while the latter relates to disclosure initiated by a specific request from a member of the public under the Freedom of Information Act. H.R. Rep. 1022, 94th Cong. 2d Sess. 27 (1976).

The procedures proposed are based upon this interpretation.

These procedures contain subparts which deal separately with notice and comment (Subpart B) and retractions (Subpart C) under section 6(b) of the CPSA. The separate treatment reflects the differing applicability of the two procedures. Section 6(b)(1) notice and comment procedures are applicable only when it is determined that product-related information to be published will enable the identity of a manufacturer

or private labeler to be readily ascertained. Also, section 6(b)(2) of the CPSA states certain exceptions to the applicability of notice and comment procedures. The section 6(b)(1) retraction provisions, however, are applicable whether or not the product safety information to be retracted identified a manufacturer or private labeler. The retraction provisions are not subject to the exceptions listed in section 6(b)(2).

Interested persons may participate in this proposed rulemaking by submitting written comments (preferably in five copies) to the Office of the Secretary, 1111 18th Street NW., Washington, D.C. 20207 until November 21, 1977. Late comments will be considered to the extent practicable. All comments in response to this proposal will be available for public inspection during normal business hours at the foregoing address.

Accordingly, under section 6(b) of the Consumer Product Safety Act (Pub. L. 92-573, 86 Stat. 1212; 15 U.S.C. 2055(b)), the Commission proposes to add the following Part 1013 to Title 16, Chapter II, Subchapter A:

PART 1013—PUBLICATIONS AND PUBLICITY

APPLICATION OF SECTION 6(b) OF THE CONSUMER PRODUCT SAFETY ACT

Subpart A—General

Sec.	
1013.1	Purpose and scope.
1013.2	Applicability.
1013.3	Definitions.
1013.4	Policy.
1013.5	Delegation of authority.

Subpart B—Procedures for Notice and Comment

1013.6	Applicability.
1013.7	Notice.
1013.8	Comments.
1013.9	Response to comments.

Subpart C—Procedures for Requesting Retraction or Correction

1013.10	Applicability.
1013.11	Requests for retraction or correction.
1013.12	Response to requests.

Subpart D—Appeal to the Commission

1013.13	Right to appeal.
1013.14	Notice of appeal.
1013.15	Record for review.
1013.16	Action upon a Commission decision.
1013.17	Right to appeal in cases of less than 30-day notice under Subpart C.

AUTHORITY: Sec. 6(b), Pub. L. 92-573; 86 Stat. 1212 (15 U.S.C. 2055(b)(1)).

Subpart A—General

§ 1013.1 Purpose and scope.

This part establishes procedures implementing section 6(b) of the Consumer Product Safety Act, as follows:

(a) Subpart B describes notice and comment procedures giving manufacturers and private labelers of consumer products an opportunity to comment on product-related information in proposed Consumer Product Safety Commission publications and publicity from which their identity will be readily ascertainable by the public. The procedures provide for correction of errors or misstate-

ments in publications or publicity before public disclosure.

(b) Subpart C describes procedures whereby manufacturers, private labelers, distributors, and retailers of consumer products may request a finding that the Consumer Product Safety Commission has made public disclosure of inaccurate or misleading information which reflects adversely upon their practices or upon the safety of their consumer product. The procedures provide for retraction or correction of the information upon such a finding.

§ 1013.2 Applicability.

This part applies to Consumer Product Safety Commission publications and publicity pertaining to consumer products including all materials, announcements, or speeches created or adopted by a Consumer Product Safety Commission officer or employee for dissemination to the general public or distribution to news media.

§ 1013.3 Definitions.

As used in this part:

(a) The term "Commission" means the five Commissioners of the Consumer Product Safety Commission;

(b) The term "CPSC" means the entire organization which bears the title, the "Consumer Product Safety Commission";

(c) The term "publications" means printed and photographic material, and public service announcements for television or radio broadcast, created or adopted by CPSC for dissemination to the public, and speeches by CPSC officers and employees;

(d) The term "publicity" means press releases or interviews furnished by CPSC personnel to news media for widespread public attention;

(e) The term "administrative proceeding" means an agency process as defined by paragraphs (5), (7), and (9) of 5 U.S.C. 551 (the Administrative Procedure Act);

(f) The term "Executive Director" means the Executive Director of the CPSC.

§ 1013.4 Policy.

In accord with the terms of section 6(b) of the Consumer Product Safety Act:

(a) It is the policy of the Commission to avoid identifying manufacturers, private labelers, or product brands in publications or publicity unless identification is necessary in order to effectuate the purposes of the Consumer Product Safety Act. When such identification is determined to be necessary, the procedures of Subpart B will be used to assure that matters to be publicly disclosed are stated accurately and fairly in the circumstances.

(b) The CPSC will retract or correct any statement made in its publications or publicity which it later finds to have been erroneous or misleading and to have reflected adversely on the safety of any consumer product or on the practices of

a manufacturer, private labeler, distributor, or retailer of consumer products. This policy will be followed whether such an error is discovered by CPSC staff or is brought to its attention through the procedures of Subpart C of this part.

§ 1013.5 Delegation of authority.

The Executive Director may delegate any of his or her duties under this Part 1013 with the exception of the duty to determine whether the public health and safety require less than 30-day notice prior to disclosure of information. See § 1013.7.

Subpart B—Procedures for Notice and Comment

§ 1013.6 Applicability.

(a) The procedures of Subpart B of this part apply when the identity of a manufacturer or private labeler will be readily ascertainable by the public from the content of a proposed CPSC publication or publicity, except as provided in § 1013.6(b).

(b) The procedures of Subpart B of this part do not apply to public disclosure of—

(1) Information about any consumer product with respect to which product the Commission has filed an action under section 12 of the Consumer Product Safety Act (relating to imminently hazardous products), or

(2) Information about any consumer product which the Commission has reasonable cause to believe is in violation of section 19 of the Consumer Product Safety Act (relating to prohibited acts), or

(3) Information in the course of or concerning any administrative or judicial proceeding under the Consumer Product Safety Act, or

(4) Information disclosed to duly authorized committees of Congress, or

(5) Information in a Corrective Action Plan agreed to by a manufacturer or private labeler and the Commission under 16 CFR Part 1116—Policy and Procedures Regarding Substantial Product Hazards (a manufacturer or private labeler who has agreed to such a Plan has already had notice and comment opportunities as to the information within it), or

(6) Information submitted to the Commission by a manufacturer or private labeler pursuant to section 15(b) of the Consumer Product Safety Act and regulations thereunder (dealing with the requirement that manufacturers, distributors and retailers inform the Commission of noncomplying or defective products). Obtaining comments from the person who submitted the information would be redundant.

(c) A decision of the Executive Director as to the applicability of Subpart B of this part is not appealable to the Commission.

§ 1013.7 Notice.

(a) In addition to using other existing internal CPSC review procedures for

accuracy, fairness, and legal sufficiency, officers of the Commission shall, prior to public disclosure, review all publications and publicity for which they are responsible, to assure conformance to the policies of this part. If an officer determines that it will be necessary for a publication or publicity to identify a manufacturer, private labeler, or product brand, or if the officer believes the identity of the manufacturer or private labeler will be readily ascertainable by the general public or he or she shall forward it to the Executive Director for application of the procedures of this Subpart.

(b) When the Executive Director determines that the identity of a manufacturer or private labeler will be readily ascertainable by the public from information pertaining to consumer products in a proposed publication or publicity, he or she shall, to the extent practicable, notify each such manufacturer or private labeler and provide a copy or summary of the information for comment. The notification shall be in writing except that it may be oral if the Executive Director determines time does not permit written notification. Any such oral notification shall be confirmed in writing.

(c) The notice shall give a date by which comments must be received by CPSC. This date shall be no less than 30 calendar days after the date of receipt of the notice unless the Executive Director determines, with the approval of the Commission, that in the interest of public health and safety, a lesser period is required. If a lesser period is required, the notice shall explain the reasons for it.

§ 1013.8 Comments.

(a) Any person receiving a notice of proposed disclosure of information pursuant to § 1013.7 may submit comments within the period specified in the notice. Comments taking issue with the accuracy of the information must be accompanied by supporting facts.

(b) Comments should be sent to the Executive Director, Consumer Product Safety Commission, Washington, D.C. 20207.

§ 1013.9 Response to comments.

(a) If no comments are received by the date set in the notice, the Executive Director may immediately thereafter release the publication or publicity for dissemination.

(b) If comments are timely received, the Executive Director shall make written findings of fact and determinations in response to the comments. The Executive Director shall make changes to the publication or publicity as necessary in view of the findings and determinations. The Executive Director may require the comments received to be disclosed along with the publication or publicity if he or she decides that such action is in the public interest.

(c) The Executive Director shall provide a notice of his or her decision, and a copy of the findings and determinations and changes made under this section, to all persons who received the notice. The notice of decision may be

given orally to the concerned manufacturer or private labeler; but if it is given orally, it shall be confirmed in writing. As part of the notice of decision, the Executive Director shall inform the manufacturer or private labeler of any right it has to appeal to the Commission pursuant to Subpart D of this part. If the Executive Director does not receive a notice of appeal of the decision within the period prescribed under Subpart D of this part, he or she may release the publication or publicity for dissemination to the public.

Subpart C—Procedures for Requesting Retraction or Correction

§ 1013.10 Applicability.

(a) The procedures of this Subpart C apply to any CPSC publication or publicity that is claimed to reflect adversely upon the safety of any consumer product or the practices of any manufacturer, private labeler, distributor, or retailer of consumer products except as provided in § 1013.9(b).

(b) The Executive Director will not entertain a request for retraction or correction under this subpart from any person who received a notice of proposed disclosure under § 1013.6, unless that person shows, or the Commission discovers, that new information or changed circumstances affect the accuracy or fairness of the information that was disclosed.

§ 1013.11 Requests for retraction or correction.

(a) A manufacturer, private labeler, distributor, or retailer adversely affected by a publication or publicity to which this Subpart applies may request a finding that information in the publication or publicity was inaccurate or misleading and request a retraction or correction of such information.

(b) Requests must be in writing, addressed to the Executive Director, Consumer Product Safety Commission, Washington, D.C. 20207, and must be accompanied by supporting facts.

§ 1013.12 Response to requests.

(a) The Executive Director shall consider requests for retraction or correction of information in CPSC publications and publicity and shall make findings of fact and determinations in response and provide them to the requester. If it is determined that information in a publication or publicity was inaccurate or misleading, the Executive Director shall publish a retraction or correction of the information in a manner similar to that in which it was disclosed. Publication of the retraction or correction shall be designed to reach at least as many members of the public as the original publication or publicity, and, to the extent possible, to reach the same members who received the original publication or publicity.

(b) When a request is received for retraction or correction of a publication or publicity disclosed in the course of or concerning a CPSC administrative or judicial proceeding, and the proceeding

is still in progress, the Executive Director may defer making a final decision on the request until the proceeding has concluded. This may be done only to the extent that the issues raised by the request are the issues which are to be resolved in the proceeding. If the answer is to be deferred, the Executive Director shall make a written determination to that effect and provide it to the requester.

(c) The final decision of the Executive Director under this Subpart C may be appealed pursuant to Subpart D of these rules. The final decision of the Executive Director shall inform the requester of the requirements of Subpart D of this part.

Subpart D—Appeal to the Commission

§ 1012.13 Right to appeal—Generally.

Except as described in § 1013.15, a company or its representative who has commented on a proposed publication or publicity under Subpart B of this part, or has requested retraction or correction of information under Subpart C of this part, may appeal for review of the Executive Director's final decision by the Commission.

§ 1013.14 Notice of appeal.

(a) A company or its representative shall have three days from the receipt of the Executive Director's final decision under Subpart B, § 1013.9(c), or Subpart C, § 1013.13 of this part, in which to appeal to the Commission. Notice of the appeal must be received by the Executive Director within the prescribed three days. In counting the three days, the day of receipt of the decision, Saturday, Sunday, and Federal holidays will not be included.

(b) Appeal shall be perfected by notice to the Executive Director. The notice shall be sufficient if it identifies the decision of the Executive Director and states that appeal is made. The notice may be oral or in writing by telegram or letter. An oral notice must be confirmed in writing.

§ 1013.15 Record for review.

(a) Upon receiving a notice of appeal, the Executive Director shall forward the record to the Commission for its review. The record shall consist of all relevant correspondence between the appellant and the Executive Director, and all other information relied upon by the Executive Director in making his or her decision.

(b) Review of the Executive Director's decision will be on the record described in paragraph (a) of this section.

§ 1013.16 Action upon a Commission decision.

(a) The Executive Director shall promptly notify the appellant of the Commission's decision on the appeal. Notice of the Commission's decision may be given orally, but must be confirmed in writing.

(b) The Executive Director shall carry out the action indicated in the Commission's decision.

(c) If the appeal was taken from a decision under Subpart B of this part, and

if on appeal the Commission has approved in whole or part, the Executive Director's decision to release a publication or publicity for dissemination, then the approved release may be made.

§ 1013.17 Right to appeal in cases of less than 30-day notice under Subpart C.

Whenever the Commission approves a decision by the Executive Director that the public health and safety require less than a 30-day notice and comment period under Subpart B (see, § 1013.6(c)), the Commission shall also decide whether or not the interests of public health and safety permit time to be taken for an appeal of the Executive Director's final decision responding to the comments. If the Commission decides that an appeal will not be allowed, then the Executive Director's final decision will be the final decision of the Commission. If the Commission decides that an appeal will be allowed, the Commission will, at the same time, determine the procedure to be followed for appeal; in such cases §§ 1013.13 through 1013.15 will not apply.

Interested persons are invited to submit, on or before November 21, 1977 written comments regarding this proposal. Comments and any accompanying data or material should be submitted, preferably in five copies, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Comments may be accompanied by a memorandum or brief in support thereof. Comments received by the Commission may be inspected in the Office of the Secretary, at 1111 18th Street NW., Washington, D.C., during working hours, Monday through Friday.

Dated: September 29, 1977.

RICHARD E. RAPP,
Secretary, Consumer Product
Safety Commission.

[16 CFR Part 1500]

LABELING REQUIREMENTS FOR CYANOACRYLATE-BASED GLUE

Proposed Exemption From Full Compliance With Labeling Requirements of Federal Hazardous Substances Act for Cyanoacrylate-Based Glue in Tube Sizes of 2 Grams or Less

AGENCY: Consumer Product Safety Commission.

ACTION: Proposed rule.

SUMMARY: The purpose of this document is to propose an exemption from full label compliance under the Federal Hazardous Substances Act (FHSA), for cyanoacrylate-based glue in package sizes of 2 grams or less. This exemption is being proposed since the Commission has preliminarily found that, because of the size of the package involved, full compliance with the labeling requirements applicable under the FHSA is impracticable and is not necessary for the

adequate protection of the public health and safety.

DATES: Comments on this proposed exemption should be submitted on or before November 4, 1977. If the Commission issues a final regulation concerning the exemption, the Commission proposes that the exemption be effective on the date the final regulation is published in the FEDERAL REGISTER.

ADDRESSES: Written comments, preferably in five copies, should be submitted to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Copies of all available material on this subject, including any comments that are received on this proposal, may be examined in the Office of the Secretary, Third Floor, 1111 18th Street, NW., Washington, D.C. 20207.

FOR FURTHER INFORMATION CONTACT:

Mark Gulak, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207. Telephone: 301-492-6754.

SUPPLEMENTARY INFORMATION:

BACKGROUND

Section 2(f)(1)(A) of the Federal Hazardous Substances Act (FHSA) (15 U.S.C. 1261(f)(1)(A)) provides that the term "hazardous substances" includes any substance or mixture of substances which is an irritant, if such substance or mixture of substances may cause substantial personal injury or substantial illness during, or as a proximate result of, any customary or reasonably foreseeable handling or use, including reasonably foreseeable ingestion by children.

Section 2(p) of the FHSA (15 U.S.C. 1261(p)) provides that a hazardous substance which is intended, or packaged in a form suitable, for use in the household or by children is misbranded if it does not bear a label stating certain specified information.

16 CFR 1500.121 describes in detail placement, conspicuousness, and contrast requirements for labeling under the FHSA. Section 1500.121(d) provides that, except for the signal word, statement of hazard, and instructions to read carefully cautionary information that may be placed elsewhere on the label, the remainder of the required information may be placed elsewhere than on the main panel of the immediate container. This section provides that the type size used must bear a reasonable relationship to the printing on the package panel involved, and must be no smaller than 10 point type, unless the available label space requires reductions, in which event this type size must be reduced to no smaller than 6 point type, unless because of small label space an exemption is granted under section 3(c) of the Act and 16 CFR 1500.82 and 16 CFR 1500.83.

The provisions for exemption provided by section 3(c) of the Act and 16 CFR 1500.82 and 16 CFR 1500.83 are applicable to this proposal. If the Consumer Product Safety Commission finds that,

because of the size of a package for a hazardous substance or because of the minor hazard presented to the public by this substance, or for other good and sufficient reasons, full compliance with the labeling requirements stated above is either impracticable or unnecessary for the adequate protection of the public health and safety, the FHSA provides for the issuance of regulations pursuant to 16 CFR 1500.83 exempting the substance from these labeling requirements to the extent that the labeling is consistent with the adequate protection of the public health and safety. By the provisions of 16 CFR 1500.83(a), any person who believes that a particular hazardous substance intended or packaged in a form suitable for use in the household or by children should be exempted from full label compliance, otherwise applicable under the Act, may submit to the Commission a request for an exemption pursuant to section 3(c) of the Act. Facts must be presented in support of the view that full compliance is impracticable or is not necessary for the protection of the public health.

The Commission must determine, on the basis of the facts submitted, and all other available information, whether the requested exemption is consistent with the adequate protection of the public health and safety. If the Commission so determines, it must detail the exemption granted and the reasons for granting it by an order published in the FEDERAL REGISTER.

In May 1974, the Consumer Product Safety Commission issued a notice announcing staff information based on testing of cyanoacrylate glues. This information indicated that cyanoacrylate-based glue is a "hazardous substance" within the meaning of that term under the Act because it is an "eye irritant." (39 FR 16511, May 9, 1974) Therefore, any such glue was deemed "misbranded" under section 2(p) of the Act unless it was properly labeled in accordance with 16 CFR 1500.121 as described above.

PETITION

On November 11, 1975, the Consumer Product Safety Commission received a petition from Wilhold Glues Inc. of Santa Fe Springs, California, requesting an exemption from full label compliance under the Federal Hazardous Substances Act for its cyanoacrylate-based glue in the 2 gram size tube. The petition stated that the size of the package made it impracticable to show all of the required labeling in the minimum 6 point type (as required by 16 CFR 1500.121).

Having considered this petition, and information obtained by the Commission staff pertinent to the requested exemption, the Consumer Product Safety Commission concludes that an exemption should be proposed as set forth below. It is proposed that this exemption include all glues with a cyanoacrylate base sold in sizes of 2 grams or less.

The Commission's decision to propose this exemption is based principally on the preliminary findings that full label compliance is both impracticable, due to

the size of the package, and unnecessary for the adequate protection of the public health.

The Commission believes that any risk of injury of eye irritation to the public associated with cyanoacrylate glues could adequately be mitigated by the placement on the main label panel of the signal word, statement of hazard, and instructions to read additional warnings elsewhere on the immediate container, as well as the requirement that additional warnings be placed elsewhere on the immediate container and on any outer package, accompanying leaflet, and display card. Under the proposed exemption, additional labeling required by the Act need not appear on the main label panel provided such warnings appear elsewhere on the label in legible type and appear on the outer package, accompanying leaflet and display card in accordance with the placement, conspicuousness, and contrast requirements of 16 CFR 1500.121.

CONCLUSION AND PROPOSAL

The Commission proposes that this exemption be granted under section 3(c) of the Federal Hazardous Substances Act and 16 CFR 1500.82, and 16 CFR 1500.83. Provided, That: (1) The immediate container bears both the proper signal word and a statement of the principal hazard or hazards associated with this product fully in accordance with 16 CFR 1500.121. This means that the signal word, in this instance either "WARNING" or "CAUTION," must appear on the main label panel of the product and must appear in accordance with the placement, conspicuousness and contrast requirements specified at 16 CFR 1500.121. A statement of the principal hazard or hazards associated with the product must also appear on the main label panel of the product in accordance with the placement, conspicuousness and contrast requirements specified at 16 CFR 1500.121; (2) the immediate container must also bear instructions to read additional warnings elsewhere on the label and on any outer package, accompanying leaflet, and display card. Thus, any precautionary measures required by section 2(p)(1) of the Act, describing the action to be followed or avoided, instructions for first-aid treatment, and the statement "keep out of the reach of children," or its practical equivalent, need not appear on the main label panel, and need not comply with the minimum type size requirements when appearing elsewhere on the immediate container label. However, instructions to read these additional warnings must be placed on the main label panel along with the required signal word and statement of hazard or hazards, in accordance with the requirements of 16 CFR 1500.121; and (3) the remainder of the cautionary labeling required by the Act, must appear elsewhere on the immediate container and must appear on any outer package, accompanying leaflet, and display card in accordance with the requirements of 16 CFR 1500.121. These

additional warnings must conform with the requirements provided in 16 CFR 1500.121, except that the type size required for this labeling on the immediate container label may be less than six point type, provided it is legible. If there is no outer package, accompanying leaflet, or display card, then the remainder of the required cautionary labeling must be displayed by means of a tag or other suitable material that is securely affixed to the article so that the labeling will remain attached throughout the conditions of merchandising and distribution to the ultimate consumer. The size, placement, and conspicuousness of these statements must conform with paragraphs (a), (c), and (d) of § 1500.121.

Accordingly, pursuant to provisions of the Federal Hazardous Substances Act (sections 2(f), (p), 3(c), 10(a); 74 Stat. 372, 374, 375, 378, as amended 80 Stat. 1304-05, 83 Stat. 187-89 (15 U.S.C. 1261(f), 1262(p), 1269(a), and under authority vested in the Commission by the Consumer Product Safety Act (Pub. L. 92-573, section 30(a), 86 Stat. 1231; 15 U.S.C. 2079(a)), the Commission proposes to add an additional exemption to those provided at 16 CFR 1500.83(a), as follows: (The text of the introductory portion of § 1500.83(a) is included for context.)

§ 1500.83 Exemptions for small packages, minor hazards, and special circumstances.

(a) The following exemptions are granted for the labeling of hazardous substances under the provisions of § 1500.83:

(37) Glues with a cyanoacrylate base packaged in containers of 2 grams or less are exempt from the requirement of 16 CFR 1500.121(d) that labeling, other than the signal word and statement of hazard may appear elsewhere than on the main label panel in type size no smaller than 6 point type: Provided, That:

(i) The main panel of the immediate container bears both the proper signal word and a statement of the principal hazard or hazards associated with this product, as provided by 16 CFR 1500.121 (a) and (c);

(ii) The main panel of the immediate container also bears instructions to read additional warnings elsewhere on the label or on any outer package, accompanying leaflet, and display card. The instructions to read additional warnings must appear in accordance with the placement, conspicuousness, and contrast requirements specified at 16 CFR 1500.121; and

(iii) The remainder of the cautionary labeling required by the Act must appear elsewhere on the label in legible type and must appear on any outer package, accompanying leaflet, and display card, in accordance with the placement, conspicuousness, and contrast requirements specified at 16 CFR 1500.121. If there is no outer package, accompanying leaflet, or display card, then the remainder of the required cautionary labeling must be

displayed by means of a tag or other suitable material that is securely affixed to the article so that the labeling will remain attached throughout conditions of merchandising and distribution to the ultimate consumer. The size, placement, and conspicuousness of these statements must conform with paragraphs (a), (c), and (d) of § 1500.121.

Interested persons are invited to submit written data, views, or arguments regarding any aspect of the proposal on or before November 4, 1977. Comments submitted after this date will be considered to the extent practicable. Comments should be accompanied, to the extent possible, by supporting data or documentation. Requests for confidentiality of documentation will be handled in accordance with the Freedom of Information Act as amended (5 U.S.C. 552), the Commission's regulations under that Act (16 CFR Part 1015, 42 FR 10490) and the provisions of section 6(a)(2) of the Consumer Product Safety Act (15 U.S.C. 2055 (a)(2)). Comments may be supported by a memorandum or brief.

Written comments and any accompanying data or materials should be submitted, preferably in five copies, to the Office of the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

Any comments that are received, and all other material which the Commission has that is relevant to this proceeding, may be seen in, or copies obtained from, the Office of the Secretary, Third Floor, 1111 18th Street, NW., Washington, D.C. 20207.

Dated September 29, 1977.

RICHARD E. RAPPS,
Secretary,
Consumer Product
Safety Commission.

DEPARTMENT OF THE TREASURY

Customs Service

[19 CFR Part 6]

AIR COMMERCE REGULATIONS

Proposed Amendment to Customs Regulations Pertaining to Permits To Proceed for Foreign-Registered Aircraft

AGENCY: United States Customs Service, Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed amendment would require foreign-registered private aircraft arriving from outside the United States to obtain a permit from Customs before proceeding from the airport of entry to any other airport in the United States. These permits are now required only for foreign-registered commercial aircraft. The purpose of the proposal is to facilitate enforcement of Customs laws by providing information on the movement of foreign-registered private aircraft between airports in the United States.

DATES: Comments must be received on or before November 4, 1977.

ADDRESS: Comments should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Donald H. Reusch, Attorney, Carriers, Drawback and Bonds Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202-566-5706).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Under Customs Regulations, § 6.2(d) (1) (19 CFR 6.2(d)(1)) requires a foreign-registered aircraft not treated as an imported article to obtain a permit to proceed from the airport of first arrival to one or more airports in the United States if it arrives in the United States carrying passengers for hire or merchandise (that is, for commercial aircraft), and is to proceed without passengers or merchandise; and § 6.9 (19 CFR 6.9) requires any commercial aircraft to obtain a permit to proceed from the airport of first arrival to one or more airports in the United States if the aircraft arrives in the United States carrying merchandise and is to proceed with merchandise.

Foreign-registered private aircraft, however, arriving from outside the United States may proceed after reporting at the airport of first arrival to as many United States airports as desired without any Customs control. The term "private aircraft" means those aircraft engaged in a personal or business flight to or from the United States and not carrying passengers or cargo for compensation or hire, nor departing from the United States to load passengers or cargo for compensation or hire. Examples are corporate aircraft and aircraft used by individuals exclusively for pleasure purposes.

Without requiring a permit to proceed, the Customs Service has no way of monitoring the movement of foreign-registered private aircraft in the United States including aircraft suspected of smuggling. Also, if the aircraft were sold while in the United States, duty on the aircraft may not be collected as Customs may not be aware of the sale.

To assist in the enforcement of the laws administered by the Customs Service, it is proposed to extend the permit-to-proceed requirement now applicable to foreign-registered commercial aircraft arriving from outside the United States to foreign-registered private aircraft as well.

This amendment is proposed under the authority of R.S. 251, as amended (19 U.S.C. 66), section 624, 46 Stat. 759 (19 U.S.C. 1624), and section 1109, 72 Stat. 799, as amended (49 U.S.C. 1509).

COMMENTS

Before adopting this proposed regulation, consideration will be given to any

written comments that are timely submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)) during regular business hours at the Regulations and Legal Publications Division, Headquarters, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this proposed regulation was Richard M. Belanger, Attorney, Regulations and Legal Publications Division of the Office of Regulations and Rulings, United States Customs Service. However, personnel from other offices of the United States Customs Service participated in developing the regulation, both on matters of substance and style.

PROPOSED AMENDMENT

PART 6—AIR COMMERCE REGULATIONS

It is proposed to amend the second sentence of § 6.2(d)(1) of the Customs Regulations (19 CFR 6.2(d)(1)) to read as follows:

§ 6.2 Landing requirements.

(d) Permit to proceed; foreign aircraft.

(1) * * * Except as provided in § 6.9, before any aircraft which is not treated as an imported article and which is registered in a foreign country proceeds from the airport of first arrival to one or more airports in the United States, its commander shall obtain from the district director at the airport of first arrival a permit to proceed on Customs Form 7507 allowing the aircraft to proceed from airport to airport in the United States, which shall be retained on board the aircraft while in the United States. * * *

G. R. DICKERSON,
Acting Commissioner of Customs.

Approved: August 29, 1977.

Bette B. Anderson,
Under Secretary
of the Treasury.

DEPARTMENT OF AGRICULTURE

Forest Service

[36 CFR Part 214]

YOUTH CONSERVATION CORPS PROGRAM

Grants to States for Establishment

AGENCY: Forest Service, USDA.

ACTION: Proposed rulemaking.

SUMMARY: The Youth Conservation Corps Act of 1970 provided for a 3-year pilot program to be carried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Pub. L. 92-597 amended

the 1970 act to include a pilot program (beginning in FY 1974) under which grants shall be made to States, to assist them in meeting the cost of Youth Conservation Corps projects on non-Federal public lands and waters within the States. Pub. L. 93-408 made the Youth Conservation Corps program permanent. This document proposes revisions to the present regulations which are necessary to assure a closer alignment between Federal and State grant program characteristics and to update current procedures to reflect policy and grants-in-aid requirements.

DATE: Comments must be received on or before November 4, 1977.

ADDRESS: Send Comments to: Director, Human Resource Programs, Forest Service, USDA, P.O. Box 2417, Washington, D.C. 20013. Comments will be available for public review in Room 2117, Auditors Building, 14th and Independence Avenues, SW., from 8:15 a.m. to 4:45 p.m. on regular working days.

FOR FURTHER INFORMATION CONTACT:

Hollis Hardy, (202-447-7783).

SUPPLEMENTARY INFORMATION: Since the enactment of Pub. L. 93-403, the Youth Conservation Corps (YCC) grants-in-aid program has grown markedly. Though interim regulations and final regulations were published in 1974 and 1975 respectively, recently proposed policies and procedures for the State grant component appear to be advisable. This revision is proposed jointly by the Department of Agriculture and the Interior. The Department of the Interior will publish the same revision under Title 43 of the Code of Federal Regulations, Subtitle A, Part 26.

NOTE.—The Department of Agriculture has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

It is proposed to revise 36 CFR Part 214 as follows:

PART 214—GRANTS TO STATES FOR ESTABLISHING YOUTH CONSERVATION CORPS PROGRAM

- Sec.
- 214.1 Introduction.
- 214.2 Definitions.
- 214.3 Program purpose and objectives.
- 214.4 Legislation.
- 214.5 Administrative requirements.
- 214.6 Request for grant.
- 214.7 Application format and instructions.
- 214.8 Program reporting requirements.
- 214.9 Consideration and criteria for awarding grants.

AUTHORITY: Sec. 4, 86 Stat. 1320, as amended, 88 Stat. 1067.

§ 214.1 Introduction.

(a) The Youth Conservation Corps (YCC) is a program of summer employment for young men and women, aged 15 through 18, who work, earn, and learn together by doing projects which further the development and conservation of the natural resources of the United States.

The Corps is open to youth of both sexes, and youth of all social, economic, and racial classifications who are permanent residents of the United States, its territories, possessions, or trust territory.

(b) The Youth Conservation Corps Act of 1970 (Pub. L. 91-378) provided for a 3-year pilot program to be carried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Pub. L. 92-597 amended the 1970 Act to include a pilot program (beginning in FY 1974) under which grants shall be made to States to assist them in meeting the cost of Youth Conservation Corps projects on non-Federal public lands and waters within the States. Pub. L. 93-408 made the Youth Conservation Corps program permanent.

§ 214.2 Definitions.

(a) Terms used in these Regulations are defined as follows:

(1) *Act*. The Youth Conservation Corps Act of 1970, Pub. L. 91-378, as amended.

(2) *Secretaries*. The Secretaries of Agriculture and the Interior, or their designated representatives, who jointly administer the grant program. Within the Department of Agriculture, the YCC program is administered by the Forest Service; within the Department of the Interior it is administered by the Office of Manpower Training and Youth Activities.

(3) *States*. Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, American Samoa and the Commonwealth of the Northern Marianas Islands.

(4) *Grant*. Money or property provided in lieu of money, paid or furnished by the Secretaries pursuant to the Act, to a State to carry out YCC programs on non-Federal public lands and waters. The amount of any grant shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 percentum of the cost (as determined by the Secretaries) of said project.

(5) *Grantee*. Any State which is a recipient of a Federal grant for the operation of a YCC program.

(6) *Sub-Grantee*. Any public organization, municipality, or agency which successfully applied through a State for the operation of a Youth Conservation Corps project within that State.

(7) *Contractor*. Any public agency or organization or any private non-profit agency or organization which has been in existence for at least 5 years which operates a YCC project for a grantee or sub-grantee.

(8) *Program agent*. Agency, Bureau, or Department designated by the Governor to have program responsibility for all aspects of YCC operations in that State except for those projects conducted under Federal auspices. Responsibility may be redelegated by the Agency, Bureau, or Department Head. Such redele-

gation must be made in writing to the Secretaries.

(9) *State Grant Program*. That part of the YCC program carried out on non-Federal lands and waters by States receiving YCC grants-in-aid.

(10) *Project*. The operating unit or camp of the State YCC grant program, either of residential or nonresidential program type, as follows:

(i) *Residential project*. One in which youths reside either seven or five days per week at a camp on or adjacent to the public lands where they conduct their work-education program.

(ii) *Nonresidential project*. One in which youths reside at home and daily commute to the public lands to conduct their work-education program.

(iii) For purposes of establishing a Federal/State cost sharing ratio, a project is defined as all YCC operations within a State which are carried out on non-Federal public lands and waters.

(11) *Operating year*. January 1 through December 31.

(12) *Non-Federal public lands and waters*. Any lands or waters within the territorial limits of a State owned either in fee simple by a State or political subdivision thereof or over which a State or political subdivision thereof has, as determined by the Secretaries, sufficient long-term jurisdiction so that improvements made as the result of a grant will accrue primarily to the benefit of the public as a whole. Federally-owned public lands and waters administered by a State or political subdivision thereof under agreement with a Department or Agency of the Federal Government are eligible under such definition if the Secretaries determine that the State or political subdivision thereof is entitled to or is likely to retain administrative responsibility for an extended period of time sufficient to justify classification as non-Federal public lands or waters.

§ 214.3 Program purpose and objectives.

(a) The purpose of the Act is to further the development and maintenance of the natural resources of the United States by American youth and in so doing prepare them for the ultimate responsibility of maintaining and managing these resources for the American people. The Departments of Agriculture and the Interior have stressed the following three equally important objectives of the Youth Conservation Corps as reflected in the law:

(1) Accomplish needed conservation work on public lands.

(2) Provide gainful employment for 15 through 18 year old males and females from all social, economic, and racial backgrounds.

(3) Develop an understanding and appreciation in participating youths of the Nation's environment and heritage.

(b) These objectives will be accomplished in a manner that will provide the youth with an opportunity to acquire increased self-dignity and self-discipline, better work with and relate with peers

and supervisors, and build lasting cultural bridges between youth from various social, ethnic, racial and economic background.

(c) Each YCC project will, to the maximum extent possible as determined by the Secretaries' representatives, have the following characteristics:

(1) A properly balanced and integrated environmental-work learning program in which environmental knowledge and awareness derives principally from meaningful work activities on public lands.

(2) A mixture of youth of both sexes from various social, economic, ethnic, and racial backgrounds which is representative of the youth residing within the recruiting area.

(3) A group living component wherein enrollees have an opportunity to relate to each other and staff during non-working hours in activities which promote social interaction and group learning.

(4) An enrollment of sufficient size (not less than 10 enrollees) that will permit social interaction and group learning. The program encourages camps of a size of 20 to 50 enrollees as the most desirable size.

§ 214.4 Legislation.

State programs must meet all of the requirements of Section 4 of the Act. Section 4 of the Act which applies to the grant program reads as follows:

Sec. 4(a). The Secretary of the Interior and the Secretary of Agriculture shall jointly establish a program under which grants shall be made to States to assist them in meeting the cost of projects for the employment of young men and women to develop, preserve, and maintain non-Federal public lands and waters within the States. For purposes of this section, the term "States" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa.

(b) (1). No grant may be made under this section unless an application therefor has been submitted to and approved by, the Secretary of the Interior and the Secretary of Agriculture. Such application shall be in such form, and submitted in such manner, as the Secretaries shall jointly by Regulations prescribe and shall contain:

(A) Assurances satisfactory to the Secretaries that individuals employed under the project for which the application is submitted shall: (i) Have attained the age of fifteen but not attained the age of nineteen, (ii) be permanent residents of the United States or its territories, possessions, or Trust Territory of the Pacific Islands, (iii) be employed without regard to the personnel laws, rules, and regulations applicable to full-time employees of the applicant, (iv) be employed for a period of not more than ninety days in any calendar year, and (v) be employed without regard to their sex or social, economic, or racial classification; and

(B) Such other information as the Secretaries may jointly by Regulation prescribe.

(2) The Secretaries may approve applications which they determine (A) meet the requirements of paragraph (1), and (B) are for projects which will further the development, preservation, or maintenance of the non-Federal public lands or waters within the jurisdiction of the applicant.

(c) (1) The amount of any grant under this Section shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 percentum of the cost (as determined by the Secretaries) of such project.

(2) Payments under grants under this section may be made in advance or by way of reimbursements and at such intervals and on such conditions as the Secretaries find necessary.

(d) Thirty percentum of the sums appropriated under Section 6 for any fiscal year shall be made available for grants under this section for such fiscal year.

§ 214.5 Administrative requirements.

The following administrative requirements must be met: (a) Recruitment will be conducted in a manner designed to assure (1) a full opportunity for all America's youth to participate in the Youth Conservation Corps, and (2) specific outreach efforts to attract minority and disadvantaged youth. The grantee and sub-grantee will assure that the YCC program is open to all eligible youth from all parts of the State including urban and rural youth of both sexes and youth of all social, economic, racial and ethnic classifications. A well-balanced YCC camp enrollment should also include representation of non-public school youth, the disadvantaged, and youth having quit school before graduation.

The grantee will conduct, or will permit to be conducted, a selection system which will assure that applicants will be selected on a random basis, without bias because of race, creed, color, religion or national origin. To insure coeducational projects, stratification of applicants by sex, prior to selection, is required. To insure that the program will reach the largest number of youth, the grantee will assure that not more than 10 percent of the selected enrollees have been YCC enrollees in previous years and that all returnees shall be designated as youth leaders and paid an increment of at least \$1.50 per day above the normal wage.

(b) To the maximum extent practicable enrollees should be selected from an area within one day's surface travel from their residence to a YCC camp.

(c) Capital outlays for facilities should be kept at a minimum. No grant is to be made for construction of residential facilities other than to provide temporary facilities and their necessary basic infrastructure and necessary renovation or modification of existing facilities.

(d) Operation of YCC projects during non-summer periods may be authorized by the Secretaries when it can clearly be demonstrated that enrollment will not interfere with the established educational systems.

(e) The enrollee is an employee of the grantee or subgrantee. The enrollee pay plan must comply with Federal or State minimum wage laws whichever may be higher. To the maximum extent practicable, State YCC enrollees should receive the same hourly rate of pay as Federal YCC enrollees. Grantees will insure that enrollees are engaged in 40 hours of work-learning activities each week, 10

hours of which will be environmental awareness. The Federal Government will cost share enrollee salary up to the equivalent of 30 hours per week.

(f) Grantees must provide for an effective accident control, health, and safety program. As a minimum, grantees shall follow U.S. Department of Labor Bulletin No. 101, "A Guide to Child Labor Provisions of the Fair Labor Standards Act".

(g) Grantees will have a financial management system which will provide the information called for in Attachment G of Federal Management Circular (FMC) 74-7.

(h) "Request for Advance or Reimbursement" as outlined in FMC 74-7, Attachment H, item 4(a), will be used to obtain an advance to start and/or maintain the program. It can also be used to obtain a reimbursement during or at the end of a project. An advance, not to exceed one month's needs, may be made after approval of the grant application.

(i) Grantees will prepare a "Financial Status Report" required by FMC 74-7, Attachment H, item 3(a), twice for each operating year. These reports will be prepared on a cash basis using the same functional headings as those used in preparing Part II of the application for Federal Assistance. Instructions and forms will be supplied each grantee at the time of grant award. Grantees shall require similar reports from all sub-grantees and contractors to facilitate their own reporting to the grantor agencies. The two reports required of the grantee are:

(1) An "Interim Financial Status Report" prepared as of September 30 and mailed in time to reach the Secretaries by October 30 of each operating year.

(2) A "Final Financial Status Report" prepared as of December 31 of each operating year. This report will be forwarded in time to reach the Secretaries by March 31 of the following operating year.

(j) Allowable costs under the grant program are defined in FMC 74-7 and FMC 74-4.

(k) Records retention and custodial requirements for records are prescribed by Attachment C to FMC 74-7.

(l) Because of the short duration of each project, budget revisions normally should be unnecessary; however, if a budget revision becomes necessary, the grantee will be governed by Attachment K of FMC 74-7.

(m) Grantees shall comply with the provisions of Attachments O and N of FMC 74-7 in regard to nonexpendable personal property and procurement standards.

(n) The Secretaries or their designees shall periodically review the conduct of the program of the State.

(o) Grantees will supervise those projects in the State being administered by sub-grantees and contractors. Sub-grantees and contractors will be required to operate in accordance with the procedures outlined in these regulations and the grant agreement with the State.

Periodic inspection of sub-grantee projects will be made by the grantee under the direction of the Program Agent or his designee. Grantees or sub-grantees may contract with a qualified non-profit agency or organization for the operation of their YCC project.

(p) Grantees will meet the audit requirements of Attachment G to FMC 74-7 and will require the same of sub-grantees. Copies of audits will be made available to the Secretaries upon request.

(q) If the grantee fails to comply with the grant award stipulations, standards, or conditions, the Secretaries may jointly suspend the grant pending corrective action. Subsequent to or during any period of suspension of the grant, the Federal Government shall not be obligated to reimburse the grantee for any incurrence of obligations other than direct salaries of enrollees and then only for a period of time which both the Secretaries shall determine to be reasonable. In addition, the Secretaries may jointly terminate the grant. Termination shall be effective by a notice of termination. Upon receipt of a notice of termination, the grantee shall:

(1) Discontinue further commitments of grant funds.

(2) Cancel all sub-Grants or contracts, where possible, scheduled for payment with grant funds.

(3) Supply either of the Secretaries within 90 days after receipt of the notice of termination, a final financial statement, along with a refund check for any unused portion of funds advanced, or request for reimbursement for allowable expenditures incurred in the grant program.

§ 214.6 Request for grant.

(a) Of the amount available for Youth Conservation Corps projects, 30 percent will be allocated for State projects. All States will be given an opportunity to participate in the program. Allocated funds not needed by a State will be re-allocated based on the merits of proposals submitted in accordance with paragraph (c) of this section or a pre-application in accordance with Attachment M of FMC 74-7. All proposed projects should be listed by priority. Grant funds are for State projects only. A grant to a State must be matched by the State for each project. Matching can consist of either direct expenditures or services of an in-kind nature.

(b) Pursuant to section 4(c) (1) of Pub. L. 93-408, States may receive grants up to but not to exceed 80 percent of the cost of funding any project from the Federal Government.

(c) Application for Federal Assistance (Standard Form 424) will be used by applicants in applying for grants under this program. Application forms will be supplied to Program Agents. Only a Program Agent may submit an application. A single grant application (Parts I, II, IV, V) must be submitted for the entire summer program within each State. Parts II, III, and VI are required for

each project included in the grant application. A separate application must be used for non-summer projects. A non-summer project is defined as one which extends beyond October 1, or beginning prior to May 1.

(d) The Secretaries have designated individuals in each State who will jointly represent them. Grant applications (original and six copies) must be submitted to the designated representative of either Secretary. January 1 has been established as the deadline date for acceptance of applications for each operating year. Names and addresses of designated representatives will be furnished to each State. The Secretaries' representatives must jointly approve grant proposals. Approval or disapproval of proposals will be documented by a formal letter to the Program Agent. The Secretaries' representatives will also be available for technical assistance and advice.

§ 214.7 Application format and instructions.

Grant applications must be made using the Office of Management and Budget approved form (SF-424) entitled "Federal Assistance." General instructions for completing the form by part numbers follow. Specific instructions and requirements which must be followed are included in the Secretaries' State Grant Procedures Handbook.

(a) Part I—(SF-424 Cover Sheet, Sections I and II) shall be completed.

(b) Part II—(Budget Data) lines 1-8 need not be used. However, the following information is needed relative to the YCC program. Please prepare a supplemental sheet using the following functional headings:

General Staff Pay
Enrollee Pay
Food

Work Project Costs
Travel and Transportation
Program Direction

A description of the items to be included under each of these functional headings are:

General. Include expenditures for (1) Capital Improvement (camp facilities and improvement), (2) other (medical, first aid expense, utilities, maintenance costs, recreation, all supplies not otherwise identified, training), (3) camp opening and closing costs.

Staff pay. Includes pay and benefits net any deductions made for meals and quarters furnished.

Enrollee pay. Includes pay and benefits of enrollees.

Food. Includes cost of food and related freight charges.

Work project costs. Safety equipment and work and environmental awareness supplies and materials.

Travel and transportation. Includes transportation of enrollees and staff to and from project sites and both intrastate and interstate travel for purposes of program direction and training.

Program direction. Includes support services and program administration expenses at locations other than at projects. The total of the above categories should be entered on line 9 of Part II and the rest of Part II completed.

The grantee agrees that any facility which is utilized in the performance of this grant is not listed on the EPA List of Violating Facilities pursuant to 40 CFR, part 15.20.

The recipient certifies that no owner or operator of a facility which he proposes to utilize in connection with this grant, has been notified that the facility has been listed on the EPA List of Violating Facilities pursuant to the provisions of the EPA in 40 CFR, Part 15.20, and that this same certification will be obtained from subgrantees or sub-contractors benefiting from this grant.

The grantee agrees that any facility which is utilized in the performance of this grant is not listed on the EPA List of Violating Facilities pursuant to 40 CFR, part 15.20.

Indirect costs. Compute the appropriate allowance for indirect costs on line 15 and enter amount on line 10. Grantee must have an approved indirect cost rate applicable to the grant period. A copy of the approved indirect expense plan should be included in the grant application.

(c) Part III—(Program Narrative Statement) should include the following information:

(1) Location of project (address and county).

(2) Distance to nearest town; name of town.

(3) Number of youth planned for project.

(4) Type of project (7-day residential, 5-day residential, nonresidential, other).

(5) Length of session (i.e., number of weeks) and proposed beginning and ending dates.

(6) Description of living conditions (types of facilities, age, condition, tents, cabins, dormitories).

(7) Project Staff (number and position titles).

(8) Complete calculation for daily rate of enrollee pay including deduction for food and lodging (if any).

(9) Description of health and safety program.

(10) Description of enrollee and staff recruiting and selection systems including description of affirmative action measures to be taken to assure that minority and other disadvantaged persons receive equal opportunity and consideration.

(11) Description of the work-learning program including the types of work projects that will be available (an integrated environmental work-learning program is required wherever possible as determined by the Secretaries' representatives).

(12) States agreement to administer tests, conduct interviews, or otherwise assist the Federal Government in collecting data on the grant program. The data is to be used for the required report to the President and Congress in accomplishing the purposes of the Act. A statement to this effect must be written into the proposal by the applicant.

(d) Part IV—(Assurances) is pre-printed within Attachment M, FMC 74-7 and is to be included as part of the application. The following assurances are not preprinted and must be included by the grantee in the grant application:

(1) EPA Required Certification if the application is for \$100,000 or more (40 CFR 15):

The recipient certifies that no owner or operator of a facility which he proposes to utilize in connection with this grant, has been notified that the facility has been listed on the EPA List of Violating Facilities pursuant to the provisions of the EPA in 40 CFR, Part 15.20, and that this same certification will be obtained from subgrantees or sub-contractors benefiting from this grant.

The grantee agrees that any facility which is utilized in the performance of this grant is not listed on the EPA List of Violating Facilities pursuant to 40 CFR, part 15.20.

In the event the grantee fails to comply with clean air or water standards at such facilities, the grant may be cancelled, terminated for default or suspended for such failure, in whole or in part, and the Government may refrain from further granting with the grantee.

The grantee agrees to comply with all the requirements of Section 114 of the Air Act and Section 308 of the Water Act relating to inspection, monitoring, entry, reports, and information as well as all other requirements specified in Section 114 and Section 308, respectively, and all regulations and guidelines issued thereunder.

The grantee agrees to promptly notify the awarding official of the receipt of any notice from the Director, Office of Federal Activities, Environmental Protection Agency, indicating that any facility utilized or to be utilized under the grant is under consideration for listing on the EPA List of Violating Facilities.

The grantee further agrees to insert, in any subgrant thereunder, unless otherwise exempted pursuant to the EPA Regulations implementing the Air or Water Acts (40 CFR 15.5) provisions which shall include this statement. The grantee shall take such action as the Government may direct as a means of enforcing such provisions.

(2) The Federal/State cost sharing ratio established by the approval of this grant application shall remain in effect for the duration of the operating year, unless modified prior to December 31 in accordance with Attachment K to Federal Management Circular 74-7.

(3) In a format prescribed by the Secretaries' representatives, the grantee agrees to provide by July 15, but not later than 14 days following project opening, detailed information on the demographic characteristics of youths enrolled in the State grant program.

(e) Part V—A camp or project profile for each project must be submitted with the application.

§ 214.8 Program reporting requirements.

(a) Monitoring and reporting of program performance will be in accordance with Attachment I of FMC 74-7. Grantees will submit performance reports with the final Financial Status Report to either of the Secretaries' representatives. This final performance report is due by March 30. An interim performance report is due not later than October 30. For non-summer projects, the final report is due 90 days after termination of the project. The performance report will include the number of youth enrolled in the project, number of weeks of camp operation, youth loss rate, value of work accomplished by resource category (for example, timber management, recreation, etc.), hours of youth work-learning experience by resource category and value of work supplies and materials by resource category.

(b) The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

§ 214.9 Consideration and criteria for awarding grants.

The decision by both of the Secretaries' representatives on grants to individual States will consider the following:

- The amount of grant funds appropriated and available.
- The quality of the proposed program in terms of meeting program characteristics and objectives.
- The overall cost per enrollee 8-week position.
- Actual prior performance of the States in administering YCC projects.
- The performance of the grantee in meeting the conditions of the grant and the requirements of FMC 74-4 and FMC 74-7.

M. RUPERT CUTLER,
Assistant Secretary.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[43 CFR Part 26]

YOUTH CONSERVATION CORPS PROGRAM

Grants to States for Establishment

AGENCY: Office of Manpower Training and Youth Activities, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The Youth Conservation Corps Act of 1970 provided for a 3-year pilot program to be carried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Pub. L. 92-597 amended the 1970 act to include a pilot program (beginning in FY 1974) under which grants shall be made to States, to assist them in meeting the cost of Youth Conservation Corps projects on non-Federal public lands and waters within the States. Pub. L. 93-408 made the Youth Conservation Corps program permanent. This document proposes revisions to the present regulations which are necessary to assure a closer alignment between

Federal and State grant program characteristics and to update current procedures to reflect policy and grants-in-aid requirements.

DATE: Comments must be received on or before November 4, 1977.

ADDRESS: Send comments to: Director, Office of Manpower Training and Youth Activities, 18th & C Sts., NW., Washington, D.C. 20240. Comments will be available for public review in Room 2419, at the above address from 7:45 a.m.-4:15 p.m. on regular working days.

FOR FURTHER INFORMATION CONTACT:

Vivian Bower, (202-343-3865.)

SUPPLEMENTARY INFORMATION: Since the enactment of Pub. L. 93-403, the Youth Conservation Corps (YCC) grants-in-aid program has grown markedly. Though interim regulations and final regulations were published in 1974 and 1975 respectively, recently proposed policies and procedures for the State grant component appear to be advisable.

This revision is proposed jointly by the Departments of Agriculture and Interior. The Department of Agriculture will publish the same revision under Title 36 of the Code of Federal Regulations, Chapter II, Part 214.

The primary author of this document is Vivian Bower, Office of Manpower Training and Youth Activities, 202-343-3865.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: September 28, 1977.

RICHARD R. HITE,
Deputy Assistant
Secretary of the Interior.

It is proposed to revise 43 CFR Part 26 to read as follows:

PART 26—GRANTS TO STATES FOR ESTABLISHING YOUTH CONSERVATION CORPS PROGRAM

Sec.

- 26.1 Introduction.
- 26.2 Definitions.
- 26.3 Program purpose and objectives.
- 26.4 Legislation.
- 26.5 Administrative requirements.
- 26.6 Request for Grant.
- 26.7 Application format and instructions.
- 26.8 Program reporting requirements.
- 26.9 Consideration and criteria for awarding grants.

AUTHORITY: Sec. 4, 86 Stat. 1320, as amended, 88 Stat. 1067.

§ 26.1 Introduction.

(a) The Youth Conservation Corps (YCC) is a program of summer employment for young men and women, aged 15 through 18, who work, earn, and learn

together by doing projects which further the development and conservation of the natural resources of the United States. The Corps is open to youth of both sexes, and youth of all social, economic, and racial classifications who are permanent residents of the United States, its territories, possessions, or the Trust Territory.

(b) The Youth Conservation Corps Act of 1970 (Public Law 91-378) provided for a 3-year pilot program to be carried out on lands and waters under the jurisdiction of the Secretary of Agriculture or the Secretary of the Interior. Public Law 92-597 amended the 1970 act to include a pilot program (beginning in FY 1974) under which grants shall be made to States, to assist them in meeting the cost of Youth Conservation Corps projects on non-Federal public lands and waters within the States. Public Law 93-408 made the Youth Conservation Corps program permanent.

§ 26.2 Definitions.

(a) Terms used in these Regulations are defined as follows: (1) *Act*. The Youth Conservation Corps Act of 1970. Pub. L. 91-378 as amended.

(2) *Secretaries*. The Secretaries of Agriculture and the Interior, or their designated representatives, who jointly administer the grant program. Within the Department of Agriculture, the YCC program is administered by the Forest Service; within the Department of the Interior it is administered by the Office of Manpower Training and Youth Activities.

(3) *States*. Any of the several States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, American Samoa and the Commonwealth of the Northern Mariana Islands.

(4) *Grant*. Money or property provided in lieu of money, paid or furnished by the Secretaries pursuant to the Act, to a State to carry out YCC programs on non-Federal public lands and waters. The amount of any grant shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 percent of the cost (as determined by the Secretaries) of said project.

(5) *Grantee*. Any State which is a recipient of a grant for the operation of YCC grant program.

(6) *Sub-Grantee*. Any public organization, municipality, or agency which successfully applied through a State for the operation of a Youth Conservation Corps project within that State.

(7) *Contractor*. Any public agency or organization or any private non-profit agency or organization which has been in existence for at least 5 years which operates a YCC project for a grantee or subgrantee.

(8) *Program Agent*. Agency, Bureau, or Department designated by the Governor to have program responsibility for all aspects of YCC operations in that State except for those projects conducted under Federal auspices. Responsibility may be

re delegated by the Agency, Bureau, or Department Head. Such re delegations must be made in writing to the Secretaries.

(9) *Grant program*. That part of the YCC program carried out on non-Federal lands and waters by States receiving YCC grants-in-aid.

(10) *Project*. The operating unit or camp of the State YCC grant program, either of residential or nonresidential program type, as follows:

(i) *Residential project*. One in which youths reside either seven or five days per week at a camp on or adjacent to the public lands where they conduct their work-education program.

(ii) *Nonresidential project*. One in which youths reside at home and daily commute to the public lands to conduct their work-education program.

(iii) *Project*. For purposes of establishing a Federal/State cost sharing ratio a project is defined as all YCC operations within a State which are carried out on non-Federal public lands and waters.

(11) *Operating year*. January 1 through December 31.

(12) *Non-Federal public lands and waters*. Any lands or waters within the territorial limits of a State owned either in fee simple by a State or political subdivision thereof or over which a State or political subdivision thereof has, as determined by the Secretaries, sufficient longterm jurisdiction so that improvements made as the result of a grant will accrue primarily to the benefits of the public as a whole. Federally-owned public lands and waters administered by a State or political subdivision thereof under agreement with a Department or Agency of the Federal Government are eligible under such definition if the Secretaries determine that the State or political subdivision thereof is entitled to or is likely to retain administrative responsibility for an extended period of time sufficient to justify classification as non-Federal public lands or waters.

§ 26.3 Program purpose and objectives.

(a) The purpose of the Act is to further the development and maintenance of the natural resources of the United States by American youth and in so doing prepare them for the ultimate responsibility of maintaining and managing these resources for the American people. The Departments of Agriculture and the Interior have stressed the following three equally important objectives of the Youth Conservation Corps as reflected in the law:

(1) Accomplish needed conservation work on public lands.

(2) Provide gainful employment for 15 through 18 year-old males and females from all social, economic, and racial backgrounds.

(3) Develop an understanding and appreciation in participating youths of the Nation's natural environment and heritage.

(b) These objectives will be accomplished in a manner that will provide the

youth with an opportunity to acquire increased self-dignity and self-discipline, better work with and relate with peers and supervisors and build lasting cultural bridges between youth from various social, ethnic, racial, and economic background.

(c) Each YCC project will, to the maximum extent possible as determined by the Secretaries' representatives, have the following characteristics:

(1) A properly balanced and integrated environmental-work learning program in which environmental knowledge and awareness derives principally from meaningful work activities on public lands.

(2) A mixture of youth of both sexes from various social, economic, ethnic, and racial backgrounds which is representative of the youth residing within the recruiting area.

(3) A group living component wherein enrollees have an opportunity to relate to each other and staff during non-working hours in activities which promote social interaction and group learning.

(4) An enrollment of sufficient size (not less than 10 enrollees) that will permit social interaction and group learning. The program encourages camps of a size of 20 to 50 enrollees as the most desirable size.

§ 26.4 Legislation.

State programs must meet all of the requirements of Section 4 of the Act. Section 4 of the Act which applies to the grant program reads as follows:

Sec. 4(a) The Secretary of the Interior and the Secretary of Agriculture shall jointly establish a program under which grants shall be made to States to assist them in meeting the cost of projects for the employment of young men and women to develop, preserve, and maintain non-Federal public lands and waters within the States. For purposes of this section, the term "States" includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa.

(b) (1) No grant may be made under this section unless an application therefor has been submitted to and approved by, the Secretary of the Interior and the Secretary of Agriculture. Such application shall be in such form, and submitted in such manner, as the Secretaries shall jointly by Regulations prescribe and shall contain:

(A) Assurances satisfactory to the Secretaries that individuals employed under the project for which the application is submitted shall: (i) Have attained the age of fifteen but not attained the age of nineteen, (ii) be permanent residents of the United States or its territories, possessions, or Trust Territory of the Pacific Islands, (iii) be employed without regard to the personnel laws, rules, and regulations applicable to full-time employees of the applicant, (iv) be employed for a period not more than ninety days in any calendar year, and (v) be employed without regard to their sex or social, economic, or racial classification; and

(B) Such other information as the Secretaries may jointly by Regulation prescribe.

(2) The Secretaries may approve applications which they determine (A) meet the requirements of paragraph (1) and (B) are for

projects which will further the development, preservation, or maintenance of the non-Federal public lands or waters within the jurisdiction of the applicant.

(c) (1) The amount of any grant under this Section shall be determined jointly by the Secretaries, except that no grant for any project may exceed 80 per centum of the cost (as determined by the Secretaries) of such project.

(2) Payments under grants under this section may be made in advance or by way of reimbursements and at such intervals and on such conditions as the Secretaries find necessary.

(d) Thirty per centum of the sums appropriated under Section 6 for any fiscal year shall be made available for grants under this section for such fiscal year.

§ 26.5 Administrative requirements.

The following administrative requirements must be met: (a) Recruitment will be conducted in a manner designed to assure (1) a full opportunity for all America's youth to participate in the Youth Conservation Corps, and (2) specific outreach efforts to attract minority and disadvantaged youth. The grantee and sub-grantee will assure that the YCC program is open to all eligible youth from all parts of the State including urban and rural youth of both sexes and youth of all social, economic, racial, and ethnic classifications. A well-balanced YCC camp enrollment should also include representation of nonpublic school youth, the disadvantaged, and youth having quit school before graduation. The grantee will conduct, or will permit to be conducted, a selection system which will assure that applicants will be selected on a random basis, without bias because of race, creed, color, religion or National origin. To insure coeducational projects, stratification of applicants by sex, prior to selection, is required. To insure that the program will reach the largest number of youth, the grantee will assure that not more than 10 percent of the selected enrollees have been YCC enrollees in previous years and that all returnees shall be designated as youth leaders and paid an increment of at least \$1.50 per day above the normal wage.

(b) To the maximum extent practicable, enrollees should be selected from an area within one day's surface travel from their residence to a YCC camp.

(c) Capital outlays for facilities should be kept at a minimum. No grant is to be made for construction of residential facilities other than to provide temporary facilities and their necessary basic infrastructure and necessary renovation or modification of existing facilities.

(d) Operation of YCC projects during non-summer periods may be authorized by the Secretaries when it can clearly be demonstrated that enrollment will not interfere with the established educational systems.

(e) The enrollee is an employee of the grantee or sub-grantee. The enrollee pay plan must comply with Federal or State minimum wage laws whichever may be higher. To the maximum extent practicable, State YCC enrollees. Grantees will insure that enrollees are engaged in 40 hours of work-learning activities each week, 10 hours of which will be in environmental awareness. The Federal Gov-

ernment will cost share enrollee salary up to the equivalent of 30 hours per week.

(f) Grantees must provide for an effective accident control, health, and safety program. As a minimum, grantees shall follow U.S. Department of Labor Bulletin No. 101, "A Guide to Child Labor Provisions of the Fair Labor Standards Act."

(g) Grantees will have a financial management system which will provide the information called for in Attachment G of Federal Management Circular (FMC) 74-7.

(h) "Request for Advance or Reimbursement" as outlined in FMC 74-7 will be used to obtain an advance to start and/or maintain the program. It can also be used to obtain a reimbursement during or at the end of a project. An advance, not to exceed one month's needs may be made after approval of the grant application.

(i) Grantees will prepare a "Financial Status Report" required by FMC 74-7, Attachment H, item 3(a), twice for each operating year. These reports will be prepared on a cash basis using the same functional headings as those used in preparing Part II of the application for Federal Assistance. Instructions and forms will be supplied each grantee at the time of grant award. Grantees shall require similar reports from all sub-grantees and contractors to facilitate their own reporting to the grantor agencies. The two reports required of the grantee are:

(1) An "Interim Financial Status Report" prepared as of September 30 and mailed in time to reach the Secretaries by October 30 of each operating year.

(2) A "Final Financial Status Report" prepared as of December 31 of each operating year. This report will be forwarded in time to reach the Secretaries by March 31 of the following operating year.

(j) Allowable costs under the grant program are defined in FMC 74-7 and FMC 74-4.

(k) Records retention and custodial requirements for records are prescribed by Attachment C to FMC 74-7.

(l) Because of the short duration of each project, budget revisions normally should be unnecessary; however, if a budget revision becomes necessary, the grantee will be governed by Attachment K of FMC 74-7.

(m) Grantees shall comply with the provisions of Attachments N and O of FMC 74-7 in regard to nonexpendable personal property and procurement standards.

(n) The Secretaries or their designees shall periodically review the conduct of the program by the State.

(o) Grantees will supervise those projects in the State being administered by sub-grantees and contractors. Sub-grantees and contractors will be required to operate in accordance with the procedures outlined in these regulations and the grant agreement with the State. Periodic inspection of sub-grantee projects will be made by the grantee under the direction of the Program Agent or his designee. Grantees or sub-grantees

may contract with a qualified non-profit agency or organization for the operation of their YCC project.

(p) Grantees will meet the audit requirements of Attachment G to FMC 74-7 and will require the same of sub-grantees. Copies of audits will be made available to the Secretaries upon request.

(q) If the grantee fails to comply with the grant award stipulations, standards, or conditions, the Secretaries may jointly suspend the grant pending corrective action. Subsequent to or during any period of suspension of the grant, the Federal Government shall not be obligated to reimburse the grantee for any incurrence of obligations other than direct salaries of enrollees and then only for a period of time which both the Secretaries shall determine to be reasonable. In addition, the Secretaries may jointly terminate the grant. Termination shall be effected by a notice of termination. Upon receipt of a notice of termination, the grantee shall:

(1) Discontinue further commitments of grant funds.

(2) Cancel all subgrants or contracts, where possible, scheduled for payment with grant funds.

(3) Supply either of the Secretaries within 90 days after receipt of the notice of termination, a financial statement, along with a refund check for any unused portion of funds advanced, or request for reimbursement for allowable expenditures incurred in the grant program.

§ 26.6 Request for grant.

(a) Of the amount available for Youth Conservation Corps projects; 30 percent will be allocated for State projects. All States will be given an opportunity to participate in the program. Allocated funds not needed by a State will be re-allocated based on the merits of proposals submitted in accordance with paragraph (c) of this section or a preapplication in accordance with Attachment M of FMC 74-7. All proposed projects should be listed by priority. Grant funds are for State projects only. A grant to a State must be matched by the State for each project. Matching can consist of either direct expenditures or services of an in-kind nature.

(b) Pursuant to section 4(c) (1) of Pub. L. 93-408, States may receive grants up to but not to exceed 80 percent of the cost of funding any project from the Federal Government.

(c) Application for Federal Assistance (Standard Form 424) will be used by applicants in applying for grants under this program. Application forms will be supplied to Program Agents. Only a Program Agent may submit an application. A single grant application (Parts I, II, IV) must be submitted for the entire summer program within each State. Parts II, III and V are required for each project included in the grant application. A separate application must be used for non-summer projects. A non-summer project is defined as one which extends beyond October 1 or being prior to May 1.

(d) The Secretaries have designated individuals in each State who will jointly represent them. Grant applications (original and two copies) must be submitted to the designated representative of either Secretary. January 1 has been established as the deadline date for acceptance of applications for each operating year. Names and address of designated representatives will be furnished to each State. The Secretaries' representatives must jointly approve grant proposals. Approval or disapproval of proposals will be documented by a formal letter to the Program Agent. The Secretaries representatives will also be available for technical assistance and advice.

(1) Location of project (address and county).

(2) Distance to nearest town; name of town.

(3) Number of youth planned for project.

(4) Type of project (7-day residential, 5-day residential; nonresidential; other).

(5) Length of session (i.e., number of weeks) and proposed beginning and ending dates.

(6) Description of living conditions (types of facilities, age, condition, tents, cabins, dormitories).

(7) Project staff (number and position titles).

(8) Complete calculation for daily rate of enrollee pay including deduction for food and lodging (if any).

(9) Description of health and safety program.

(10) Description of enrollee and staff recruiting and selection systems including description of affirmative action measures to be taken to assure that minority and other disadvantaged persons receive equal opportunity and consideration.

(11) Description of the work-learning program including the types of work projects that will be available (an integrated environmental work-learning program is required wherever possible as determined by the Secretaries' representatives).

(12) States agreement to administer tests, conduct interviews, or otherwise assist the Federal Government in collecting data on the grant program. The data is to be used for the required report to the President and Congress in accomplishing the purposes of the Act. A statement to this effect must be written into the proposal by the applicant.

(d) Part IV (Assurances) is preprinted within Attachment M, FMC 74-7 and is to be included as part of the application. The following assurances are not preprinted and must be included by the grantee in the grant application:

(1) EPA required certification if the application is for \$100,000 or more (40 CFR 15):

The recipient certifies that: No owner or operator of a facility which he proposes to utilize in connection with this grant has been notified that the facility has been listed on the EPA list of violating facilities pursuant to the provisions of the EPA in 40 CFR, Part 15.20, and that this same certification will be obtained from sub-grantees or sub-contractors benefiting from this grant.

The grantee agrees that any facility which is utilized in the performance of this grant is not listed on the EPA list of violating facilities pursuant to 40 CFR, part 15.20. In the event the grantee fails to comply with clean air or water standards at such facilities, the grant may be canceled, terminated for default or suspended for such failure, in whole or in part, and the Government may refrain from further granting with the grantee.

The grantee agrees to comply with all the requirements of section 114 of the Air Act and section 308 of the Water Act relating to inspection, monitoring, entry, reports, and information as well as all other requirements specified in section 114 and section 308, respectively, and all regulations and guidelines issued thereunder.

§ 26.7 Application format and instructions.

Grant applications must be made using the Office of Management and Budget approved form (SF-424) entitled "Federal Assistance." General instructions for completing the form by part numbers follows. Specific instructions and requirements which must be followed are included in the Secretaries State Grant Procedures Handbook.

(a) Part I—SF-424 Cover Sheet, sections I and II shall be completed.

(b) Part II—(Budget Data) Lines 1-8 need not be used. However, the following information is needed relative to the YCC program. Please prepare a supplemental sheet using the following functional headings:

General.
Staff pay.
Enrollee pay.
Food.
Work project costs.
Travel and transportation.
Program direction.

A description of the items to be included under each of these functional headings are:

General. Include expenditures for: (1) Capital improvement (camp facilities and improvement), (2) other (medical, first aid expense, utilities, maintenance costs, recreation, all supplies not otherwise identified, training), (3) camp opening and closing costs.

Staff pay. Includes pay and benefits net any deductions made for meals and quarters furnished.

Enrollee pay. Includes pay and benefits of enrollees.

Food. Includes cost of food and related freight charges.

Work project costs. Safety equipment and work supplies and environmental awareness supplies and materials.

Travel and transportation. Includes transportation of enrollees and staff to and from project sites and both intrastate and interstate travel for purposes of program direction and training.

Program direction. Includes support services and program administration expenses at locations other than at projects. The total of the above categories should be entered on line 9 of Part II and the rest of Part II completed.

Indirect costs. Compute the appropriate allowance for indirect costs on line 15 and enter amount on line 10. Grantee must have an approved indirect cost rate applicable to the grant period. A copy of the approved indirect expense plan should be included in the grant application.

(c) Part III—Program narrative statement should include the following information:

The grantee agrees to promptly notify the awarding official of the receipt of any notice from the Director, Office of Federal Activities, Environmental Protection Agency, indicating that any facility utilized or to be utilized under the grant is under consideration for listing on the EPA list of violating facilities.

The grantee further agrees to insert, in any subgrant thereunder unless otherwise exempted pursuant to the EPA regulations implementing the Air or Water Acts (40 CFR, Part 15.5) provisions which shall include this statement. The grantee shall take such action as the Government may direct as a means of enforcing such provisions.

(2) The Federal/State cost sharing ratio established by the approval of this grant application shall remain in effect for the duration of the operating year, unless modified prior to December 31 in accordance with Attachment K to Federal Management Circular (FMC) 74-7.

(3) In a format prescribed by the Secretaries' representatives, the grantee agrees to provide by July 15, but not later than fourteen days following project opening, detailed information on the demographic characteristics of youths enrolled in the State grant program.

(e) Part V—A camp or project profile for each project must be submitted with the application.

§ 26.8 Program reporting requirements.

(a) Monitoring and reporting of program performance will be in accordance with Attachment I of FMC 74-7. Grantees will submit performance reports with the final financial status report to either of the Secretaries' representatives. This final performance report is due by March 30. An interim performance report is due not later than October 30. For non-summer projects, the final report is due 90 days after termination of the project. The performance report will include the number of youth enrolled in the project, number of weeks of camp operation, youth loss rate, value of work accomplished by resource category (for example, timber management, recreation, etc.), hours of youth work-learning experience by resource category and value of work supplies and materials by resource category.

(b) The reporting and/or recordkeeping requirements contained herein have been approved by the Office of Management and Budget in accordance with the Federal Reports Act of 1942.

§ 26.9 Consideration and criteria for awarding grants.

The decision by both of the Secretaries' representatives on grants to individual States will consider the following:

(a) The amount of grant funds appropriated and available.

(b) The quality of the proposed program in terms of meeting program characteristics and objectives.

(c) The overall cost per enrollee eight-week position.

(d) Actual prior performance of the States in administering YCC projects.

(e) The performance of the grantee in meeting the conditions of the grant and the requirements of FMC 74-4 and FMC 74-7.

DEPARTMENT OF AGRICULTURE

Forest Service

EXTENSION OF TIMBER SALE CONTRACTS AND OTHER RELATED MATTERS

Forest Service Policy

AGENCY: Forest Service, USDA.

ACTION: Proposed policy.

SUMMARY: This is a Forest Service proposed policy on contract term extension, contract term adjustment and period of contract. The proposal includes Forest Service manual changes, revised timber sale contract provisions, and graphs to be used when the policy is implemented.

DATE: Comments must be received before November 4, 1977.

ADDRESS: Submit comments to Chief, John R. McGuire, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013.

All written submissions made pursuant to this notice will be available for public inspection in the Timber Management Staff, South Agriculture Building, Room 3207, Washington, D.C., during regular business hours.

FOR FURTHER INFORMATION, CONTACT:

George Leonard, Timber Management Staff, Forest Service, Department of Agriculture, P.O. Box 2417, Washington, D.C. 20013, (202-447-4051).

SUPPLEMENTARY INFORMATION: This is a Forest Service proposed policy to revise the criteria for contract term extension and to make other less significant changes regarding contract term. The significant changes in extension policy are: (1) 75 percent of the volume must be removed rather than 50 percent; (2) Volume must be removed and presented for scaling to be counted toward the 75 percent requirement; and (3) the sale must have been operated in reasonable conformance with the plan of operations required by the National Forest Management Act of 1976.

The changes in matters other than extension criteria can be summarized briefly as: (1) Clarification of policy for granting contract term adjustment when other, distressed timber is in more urgent need of cutting; (2) criteria for extension in conjunction with an environmental modification and (3) revision of guidance to Forest officers on setting the original term of a contract.

The proposed Forest Service Manual changes are:

TITLE 2400—TIMBER MANAGEMENT

Revise 2433.12 to read:

2433.12—Contract term extension. A contract for harvesting National Forest timber clearly establishes an obligation on the part of the purchaser to complete the cutting and removal of all designated timber, as well as other contractual obligations, within the time limits specified in the contract. The Forest Service expects timber purchasers to meet this obligation.

1. Policy. Extensions of a contract term should be the exception rather than the rule and a timber purchaser is expected to complete all contractual obligations during the specified contract term. Failure on the part of the timber purchaser to harvest the timber within the specified time limits will result in termination of the timber sale contract unless the purchaser applies for and the Forest Service approves a contract term extension. If no extension is granted, the purchaser is liable for damages as set forth in the contract.

The contract contains certain stipulations which apply if the contract period is extended. Subject to those contract provisions, an extension of time may be granted by the officer approving the sale, his successor, or his superior, if the purchaser has diligently performed in accordance with contract provisions and the approved plan of operations, or if it is determined that the substantial overriding public interest justifies the extension. Except as discussed later in this section, contracts will be extended only when there is proper justification and termination is imminent.

(a) Criteria for determining diligent performance. To qualify for an extension of a sale sold prior to July 1, 1971, a purchaser should expect to have cut at least 50 percent of the advertised volume by the date of his application for extension and to have constructed sufficient specified roads to service at least 60 percent of the timber to be cut, including all roads which are planned or needed as access routes for other National Forest timber.

Unless there are other considerations advantageous to the United States, extension applications which fail to meet this standard will not be considered.

To qualify for an extension of a sale made on or after July 1, 1971, "but prior to January 1, 1978", all of the following conditions must be met by the purchaser:

(1) At least 50 percent of the advertised volume must have been cut and removed from the sale area;

(2) Specified roads needed by the purchaser (a) to remove the timber har-

vested to date and (b) those specified roads which are needed to permit planned, orderly development of future sales and which were identified in the prospectus, have been accepted under B6.35. Where possible it is desirable to announce those roads to which this latter requirement will apply prior to advertisement.

(3) All contractual requirements, such as snag felling, erosion control and slash disposal, have been accepted on the area cutover except for areas where logging is currently in progress. Purchaser's burning of current slash may be waived as a prerequisite for extension, if weather conditions or other considerations, have precluded burning.

A decision not to grant an extension when the above conditions are met will be made only when the extension would result in intolerable resource management or protection problems, or cause environmental damage, which cannot be corrected or prevented by contract modification.

"Timber sale contracts for sales made on or after January 1, 1978, shall authorize contract term extensions only if the purchaser has met the following conditions, unless the Chief finds that there is an overriding public interest which justifies the extension.

1. Specified roads needed by the Purchaser for removal of all included timber in accordance with his approved plan of operations were constructed and accepted by the Forest Service prior to the applicable road completion date.

2. At least 75 percent of the advertised volume has been cut, removed from the sale area, and presented for scaling.

3. Operations to date have been in reasonable compliance with contract terms and the approved plan of operations.

4. Contractual requirements, such as snag felling, erosion control, and slash disposal, have been accepted on the area cutover, except for areas where logging is currently in progress. Purchaser's burning of current slash or grass seeding of disturbed areas may be waived as a prerequisite for extension, if weather conditions or other factors have delayed these activities.

A decision not to grant an extension when the above criteria are met will be made only when the extension would result in intolerable resource management or protection problems, or cause environmental damage which cannot be corrected or prevented by contract modification.

(b) Waiver of extension criteria. Wood product markets are highly volatile with wide fluctuations in price and demand. These fluctuations are normally in re-

sponse to major changes in the Nation's economy, such as expansion or contraction of the housing market. Individual timber sale purchasers can exercise little control over such market changes, yet the changes can have significant impacts on industry-wide production and the individual purchaser's ability to successfully market products produced from National Forest timber.

The terms of most timber sales are long enough to provide the purchaser with flexibility to respond to normal fluctuations in market conditions. There are, however, occasional drastic reductions in market demand which can preclude successful operation of relatively short-term sales (contract period two years or less). It is not in the public interest to force uneconomic operation of such sales nor to allow such sales to be defaulted. Therefore, contracts for sales of two years or less sold after January 1, 1978, shall authorize waiver of the extension criteria set forth above when the Chief determines that a drastic decline in industry-wide production has occurred which has seriously affected markets for products expected to be produced.

In order to provide an equitable basis to reflect such situations, the timber management staff in the Washington Office will maintain data to monitor and identify when rapid and significant production declines occur. Quarterly average production rates and rolling four-quarter averages will be maintained for major forest product commodities. The Chief will notify Regional Foresters that extension criteria may be waived for short-term sales whenever the quarterly average production drops 15 percent or more below the four-quarter average or if the quarterly average drops ten percent or more below the rolling four-quarter average and remains below for two or more quarters. The above criteria notwithstanding, the Chief may authorize extensions of a timber sale contract when he determines such action is justified by a substantial overriding public interest (36 CFR 223.8).

(c) Extension in conjunction with modification of contract to prevent environmental or resource damage. When a modification (2433.23) of contract to prevent environmental or resource damage cannot be executed prior to the start of an ensuing operating period, and purchaser's timber harvest operations on the timber involved in the modification are delayed, an extension of the contract term may be necessary. The following guidelines are established for determining the period of contract extension.

1. Consider all factors relating to the harvest of the timber involved in the environmental modification including the timber involved in procurement, scheduling, move-in, and use of equipment (types) other than that contemplated in the original sale. If the "final" modification is executed after the mid-way date of a normal logging season, disregard the remainder of that logging season in establishing the time needed

to harvest the timber involved in the environmental modification.

2. The period time for harvest of the timber volume involved in the contract modification to prevent environmental or resource damage must recognize any changes in harvest methods which could reduce production rates used to establish the original contract term. Estimate the rate of production for the harvest methods specified in the modification, volumes to be cut per acre, road construction needed, and any other variables affecting the establishment of a logical contract period.

3. Estimated production rates for the volume involved in the environmental modification and other considerations included in Item No. 2 above will be used to calculate the time needed to complete the harvest of the timber involved in the modification.

4. Using the period of time calculated in No. 3 above, determine if there is sufficient time remaining under the original contract term to harvest the timber involved in the environmental modification. If not, extend the contract term to fully provide for the changed conditions of the modified sale and any time lost by the purchaser while the Forest Service was preparing the modification. In estimating the time required to complete the sale it is advisable to consult the Purchaser.

(d) Early extensions. Even though the termination date is not imminent, "early extension" may be granted when appropriate, whether or not the above conditions have been met. An early extension may be granted only when the approving officer determines that it is in the interest of the United States to permit a purchaser to interrupt or reduce operations on National Forest timber so that he may log other timber which is more urgently in need of harvesting, for example, salvage of fire-killed or insect-threatened timber. When the purchaser cannot operate the subject National Forest timber at the rate required to complete the contract by the termination date, and at the same time operate the other timber that is more urgently in need of harvesting, additional time may be granted for operating the subject National Forest timber. An extension may be executed at the time operations are initiated on the timber more urgently needing cutting.

When the timber more urgently in need of cutting is National Forest timber, an early extension need be processed only for sales on contract form 2400-2. Such an extension should be granted only where the intent to do so has been stated in the prospectus for the timber in more urgent need of harvesting. For sales on forms 2400-5 and 2400-6, contract term adjustments may be granted (FSM 2433.11).

When other than National Forest timber is more urgently in need of harvesting the early extension procedure must be followed regardless of contract form.

(1) Restrictions. Extensions to permit harvesting of other than National Forest timber should be granted only when:

(a) Substantial timber quantities or values are involved.

(b) In the case of other public timber the managing agency has requested Forest Service cooperation, or

(c) In the case of private timber, when failure to harvest it promptly will result in significant resource loss or create a threat of an insect epidemic.

(d) The purchaser presents an acceptable "plan of operations" for completing the sale to be extended.

Good judgement is required in determining the proper lengths of early extensions to avoid either excessive or inadequate periods.

Where indicated by the facts, it is reasonable to provide some slack time in the extension period to cover unforeseen difficulties, such as slower production or greater volume than expected. Because specific situations vary widely, no hard and fast rules can be applied. The purchaser's plan of operations should be used as a guide.

(2) Procedure for urgent removal sales. During the sale preparation phase of sales requiring urgent removal, a decision must be made of whether or not early extension or contract term adjustment on other sales will be granted to operators who purchase the sales. If the decision is to grant such extensions, the prospectus for such sales should clearly state that such extensions may be granted and in addition should state:

(a) The specific geographic area which will be considered for granting extensions on existing sales.

(b) That a showing of impact on existing sales is a prerequisite to granting early extension.

(c) Specific classes of sales (such as salvage sales) which will not be considered for early extension.

(d) That the number of days of contract term adjustment or early extension a purchaser may expect to be granted will be calculated on a case by case basis and will reflect the time lost in logging the salvage sales.

The specific sales to be extended and the time granted should be agreed upon as soon after bidding as possible. To expedite this process the award letter to successful bidders (except for bidders with no existing sales) would contain a paragraph similar to the following:

"As stated in the prospectus for this sale, we are willing to consider early extension or contract term adjustment on green sales to allow time for logging the timber in this sale which is in urgent need of removal. To qualify for these extensions you must submit your request for adjustments within 30 days of receipt of this letter. The request should list which sales you want extended, the number of days requested by sale, and how the existing sales would be impacted by logging this sale."

When the logger has submitted his list of sales, they will be checked against the criteria listed in the prospectus. If they meet these criteria the early extension (or contract term adjustment) will normally be granted unless there is clear

NOTICES

evidence that there will be no impact from the urgent removal cutting. If there are sales on the list which do not qualify, the purchaser should be advised promptly and asked to revise his list accordingly. It is highly desirable that the early extensions be granted prior to the commencement of logging on sales involving timber in urgent need of removal.

As indicated above, a showing of impact on existing sales must be made. However, impacts should not be limited to physical limitations on log storage, or physical moving of men and equipment. Transfers of capital, inventory limitations established for fiscal purposes, and similar indirect impacts should also be considered.

2451.82—Period of contract (B8.2, A19). Add the following to replace the material following the first two paragraphs in FSM:

Regional Foresters will provide guidelines to assure reasonable consistency in establishment of contract lengths. The guidelines should recognize the need for variation in sale periods to reflect differences in factors such as required road construction, climate, and special operating requirements.

Contract periods will be established with consideration of the size and type of offering. Contract periods should provide time for well planned operations by typical operators within the local area. Sale periods must provide adequate time for completion of logging and other contractual obligations after construction of specified roads by the Forest Service, should the bidder so elect. Contract lengths should be set with recognition that an adequate volume of timber under contract is essential to provide the purchaser a basis for financing his operation, planning his timber supply needs, and reasonable flexibility to respond to market fluctuations. On the other hand, a continuous flow of National Forest timber onto the market is desirable, and sale periods should not be so long as to encourage speculative buying.

Guidelines adopted by Regional Foresters should recognize that variation from established guides may be appropriate in the following circumstances:

1. Additional time should be considered for such special requirements or condi-

tions as extensive road construction, special logging systems, the need to avoid peak recreation periods, and requirements for time-consuming work, such as yarding unutilized material. Some sales are well suited for winter or early spring logging. Consideration should be given to allowing additional seasons for these sales in order to make operable area available when other areas may be closed. Additional operating seasons may also be necessary for high elevation sales with abnormally short operating seasons. Sales where construction of access road is not by purchaser should be withheld from sale until access is ensured rather than establishing a longer period of contract.

2. Shorter sale periods should be considered for salvage sales to minimized timber deterioration or sales when prompt removal is necessary to prevent the spread of insects. Shorter sale periods may also be appropriate when necessary to meet clearing deadlines in connection with development projects. When shorter sale periods are established, potential bidders shall be apprised of this condition in the prospectus.

3. Sales of products for which markets are not assured, such as pulpwood, bolts, or poles, should be given special consideration.

4. Sales in heavily competitive areas which do not require road construction should generally be of shorter duration than sales requiring road construction.

The following are proposed National C Provisions to be added to new timber sale contracts.

C8.231—Conditions for contract term extensions (Proposed). Forest Service may grant Purchaser's written request for Contract Term Extension if all of the following conditions have been met by Purchaser at time of Purchaser's request:

(a) At least 75 percent of estimated volume in A2 has been cut, removed from Sale Area, and presented for scaling.

(b) Specified Roads needed by Purchaser for removal of all Included Timber.

ber in accordance with his approved plan of operations under C6.3 were constructed and accepted by Forest Service prior to the applicable road completion date shown in C5.101.

(c) Purchaser's Operations to date have been in reasonable compliance with

contract terms and the approved plan of operations under C6.3.

(d) All contractual requirements have been met by Purchaser and accepted by Forest Service on area cutover at time of Purchaser's request except for areas where logging is in progress at time of Purchaser's request. Purchaser's burning of current slash, or seeding or planting for erosion control, may be temporarily waived if weather or other considerations make such work currently impractical.

Instructions: Use in all new 2400-6 contracts.

CT8.231—Conditions for Contract Term Extension (Proposed). Forest Service may grant Purchaser's written request for Contract Term Extension if all of the following conditions have been met by Purchaser at time of Purchaser's request:

(a) At least 75 percent of estimated volume in AT2 has been cut, paid for and removed from Sale Area.

(b) Specified Roads needed by Purchaser for removal of all Included Timber in accordance with his approved plan of operations under CT6.3 were constructed and accepted by Forest Service prior to the applicable road completion date shown in CT5.101.

(c) Purchaser's Operations to date have been in reasonable compliance with contract terms and the approved plan of operations under CT6.3.

(d) All contractual requirements have been met by Purchaser and accepted by Forest Service on area cutover at time of Purchaser's request amount for area.

of Purchaser's request except for area where logging is in progress at time of Purchaser's request. Purchaser's burning of current slash, or seeding or planting for erosion control, may be temporarily

Instructions: Use in all new 2400-67

Instructions: Use in all new 2400-6 contracts.

Following is a copy of graphs referred to in FSM 2433.12(1) (b).

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric
Administration
SPORTSMANReceipt of Application for Certificate of
Exemption

Notice is hereby given that the following applicant has applied in due and timely form for a Certificate of Exemption under Pub. L. 94-359, and the regulations issued thereunder (50 CFR Part 222, Subpart B), to engage in certain commercial activities with respect to pre-Act endangered species parts or products.

Applicant:

The Sportsman, 184 Pierce St., Birmingham, Mich. 48011.

Period of exemption. The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

Commercial activities exempted. (i) The prohibition, as set forth in section 9(a)(1)(A) of the Act, to export any such species part from the United States; (ii) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of commercial activity any such species part; (iii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

Parts or products exempted. Finished scrimshaw products consisting of 14 jewelry items, one carved whale tooth and seven items carved from slices of whale teeth.

Written comments on this application may be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 on or before November 4, 1977.

Dated: September 30, 1977.

MORRIS M. PALLIZZI,
Acting Associate Director
for Fisheries Management.

TWENTIETH CENTURY-FOX
MARINELAND, INC.

Modification of Permit

Notice is hereby given that, pursuant to the provisions of § 216.33 (d) and (e) of the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216), the Public Display Permit issued to Twentieth Century-Fox Marineland, Inc., 6600 Palos Verdes Drive South, Rancho Palos Verdes, California 90274, is modified in the following manner:

The period of validity, during which the authorized marine mammal may be taken,

is extended from December 31, 1977, to December 31, 1978.

This modification is effective on October 5, 1977.

The Permit, as modified, and documentation pertaining to the modification is available for review in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven St. NW., Washington, D.C.; and
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry St., Terminal Island, Calif. 90731.

Dated: September 19, 1977.

WINFRED H. MEIBOHM,
Associate Director.

National Marine Fisheries Service.

National Technical Information Service
GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for \$5.00 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for \$3.50 (\$7.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPLnumber. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

U.S. DEPARTMENT OF THE AIR FORCE, AF/JACP, Washington, D.C. 20314.

Patent application 758,879: Fusible Heat Sink for a Cryogenic Refrigerator; filed January 12, 1977.

Patent 4,005,144: Ethynyl-Substituted Aromatic Ortho Diamines and Method of Synthesis. Filed April 9, 1976, patented January 25, 1977; not available NTIS.

Patent 4,005,327: Low Beam Velocity Retina for Schottky Infrared Vidicons; filed October 28, 1975, patented January 25, 1977, not available NTIS.

Patent 4,005,366: System to Simulate Motion and Plasma Induced Signal Variations from Reentry Vehicles; filed August 18, 1975, patented January 25, 1977; not available NTIS.

Patent 4,005,378: Surface Acoustic Wave Filter; filed November 25, 1975, patented January 25, 1977; not available NTIS.

Patent 4,005,399: Impedance Sensitive Power Line Intrusion Alarm System; filed February 14, 1975, patented January 25, 1977; not available NTIS.

U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent 3,957,031: Light Collectors in Cylindrical Geometry; filed May 29, 1975, patented May 18, 1976; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent application 712,416: Polymer-Bound Metalocarbonyl Catalyst; filed August 6, 1976.

Patent application 736,902: Photometric Method and Apparatus for Measuring Packing Fraction of Terminated Fiber Optic Cables; filed October 29, 1976.

Patent application 737,807: On Line Electro-Optic Modulator; filed November 1, 1976.

Patent application 747,590: Low-Loss Single Filament Fiber Optic Connector; filed December 6, 1976.

Patent application 749,935: Desensitizer for N-Propyl Nitrate; filed December 13, 1976.

Patent application 753,646: Microstrip Hybrid Ring Coupler; filed December 20, 1976.

Patent application 756,575: Method and Means of Link Coupling with Separate Control of Link Reactance and Coupling Coefficient; filed January 3, 1977.

Patent application 757,429: Fourier Power Spectra of Optical Images using CCD's; filed January 6, 1977.

Patent application 758,624: Complex Photo-dichroic Spatial Filter; filed January 12, 1977.

Patent application 759,970: Non-Linear Analog-to-Digital Converter; filed January 17, 1977.

Patent application 761,749: A Method of Manufacturing Three Dimensional Integrated Circuits; filed January 23, 1977.

Patent 3,893,332: Leakage Test System; filed February 21, 1974, patented July 8, 1975; not available NTIS.

Patent 3,913,107: Noise Cancelling Magnetic Antenna for Use with Watercraft; filed September 6, 1974, patented October 14, 1975; not available NTIS.

Patent 3,938,888: Automated Precision Flame-Emission Photometric Apparatus; filed February 3, 1975, patented February 17, 1976; not available NTIS.

Patent 3,958,176: Method for Measuring Suitability of Aluminum for Use in Certain Propellants; filed February 24, 1975, patented May 18, 1976; not available NTIS.

Patent 3,961,169: Based-Bit Generator; filed March 25, 1975, patented June 1, 1976; not available NTIS.

Patent 3,963,310: Liquid Crystal Waveguide; filed August 20, 1973, patented June 15, 1976; not available NTIS.

Patent 3,968,126: Ferrocene Derivatives and Their Preparation; filed March 22, 1974, patented July 8, 1976; not available NTIS.

Patent 3,976,596: Hydridometallic Carbonyl Catalytic Compounds; filed March 26, 1975; patented August 24, 1976; not available NTIS.

Patent 3,983,832: Planing Ski Conversion to Stand-Off Armor; filed July 18, 1975, patented October 5, 1976; not available NTIS.

Patent 3,988,682: Voltage Ramp Temperature Controller; filed June 23, 1975, patented October 26, 1976; not available NTIS.

Patent 3,988,778: System for Random, Time Accurate Access to Recorded Material; filed February 10, 1975, patented October 26, 1976; not available NTIS.

Patent 3,938,888: Filter; Cooler; filed June 14, 1974, patented November 2, 1976; not available NTIS.

Patent 3,992,683: Optically Pumped Collision Laser in Hg at 546.1 NM; filed May 28, 1976, patented November 16, 1976; not available NTIS.

Patent 3,994,696: Aluminum Soap Demisting Agent in Jet Fuel; filed May 22, 1975; patented November 30, 1976; not available NTIS.

Patent 3,995,155: Integrated Optical Data Bus Coupler; filed June 6, 1975; patented November 30, 1976; not available NTIS.

Patent 3,995,311: Optical Logic Elements; filed September 22, 1975; patented November 30, 1976; not available NTIS.

Patent 3,995,957: Internally Referenced, Laser Intracavity Technique for Measuring Small Gains or Losses; filed October 16, 1975; patented December 7, 1976; not available NTIS.

Patent 3,996,484: Interactive Negative Resistance Multiple-Stable State Device; filed September 5, 1975; patented December 7, 1976; not available NTIS.

Patent 3,996,525: Acousto-Optically Tuned Laser; filed May 12, 1975; patented December 7, 1976; not available NTIS.

Patent 3,999,083: Automatic Threshold Circuit; filed March 31, 1975; patented December 21, 1976; not available NTIS.

Patent 3,999,301: Reticule-Lens System; filed July 24, 1975; patented December 28, 1976; not available NTIS.

Patent 4,001,726: High Accuracy Sweep Oscillator System; filed January 23, 1976; patented January 4, 1977; not available NTIS.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20548.

Patent application 658,487: Improved Nozzle for Use with Abrasive and/or Corrosive Materials; filed February 17, 1976.

Patent application 760,771: Improved Back-wall Cell; filed January 19, 1977.

Patent application 767,912: Preparation of Dielectric Coatings of Variable Dielectric Constant by Plasma Polymerization; filed February 11, 1977.

Patent application 776,869: Solar Cell Collector and Method for Producing Same; filed February 22, 1977.

Patent 3,999,886: Hingeless Helicopter Rotor with Improved Stability; patented December 28, 1976; not available NTIS.

Patent 4,000,929: Magnetic Bearing System; patented January 4, 1977; not available NTIS.

Patent 4,005,574: Reverse Pitch Fan with Divided Splitter; patented February 1, 1977; not available NTIS.

National Technical Information Service.

U.S. DEPARTMENT OF THE AIR FORCE, AF/JACP, Washington, D.C. 20314.

Patent 4,005,363: Range Resolving Ground Line Sensor; filed October 22, 1974; patented January 25, 1977; not available NTIS.

Patent 4,005,414: Method for Providing Means to Eliminate Ambiguous Polarization Effects on Phase and Amplitude of Radar Backscatter Due to Unknown Target Aspect Angle; filed June 24, 1975; patented January 25, 1977; not available NTIS.

U.S. DEPARTMENT OF AGRICULTURE, Research Agreements and Patent Management Branch, General Services Division, Federal Bldg., Agricultural Research Service, Hyattsville, Md. 20782.

Patent 4,002,769: Insect Maturation Inhibitors; filed August 1, 1975; patented January 11, 1977; not available NTIS.

U.S. ENVIRONMENTAL PROTECTION AGENCY, Room W513, 401 M St., SW., Washington, D.C. 20460.

Patent 3,857,777: Ion Exchange Membrane for Measuring Orthophosphate; filed August 10, 1973; patented December 31, 1974; not available NTIS.

Patent 3,994,822: Polarization Excitation Device for X-Ray Fluorescence Analysis; filed September 30, 1974; patented March 16, 1976; not available NTIS.

Patent 3,948,769: Ligand Exchange Process for Removal of Ammonia; filed April 8, 1974; patented April 6, 1976; not available NTIS.

Patent 3,966,431: Waste Stone Oxidation and Recarbonization; filed February 21, 1975; patented June 29, 1976; not available NTIS.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, National Institutes of Health, Chief, Patent Branch, Westwood Bldg., Bethesda, Md. 20014.

Patent application 734,129: Homocysteine Thiolactone Perchlorate and a Method of Making Same; filed October 20, 1976.

U.S. DEPARTMENT OF THE INTERIOR, Branch of Patents, 18th and C Streets, NW., Washington, D.C. 20240.

Patent application 738,201: Preparation and Use of High Surface Area Transition Metal Catalysts; filed November 3, 1976.

Patent application 749,583: Beneficiation of Olivine Foundry Sand by Differential Attrition Grinding; December 12, 1976.

Patent application 749,586: Foam Injection Leaching Process for Fragmented Ore; filed December 10, 1976.

Patent 4,002,428: Deductive Method for Measuring Ion Concentration Electrically; filed May 21, 1976; patented January 11, 1977; not available NTIS.

Patent 4,002,975: Electro-Optic Measurement of Voltage on High-Voltage Power Lines; filed February 26, 1976; patented January 11, 1977; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent application 734,833: Diving Helmet Breech Ring Connection; filed October 22, 1976.

Patent application 747,461: Sealant-Primer Coating; filed December 13, 1976.

Patent application 750,087: Prosthetic Implant Suitable for the Plateau of a Joint, and Method of Making the Same; filed December 13, 1976.

Patent application 751,308: Soft abrasive disc; filed December 16, 1976.

Patent application 761,189: Means for Sensitizing Liquid Explosives Abstract of the Disclosure; filed January 21, 1977.

Patent 3,937,951: All-Sky Photoelectric Lightning Detector Apparatus; filed December 9, 1974; patented February 10, 1976; not available NTIS.

Patent 3,961,964: Coating Composition for Suppressing Combustion of Titanium Metal; filed October 24, 1973; patented June 8, 1976; not available NTIS.

Patent 3,989,792: Method for Fabricating a Consumable Cartridge, Casing; filed April 1, 1974, patented November 2, 1976; not available NTIS.

Patent 3,992,976: Liquid Propellant Gun; filed September 12, 1975; patented November 23, 1976; not available NTIS.

Patent 3,992,997: Warhead Casing; filed March 31, 1975; patented November 23, 1976; not available NTIS.

Patent 3,992,998: Warhead, Penetrating Nose Shape; filed February 10, 1975; patented November 23, 1976; not available NTIS.

Patent 3,994,231: Guided Missile Warhead Fuze; filed December 8, 1971; patented November 30, 1976; not available NTIS.

Patent 3,994,895: Product and Process for Protecting Split Line of a Movable Nozzle; filed October 21, 1974; patented November 30, 1976; not available NTIS.

Patent 3,997,914: Analog Encoder Decoder Circuit. Filed February 2, 1976, patented December 14, 1976; not available NTIS.

Patent 3,998,124: Bomb Rack Arming Unit; filed June 2, 1975; patented December 21, 1976; not available NTIS.

Patent 3,998,408: Remote Elevated Platform; filed February 19, 1976; patented December 21, 1976; not available NTIS.

Patent 4,004,975: Method of Isolating and Cryopreserving Human White Cells from Whole Blood; filed December 30, 1975; patented January 25, 1977; not available NTIS.

Patent 4,005,357: Electrostatic Field Sensor; filed February 13, 1976; patented January 25, 1977; not available NTIS.

Patent 4,005,423: Synthetic Aperture Radar Utilizing a Low-Speed Analog-to-Digital Converter; filed July 9, 1975; patented January 25, 1977; not available NTIS.

TENNESSEE VALLEY AUTHORITY, Division of Law, Muscle Shoals, Ala. 35660.

Patent 4,017,589: Production of Ammonium Polyphosphates from Melamine Phosphates; filed March 17, 1976; patented April 12, 1977; not available NTIS.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20546.

Patent application 564,622: Improvement in Combustion Engine; filed April 2, 1975.
 Patent application 694,407: A Reverse Osmosis Membrane of High Urea Rejection Properties; filed June 9, 1976.
 Patent application 750,798: Process for Purification of Waste Water Produced by a Kraft Process Pulp and Paper Mill; filed December 15, 1976.
 Patent application 755,310: A Method for Aerosol Analysis by Thermoluminescence; filed December 20, 1976.
 Patent application 760,795: Detection of Microbial Infection in Blood and Antibiotic Determinations; filed January 19, 1977.
 Patent application 763,753: In-Situ Laser Retorting of Oil Shale; filed January 28, 1977.
 Patent application 769,148: Contour Detector and Data Acquisition System for the Left Ventricular Outline; filed February 16, 1977.
 Patent application 772,165: Simulator for Practicing the Mating of an Observer-Controlled Object with a Target; filed February 25, 1977.
 Patent application 772,167: Device for the Detection of Phenol and Related Compounds; filed February 25, 1977.
 Patent application 776,029: Apparatus and Method for Reducing Thermal Stress in a Turbine Rotor; filed March 4, 1977.
 Patent application 776,146: Formulated Plastic Separators for Soluble Electrode Cells; filed March 10, 1977.
 Patent 4,003,257: Analysis of Volatile Organic Compounds; patented January 18, 1977; not available NTIS.
 Patent 4,007,434: Notch Filter; patented February 8, 1977; not available NTIS.
 Patent 4,007,891: The Engine Air Intake System; patented February 15, 1977; not available NTIS.
 Patent 4,008,348: Particulate and Solar Radiation Stable Coating for Spacecraft; patented February 15, 1977; not available NTIS.

Patent 3,953,853: Passive Microwave Power Distribution Systems; filed June 25, 1974; patented April 27, 1976; not available NTIS.
 Patent 3,959,794: Semiconductor Waveguide Antenna with Diode Control for Scanning; filed September 26, 1975; patented May 25, 1976; not available NTIS.
 Patent 3,968,458: Microwave Power Reflector using Edge-Guided Mode; filed September 23, 1975; patented July 6, 1976; not available NTIS.
 Patent 3,971,536: Combined Helicopter Flight Controller; filed June 10, 1975; patented July 27, 1976; not available NTIS.
 Patent 3,971,618: Holding Device for Measuring the Capacity of Small Electrical Components; filed March 20, 1975; patented July 27, 1976; not available NTIS.

U.S. DEPARTMENT OF AGRICULTURE, RESEARCH AGREEMENTS AND PATENT MGMT. BRANCH, GENERAL SERVICES DIVISION, FEDERAL BLDG., AGRICULTURAL RESEARCH SERVICE, HYATTSVILLE, MD. 20782.

Patent 2,981,738: Gluten Washing and Dewatering Device; filed February 18, 1976; patented September 21, 1976; not available NTIS.
 Patent 4,011,752: Adaptive Speed and Direction Analyzer; filed February 6, 1976; patented March 15, 1977; not available NTIS.
 Patent 4,018,785: Extraction of Proteins from Vegetable Seed Compositions; filed May 12, 1975; patented April 19, 1977; not available NTIS.

U.S. ENVIRONMENTAL PROTECTION AGENCY, ROOM W513, 401 M St., SW., WASHINGTON, D.C. 20545.

Patent application 685,569: Wastewater Disposal System; filed May 12, 1976.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, NATIONAL INSTITUTES OF HEALTH, Chief, Patent Branch, Westwood Bldg., Bethesda, Md. 20014.

Patent application 739,858: Enzyme-Resistant Oplate Pentapeptides; filed November 9, 1976.

U.S. DEPARTMENT OF THE INTERIOR, Branch of Patents, 18th and C Streets NW., Washington, D.C. 20240.

Patent application 742,450: Improved Synthesis of Methotrexate; filed November 17, 1976.

Patent applicant 751,402: Clog-Free Inorganic Grout Emplacement Gun; filed December 16, 1976.

Patent 4,000,067: Method for Rapid Sedimentation of Fine Particles from Suspensions; filed May 21, 1976; patented December 28, 1976; not available NTIS.

Patent 4,002,563: Regular Copolyamides as Desalination Membranes; filed May 23, 1975; patented January 11, 1977; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent 3,935,574: Signal Source Position-Determining Process; filed April 15, 1974; patented January 27, 1976; not available NTIS.

Patent application 685,867: Magnetostrictive Transducer; filed May 12, 1976.

Patent application 689,894: Cable Brake and Lock; filed May 25, 1976.

Patent application 696,952: Variable Jet Nozzle with Balanced Two Dimensional Blocker Flap; filed April 14, 1976.

Patent application 720,310: Igniter; filed September 3, 1976.

Patent 3,940,607: Photo-Electric Lightning Detector Apparatus; filed December 9, 1974; patented February 24, 1976; not available NTIS.

Patent 3,949,682: Towing Thermal Protection System; filed June 10, 1974; patented April 13, 1976; not available NTIS.

Patent 3,990,345: Intervalometer; filed June 24, 1974; patented November 9, 1976; not available NTIS.

Patent 3,992,666: Technique for Detecting Energy and Determining the Frequency of Constituent Energy Components; filed January 27, 1975; patented November 16, 1976; not available NTIS.

Patent 4,000,757: High Gain Fluid Amplifier; filed December 4, 1975; patented January 4, 1977; not available NTIS.

Patent 4,003,458: Fail Safe Centrifugal Clutch; filed July 31, 1975; patented January 18, 1977; not available NTIS.

Patent 4,007,437: Acoustic Foghorn for Directional Signaling; filed August 20, 1975; patented February 8, 1977; not available NTIS.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20546.

Patent application 775,289: Automatically Lockable Axially Extensible Strut; filed March 7, 1977.

Patent 4,004,202: System for Producing Chroma Signals; patented January 18, 1977; not available NTIS.

Patent 4,007,623: Spring Operated Accelerator and Constant Force Spring Mechanism Therefor; patented February 15, 1977; not available NTIS.

Patent 4,008,407: Nuclear Thermionic Converter; patented February 15, 1977; not available NTIS.

Patent 3,943,517: Adaptive Polarization Receiving System; filed October 29, 1974; patented March 9, 1976; not available NTIS.

Patent 3,967,444: Technique for Preventing Afterburning of the Inert Components of Solid-Propelled Rocket Motors by Using Formamidinesulfonic Acid in the Binder of the Inert Components; filed September 30, 1974; patented July 6, 1976; not available NTIS.

Patent 3,968,378: Electron Beam Driven Neutron Generator; filed June 11, 1974; patented July 6, 1976; not available NTIS.

Patent 3,968,411: Transmitter-Receiver Protection Device; filed March 27, 1975; patented July 6, 1976; not available NTIS.

Patent 3,968,724: Method for Accurately Varying the Density of a Powder or Powder Charge and Shrink Tubes for Use Therewith; filed October 3, 1974; patented July 13, 1976; not available NTIS.

Patent 3,969,628: Intense, Energetic Electron Beam Assisted X-Ray Generator; filed April 4, 1974; patented July 13, 1976; not available NTIS.

Patent 3,971,237: Laminar Jet Linear Accelerometer; filed August 14, 1975; patented July 27, 1976; not available NTIS.

Patent 3,971,989: Method and System for Absolute Measurement of Noise Power at All Radio Frequencies; filed May 21, 1975; patented July 27, 1976; not available NTIS.

Patent 3,975,292: Method of Screening Infrared Radiation; filed October 1, 1963; patented August 17, 1976; not available NTIS.

Patent 3,980,103: Fluidic Resistive Element; filed November 7, 1975; patented September 14, 1976; not available NTIS.

Patent 3,980,880: Automatic Exposure Control Circuit for an Image Intensifier Camera; filed April 4, 1974; patented September 14, 1976; not available NTIS.

Patent 3,982,219: Digital Pressure/Range Transducer; filed February 19, 1975; patented September 21, 1976; not available NTIS.

Patent 3,982,244: Radar Antenna, Monopulse Comparator Network and Mixer Simulator; filed June 30, 1975; patented September 21, 1976; not available NTIS.

U.S. DEPARTMENT OF THE AIR FORCE, AF JACP, Washington, D.C. 20314.

Patent 4,006,479: Method for Dispersing Metallic Particles in a Dielectric Binder; filed February 4, 1969; patented February 1, 1977; not available NTIS.

U.S. DEPARTMENT OF AGRICULTURE, Research Agreements and Patent Mgmt. Branch, General Services Division, Federal Bldg., Agricultural Research Service, Hyattsville, Md. 20782.

Patent 3,983,746: Road Roughness Meter; filed August 14, 1975; patented October 5, 1976; not available NTIS.

U.S. ENVIRONMENTAL PROTECTION AGENCY, ROOM W513, 401 M St., SW., Washington, D.C. 20460.

Patent 3,886,694: Ascension Pipe Cleaning Apparatus with Self-Indexing Suspension; filed September 26, 1974; patented June 3, 1975; not available NTIS.

Patent 3,960,732: System for Dewatering Dilute Slurries; filed November 1, 1974; patented June 1, 1976; not available NTIS.

Patent 3,976,457: In-Stack Filter Cell; filed August 13, 1975; patented August 24, 1976; not available NTIS.

Patent 4,012,822: System for Sealing and Repairing Leaks in Ruptured Containers. March 22, 1977; not available NTIS.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, National Institutes of Health, Chief, Patent Branch, Westwood Bldg., Bethesda, Md. 20014.

Patent application 753,945: Method and Apparatus for Air Caloric Testing for the Evaluation of Aural Vestibular Disorders; filed December 23, 1976.

Patent 3,993,064: One-Handed Syringe; filed March 27, 1975; patented November 23, 1976; not available NTIS.

U.S. DEPARTMENT OF THE INTERIOR, Branch of Patents, 18th and C Streets NW., Washington, D.C. 20240.

Patent application 750,745: Modified Horizontal Roof Strain Indicator; filed December 15, 1976.

Patent application 755,916: Window Method for Measuring Leakage; filed December 30, 1976.

Patent application 755,917: Borehole Aerostatic Ground Support System; filed December 30, 1976.

Patent 3,999,980: Fluxless Recovery of Metallic Aluminum from Wastes; filed May 9, 1975; patented December 28, 1976; not available NTIS.

Patent 4,000,621: Remote Sealing of Mine Passages Containing Flowing Water; filed June 19, 1975; patented January 4, 1977; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent application 695,412: Phase Detector for Optical Figure Sensing; filed March 22, 1976; not available NTIS.

Patent 3,922,104: Tension Link Control Device; filed September 20, 1974; patented November 25, 1975; not available NTIS.

Patent 3,983,636: Hydraulic Fluidic Level Control System; filed June 19, 1975; patented October 5, 1976; not available NTIS.

Patent 3,985,436: Remote Controlled, CRT Digital Display, LLLTV Camera-Sextant; filed August 27, 1974; patented October 12, 1976; not available NTIS.

Patent 3,986,021: Passive Solar Tracking System for Steerable Fresnel Elements; filed October 24, 1975; patented October 12, 1976; not available NTIS.

Patent 3,986,116: Transient Source and Direction of Propagation-Detector; filed January 27, 1975; patented October 12, 1976; not available NTIS.

Patent 3,986,122: Reliable Communications System; filed May 22, 1962; patented October 12, 1976; not available NTIS.

Patent 3,991,383: Franz-Keldysh Effect Tuned Laser; filed March 28, 1975; patented November 9, 1976; not available NTIS.

Patent 3,991,387: Method and Device for Synchronous Generation and Amplification of Tunable VUV Laser Radiation; filed November 19, 1975; patented November 9, 1976; not available NTIS.

Patent 3,992,079: Frequency Tunable Acousto-optic Mode Filter; filed December 11, 1975; patented November 16, 1976; not available NTIS.

Patent 3,992,613: TACAN Flying Target Control System; filed October 3, 1975; patented November 16, 1976; not available NTIS.

Patent 3,992,619: Optical Scanner; filed June 23, 1975; patented November 16, 1976; not available NTIS.

Patent 3,992,692: Programmable Underwater Acoustic Beacon; filed July 23, 1975; patented November 16, 1976; not available NTIS.

Patent 3,999,879: Inflatable Roadway; filed June 16, 1975; patented December 28, 1976; not available NTIS.

Patent 4,000,613: Dual Mode Fluid Management System; filed February 13, 1975; patented January 4, 1977; not available NTIS.

Patent 4,002,962: Phase Locked Servo Loop Circuit; filed October 1, 1973; patented January 11, 1977; not available NTIS.

Patent 4,004,754: Drogue Chute Extraction; filed May 13, 1974; patented January 25, 1977; not available NTIS.

Patent 4,004,948: Paint-On Thermocouple; filed May 29, 1975; patented January 25, 1977; not available NTIS.

Patent 4,007,437: Acoustic Foghorn for Directional Signaling; filed August 20, 1975; patented February 8, 1977; not available NTIS.

Patent 4,008,868: Aircraft Steering and Braking System; filed December 18, 1975; patented February 22, 1977; not available NTIS.

Patent 4,009,323: Storage Battery Comprising Positive Electrode of a Graphite and Lithium Fluoride Compound; filed May 12, 1975; patented February 22, 1977; not available NTIS.

Patent 4,014,022: Target Detection Method and Apparatus for Reducing Range-Smearing Error Caused by Relative Target Motion; filed June 16, 1975; patented March 22, 1977; not available NTIS.

GOVERNMENT-OWNED INVENTIONS Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for \$5.00 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for \$3.50 (\$7 outside North American Continent). Requests for copies of patent applications must include the PAT-APPLnumber. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

U.S. DEPARTMENT OF THE ARMY, Office of Judge Advocate General, Patent Division, Room 2C-455, Pentagon, Washington, D.C. 20310.

Patent 3,971,951: Method of Producing, Freeze-Dried, Cooked Beef Steak and Resulting Product; filed December 22, 1975; patented July 27, 1976; not available NTIS.
Patent 3,975,068: Fiber Acoustic Waveguide and System; filed December 15, 1975; patented August 17, 1976; not available NTIS.
Patent 3,975,750: Gadolinium Doped Germanium; filed June 28, 1974; patented August 17, 1976; not available NTIS.
Patent 3,979,182: Chemical Detection of Nitrogen Containing Compounds; filed April 29, 1969; patented September 7, 1976; not available NTIS.
Patent 3,981,125: Method of Treating Quartz Crystal Resonators; filed May 8, 1975; patented September 21, 1976; not available NTIS.
Patent 3,982,125: Method and Apparatus for Providing Height Variation Compensation in Certain Nuclear Gauging Applications Including Nuclear Mine Detection; filed January 9, 1975; patented September 21, 1976; not available NTIS.

U.S. DEPARTMENT OF THE AIR FORCE AF JACP, Washington, D.C. 20314.

Patent 4,005,852: Traction Sheave Warning for Helicopter Rescue Hoist Systems; filed June 27, 1975; patented February 1, 1977; not available NTIS.
Patent 4,006,363: Gaseous Infrared Waveguide Mixer; filed January 26, 1976; patented February 1, 1977; not available NTIS.
Patent 4,006,387: Low Power Solid State Three-Phase Overcurrent/Undercurrent Protection Circuit; filed September 22, 1975; patented February 1, 1977; not available NTIS.
Patent 4,006,446: RAPCON-Control Tower Coordination System; filed January 8, 1976; patented February 8, 1977; not available NTIS.
Patent 4,007,049: Thermal Shock Resistant Ceramic Composite; filed August 6, 1968; patented February 8, 1977; not available NTIS.

U.S. DEPARTMENT OF AGRICULTURE, Research Agreements and Patent Management Branch, General Services Division, Federal Building, Agricultural Research Service, Hyattsville, Md. 20782.

Patent application 748,032: Highly Absorbent Polymeric Compositions from Polyhydroxy Polymer Graft Copolymers; filed December 6, 1976.
Patent application 764,113: Alkyl 9,9(10,10)-Bis(acetyloxymethyl)octadecanoates as Primary Plasticizers for Polyvinylchloride; filed January 31, 1977.
Patent application 780,567: Physicochemically Designed Fat Compositions from Tallow and Process for Making; filed March 23, 1977.
Patent application 789,375: Nutritionally Balanced Protein Snack Food Prepared from Legume Seeds; filed April 20, 1977.
Patent 3,972,828: Fuel Moisture Analog; filed August 14, 1975; patented August 3, 1976; not available NTIS.

Patent 4,006,032: Process for Removing Off-Flavor from Maple Syrup; filed January 30, 1976; patented February 1, 1977; not available NTIS.

U.S. DEPARTMENT OF COMMERCE, National Technical Information Service, Springfield, Va. 22161.

Patent application 788,951: Use of Sulphur as an Additive to Inhibit the Smoldering Combustion of Materials; filed April 19, 1977.

U.S. ENVIRONMENTAL PROTECTION AGENCY, Room W513, 401M Street SW., Washington, D.C. 20460.

Patent 3,863,606: Vapor Generating System Utilizing Fluorized Beds; filed July 25, 1973; patented February 4, 1975; not available NTIS.
Patent 3,918,836: Dual Temperature Controller; filed July 23, 1974; patented November 11, 1975; not available NTIS.
Patent 3,941,314: Nozzle Assembly for Distributing Fluid; filed December 26, 1973; patented March 2, 1976; not available NTIS.

U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent 3,952,253: Method and Means for Generating a Synchronizing Pulse from a Repetitive Wave of Varying Frequency; filed November 21, 1974; patented April 20, 1976; not available NTIS.
Patent 3,955,085: Thin Film Tritium Dosimetry; filed July 23, 1975; patented May 4, 1976; not available NTIS.
Patent 3,957,597: Process for Recovering Tritium from Molten Lithium Metal; filed May 28, 1974; patented May 18, 1976; not available NTIS.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, National Institutes of Health, Chief, Patent Branch, Westwood Building, Bethesda, Md. 20014.

Patent application 711,569: Esters of Aromatic Sulfonic Acids; filed August 4, 1976.
Patent application 730,351: The Topical and Oral Use of Cannabinoid-Like Substances to Effect Reduction in Intracocular Pressure in Animals; filed October 7, 1976.
Patent application 758,446: Metal Chelate Derivatives of Anthracycline Antibiotics, and Method for Preparing Same; filed January 11, 1977.
Patent application 758,812: Aziridinyl Quinone Antitumor Agents; filed January 12, 1977.
Patent application 769,888: 1,1-Diaminocyclohexane Platinum (II) Complexes Having Antineoplastic Activity; filed February 18, 1977.

Patent 3,992,522: Temperature-Sensitive Recombinant Mutant Viruses and a Process for Producing Same; filed June 18, 1975; patented November 16, 1976; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent 3,922,223: Multiple Chromatographic Column System; filed March 25, 1974; patented November 25, 1975; not available NTIS.

Patent 3,961,171: Method of Obtaining Correlation between Certain Selected Samples of a Sequence; filed February 18, 1975; patented June 1, 1976; not available NTIS.

Patent 3,963,439: Multielectrode Apparatus and Techniques to Prepare Aligned Asbestos Fibers on a Thin Substrate; filed September 5, 1975; patented June 15, 1976; not available NTIS.

Patent 3,968,361: Laser Receiver Anti-Sun Circuit; filed June 23, 1975; patented July 6, 1976; not available NTIS.

Patent 3,976,655: Method of Making 2,6-Bis (Methylamino) or 2,6-Bis(Dimethylamino) Pyridines; filed June 20, 1975; patented August 24, 1976; not available NTIS.

Patent 3,976,656: 1,4-Bis(5-p-n-Butoxyphenyloxazol-2-yl)Benzene and the Preparation Thereof; filed January 20, 1975; patented August 24, 1976; not available NTIS.

Patent 3,982,280: Functional Ankle for a Prosthetic Limb; filed October 6, 1975; patented September 28, 1976; not available NTIS.

Patent 3,982,736: Expandable Element Check Valve; filed December 22, 1975; patented November 23, 1976; not available NTIS.

Patent 3,983,577: Method for Production of Heat and Hydrogen Gas; filed December 8, 1975; patented November 23, 1976; not available NTIS.

Patent 3,983,968: In-Line Waveguide to Coax Transition; filed June 16, 1975; patented November 23, 1976; not available NTIS.

Patent 3,995,480: Thermal Sensor for Measurement of Ocean Current Direction; filed August 8, 1975; patented December 7, 1976; not available NTIS.

Patent 3,996,551: Chromium-Silicon Oxide Thin Film Resistors; filed October 20, 1975; patented December 7, 1976; not available NTIS.

Patent 3,998,223: Syringe Apparatus; filed October 24, 1975; patented December 21, 1976; not available NTIS.

Patent 3,999,331: Apparatus for Making High-Pressure Ports in Closed Hulls; filed August 4, 1975; patented December 28, 1976; not available NTIS.

Patent 4,000,648: High Sensitivity Flowmeter; filed January 12, 1976; patented January 4, 1977; not available NTIS.

Patent 4,002,824: Selective Zoom Camera and Display; filed January 28, 1976; patented January 11, 1977; not available NTIS.

Patent 4,002,898: Single Mode Laser Multimodal Optical Data Communication System; filed January 26, 1976; patented January 11, 1977; not available NTIS.

Patent 4,004,000: Self-Limiting Chemical Systems for Nonpolluting Control of Noxious Pests; filed July 8, 1975; patented January 18, 1977; not available NTIS.

Patent 4,004,230: Critical Parameter Receiver Tester; filed December 29, 1975; patented January 18, 1977; not available NTIS.

Patent 4,004,235: Phase-Locking Midpulse Detector; filed March 1, 1976; patented January 18, 1977; not available NTIS.

Patent 4,004,415: Propellant for Liquid Propellant Gun; filed December 11, 1974; patented January 25, 1977; not available NTIS.

Patent 4,004,515: Sequential Jet Shaped Charge; filed January 25, 1971; patented January 25, 1977; not available NTIS.

Patent 4,004,516: Fuse; filed October 24, 1975; patented January 25, 1977; not available NTIS.

Patent 4,005,632: Liquid Propellant Gun; filed September 15, 1975; patented February 1, 1977; not available NTIS.

Patent 4,005,655: Inflatable Stabilizer/Retarder; filed February 2, 1976; patented February 1, 1977; not available NTIS.

Patent 4,007,437: Acoustic Foghorn for Directional Signaling; filed August 20, 1975; patented February 8, 1977; not available NTIS.

Patent 4,014,019: Real Time Analog Doppler Processor for Weather Radar; filed September 11, 1975; patented March 22, 1977; not available NTIS.

Patent 4,015,257: Radar Detection of Turbulence in Precipitation; filed September 11, 1975; patented March 29, 1977; not available NTIS.

National Aeronautics and Space Administration, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20546.

Patent application 643,043: Optically Selective, Acoustically Resonant Gas Detecting Transducer; filed December 22, 1975.
Patent application 687,251: Automated Clinical System for Chromosome Analysis; filed May 16, 1976.

Patent application 704,180: Charge Transfer Reaction Laser with Preionization Means; filed July 12, 1976.

Patent application 765,133: Dual Membrane, Hollow Fiber Fuel Cell; filed February 3, 1977.

Patent application 765,139: A Non-Tracking Solar Energy Collector System; filed March 2, 1977.

Patent application 765,165: Phase Array Antenna Control; filed February 3, 1977.

Patent application 765,167: Bit Error Rate Measurement Above and Below Bit Rate Tracking Threshold; filed March 2, 1977.

Patent application 766,999: Passive Intrusion Detection System; filed February 9, 1977.

Patent application 767,911: Multi-Purpose Wind Tunnel Reaction Control Model Block; filed February 11, 1977.

Patent application 769,149: Logarithmic Circuit with Wide Dynamic Range; filed February 16, 1977.

Patent application 772,168: Sequencing Device Utilizing Planetary Gear Set; filed February 25, 1977.

Patent application 778,195: Low Density Bis-maleimide-Carbon Microballoon Composites; filed March 16, 1977.

Patent 3,988,933: Fluid Mass Sensor for a Zero Gravity Environment; patented November 2, 1976; not available NTIS.

Patent 3,989,136: Guide for a Typewriter; patented November 2, 1976; not available NTIS.

Patent 3,989,136: Guide for a Typewriter; patented November 2, 1976; not available NTIS.

Patent 3,989,541: Solar Cell Assembly; patented November 2, 1976; not available NTIS.

Patent 3,989,602: Method of Making Reinforced Composite Structure; patented November 2, 1976; not available NTIS.

Patent 3,990,049: Selective Data Segment Monitoring System; patented November 2, 1976; not available NTIS.

Patent 4,006,631: Magnetic Heading Reference; patented February 8, 1977; not available NTIS.

Patent 4,006,999: Leading Edge Protection for Composite Blades; patented February 8, 1977; not available NTIS.

Patent 4,007,430: Continuous Plasma Laser; patented, February 8, 1977; not available NTIS.

Patent 4,007,601: Tubular Sublimatory Evaporator Heat Sink; patented February 15, 1977; not available NTIS.

Patent 4,010,455: Cyclical Bi-Directional Rotary Actuator; patented March 1, 1977; not available NTIS.

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are avail-

able for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for \$0.50. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161, for \$3.50 (\$7 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

U.S. DEPARTMENT OF THE ARMY, Office of Judge Advocate General, Patent Division, Room 2C-455, Pentagon, Washington, D.C. 20310.

Patent application 684,040: Benefication of Carbinolamine Compounds; filed May 7, 1976.

Patent application 714,416: Rectifier Controlled Circuit; filed August 16, 1976.

Patent application 774,165: Improved Process for Producing 8-NHR Quinolines; filed March 3, 1977.

Patent 3,974,708: Constant Force Belt Tensioner; filed September 17, 1975; patented August 17, 1976; not available NTIS.

Patent 3,984,577: Method of Compacting and Freeze-Drying Particulate Foods; filed October 8, 1974; patented October 5, 1976; not available NTIS.

Patent 3,984,762: Method for Determining Battery State of Charge by Measuring A.C. Electrical Phase Angle Change; filed March 25, 1975; patented October 5, 1976; not available NTIS.

Patent 3,984,824: Wide-Band Optical Analog Signal Link Using Fiber Optics; filed July 25, 1975; patented October 5, 1976; not available NTIS.

Patent 3,986,137: Method for Producing Chemical Laser Output from Radioactive Decomposition of Chemicals; filed September 30, 1974; patented October 12, 1976; not available NTIS.

Patent 3,986,527: Laminar Flow Digital Logic Elements with Feedback; filed November 6, 1975; patented October 19, 1976; not available NTIS.

Patent 3,987,208: Method of Extending the Storage Life of Cut Lettuce; filed March 25, 1976; patented October 19, 1976; not available NTIS.

Patent 3,987,305: Low Self-Bias Variable Gap Diode; filed June 10, 1975; patented October 19, 1976; not available NTIS.

Patent 3,987,372: Chemical Laser from Radiative Decomposition of Chemicals; filed September 30, 1974; patented October 19, 1976; not available NTIS.

Patent 3,987,665: Non-Destructive Test Method for Assessing Textile Material Degradation; filed August 22, 1975; patented October 25, 1976; not available NTIS.

Patent 3,990,003: Pulsed Loop Antenna-Conduit Electromagnetic Radiator Test Technique for Electromagnetic Shielding Flaw Detection in Buried Conduits and Shielded Conductors; filed September 17, 1975; patented November 2, 1976; not available NTIS.

Patent 3,995,263: Oscilloscope Date-Time Generator and Display; filed December 5, 1974; patented November 30, 1976; not available NTIS.

Patent 3,995,831: Force Feedback Controlled Winch; filed December 17, 1974; patented December 7, 1976; not available NTIS.

Patent 3,997,266: Lens Testing Using Total Internal Reflection Polarography; filed September 26, 1975; patented December 14, 1976; not available NTIS.

Patent 3,998,749: Chemical Heater Formulation and Method for Generating Heat; filed September 6, 1974; patented December 21, 1976; not available NTIS.

Patent 4,000,505: Thin Oxide MOS Solar Cells; filed August 8, 1975; patented December 28, 1976; not available NTIS.

U.S. DEPARTMENT OF THE AIR FORCE, AF/JACP, Washington, D.C. 20314.

Patent 4,006,480: Antenna Window Assembly for Ablative Heat Shields; filed February 3, 1976; patented February 1, 1977; not available NTIS.

U.S. ENVIRONMENTAL PROTECTION AGENCY, Room W513, 401 M Street, SW., Washington, D.C. 20460.

Patent 3,923,545: Grid Structure for High Rate Lead/Acid Battery; filed March 30, 1973; patented December 2, 1975; not available NTIS.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, National Institutes of Health, Chief, Patent Branch, Westwood Building, Bethesda, Md. 20014.

Patent application 778,455: Horizontal Flow-Through Coil Planet Centrifuge Without Rotating Seals; filed March 17, 1977.

Patent application 786,414: A Pteridine Compound; filed April 11, 1977.

Patent 3,960,138: Differential Temperature Integrating Diagnostic Method and Apparatus; filed January 6, 1975; patented June 1, 1976; not available NTIS.

Patent 3,988,307: Solid Phase Synthesis of Peptides with Carboxyl-Terminal Amides; filed September 6, 1974; patented October 26, 1976; not available NTIS.

Patent 4,001,087: Affinity Labelling Enzymes with Esters of Aromatic Sulfonic Acids; filed November 4, 1975; patented January 4, 1977; not available NTIS.

Patent 4,006,023: Photographic Polymeric Composition Containing a Leuco Dye Cyanide; filed October 7, 1974; patented February 1, 1977; not available NTIS.

Patent 4,016,303: Method of Flocking Blood-Contacting Surfaces on Artificial Implant Devices; filed August 6, 1975; patented April 5, 1977; not available NTIS.

U.S. DEPARTMENT OF THE INTERIOR, Branch of Patents, 18th and C Streets NW., Washington, D.C. 20240.

Patent application 759,202: System for the Dielectrophoretic Separation of Particulate and Granular Materials; filed January 13, 1977.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent application 736,173: A Cylindrical Array Radiator; filed March 30, 1977.

Patent application 759,526: Autokinetic Sampling Nozzle; filed January 14, 1977.
 Patent application 761,917: Apparatus and Method for Connecting Bimetallic Members by Explosive Bonding; filed January 24, 1977.
 Patent application 763,265: Field-Effect Transistor with Extended Linear Logarithmic Transconductance; filed January 27, 1977.
 Patent application 767,020: Translating Filter; filed February 9, 1977.
 Patent application 772,395: Optical Slip-rings; filed March 30, 1977.
 Patent application 772,396: Optical Slip-rings; filed March 30, 1977.
 Patent application 773,615: Wideband Optical Isolator; filed March 30, 1977.
 Patent 3,938,029: Low Noise DC Power Supply System for Electronics on a Rotating Assembly; filed July 5, 1974; patented February 10, 1976; not available NTIS.
 Patent 3,938,148: Automatic Frequency Control System; filed July 10, 1974; patented February 10, 1976; not available NTIS.
 Patent 3,991,475: Depth Selecting Spool Device; filed December 5, 1975; patented November 16, 1976; not available NTIS.
 Patent 3,992,352: Fire Retardant Polyester Resins; filed October 24, 1975; patented November 16, 1976; not available NTIS.
 Patent 3,992,353: Fire Retardant Polyester Resins; filed October 24, 1975; patented November 16, 1976; not available NTIS.
 Patent 3,996,586: Magnetic Tape Pulse Width to Digital Converter; filed September 20, 1974; patented December 7, 1976; not available NTIS.
 Patent 3,997,231: Test Connector; filed December 8, 1975; patented December 14, 1976; not available NTIS.
 Patent 4,001,373: Removal of Tetrahydro-methane from TNT Plant Waste; filed August 18, 1975; patented January 4, 1977; not available NTIS.
 Patent 4,002,596: Haloalkoxy Derivatives of the Cyclophosphonitrilic Chloride-Hexamethylphosphoramide Adduct; filed September 10, 1975; patented January 11, 1977; not available NTIS.
 Patent 4,003,977: Removal of Tetrahydro-methane from TNT Plant Waste Gases; filed August 18, 1975; patented January 18, 1977; not available NTIS.
 Patent 4,004,266: Transducer Array Having Low Cross-Coupling; filed December 5, 1975; patented January 18, 1977; not available NTIS.
 Patent 4,006,404: Pulsed Plasma Probe; filed January 30, 1976; patented February 1, 1977; not available NTIS.
 Patent 4,007,816: Portable Salvage Lift Apparatus; filed August 28, 1975; patented February 15, 1977; not available NTIS.
 Patent 4,008,139: Fluorinated Compounds; filed December 22, 1975; patented February 15, 1977; not available NTIS.
 Patent 4,008,395: Flexible Tube Section for Gimbalized IR Detectors; filed August 2, 1974; patented February 15, 1977; not available NTIS.
 Patent 4,010,040: Modified Mixing Technique for Carboreaceous Stock; filed December 5, 1974; patented March 1, 1977; not available NTIS.
 Patent 4,011,518: Microwave GaAs FET Amplifier Circuit; filed October 28, 1975; patented March 8, 1977; not available NTIS.
 NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20546.
 Patent application 762,362: Solar Energy Collection System; filed January 25, 1977.

Patent application 762,363: Low Cost Solar Energy Collection System; filed January 25, 1977.
 Patent application 768,794: Apparatus for Automatically Spraying a Coating Material; filed February 15, 1977.
 Patent application 774,553: Very Narrow Band Width Receiver; filed March 4, 1977.
 Patent application 779,871: A Rotary Electric Device; filed March 21, 1977.
 Patent application 779,883: Oxygen Post-Treatment of Plastic Surfaces Coated with Plasma Polymerized Silicon-Containing Monomers; filed March 21, 1977.
 Patent application 780,568: Crosswind Landing Gear Position Indicator; filed March 23, 1977.
 Patent application 780,873: Apparatus and Method for Determining the Position of a Radiant Energy Source; filed March 24, 1977.
 Patent application 780,874: Microcomputerized Electric Field Meter Diagnostic and Calibration System; filed March 24, 1977.
 Patent 4,011,719: Anode for Ion Thruster; patented March 15, 1977; not available NTIS.
 Patent 4,011,854: Mount for Continuously Orienting a Collector Dish in a System Adapted to Perform Both Diurnal and Seasonal Solar Tracking; patented March 15, 1977; not available NTIS.
 Patent 4,012,018: All Sky Pointing Attitude Control System; patented March 15, 1977; not available NTIS.
 Patent 4,012,123: Binocular Device for Displaying Numerical Information in Field of View; patented March 15, 1977; not available NTIS.
 Patent 4,012,696: Multiple Rate Digital Command Detection System with Range Clean-Up Capability; patented March 15, 1977; not available NTIS.

GOVERNMENT-OWNED INVENTIONS
Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for \$5.00 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for \$3.50 (\$7.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed

to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

U.S. DEPARTMENT OF THE ARMY, Office of Judge Advocate General, Patent Division, Room 2C-455, Pentagon, Washington, D.C. 20310.

Patent application 713,312: Irreversible Warmup Indicator; filed August 10, 1976.
 Patent 3,986,906: Ultrahigh Burning Rate Propellants Containing an Organic Perchlorate Oxidizer; filed December 23, 1974; patented October 19, 1976; not available NTIS.
 Patent 3,987,366: Square Root of Transient Circuit; filed October 22, 1974; patented October 19, 1976; not available NTIS.
 Patent 3,991,421: Personal Blast Protection Armor; filed September 9, 1975; patented November 16, 1976; not available NTIS.
 Patent 3,995,234: Ringing Oscillator Including a Resonant Circuit with Frequency Divider Feedback Loop; filed October 6, 1975; patented November 30, 1976; not available NTIS.

U.S. DEPARTMENT OF AGRICULTURE, Research Agreements and Patent Management Branch, General Services Division, Federal Bldg., Agricultural Research Service, Hyattsville, Md. 20782.

Patent application 734,937: An Improvement in the Short Milk Tube of a Milking Machine; filed October 22, 1976.
 Patent application 789,376: Apparatus for Growing Mushrooms; filed April 20, 1977.
 Patent application 789,377: Apparatus for Harvesting Vegetable Heads; filed April 20, 1977.

U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent application 663,590: Solar Concentrator with Restricted Exit Angles; filed March 3, 1976.
 Patent 3,969,218: Elution Electrophoresis; filed February 11, 1975; patented July 13, 1976; not available NTIS.
 Patent 3,972,775: Conversion of Cellulosic Materials to Sugar; filed June 28, 1974; patented August 3, 1976; not available NTIS.
 Patent 3,981,480: Variable Gas Leak Rate Valve; patented September 21, 1976; not available NTIS.

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE, National Institutes of Health, Chief, Patent Branch, Westwood Bldg., Bethesda, Md. 20014.

Patent application 736,451: Capillary Cell Culture Device; filed October 28, 1976.
 Patent application 737,590: Direct Contact Microwave Diathermy Applicator; filed November 1, 1976.
 Patent application 738,580: Prosthetic Joint Lock and Cable Mechanism; filed November 3, 1976.
 Patent application 753,103: Electrophoretic Fractional Elution Apparatus Employing a Rotational Seal Fraction Collector; filed December 21, 1976.
 Patent application 758,851: Real Time Two-Dimensional Mechanical Ultrasonic Sector Scanner with Electronic Control of Sector Width; filed January 12, 1977.
 Patent application 767,883: Three Dimensional Laser Doppler Velocimeter; filed February 11, 1977.

Patent application 767,996: Electrode for Artificial Pacemaker; filed February 11, 1977.
 Patent application 768,397: Subcutaneous Fluid and Culture Chamber and Implant Technique; filed February 14, 1977.
 Patent application 778,083: Method of and Apparatus for Measurement of Blood Flow Using Coherent Light; filed March 16, 1977.
 Patent application 786,486: A Magnetic Fluid Actuated Control Valve, Relief Valve and Pump; filed April 8, 1977.
 Patent 3,628,813: Fluid Connecting Device; filed June 9, 1970; patented December 21, 1971; not available NTIS.
 Patent 3,663,965: Bacteria-Resistant, Percutaneous Conduit Device; filed June 8, 1970; patented May 23, 1972; not available NTIS.
 Patent 3,995,031: Method of Controlling Obesity with Purified Active Principle of Fruit of 'Synsepalum dulcificum'; filed July 23, 1974; patented November 30, 1976; not available NTIS.
 Patent 4,003,834: Density Gradient Fractionation by Piston Displacement; filed March 31, 1975; patented January 18, 1977; not available NTIS.
 Patent 4,008,713: Ultrasonic Diagnostic Technique Utilizing Switched Gain Signal Processing; filed September 18, 1975; patented February 22, 1977; not available NTIS.
 Patent 4,014,317: Multipurpose Cardiocirculatory Assist Cannula and Methods of Use Thereof; filed February 18, 1972; patented March 29, 1977; not available NTIS.
 Patent 4,014,885: Anti-Leukemic Oxygenated Benzo(c)Phenanthridine Compounds; filed March 10, 1975; patented March 29, 1977; not available NTIS.
 Patent 4,014,991: Oral Rabies Immunization of Carnivores; filed January 23, 1976; patented March 29, 1977; not available NTIS.
 Patent 4,015,130: Method and Apparatus for Monitoring Optical Radiation; filed October 7, 1975; patented March 29, 1977; not available NTIS.
 Patent 4,017,404: Apparatus for Low Temperature Ashing Using Radio Frequency Excited Gas Plasma; filed March 11, 1976; patented April 12, 1977; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent application 765,500: Exhaust Plume Reduction and Cooling System; filed February 3, 1977.
 Patent application 767,728: Castable Gas Generator Propellant; filed March 30, 1977.
 Patent 3,453,861: Square Wave Fluid Pressure Generator; filed April 25, 1967; patented July 8, 1969; not available NTIS.
 Patent 3,916,305: Atmospheric Electrical Current Detector; filed May 20, 1974; patented October 28, 1975; not available NTIS.
 Patent 3,919,636: Electrical Field Change Meter; filed April 29, 1974; patented November 11, 1975; not available NTIS.
 Patent 3,925,726: Electric Field Sensor; filed May 8, 1974; patented December 9, 1975; not available NTIS.
 Patent 4,000,517: Remotely Controllable Recorder; filed November 10, 1975; patented December 28, 1976; not available NTIS.
 Patent 4,003,015: Multipath Sonar System; filed July 3, 1975; patented January 11, 1977; not available NTIS.
 Patent 4,005,765: Crash Load Attenuating Troop Seat; filed February 24, 1975; patented February 1, 1977; not available NTIS.
 Patent 4,006,303: Filtered Transition Distortion Channel Quality Monitor; filed December 29, 1975; patented February 1, 1977; not available NTIS.

Patent 4,008,476: Digital Antenna Pattern Generator for Radar Simulation; filed October 3, 1976; patented February 15, 1977; not available NTIS.
 Patent 4,011,564: Phase Modulated Monopulse System; filed July 7, 1966; patented March 8, 1977; not available NTIS.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20546.

Patent application 782,462: Direct Current Transformer; filed March 29, 1977.
 Patent 4,011,756: Metallic Hot Wire Anemometer; patented March 15, 1977; not available NTIS.
 Patent 4,012,237: Zirconium Modified Nickel-Copper Alloy; patented March 15, 1977; not available NTIS.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

U.S. DEPARTMENT OF THE AIR FORCE, AF, JACP, Washington, D.C. 20314.

Patent application 776,039: Double Acting Dynamic Seal; filed March 9, 1977.

U.S. DEPARTMENT OF AGRICULTURE, Research Agreements and Patent Mgmt. Branch, General Services Division, Federal Bldg., Agricultural Research Service, Hyattsville, Md. 20782.

Patent application 751,634: Bark Burning System; filed January 10, 1977.

U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent application 659,439: Method and Apparatus for Detecting and Measuring Trace Impurities in Flowing Gases; filed February 19, 1976.

Patent application 664,858: Isotope Separation by Photodissociation of Van der Waals Molecules; filed March 8, 1976.

Patent application 664,859: Solar Radiation Absorbing Material; filed March 8, 1976.

Patent application 665,191: Multiple Fuel Supply System for an Internal Combustion Engine; filed March 9, 1976.

Patent application 666,533: Bearing Assembly and the Like for Use in Corrosive and Non-Corrosive Atmospheres; filed March 15, 1976.

Patent application 668,345: Solar Collector Having a Solid Transmission Medium; filed March 19, 1976.

Patent 3,969,615: Interpolator for Numerically Controlled Machine Tools; filed December 20, 1974; patented July 13, 1976; not available NTIS.

Patent 3,973,075: High Temperature Furnace; filed September 15, 1975; patented August 3, 1976; not available NTIS.

Patent 3,973,152: Ultrasonic Transducer with Laminated Coupling Wedge; filed April 3, 1975; patented August 3, 1976; not available NTIS.

Patent 3,976,569: Water Softening Process; filed February 25, 1975; patented August 24, 1976; not available NTIS.

Patent 3,976,747: Modified Dry Limestone Process for Control of Sulfur Dioxide Emissions; filed June 6, 1975; patented August 24, 1976; not available NTIS.

Patent 3,979,498: Recovery of Cesium and Palladium from Nuclear Reactor Fuel Processing Waste; filed August 6, 1975; patented September 7, 1976; not available NTIS.

Patent 3,981,321: Vehicle Fuel System; filed September 24, 1974; patented September 21, 1976; not available NTIS.

Patent 3,982,526: Turning Collectors for Solar Radiation; filed May 20, 1975; patented September 28, 1976; not available NTIS.

Patent 3,982,838: Compact Fast Analyzer of Rotary Cuvette Type; filed March 12, 1974; patented September 28, 1976; not available NTIS.

Patent 3,983,050: Method for Storage of Solid Waste; filed February 7, 1975; patented September 28, 1976; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research, Code 302, Arlington, Va. 22217.

Patent application 700,675: Radial depressor; filed June 28, 1976.

Patent application 762,084: Radiation Seal and Method; filed January 24, 1977.

Patent application 765,170: 360 Degrees Non-Programmed Visual System; filed February 3, 1977.

Patent application 770,871: Ternary Pulse-Number Modulation Method; filed February 22, 1977.

Patent application 774,826: An Improved Ultrasonic Focused Transducer; filed March 7, 1977.

Patent application 776,578: Oceanographic Sensor with In-Situ Cleaning and Bio-Fouling Prevention System; filed March 11, 1977.

Patent application 777,225: Zero Temperature Coefficient of Resistance Bi-Film Resistor; filed March 14, 1977.

Patent 3,954,931: Process for Making a Molded Valve Housing for a Prosthetic Limb; filed April 12, 1974; patented May 4, 1976; not available NTIS.

Patent 3,983,501: Hybrid Tracking Loop for Detecting Phase Shift Keyed Signals; filed September 29, 1975; patented September 28, 1976; not available NTIS.
 Patent 4,002,834: PCM Synchronization and Multiplexing System; filed December 9, 1974; patented January 11, 1977; not available NTIS.
 Patent 4,005,282: Deometer; filed September 25, 1975; patented January 25, 1977; not available NTIS.
 Patent 4,009,231: Powder Barrier Bonding Technique; filed March 20, 1975; patented February 22, 1977; not available NTIS.
 Patent 4,017,859: Multi-Path Signal Enhancing Apparatus; filed December 22, 1975; patented April 12, 1977; not available NTIS.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION, Assistant General Counsel for Patent Matters, NASA Code GP-2, Washington, D.C. 20546.

Patent application 779,428: Flow Compensating Pressure Regulator; filed March 21, 1977.
 Patent application 780,729: Digital Automatic Gain Amplifier; filed March 24, 1977.
 Patent application 780,930: Portable Breathing System; filed March 24, 1977.
 Patent application 782,480: Wide Power Range Microwave Feedback Controller; filed March 29, 1977.
 Patent application 782,481: Ocean Thermal Plant; filed March 29, 1977.
 Patent Application 782,482: Remote lighting Monitor System; filed March 29, 1977.
 Patent application 782,693: Lighting Current Waveform Measuring System; filed March 30, 1977.
 Patent application 788,044: Reduced Chromium Stainless Steel Alloys; filed April 15, 1977.
 Patent 3,555,483: Cryogenic Liquid Sensor; patented January 12, 1971; not available NTIS.
 Patent 3,582,828: Charge Storage Diode Modulators and Demodulators; patented June 1, 1971; not available NTIS.
 Patent 3,621,330: Depressurization of Arc Lamps; patented November 16, 1971; not available NTIS.
 Patent 3,697,705: Electromagnetic Transducer Recording Head Having a Laminated Core Section and Tapered Gap; patented October 10, 1972; not available NTIS.
 Patent 3,711,701: Uniform Variable Light Source; patented January 16, 1973; not available NTIS.
 Patent 3,881,132: Compact, High Intensity Arc Lamp with Internal Magnetic Field Producing Means; patented April 29, 1975; not available NTIS.
 Patent 4,018,092: Mechanical Sequencer; patented April 19, 1977; not available NTIS.
 Patent 4,018,423: Emergency Descent Device; patented April 19, 1977; not available NTIS.

GOVERNMENT-OWNED INVENTIONS
Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents and Trademarks, Washington, D.C. 20231, for \$0.50 each. Requests for copies

of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Va. 22161 for \$3.50 (\$7 outside North American Continent). Requests for copies of patent applications must include the PAT-APPLnumber. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator,
National Technical Information Service.

Patent application 776,037: Probe Station; filed March 9, 1977.
 Patent application 776,387: Plastic/Miscellaneous Incendiary Projectile; filed March 10, 1977.
 Patent 4,010,921: Spacecraft Closed Loop Three-Axis Momentum Unloading System; filed August 20, 1975; patented March 8, 1977; not available NTIS.
 Patent 4,011,452: Antinuclear Reflector Assembly for Infrared Detector; filed November 6, 1975; patented March 8, 1977; not available NTIS.

U.S. ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION, Assistant General Counsel for Patents, Washington, D.C. 20545.

Patent 3,959,073: Reactor Hold-down Arrangement; filed June 6, 1973; patented May 25, 1976; not available NTIS.
 Patent 3,970,936: Telecommunication Using Muon Beams; filed May 29, 1973; patented July 20, 1976; not available NTIS.
 Patent 3,970,956: Cylindrical Electron Beam Diode; filed July 24, 1975; patented July 20, 1976; not available NTIS.
 Patent 3,973,928: Apparatus for Diffusion Separation; filed January 28, 1949; patented August 10, 1976; not available NTIS.
 Patent 3,973,934: Apparatus for Diffusion Separation; filed February 23, 1949; patented August 10, 1976; not available NTIS.
 Patent 3,976,775: Method for Dissolving Plutonium Dioxide; filed May 6, 1975; patented August 24, 1976; not available NTIS.
 Patent 3,976,888: Fission Fragment Driven Neutron Source; filed January 23, 1975; patented August 24, 1976; not available NTIS.
 Patent 3,981,321: Vehicle Fuel System; filed September 24, 1974; patented September 21, 1976; not available NTIS.
 Patent 3,982,928: Separation of Uranium from (Th,U)O₂ Solid Solutions; filed January 3, 1975; patented September 28, 1976; not available NTIS.
 Patent 3,983,219: High Purity Polonium Recovery; filed October 1, 1973; patented September 28, 1976; not available NTIS.
 Patent 3,983,220: Recovery of Boric Acid from Ion Exchangers; filed November 7, 1974; patented September 28, 1976; not available NTIS.

U.S. DEPARTMENT OF THE NAVY, Assistant Chief for Patents, Office of Naval Research Code 302, Arlington, Va. 22217.

Patent application 700,244: Parachute Deployment and Container System; filed June 28, 1976.

Patent application 743,441: Wide Band Proportional Transducer Array; filed November 19, 1976.

Patent application 743,723: 2,2,7,8-Tetraazaspiro (4,4) nonane, 2,3,7,8-Tetraazaspiro-(4,4) nona-2,7-diene and Derivatives; filed November 22, 1976.

ENERGY RESEARCH AND
DEVELOPMENT ADMINISTRATION
RETRANSFER AND REPROCESSING OF
SPECIAL NUCLEAR MATERIAL OF U.S.
ORIGIN

Denial of Petition for Rulemaking

On March 28, 1977 (42 FR 16466), ERDA gave notice that it had received a Petition for Rulemaking styled as follows: "In the Matter of Approvals for Retransfer and Reprocessing of Special Nuclear Material of United States Origin." The petitioners are Natural Resources Defense Council, Inc., Union of Concerned Scientists, Friends of the Earth (United Kingdom) Ltd., and Les Amis de la Terre. By letter dated August 31, 1977 ERDA denied the Petition. Copies of the letter denying the petition are available for inspection at ERDA's Public Document Room, 20 Massachusetts Avenue, N.W., Washington, D.C.

HUDSON B. RAGAN,
Acting General Counsel.

ENVIRONMENTAL PROTECTION
AGENCY

[FRL 801-7; OPP-50331]

MISSISSIPPI AUTHORITY FOR CONTROL
OF FIRE ANTSIssuance of Experimental Use Permit and
Solicitation of Public Views

The Environmental Protection Agency (EPA) has issued two experimental use permits to the Mississippi Authority for Control of Fire Ants, Jackson, Mississippi 39025. These permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

Experimental Use Permit No. 38962-EUP-1 allows the use of 0.5 pound of the insecticide dodecachlorooctahydro-1,3,4-metheno-2H-cyclobuta (cd) pentalene (0.05 Mirex Bait 10-5) on clear cut forest areas to evaluate control of imported fire ants. A total of 1,000 acres is involved; the program is authorized only in the State of Mississippi. The experimental use permit is effective from

September 2, 1977 to December 31, 1977.

Experimental Use Permit No. 38962-EUP-2 allows the use of approximately 11 pounds of the insecticide dodecachlorooctahydro-1,3,4-metheno-2H-cyclobuta (cd) pentalene (Ferriamicide Bait) on infested clear cut forest areas to evaluate control of imported fire ants. A total of 5,500 acres is involved; the program is authorized only in the States of Florida and Mississippi. The experimental use permit is effective from September 2, 1977 to October 1, 1978.

The Mississippi Authority for the Control of Fire Ants is the holder of all registrations for Mirex end-use products. With EPA acceptance of its phase-out plan on December 29, 1976, all registered Mirex formulations will be effectively cancelled by December 1, 1977, and all existing stocks of registered Mirex formulations within the United States will not be sold or distributed or used after June 30, 1978.

On August 10, 1977, the Mississippi Authority for Control of Fire Ants requested experimental use permits to use a 0.05% Mirex bait and a 0.025 to 0.1% Ferriamicide Bait (degradable Mirex). The purpose of the program for the 0.5% Mirex bait (No. 38962-EUP-1) is to obtain efficacy data on the reduced concentration of Mirex formulation, a comparison of 0.05% active ingredient with the registered 0.1% active ingredient formulation. The purpose of the 0.025 to 0.1% Mirex bait (No. 38962-EUP-2) is to determine the efficacy of this degradable Mirex bait formulation and to investigate the bioaccumulation and rate of degradation in the environment.

In light of the Mississippi Authority Plan mentioned above to end all uses of registered Mirex formulations by June 30, 1978, loss of this season's testing would take away the only mechanism with which to gather data necessary to support any new registration requests in time for possible use in the 1978 season. Since Mirex formulations may be used through June 30, 1978, the newly approved use of the 0.05% formulation on 1,000 acres from September through December 1977 and of the Ferriamicide formulation from September 1977 through September 1978 should not increase any possible adverse effect on the environment. Further, the program for the degradable Mirex bait will create data which will enable a determination of the fate of this new compound in the environment to be made.

The Agency is soliciting public comment now rather than prior to issuance of the permits since timing of application was critical to the gathering of data this season.

All interested parties are invited to submit written comments pertinent to these experimental use permits. Comments should be forwarded to the Federal Register Section, Room E-401, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, 401 M Street, S.W., Washington, D.C. 20460.

Three copies of the comments should be submitted to facilitate the work of the Agency and others interested in inspecting the submissions. The comments must be received on or before November 4, 1977, and should bear the identifying notation OPP-50331.

All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. during normal working days.

Interested parties wishing to review the experimental use permits are referred to Room E-315, Registration Division (WH-567), Office of Pesticide Programs, EPA, at the same address mentioned above. It is suggested that such interested persons call 202-755-4854 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: September 29, 1977.

DOUGLAS D. CAMP,
Acting Director,
Registration Division.

SCIENCE ADVISORY BOARD EXECUTIVE
COMMITTEE

Open Meeting

As required by Pub. L. 92-463, notice is hereby given that a meeting of the Executive Committee of the Environmental Protection Agency's Science Advisory Board will be held beginning at 9 a.m., October 25 and 26, in Room 1101 (West Tower), U.S. Environmental Protection Agency, Waterside Mall, 401 M Street S.W., Washington, D.C.

This meeting is a regularly scheduled meeting of the Committee. The Committee will be briefed on selected EPA activities and the activities and reports of other Science Advisory Board Committees; discuss the report of the Study Group on encapsulated pesticides, an approach for the Science Advisory Board to provide advice on anticipatory research for the next budget cycle, approaches for improving the peer review of ORD programs, the formation of a subcommittee to provide the advice required by the Clean Air Act Amendments, the SAB review of Air and Water Monitoring Strategies; and member items of interest.

The meeting is open to the public. Any member of the public wishing to attend or submit a paper should contact Dr. Richard M. Dowd, Executive Secretary, of the Executive Committee, 202-755-0263, by c.o.b. October 19, 1977.

RICHARD M. DOWD,
Staff Director,
Science Advisory Board

SEPTEMBER 29, 1977.

FEDERAL COMMUNICATIONS
COMMISSIONPURAC TASK AREA ON TECHNICAL
STANDARDS

Meeting

In preparation for the next meeting of the Personal Use Radio Advisory Committee (PURAC), the PURAC Task Area investigating technical standards will meet October 19, 1977 at 9 a.m. in room A110 of the offices of the Federal Communications Commission at 1229 20th Street N.W., Washington, D.C. 20554.

The agenda for the meeting will be to discuss the task's progress in preparing its fact finding report for presentation to the full PURAC.

This meeting is open to the public. Individuals seeking further information about the task area or the meeting should contact the Task Coordinator, Mr. Howard L. Lester, of the General Electric Company, Research and Development Center, P.O. Box 43, Schenectady, New York 12301 (518-385-4043).

RADIO TECHNICAL COMMISSION FOR
MARINE SERVICES

Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

EXECUTIVE COMMITTEE MEETING

TUESDAY, OCTOBER 18, 1977

The next Executive Committee meeting will be on Tuesday, October 18, 1977, in Conference Room 847, 1919 M Street NW., Washington, D.C. at 9:30 a.m.

AGENDA

1. Call to Order; Chairman's Report.
2. Introduction of Attendees; Adoption of Agenda.
3. Acceptance of Minutes of Executive Committee meetings.
4. Committee Reports.
5. Approval of new Membership Applications.
6. Administrative Action Items.
7. Approval of Terms of Reference revision for SC-71, "VHF Automated Radiotelephone Systems."
8. Approval of establishment of SC-72, "Numerical Identification of Stations in Maritime Telecommunications Systems."
9. Discussion and approvals for 1978 Assembly Meeting.
10. Summary Reports and Announcements.
11. New business.
12. Establishment of next meeting date.

To comply with the advance notice requirements of Public Law 92-463, a comparatively long interval of time occurs between publication of this notice and

an actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of a meeting. Those planning to attend a meeting should report to the room listed in the notice. If a room substitution has been made, the new meeting room location will be posted at the room listed in this notice.

Agendas, working papers, and other appropriate documentation for a meeting will be available at the meeting. Those desiring more specific information may contact either the designated Chairman or the RTCM Secretariat. Phone 202-632-6490.

The RTCM has acted as a coordinator for maritime telecommunications since its establishment in 1947. Problems are studied by Special Committees, and a Special Committee final report is approved by the RTCM Executive Committee. All RTCM meetings are open to the public. Written statements are preferred but by previous arrangement, oral presentations will be permitted within time and space limitations.

FEDERAL COMMUNICATIONS
COMMISSION,
VINCENT J. MULLINS,
Secretary.

RADIO TECHNICAL COMMISSION FOR
MARINE SERVICES

Meetings

In accordance with Pub. L. 92-463, "Federal Advisory Committee Act," the schedule of future Radio Technical Commission for Marine Services (RTCM) meetings is as follows:

Secretariat note: In addition to the October meetings listed below, notices of the following October meetings already have been published in the FEDERAL REGISTER.

Special Committee No. 70, "Minimum Performance Standards (MPS)—Marine Loran-C Receiving Equipment," Thursday, October 6, 10 a.m., Conference Room (Second floor), U.S. Coast Guard Marine Inspection Office, Battery Park Building, Battery Park at South Ferry, New York, N.Y.

RTCM Executive Committee, Tuesday, October 18, 9:30 a.m., Room 847, 1919 M Street NW., Washington, D.C.

SC-65 SHIP RADAR
WASHINGTON, D.C.

Wednesday, October 19, 1977

Members of Special Committee No. 65, "Ship Radar," notice of 58th meeting, Wednesday, October 19, 1977—1:30 p.m., Conference Room 8210, 2025 M Street NW., Washington, D.C.

Agenda for SC-65 Committee Meeting appears later in this notice. SC-65 Working Group schedule. To be held at 2025 M Street NW., Washington, D.C.

Working group	Room	Date	Time
Basic Radar	8210	Oct. 19	9:30 a.m.

If other Working Group meetings are scheduled, Group Members will be notified.

NOTE.—Meeting Room location is subject to change. Check at Room 8210 first.

AGENDA

1. Call to Order; Chairman's Report; Adoption of Agenda.
2. Acceptance of SC-65 Summary Records; Appointment of Rapporteur.
3. Progress Report of Basic Radar Working Group.
4. Report of recent Executive Committee action on SC-65 papers.
5. Mini-meeting of: (a) CAWG on Evaluation; (b) REWG on Reliability.
6. Other business.
7. Establishment of next meeting date. (Proposed November 16, 1977).

Irvin Hurwitz, Chairman, SC-65, Federal Communications Commission, Washington, D.C. 20554. Phone: 202-632-7197.

Special Committee No. 72, "Numerical Identification of Stations in Maritime Telecommunications Systems," notice of 1st meeting, Wednesday, October 19, 1977—9:30 a.m. (full-day meeting), Conference Room 7327, 2025 M Street NW., Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Introduction of Attendees; Appointment of Secretary.
3. Adoption of Agenda.
4. Discussion on Terms of Reference.
5. Review of Timetable.
6. Discussion of Preliminary Views.
7. Discussion of Work Assignments.
8. Other Business.
9. Establishment of Meeting Schedule. (Next meeting: Friday, October 28, 1977)

Francis K. Williams, Chairman, SC-72, Federal Communications Commission, Washington, D.C. 20554. Phone: 202-632-7054.

Special Committee No. 66, "Receiver Standards for the Maritime Mobile Service," notice of 43rd meeting, Thursday, October 20—9:30 a.m. (all-day meeting), Conference Room A-205, 1229 20th Street N.W., Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Adoption of Agenda; Appointment of Rapporteur.
3. Acceptance of SC-66 Summary Record.
4. Continue preparation of MMS R-5, Standard for "General Purpose Marine Receivers."
5. Discussion of problem areas.
6. Solicitation of work assignments.
7. Other business.
8. Establishment of next meeting date.

H. R. Smith, Chairman, SC-66, ITT Mackay Marine, 441 U.S. Highway No. 1, Elizabeth, N.J. 07202. Phone: 201-527-0300.

Special Committee No. 71, "VHF Automated Radiotelephone Systems," notice of fourth meeting, Friday, October 21, 1977, 10 a.m. (full-day meeting), Conference Room A-110, 1229 20th Street NW., Washington, D.C.

AGENDA

1. Call to Order; Chairman's Report.
2. Introduction of Attendees; Adoption of Agenda.
3. Acceptance of SC-71 Summary Record.
4. Morning Session (10:00 a.m.—11:45 a.m.), Afternoon Session (1:45 p.m.—3:45 p.m.); Presentation and discussion of proposals offered for Committee consideration.
5. Other business.
6. Establishment of next meeting date.

John J. Renner, Chairman, Advanced Technology Systems, Inc., 2425 Wilson Blvd., Arlington, Va. 22201. Phone: 703-525-2664.

SC-72, Numerical Identification of Stations in Maritime Telecommunications Systems, Friday, October 28, 1977—9:30 a.m., Conference Room 7327, 2025 M Street NW., Washington, D.C.

NOTE.—Meeting Room location is subject to change. Check at Room 7327 first.

AGENDA

1. Call to Order.
2. Introduction of Attendees; Appointment of Secretary.
3. Adoption of Agenda.
4. Discussion on Terms of Reference.
5. Review of Timetable.
6. Discussion of Preliminary Views.
7. Discussion of Work assignments.
8. Other Business.
9. Establishment of Meeting Schedule.

Francis K. Williams, Chairman, SC-72, Federal Communications Commission, Washington, D.C. 20554. Phone: 202-632-7054.

To comply with the advance notice requirements of Public Law 92-463, a comparatively long interval of time occurs between publication of this notice and an actual meeting. Consequently, there is no absolute certainty that the listed meeting room will be available on the day of a meeting. Those planning to attend a meeting should report to the room listed in the notice. [6715-01]

FEDERAL ELECTION COMMISSION

[Notice 1977-50, AOR 1977-49]

ADVISORY OPINION REQUEST

Pursuant to 2 U.S.C. 437f(c) and the procedures reflected in Part 112 of the Commission's regulations, published on August 25, 1976 (41 FR 35954), Advisory Opinion Request 1977-49 has been made public at the Commission. Copies of AOR 1977-49 were made available on September

ber 28, 1977. These copies of the advisory opinion request were made available for public inspection and purchase at the Federal Election Commission, Public Records Division, at 1325 K Street NW., Washington, D.C. 20463.

Interested persons may submit written comments on any advisory opinion request within ten days after the date the request was made public at the Commission. These comments should be directed to the Office of General Counsel, Advisory Opinion Section, at the Commission. Persons requiring additional time in which to respond to any advisory opinion requests will normally be granted such time upon written request to the Commission. All timely comments received by the Commission will be considered before the Commission issues an advisory opinion. Comments on pending requests should refer to the specific AOR number of the requests and statutory references should be to the United States Code citations rather than to the Public Law citations.

A descriptive listing of the request recently made public as well as the identification of the requesting party follows hereafter:

AOR 1977-49: The Kerr-McGee Corp. Political Action Committee (K-M PAC) requests an advisory opinion on several issues:

(1) May corporate employees who participate in Kerr-McGee's Savings Investment Plan be regarded as stockholders and thus solicitable under 2 U.S.C. § 441b and Part 114 of the Commission's regulations?

(2) Is a bank which holds Kerr-McGee stock as a fiduciary thereby precluded from functioning as custodian and independent mailing service for K-M PAC under the twice-yearly solicitation provisions of 2 U.S.C. § 441b(b)(4)(B) and § 114.6 of the regulations?

(3) If K-M PAC solicits only employees of Kerr-McGee, is it required to make the names and addresses of stockholders available for political contribution solicitations by a labor organization?

(4) Is Kerr-McGee entitled to receive from a labor organization reimbursement of costs in making computer produced labels available for a labor organization's contribution solicitations?

(5) If labor organization is required to bear costs of using independent mailing service for distributing its solicitation materials, but cannot reach agreement on price terms, would the lack of agreement, and hence non-use of service by labor organization, preclude K-M PAC from using the service for its mailing?

(6) In view of K-M PAC's decision not to solicit employees (or stockholders) who are or may be foreign nationals may Kerr-McGee nevertheless be required to make addresses of such persons available to an independent mailing service for purposes of labor organization solicitations under 2 U.S.C. § 441b(b)(4)(B) and § 114.6 of the regulations?

(7) May solicitation materials used by K-M PAC inform the recipients that 2 U.S.C. § 441b permits a labor organization to solicit political contributions from Kerr-McGee personnel and that one or more labor organizations have indicated their intent to make such a solicitation?

(8) Are both the local of an international union and the international union itself separate labor organizations for purposes of 2 U.S.C. § 441b if both are signatories to a labor agreement?

(9) May those labor organizations, which do not agree on a twice yearly joint written solicitation with others representing Kerr-McGee employees, solicit political contributions (under the twice yearly provisions) on their own behalf to their own separate segregated funds.

Requested by Robert H. Walsh on behalf of the Kerr-McGee Corp. Political Action Committee, Oklahoma City, Okla.

Dated: September 29, 1977.

THOMAS E. HARRIS,
Chairman for the
Federal Election Commission.

FEDERAL ENERGY
ADMINISTRATIONGASOLINE MARKETING ADVISORY
COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Gasoline Marketing Advisory Committee will meet Friday, November 4, 1977, 10 a.m., in the Williamsburg Room, Olympic Hotel, Seattle, Wash.

The Committee was established to provide the Administrator, FEA, with expert and technical advice concerning the wholesale and retail selling of gasoline. The agenda for the meetings is as follows:

1. Old business—Discussion of requests and commitments from the previous committee meeting.
2. Gasoline decontrol—Standby mechanism.
3. Gasoline trigger data.
4. Refiner-supplier direct marketing (white paper).
5. Implementation of the National Energy Act: Impact on marketing segments.
6. Gasoline rationing.
7. New business—Items for discussion at the next meeting.
8. Remarks from the floor (10 minute rule).

A subcommittee meeting will be held Thursday, November 3, 1977, at 2 p.m. in the Colonial Room, Olympic Hotel, Seattle, Wash., to discuss and make recommendations to the parent committee concerning agenda items.

The meetings are open to the public. The Chairman of the Committee or subcommittee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee or subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management, 202-566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning these meetings may be obtained from the Ad-

visory Committee Management Office. Transcripts of the meetings will be available for public review at the Freedom of Information Public Reading Room 2107, FEA, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

[3128-01]

FUEL OIL MARKETING ADVISORY
COMMITTEE
Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Fuel Oil Marketing Advisory Committee will meet Monday, December 5, 1977, at 10 a.m., at the Fairmont Hotel, atop Nob Hill, San Francisco, Calif.

The Committee was established to provide the Administrator, FEA, with expert and technical advice concerning the trade of selling fuel oil.

The agenda for the meeting is as follows:

1. Old business—Discussion of requests and commitments from previous committee meeting.
2. Strategic storage of product in the regions.
3. Emergency planning for upcoming heating season (coal and rail deliveries of coal will be linked together).
4. Monitoring program—FEA data collection.
5. Synthetic natural gas plants—FEA policy.
6. Heating oil distribution—Pullouts and contracts.
7. Heat pumps as a renewable resource.
8. New business—Items for discussion at the next meeting.
9. Remarks from the floor (10 minute rule).

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Georgia Hildreth, Acting Director, Advisory Committee Management, 202-566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

The transcript of the meeting will be available for public review at the Freedom of Information Public Reading

Room, Room 2107, FEA, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

Negative Determination of Environmental
Impact, American Samoa Energy Con-
servation Plan

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by American Samoa, of its State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of this plan, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for American Samoa are available upon request from the FEA National Energy Information Center, Room 1404, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

A copy of the State Plan is available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessment to Executive Communication, Box PZ, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—American Samoa Energy Conservation Plan." Fif-

teen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., October 28, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

SUPPLEMENTAL STATE ENERGY
CONSERVATION PLANSNegative Determination of Environmental
Impact, Supplemental State Energy Con-
servation Plans

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the Supplemental State Energy Conservation Program. Federal funding for plans submitted under this program is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon an assessment of environmental impacts that are expected to result from implementation of these plans, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for these plans.

Single copies of the environmental assessment of the Supplemental State Plans are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Copies of the State Plans are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessment to Executive Communication, Box PY, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—Supplemental State Energy Conservation Plans." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m., October 26, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

FEDERAL MARITIME COMMISSION
CONTINENTAL NORTH ATLANTIC
WESTBOUND FREIGHT CONFERENCE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the field offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 25, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:
Mr. R. J. Finn, Pricing Analyst, Lykes Bros. Steamship Co., Inc., 300 Poydras Street, New Orleans, La. 70130.

Agreement No. 10312, between the above-named parties, is a stevedoring contract whereby Lykes engages Carolina Shipping Company to perform stevedoring services for Lykes' vessels at the port of Charleston, S.C., in accordance with the terms, conditions and to the extent set forth in the agreement.

Howard A. Levy, Esq., Suite 727, 17 Battery Place, New York, N.Y. 10004.

Agreement No. 8210-38 states that the Conference shall appoint a resident representative in the United States who may be the Chairman or other official of the North Atlantic Continental Freight Conference. The resident representative shall perform functions delegated to him by the Chairman such as attending and/or chairing meetings and implementing shippers' requests and complaints procedures adopted in the United States.

By Order of the Federal Maritime Commission.

Dated: September 30, 1977.

FRANCIS C. HURNEY,
Secretary.

[Docket No. 77-51]

MATSON NAVIGATION CO.; GENERAL IN-
CREASE IN RATES IN THE U.S. MAIN-
LAND/GUAM TRADE

Order of Investigation

Effective September 29, 1977, Matson Navigation Co. (Matson) proposes to increase its ocean freight rates and charges between West Coast, Hawaii, and Guam Ports (the trade) by 5 percent. The increases were filed with the Commission on August 16, 1977, and were accompanied by supporting financial and operating data pursuant to Commission General Order No. 11, 46 CFR 512.

A protest and petition for suspension and investigation was received relative to the reasonableness of Matson's proposed increase from the Government of Guam (Guam). Generally, Guam contends that the proposed increase is not cost justified and that its implementation would inflict severe economic consequences upon Guam and its citizens and requests that the Commission suspend the proposed increase and initiate an appropriate investigation.

United States Lines, Inc. (USL), Matson's competitor in the trade, filed a similar 5 percent increase simultaneously with Matson. The Commission believes that USL may be earning an excessive rate of return and therefore has ordered the increase of USL suspended and investigated. That investigation may result in a Commission order prescribing the maximum rate level to be charged by USL. Historically, the rate levels maintained by USL and Matson have remained at parity for competitive reasons. Therefore, any order affecting the rate level of USL will probably affect Matson as well. Accordingly, we believe that the revenue requirements of Matson must be considered in determining the level of rates which will, in all probability, be charged by both carriers in the trade.

Now, therefore, it is ordered, That, pursuant to the authority of sections 18 (a) and 22 of the Shipping Act, 1916, as amended, and section 4 of the Intercoastal Shipping Act, 1933, an investigation is hereby instituted into the lawfulness of the tariff matter listed in Supplement No. 4 to Matson Tariff FMC-F No. 152 for the purpose of making such findings as the facts and circumstances warrant;

It is further ordered, That this investigation determine whether the gross revenue to be derived from the proposed rate changes is just and reasonable. Evidence as to the effect of the proposed

changes on the movement of any particular commodity or commodities will be considered relevant to this basic issue and may be used to determine what overall revenue will, in fact, be derived. However the question of reasonableness of any particular commodity rate is not an issue for determination in this proceeding. A particular rate will be affected by an order that may result from this proceeding only insofar as a finding is made regarding the reasonableness of the overall rate level of which the particular rate is a part.

It is further ordered. That shippers or other persons complaining about the level of any particular commodity rate may file a complaint pursuant to section 22 of the Shipping Act, 1916 (46 U.S.C. 821) and litigate the issue of reasonableness of such rate with respect to cost of service, value, and service and any other applicable ratemaking factors. They may also petition for leave to intervene in this proceeding provided that they will not broaden the issue described above and that they meet the other tests prescribed by Rule 72 of the Commission's Rules of Practice and Procedure, 46 CFR 502.27.

It is further ordered. That during the pendency of this investigation, Matson will serve the presiding officer and all parties of record with notice of any tariff changes affecting any of the ten leading commodities as reported pursuant to 46 CFR 512.25 at the same time such changes are filed with the Commission.

It is further ordered. That this proceeding be assigned for public hearing before an Administrative Law Judge of the Commission's Office of Administrative Law Judges and that the hearing be held at a date and place to be determined by the Presiding Administrative Law Judge, but in any event, the hearing date shall be set no later than March 28, 1978.

The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

It is further ordered. That (1) a copy of this order be forthwith served upon the respondent and upon the Commission's Bureau of Hearing Counsel and published in the FEDERAL REGISTER, and (2) the respondent and Hearing Counsel be duly served with notice of time and place of hearing.

All persons (including individuals, corporations, associations, firms, partnerships, and public bodies) having an interest in this proceeding and desiring to intervene herein should notify the Secretary of the Commission promptly and file petitions for leave to intervene in accordance with Rule 72 of the Commis-

sion's Rules of Practice and Procedure (46 CFR 502.72) with a copy to all parties to the proceeding.

By the Commission.

FRANCIS C. HURNEY,
Secretary.

[Docket No. 77-50]

NORTH CAROLINA STATE PORTS AUTHORITY, INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, AFL-CIO, LOCAL 1426, INTERNATIONAL LONGSHOREMEN'S ASSOCIATION, AFL-CIO, LOCAL 1426-A, WAREHOUSEMEN v. DART CONTAINERLINE CO., LTD.

Notice of Filing of Complaint

SEPTEMBER 29, 1977.

Notice is hereby given that a complaint filed by North Carolina State Ports Authority, International Longshoremen's Association, AFL-CIO, Local 1426, International Longshoremen's Association, AFL-CIO, Local 1426-A, Warehousemen against Dart Containerline Co., Ltd., was served September 29, 1977. Complainants allege that respondent is diverting or attempting to divert cargo by the absorption of inland transportation costs from the Port of Wilmington, N.C., to other ports, in a manner unlawful and illegal under sections 16 and 17 of the Shipping Act, 1916, and section 8 of the Merchant Marine Act of 1920.

Hearing in this matter, if any is held, shall commence on or before March 28, 1978. The hearing shall include oral testimony and cross examination in the discretion of the presiding officer only upon a proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statement, affidavits, depositions, or other documents or that the nature of the matters in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record.

FRANCIS C. HURNEY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONAL DIRECT STUDENT LOAN; COLLEGE WORK-STUDY, SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANTS

Approved List of Need Analysis Systems

AGENCY: Office of Education, HEW.

ACTION: Notice of approved need analysis systems.

SUMMARY: The Office of Education announces the list of approved need analysis systems for use by institutions of higher education in making awards

to students during the academic year 1978-79 under the National Direct Student Loan, College Work-Study, and Supplemental Educational Opportunity Grants Programs.

EFFECTIVE DATE: October 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Hubert S. Shaw, Chief, Program Development Branch, Division of Student Financial Aid, Bureau of Student Financial Assistance, 400 Maryland Avenue SW., Washington, D.C. 20202 (202-245-9717).

SUPPLEMENTARY INFORMATION:

General. Section 144.13 of the National Direct Student Loan Program Regulations (45 CFR 144.13), § 175.13 of the College Work-Study Program Regulations (45 CFR 175.13), and § 176.13 of the Supplemental Educational Opportunity Grant Program Regulations (45 CFR 176.13) approve the use of certain need analysis systems and methods of determining expected family contributions for dependent and independent students, and set forth procedures for an annual review and approval by the Commissioner of other need analysis systems for use in those programs. In order to be approved for dependent students the latter systems must generate expected parental contributions for at least 75 percent of the sample cases which are within \$50 of the benchmark figures published by the Commissioner for those cases. The benchmark figures for the 1978-79 academic year were published in the FEDERAL REGISTER of June 30, 1977 (42 FR 33290). For independent students, a system that was not specifically included in the regulations must produce expected family contributions which are comparable to those produced by one of the systems specified in subparagraph (c)(1) of each section. An annual review of systems for independent students is not required.

The approved systems are:

1. Dependent students only—
 - (a) The Income Tax System.
 2. Dependent and independent students—
 - (a) The method of calculating expected family contributions used in the Basic Educational Opportunity Grant Program (45 CFR 190);
 - (b) The system of need analysis published by the College Scholarship Service;
 - (c) The system of need analysis published by the American College Testing Program;
 - (d) The need analysis service published by the Graduate and Professional Student Financial Aid Service;
 - (e) The system of need analysis published by Financial Analysis Service Inc., a division of Donley, Richardson and Associates;
 - (f) The system of need analysis published by Student Assistance Financial Evaluation, a program of Information and Communications, Inc.;

(g) The system of need analysis published by Student Aid Management, a program of Education Methods, Inc.;

(h) The system of need analysis published by the Illinois State Scholarship Commission;

(i) The system of need analysis published by Functional Solutions, Inc.;

(j) The system of need analysis published by Monroe, The Calculator Co.; and

(k) The system of need analysis published by J. S. Jones and Associates.

DEPARTMENT OF JUSTICE

Office of the Attorney General

[Order No. 749-77]

PRIVACY ACT OF 1974

Notice of System of Records

Notice is hereby given that pursuant to the provisions of the Privacy Act of 1974 (5 U.S.C. 552a) the Department of Justice proposes to add a new subsystem of records entitled the "Application and petition system" of records to the Immigration and Naturalization Service Index System JUSTICE/INS-001 which was published in the FEDERAL REGISTER on March 21, 1977 (42 FR 15349).

JUSTICE INS-001 has been revised and is reprinted below in its entirety to include the changes associated with the addition of this subsystem and to describe more accurately the record-keeping practices of the Immigration and Naturalization Service (INS). For the convenience of the reader, the changes relating to the added subsystem have been underscored. Finally, the notice reflects the addition of three locations for the maintenance of INS records: Glynnco, Ga.; Oklahoma City, Okla.; and Louisville, Ky.; and the redesignation of a sub-office at Dallas, Tex. as a district office.

A report of the proposed subsystem has been provided to the President of the Senate, the Speaker of the House of Representatives, the Office of Management and Budget, and the Privacy Protection Study Commission.

Interested persons are invited to submit written comments concerning the routine uses applicable to this subsystem. Comments should be mailed by November 4, 1977 to the Office of Administrative Counsel, Office of Management and Finance, Department of Justice, Washington, D.C. 20530. Comments received will be available for inspection in Room 1266, Main Department of Justice Building, 10th and Constitution Avenue NW., Washington, D.C.

Dated: September 26, 1977.

GRIFFIN B. BELL,
Attorney General.

JUSTICE/INS-001

System name:

The Immigration and Naturalization Service Index System, which consists of the following subsystems:

- A. Agency information control record index.
- B. Alien address reports index and records.
- C. Alien enemy index and records.
- D. Automobile decal parking identification system for employees.
- E. Centralized index and records (Master Index).
- F. Congressional Mail Unit correspondence control index.
- G. Document vendors and alterers index.
- H. Enforcement indexes.
 1. *Group one.* (a) Contact index. (b) Informant index. (c) Anti-smuggling index (general). (d) Criminal, immoral, narcotic, racketeer, and subversive index. (e) Suspect third party index.
 2. *Group two.* (a) Air detail office index. (b) Anti-smuggling information centers, Canadian and Mexican borders. (c) Border Patrol Academy index. (d) Border Patrol sectors general index. (e) Fraudulent Document Center index.
 3. Enforcement correspondence control index.
 1. Examinations indexes.
 1. Application and petition system.
 2. Correspondence control index.
 3. Service lookout system.
 - J. Extension training program enrollees.

K. Finance Section indexes.

1. Accounts with creditors.

2. Accounts with debtors.

L. Freedom of Information correspondence control index.

M. Intelligence indexes.

N. Microfilmed manifest records.

O. Naturalization and citizenship indexes.

1. Naturalization and citizenship docket cards.

2. Examiners docket lists of petitioners for naturalization.

3. Master docket list of petitions for naturalization pending one year or more.

P. Personnel investigations index and records.

Q. Property issued to employees.

R. Security access clearance index.

S. White House and Attorney General correspondence control index.

T. Health record system.

U. Personal data card system.

V. Compassionate cases system.

W. Emergency reassignment index.

X. Alien documentation, identification and telecommunications (ADIT) system.

System location:

A. Central Office: 425 Eye Street NW., Washington, D.C. 20536.

B. Regional Offices: (1) Burlington, Vt.; (2) Fort Snelling, Twin Cities, Minn.; (3) Dallas, Tex.; (4) San Pedro, Calif.

C. District offices in the United States:

(1) Anchorage, Alaska; (2) Atlanta, Ga.; (3) Baltimore, Md.; (4) Boston, Mass.; (5) Buffalo, N.Y.; (6) Chicago, Ill.; (7) Cleveland, Ohio; (8) Dallas, Tex.; (9) Denver, Colo.; (10) Detroit, Mich.; (11) El Paso, Tex.; (12) Hartford, Conn.; (13) Helena, Mont.; (14) Honolulu, Hawaii; (15) Houston, Tex.; (16) Kansas City, Mo.; (17) Los Angeles, Calif.; (18) Miami Fla.; (19) Newark, N.J.; (20) New Orleans, La.; (21) New York, N.Y.; (22) Omaha, Nebr.; (23) Philadelphia, Pa.; (24) Phoenix, Ariz.; (25) Portland, Maine; (26) Portland, Oreg.; (27) St. Albans, Vt.; (28) St. Paul, Minn.; (29) San Antonio, Tex.; (30) San Diego, Calif.; (31) San Francisco, Calif.; (32) San Juan, P.R.; (33) Seattle, Wash.; (34) Washington, D.C.

D. District offices in foreign countries: (1) Hong Kong, B.C.C.; (2) Mexico City, Mexico; (3) Rome, Italy.

E. Sub-offices: (1) Agana, Guam; (2) Albany, N.Y.; (3) Cincinnati, Ohio; (4) Hammond, Ind.; (5) Harlingen, Tex.; (6) Las Vegas, Nev.; (7) Louisville, Ky.; (8) Memphis, Tenn.; (9) Milwaukee, Wis.; (10) Norfolk, Va.; (11) Oklahoma City, Okla.; (12) Pittsburgh, Pa.; (13) Providence, R.I.; (14) Reno, Nev.; (15) St. Louis, Mo.; (16) Salt Lake City, Utah; (17) Spokane, Wash.

F. Border Patrol Sector Headquarters: (1) Blaine, Wash.; (2) Buffalo, N.Y.; (3) Chula Vista, Calif.; (4) Del Rio, Tex.; (5) Detroit, Mich.; (6) El Centro, Calif.; (7) El Paso, Tex.; (8) Grand Forks, N. Dak.; (9) Havre, Mont.; (10) Houlton, Maine; (11) Laredo, Tex.; (12) Livermore, Calif.; (13) Marfa, Tex.; (14) McAllen, Tex.; (15) Miami, Fla.; (16) New Orleans, La.; (17) Ogdensburg, N.Y.; (18)

Spokane, Wash.; (19) Swanton, Vt.; (20) Tucson, Ariz.; (21) Yuma, Ariz.

G. Border Patrol Academy, Los Fresnos, Tex.; Federal Law Enforcement Training Center (FLETC), Glynco, Ga.

H. Charlotte Amalie, St. Thomas, V.I. I. Sub-offices in foreign countries: (1) Athens, Greece; (2) Frankfurt, Germany; (3) Naples, Italy; (4) Palermo, Palermo, Italy; (5) Rome, Italy; (6) Tokyo, Japan; (7) Vienna, Austria.

J. El Paso Intelligence Center (EPIC), El Paso, Tex.

Addresses of offices are listed in the telephone directories of the respective cities listed above under the heading "United States Government, Immigration and Naturalization Service."

Categories of individuals covered by the system:

A. Agency information control record index (Location A, supra). Individuals named or referenced in documents classified for national security reasons.

B. Alien address reports index and records (Location A, supra). Aliens required to report addresses each January.

C. Alien enemy index and records (Location A, supra).

1. Alien enemies who were interned during World War II.

2. Americans of Japanese ancestry (Nisei) who returned to Japan and, during World War II, either accepted employment by the Japanese Government or became naturalized in Japan.

D. Automobile decal parking identification for employees (Location B-4, supra). Current INS employees who have the privilege of parking their cars on government premises.

E. Centralized index and records (Master Index) (Locations A, C, D, E, and I, supra).

1. Individuals covered by provisions of the immigration and nationality laws of the United States.

2. Individuals who are under investigation, were investigated in the past, or who are suspected of violating the criminal or civil provisions of treaties, statutes, Executive orders, and Presidential proclamations administered by the Immigration and Naturalization Service, and witnesses and informants having knowledge of such violations.

F. Congressional Mail Unit correspondence control index (Location A, supra).

1. Individuals named in correspondence received, including INS employees and past employees; Federal, state, and local officials; and members of the general public.

2. Individuals named in reports or correspondence received, as individuals investigated in the past or under active investigation, or suspected of violations of the criminal or civil provisions of statutes enforced by INS, including Presidential proclamations and Executive orders relating thereto, and witnesses and informants having knowledge of violations.

G. Document vendors and alterers index (Location B-4; duplicates in several

INS offices in the Western and Southern regions). Individuals who are alleged immigration law violators involved in the supply of fraudulent documents.

H. Enforcement indexes.

1. Group one (Locations A, B, C, and E, supra): (a) Contact index; (b) Informant index; (c) Anti-smuggling index (general); (d) Criminal, immoral, narcotic, racketeer and subversive indexes; (e) Suspect third party index.

(1) Individuals who are in a position to know, learn of, and assist in locating aliens illegally in the United States; (2) individuals who have significant knowledge of foreign or domestic organizations subversive in nature and are willing to appear as Government witnesses or cooperate with INS on a continuing basis; (3) individuals who are known or suspected of being professional arrangers, transporters, harborers, and smugglers of aliens; who operate or conspire to operate with others to facilitate the surreptitious entry of an alien over a coastal or land border of the United States; and witnesses having knowledge of such matters; (4) individuals who are known or suspected of being habitual or notorious criminals, immoral, narcotic violators or racketeers, or subversive functionaries or leaders; (5) individuals who are known or believed to be engaged in fraud operations involving the preparation and submission of visa petitions and other applications for benefits administered by INS; or the preparation and submission of applications for immigrant visas and/or Department of Labor certifications, or the filing of false United States birth registrations for alien children to enable them to pose as citizens or to enable parents who are immigrant visa applicants to evade the labor certification requirements.

2. Group two. (a) Air detail office index (Location J, supra). Individuals who are pilots and/or owners of private aircraft flying between the United States and foreign countries; individuals who engage in or are suspected of being engaged in illegal activity such as alien smuggling or entry without inspection.

(b) Anti-smuggling information centers, Canadian and Mexican borders (Locations: northern border, F-19, supra; southern border, J, supra). Individuals who are known or suspected of being smugglers or transporters of illegal aliens.

(c) Border Patrol Academy index (Location G, supra). Students or former students at the Border Patrol Academy; INS officers attending advanced training classes at the Academy or the Federal Law Enforcement Training Center (FLETC).

(d) Border Patrol sectors general index (Locations F, supra). Past or present INS employees; individuals who are law violators, witnesses, contacts, informants, members of the general public, Federal, state, county, and local officials.

(e) Fraudulent Document Center index (Location J, supra). Individuals who are members of the general public,

notaries public, state and local birth registration officials and employees, immigration law violators, vendors of documents, donors of documents, midwives, and witnesses. Also included in the system are names and information about fictitious persons used by counterfeiters or alterers of citizenship documents.

3. Enforcement correspondence control index (Location A, supra). (a) Individuals named in correspondence received, including employees, past employees, and others; (b) individuals named in documents, reports, or correspondence as individuals under current or past investigation, suspended of violation of the criminal or civil provisions of the statutes enforced by INS, including Executive orders and Presidential proclamations, and witnesses and informants having knowledge of violations.

I. Examinations indexes (Location A supra; duplicates in some local offices):

1. Application and petition index: individuals who have filed or assisted in filing petitions to classify aliens for the issuance of immigrant visas.

2. Correspondence control index: members of the general public.

3. Service lookout system: violators or suspected violators of the criminal or civil provisions of statutes enforced by INS.

J. Extension training program enrollees (Location A, supra). INS employees and other Federal agency employees enrolled in extension training program courses administered by INS.

K. Finance Section indexes (Locations A and B, supra): (1) Accounts with creditors; (2) Accounts with debtors.

(a) Individuals who are indebted to the United States Government for goods, services, or benefits or for administrative fines and assessments.

(b) Employees who have received travel advances or overpayments from the United States Government, who are in arrears in their accounts, or who are liable for damage to Government property.

(c) Vendors who have furnished supplies, material, equipment, and services to the Government.

(d) Employees, witnesses and special deportation attendants who have performed official travel.

(e) Employees and other individuals who have a valid claim against the Government.

L. Freedom of Information correspondence control index (Locations A, B, C, D, E, F, G, H, and I, supra). Individuals who request access to or copies of records maintained by INS, under the provisions of the Freedom of Information Act (5 U.S.C. 552).

M. Intelligence indexes (Locations A and B, supra). Individuals who have or are suspected of having violated the criminal or civil provisions of the statutes enforced by INS.

N. Microfilmed manifest records (Locations A, C-26, C-10, C-20, and C-29, supra). Individuals who have arrived or

departed by aircraft or vessel at a United States port.

O. Naturalization and citizenship indexes (Locations C and E, supra, except E-6, E-7, E-8, and E-13).

1. Naturalization and citizenship docket cards. Individuals seeking benefits under Title III of the Immigration and Nationality Act of 1958, as amended.

2. Examiners' docket lists of petitioners for naturalization. Petitioners for naturalization and their beneficiaries.

3. Master docket list of petitioners for naturalization pending one year or more. Petitioners for naturalization and their beneficiaries.

P. Personnel investigations index and records (Location A, supra). Employees, former employees, other Government agency employees designated to perform immigration functions, witnesses, informants, and certain other persons having contacts with INS operations.

Q. Property issued to employees (Locations A, B, C, E, and F, supra). INS employees who have been issued property for use in performance of official duties.

R. Security access clearance index (Location A, supra). Current INS employees who have been cleared for access to documents and materials classified in the interest of national security.

S. White House and Attorney General correspondence control index (Location A, supra). Individuals named in or originating correspondence referred to INS by staff of the White House or Attorney General.

T. Health record system (Location A, supra). Persons at Location A who have requested health services or required emergency treatment.

U. Personal data card system (Locations A and B, supra). Employees and former employees of INS.

V. Compassionate cases system (Locations A and B, supra). INS employees who have requested transfers for personal reasons.

W. Emergency reassignment index (Locations B, C, E, and F, supra). INS employees who would be reassigned to other duty stations in case of emergency.

X. Alien documentation, identification, and telecommunications (ADIT) system (Location A, supra). Aliens lawfully admitted for permanent residence, commuters and other authorized frequent border crossings, and nonimmigrant persons other than transients.

Categories of records in the system:

A. Agency information control record index. This system contains reference and locator data on the following kinds of documents:

1. Top secret and secret materials classified as national security information, including all copies prepared from controlled documents originated, received, or transmitted by INS officers.

2. Confidential material originated by other agencies and referred to INS, including all copies prepared from controlled documents.

3. All investigative reports, responses to security checks, and intelligence material received from sources within the Department of Justice and other Federal intelligence sources.

B. Alien address report index and records. This system contains an index and copies of Form I-53, Alien Address Report, required to be filed January 1 of each year by aliens in the United States.

C. Alien enemy index and records. This system contains a microfilm index and files containing various forms, reports, and other information.

D. Automobile decal parking identification system for employees. This system contains a list by number of each Department of Justice decal car sticker issued to local INS employees.

E. Centralized index and records (Master Index). The system consists of index records and related records and files containing various forms, applications and petitions for benefits under the immigration and nationality laws, reports of investigation, statements, reports, correspondence, and memorandums. Records which may be accessed electronically are limited to index and file locator data including name, identifying number, date and place of birth, date and port of entry, coded status transaction data, and location of relating records or files.

F. Congressional Mail Unit correspondence control index. This system contains a locator record for each report or piece of correspondence received, reflecting the name of the individual and the number of the subject file in which specific information concerning the individual is maintained.

G. Document vendors and alterers index. This system consists of "mug book" photos of alleged immigration law violators involved in the supply of fraudulent documents, and data relating to the pictured violators including name, aliases, vital statistics, method of operation, list of convictions, present location, and source material.

H. Enforcement indexes. 1. Group one. (a) Contact index; (b) Informant index; (c) Antismuggling index (general); (d) Criminal, immoral, narcotic, racketeer and subversive indexes; (e) Suspect third party index. These systems of records are maintained on Form G-598, Contact Record; Form G-169, Informant Record; Form G-170, Smuggler Information Index Card; and other index cards containing reference and file locator data on the individuals, including in some cases biographic data, address, and a brief description of activities.

2. Group two. (a) Air detail office index. The primary record in the system is Form I-92A, Report of Private Aircraft Arrival, which is executed by the inspecting official upon arrival of a private aircraft from foreign territory. There are also index cards, forms, investigative reports, records, and correspondence on aircraft arrivals, failures to report for inspection, and known or suspected alien

smuggling operations using aircraft; and microfiche indexes containing names of owners of aircraft of United States registry.

(b) Anti-smuggling information centers, Canadian and Mexican borders. This system contains Form G-170, Smuggler Information Index Card, other index cards, and correspondence relating to anti-smuggling activities. These indexes are in loose leaf form and are distributed to Border Patrol offices in the border areas.

(c) Border Patrol Academy index. This system contains general information and correspondence regarding each student's academic progress in training. The information is maintained on the following forms: SW-91, Probationary Achievement Report; SW-91A, Scholastic Grade Worksheet; SW-91B, IOBTC Achievement Report-Immigration Inspector; SW-91C, IOBTC Achievement Report-Investigator; SW-96, Class Rating Form; SW-128, Training Data; SW-282, Registration Information Form; SW-446, Conduct and Efficiency Report of Probationary Employee-5½ and 10 Months Exam Grades.

(d) Border Patrol sectors general index. This system contains indexes, forms, reports, and records relating to activities of the Border Patrol, including Form I-44, Record of Apprehension or Seizure; Form I-326, Prosecution Reports; Form I-263A and I-263B, Record of Sworn Statement; Form I-195, Criminal Prosecution Control Card; Form I-263W, Record of Sworn Statement-Witness; Form I-236, Prosecution Reports; Form G-170, Smuggler Information Index Card; Form G-296, Report of Violation of Section 239, Immigration and Nationality Act; Form G-330, Notice of Action Information; Form G-445, Conduct and Efficiency Evaluation of Probationary Appointees; Form G-598, Contact Record. This system also contains copies of correspondence and memorandums between INS offices and outside agencies and individuals, as well as photographs of some violators of the immigration laws of individuals suspected of being involved in immigration law violations.

(e) Fraudulent Document Center index. This system contains birth certificates, baptismal certificates, and other identification documents used by aliens to support their fraudulent claims to United States citizenship. Most of the documents are genuine; however, there are also counterfeit and altered documents in the system. Also contained in the system are cross indexes, investigative reports, and records of individuals involved in fraud schemes or whose documents have been put to fraudulent use.

3. Enforcement correspondence control index. This system contains reference and locator information on documents, reports, and correspondence received in the offices of the Associate Commissioner, Enforcement. Records are maintained on Form G-617, Correspondence

Control Card, and Form CO-147, Call-up Index—Domestic Control.

1. Examinations indexes. 1. *Application and petition system.* This system contains petitioners' names, date and place of birth, names of prior spouses, immigration "A" number if an alien, and date of marriage if married; beneficiaries' names, date and place of birth, immigration "A" number if any, names of spouses, and nationality code, and the names, dates, and places of birth of any children; name of the person administering the oath or preparing the form, if other than a Government employee.

2. Correspondence control index. This system contains reference and locator information on documents, reports and correspondence received in the office of the Associate Commissioner. Examinations. Records are maintained on Form G-617, Correspondence Control Card.

3. Service lookout system. This system contains names and reference data on violators, alleged violators, and suspected violators of the criminal or civil provisions of the statutes enforced by INS.

J. Extension training program enrollees. This system contains correspondence and records of each enrollee's test scores; dates of actions such as mailing of lesson materials, test results, and certificates of completion; and dates of receipt of tests.

K. Finance Section indexes. 1. Accounts with creditors. Records are vendors' invoices, purchase orders, travel vouchers, and claims filed by appropriation for the fiscal year from which payment is chargeable.

2. Accounts with debtors. Records consist of bills for inspection services performed under the Act of March 2, 1931; fees, fines, penalties, and deportation expenses assessed pursuant to the Immigration and Nationality Act; and employee indebtedness for travel advances, for the unofficial use of Government facilities and services, for damage to or loss of Government property, and for erroneous or overpayment of compensation for travel expenses.

L. Freedom of Information correspondence control index. Records are kept on Form G-617, Correspondence Control Card, and include reference and locator information on each request for information received under the Freedom of Information Act.

M. Intelligence indexes. Records include reference and locator information on documents, reports, bulletins, and correspondence; records are categorized by name, violation, and activity.

N. Microfilmed manifest records. The system contains microfilmed indexes and arrival and departure manifests with brief biographical data and facts of arrival and departure. Arrival records for certain ports date from 1891, and departure records date from 1900. Records are not complete, as some records were destroyed and not microfilmed.

O. Naturalization and citizenship indexes. 1. Naturalization and citizenship docket cards. Docket cards are 3X5 or 5X8 index cards for each applicant, bene-

fiary, or petitioner, recording type of application, date of receipt, file and/or petition number, court number where petition for naturalization was filed, and reference number of the individual's case file.

2. Examiners' docket lists of petitioners for naturalization. Records are maintained on Form N-476, Examiner's Docket List, and record court of naturalization jurisdiction, petition number, petition filing date, court number, name of petitioner, name of beneficiary, proposed recommendation by the naturalization examiner, reasons for continuance, and reference number of the individual's case file.

3. Master docket lists of petitions for naturalization pending one year or more. Records are maintained on Form N-476, Examiner's Docket List, and contain reference and locator information on petitions pending for one year or longer.

P. Personnel investigations index and records. Index records for closed cases or cases under active investigation contain reference and locator information including names, locations, and allegations. Two relating sets of temporary work folders contain reports, documents, and correspondence.

Q. Property issued to employees. Records are maintained on Form G-570, Record-Receipt—Property Issued to Employees, which lists name, description of property, serial number, dates issued and returned, employee's initials, and supervisor's initials.

R. Security access clearance index. Records are kept on 3X5 index cards listing employee's name, dates when clearances were granted, and levels of clearance. Related records and reports are maintained by the Office of Management and Finance, Department of Justice.

S. White House and Attorney General correspondence control index. Records are maintained on Form G-617, Correspondence Control Card, and contain reference and locator information on correspondence addressed to the President and the Attorney General which has been referred to INS for appropriate attention.

T. Health record system. Records are kept on 5X7 index cards listing name, date, and treatment given.

U. Personal data card system. Records are kept on Form G-74, Personal Data Card, for each employee or former employee. Information includes name, date of birth, height, weight, sex, blood type, photograph, and color of hair and eyes.

V. Compassionate cases system. Records are kept on 3X5 index cards containing employees' name, position, grade, present location, date of request, date circulated to committee, disposition, and (when applicable) new location of employee. Relating records include the employee's request; Form G-410, Employee Qualification-Skills Inventory; local and regional recommendations, medical statements (where applicable), records of committee actions, and response to employee.

W. Emergency reassignment index. Records are kept on Form G-560, Emergency Activity Project Assignment. Information includes name, age, grade, title, official station, residence, telephone number, and emergency assignment activity.

X. Alien documentation, identification and telecommunications (ADIT) system. Records consist of formatted data base records of personal and biographical information such as name, date of birth, picture and fingerprint coordinates, height, mother's first name, father's first name, city/town/village of birth.

Authority for maintenance of the system:

A. General, applicable to all Service index system, includes but is not limited to: Sections 103, 265 and 290 and Title III of the Immigration and Nationality Act, hereinafter referred to as the Act (66 Stat. 163), as amended, (8 U.S.C. 1103; U.S.C. 135; 8 U.S.C. 1360), and the regulations pursuant thereto.

B. Specific, applicable to some of the indexes, including but not limited to:

1. Executive Order 11652, and 28 CFR 17.79—Agency control information record index, and Access clearance information system.

2. 31 U.S.C. 66a—Finance Section indexes.

3. Title III of the Act, as amended, (8 U.S.C. section 1401 through 1503), and the regulations promulgated thereunder—Naturalization and citizenship indexes.

4. Sections 235 and 287 of the Act, as amended, (8 U.S.C. 1225; and 8 U.S.C. 1357), and the regulations promulgated pursuant thereto—Personnel investigations.

5. Section 231 of the Act, as amended, (8 U.S.C. 1221)—Microfilmed manifest records.

6. 40 U.S.C. 483—Property management system.

7. 5 U.S.C. 4113—Extension training program.

8. 5 U.S.C. 552. The Freedom of Information Act requires certain record keeping; this system was established and is maintained in order to enable INS to comply with this requirement.

9. 5 U.S.C. 301—Health Record System, Personal Data Card System, and Compassionate Cases System.

10. Executive Order 11490—Emergency Reassignment Index.

11. Section 204, 214, and 290 of the Act, as amended (8 U.S.C. 1154, 1184, 1360)—Application and petition system.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

This system of records is used to serve the public by providing data for responses, when authorized, to written inquiries, complaints, and so forth. It is also used to administer the management, operational, and enforcement activities of the Service. The records are used by officers and employees of the Service and the Department of Justice in the admin-

istration and enforcement of the immigration and nationality laws, and related statutes, including the processing of applications for benefits under these laws, detecting violations of these laws, and for referrals for prosecution.

A. Relevant information contained in this system of records maintained by the Service to carry out its functions may be referred, as a routine use, to clerks and judges of courts exercising naturalization jurisdiction for the purpose of filing petitions for naturalization and to enable such courts to determine eligibility for naturalization or grounds for revocation of naturalization.

B. Relevant information contained in this system of records maintained by the Service to carry out its functions may be referred, as a routine use, to the Department of State in the processing of petitions or applications for benefits under the Immigration and Nationality Laws Act, and all other immigration and nationality laws, including treaties and reciprocal agreements.

C. Relevant information contained in this system of records maintained by the Service to carry out its functions may be provided, as a routine use, to other federal, state, and local government law enforcement and regulatory agencies, foreign governments, the Department of Defense, including all components thereof, the Department of State, the Department of the Treasury, the Central Intelligence Agency the Selective Service System, the United States Coast Guard, the United Nations, INTERPOL, and individuals and organizations during the course of investigation in the processing of a matter or a proceeding within the purview of the immigration and nationality laws, to elicit information required by the Service to carry out its functions and statutory mandates.

D. In the event that this system of records maintained by the Service to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in this system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation, or order issued pursuant thereto.

E. In the event that this system of records maintained by the Service to carry out its functions indicates a violation or potential violation of the immigration and nationality laws, or of a general statute within Service jurisdiction, or by regulation, rule, or order issued pursuant thereto, the relevant records in this system of records may be disclosed, as a routine use, in the course of presenting evidence to a court, magistrate, or administrative tribunal and to opposing counsel in the course of discovery.

F. A record from this system of records may be disclosed, as a routine use, to a federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

G. A record from this system of records may be disclosed, as a routine use, to a federal, state or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to a decision of this Service concerning the hiring or retention of an employee, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant or other benefit.

H. Indication of a violation or potential violation of the laws of another nation, whether civil or criminal, may be referred to the appropriate foreign agency charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing such laws; indication of any such violation or potential violation may also be referred to international organizations engaged in the collection and dissemination of intelligence concerning criminal activity.

I. Relevant information contained in this system of records may be disclosed, as a routine use, to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

J. A record from this system may be disclosed to other Federal agencies for the purpose of conducting national intelligence and security investigations.

K. Information contained in this system or records may be disclosed to an applicant, petitioner or respondent or to his or her attorney or representative (as defined in 8 CFR 1.1(j)) in connection with any proceeding before the Service.

Release of information to the news media:

Information permitted to be released to the news media and the public pursuant to 28 CFR 50.2 may be made available from systems of records maintained by the Department of Justice unless it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

Release of information to Members of Congress.

Information contained in systems of records maintained by the Department of Justice, not otherwise required to be released pursuant to 5 U.S.C. 552, may be made available to a Member of Con-

gress or staff acting upon the Member's behalf when the Member or staff requests the information on behalf of and at the request of the individual who is the subject of the record.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage:

Generally, index records and cards are stored in manually operated index machines, file drawers, and boxes; other information is stored manually as paper records in file folders at locations A, B, C, E, F, and H, supra. Inactive files are stored at Federal Records Centers. Exceptions are as follows:

A. Alien address report index and records: Forms I-53, Alien Address Report, are microfilmed in the order in which they are received. An index is maintained on microfiche and on computer-readable magnetic tape.

B. Alien documentation, identification, and telecommunications (ADIT) system information is stored on magnetic tape and disks. Original forms completed by the individuals are filed with other records described for the subsystem "Centralized index and records."

C. Alien enemy index: Index records are maintained on microfilm. Actual files are stored in Federal Records Centers.

D. Centralized index and records: Most records are paper documents stored in file folders. Those index records which can be accessed electronically are stored on magnetic disk and tape.

E. Enforcement indexes: Original index cards and records are stored in manually operated file drawers and machines. Some records are also maintained in the automated system published in a notice entitled "JUSTICE/DEA-INS-111. Automated Intelligence Records System (Pathfinder)."

F. Examinations indexes: (1) *Application and petition system records* are stored on magnetic media at the Department of Justice Data Management Service. Original paper forms completed by the individuals are filed with other records in the subsystem called "Centralized index and records." (2) *Service lookout system records* are maintained on magnetic tape and in printed loose-leaf reference books at ports of entry.

Retrievability:

Generally, records are indexed and retrievable by name and/or "A" or "C" file number. Exceptions are as follows:

A. Air detail office index system: Aircraft data is filed in numerical sequence, within each calendar year.

B. Intelligence indexes: Records are retrieved by name within organization, activity, or type of violation.

C. Examiners' docket lists of petitioners for naturalization, and Master docket lists of petitions for naturalization pending one year or more, are filed chronologically for each court exercising naturalization jurisdiction. Relating records are filed by petition number.

Access controls:

Records are safeguarded in accordance with Department of Justice rules and procedures. INS offices are located in buildings under security guard, and access to premises is by official identification. All records are stored in spaces which are locked outside of normal office hours. Many records are stored in cabinets or machines which are locked outside of normal office hours. Access to automated systems is controlled by restricted password for use of remote terminals in secured areas.

Retention and disposal:

Several general rules apply to many subsystems of records:

A. Alien registration records are retained for 100 years from the closing date or date of last action.

B. Correspondence control cards (Forms G-617) are normally retained for one year following the year in which created.

C. Correspondence portions of subject files are normally retained no longer than two years. Records are then either microfilmed or destroyed by burning.

D. Records in policy portions of subject files are retained indefinitely.

E. Indexes and records not specifically mentioned are retained only so long as they serve a useful purpose.

F. Records are destroyed by shredding, burning, or as provided in disposal schedules.

Exceptions to the general practices are as follows:

A. Alien documentation, identification, and telecommunications (ADIT) system records are maintained until naturalization, death, or other material change in status of the individual, or until the registration card is relinquished.

B. Air detail office index: Forms I-92A are retained for five years.

C. Border Patrol trainee examination papers are destroyed six months after the trainee officer completes his probationary year.

D. Centralized index records stored on magnetic disk and tape are updated periodically and maintained for the life of the relating record. Original index cards are microfilmed, then destroyed.

E. Compassionate cases system records are retained for three years after completion of action.

F. Congressional Mail Unit correspondence control index records are retained for three years.

G. Emergency reassignment index records are destroyed upon the transfer, separation, retirement, or death of the employee.

H. Enforcement indexes relating to law violators and witnesses are retained for three years. Routine investigations records are destroyed when the investigation is closed. Correspondence control records are destroyed after final action on the subject matter.

I. Examinations indexes: (1) *Application and petition system records are deleted from the automated data base five years after the date of last activity. Inactive records will be stored on magnetic tape for an additional five years.* (2) Service lookout system records are deleted five years after insertion, unless removed at an earlier date or reinserted by the listing agency.

J. Finance Section indexes: accounts with creditors and debtors are retained for two years from the close of the fiscal year to which they relate and then are transferred to Federal Records Centers for storage and disposition.

K. Freedom of Information correspondence control index cards and records of requests under appeal or litigation are retained until completion of the action. Other index records of FOIA requests are retained for one year following the year in which created.

L. Health records are retained for six years after the date of the last entry.

M. Intelligence indexes: records are maintained indefinitely.

N. Naturalization examiners' docket lists and master docket lists are retained for two years. Naturalization and citizenship docket cards are purged after applications are rejected, closed, granted, or denied; or petitions for naturalization are granted, denied, or nonfiled.

O. Microfilmed manifest records are retained permanently.

P. Personal data cards are retained for three years after the employee is separated (Location A, supra). In regional offices (Location B, supra), records are destroyed after the employee is separated.

Q. Personnel investigations records are destroyed at the close of the fiscal year following the year of investigation. However, Operation Clean Sweep records are being retained until the program is terminated. Records of criminal investigations are retained as long as the information serves a useful purpose.

R. Security access clearance index records are destroyed upon the separation, death, or retirement of the employee.

S. White House and Attorney General correspondence control index cards are retained for one year beyond the expiration of the term of the President.

System manager(s) and address:

A. The system manager, Service-wide, is the Associate Commissioner, Management (Location A, supra).

B. The Associate Commissioner, Management, is the sole manager of the following subsystems:

1. Agency information control record index.

2. Alien address reports index and records.

3. Alien documentation, identification and telecommunications (ADIT) system.

4. Alien enemy index.

5. Centralized index and records (Master Index).

6. Congressional Mail Unit correspondence control index.

7. Document vendors and alterers index.

8. Enforcement correspondence control index.

9. Examinations indexes: (1) *Application and petition system; (2) Correspondence control index; (3) Service lookout system.*

10. Finance Section indexes.

11. Freedom of Information correspondence control index.

12. Health record system.

13. Intelligence indexes.

14. Microfilmed manifest records.

15. Property issued to employees.

16. Security access clearance index.

17. White House and Attorney General correspondence control index.

C. The following officials are system managers for special subsystems:

1. Automobile decal parking identification for employees: Deputy Regional Commissioner (Location B-4, supra).

2. Enforcement indexes, group one (Contact index; Informant index; Anti-smuggling index (general); Criminal, immoral, narcotic, racketeer and subversive indexes; Suspect third party index): the ranking Service officer of the offices in which the indexes are maintained (Locations A, B, C, and E, supra).

3. Enforcement indexes, group two: (a) Air detail office index: Deputy Director (Location J, supra). (b) Anti-smuggling information centers: (1) Canadian border, Chief Patrol Agent (Location F-19, supra); (2) Mexican Border, Deputy Director (Location J, supra). (c) Border Patrol Academy index: Chief Patrol Agent (Location G, supra). (d) Border Patrol sectors general index: Chief Patrol Agent (Location F, supra). (e) Fraudulent Document Center index (Location J, supra).

4. Compassionate cases system: Associate Commissioner, Management (Location A, supra); Regional Commissioners (Location B, supra).

5. Emergency reassignment index: Regional Commissioners (Location B, supra); District Directors (Location C, supra); Officers in charge (Location E, supra); Chief Patrol Agents (Location F, supra).

6. Extension training program enrollees: Chief, Employee Development Branch, Office of Assistant Commissioner, Personnel (Location A, supra).

7. Naturalization and citizenship indexes: (a) Naturalization and citizenship docket cards, and Examiners' docket lists of petitioners for naturalization: District Directors (Location C, supra); Officers in Charge (Location E, supra, except E-6, E-7, E-8, and E-13). (b) Master docket lists of petitions for naturalization pending one year or more: the Associate Commissioner, Management (Location A, supra); Regional Commissioners (Location B, supra); District Directors (Location C, supra); Officers in charge (Location E, supra, except E-6, E-7, E-8, and E-13).

8. Personal data card system: Associate Commissioner, Management (Location A, supra); Regional Commissioners (Location B, supra).

Notification procedure:

A. Inquiries should be addressed to the system managers listed above, except for the following subsystems:

1. Finance Section indexes: address inquiries to the INS office at which business was conducted.

2. Freedom of Information correspondence control index: address inquiries to the INS office nearest the requestor's place of residence, or (if known) the INS office where the record is located.

B. Systems totally exempt from disclosure pursuant to 5 U.S.C. 552a(j) and (k) are listed below:

1. Agency information control record index.

2. Document vendors and alterers index.

3. Emergency reassignment index.

4. Enforcement indexes, group one: (a) Contact index. (b) Informant index. (c) Anti-smuggling index (general). (d) Criminal, immoral, narcotic, racketeer, and subversive indexes. (e) Suspect third party index.

5. Enforcement indexes, group two: Anti-smuggling information centers, Canadian and Mexican borders.

6. Examinations indexes: Service lookout system.

7. Intelligence indexes.

Record access procedures:

In all cases, requests for access to a record from any record subsystem shall be in writing or in person. If a request for access is made in writing, the envelope and letter shall be clearly marked "Privacy Access Request." The requester shall include a description of the general subject matter and if known, the relating file number. To identify a record relating to an individual's full name; date and place of birth; alien, citizen, or employee identification number; and, if appropriate, the date and place of entry into or departure from the United States. The requester shall also provide a return address for transmitting the information.

Most of the subsystems of records contain information which the Attorney General has exempted from disclosure pursuant to 5 U.S.C. 552a(j) and (k), and records which are classified pursuant to Executive order. Each requester will be accorded access to the records relating to himself only to the extent that such records are not within the scope of exemptions and are not classified.

Contesting record procedure:

Any individual desiring to contest or amend information maintained in the system should direct his request to the INS office nearest his residence or to the office in which he believes a record concerning him may exist. The request should state clearly what information is being contested, the reasons for contesting it, and the proposed amendment to the information.

Record source categories:

Basic information contained in INS records is supplied by individuals on Department of State and INS applications and reports. Other information comes from inquiries and/or complaints from members of the general public and mem-

bers of the Congress; referrals of inquiries and/or complaints directed to the White House or Attorney General; INS reports of investigation, sworn statements, correspondence and memorandums; official reports, memorandums, and written referrals from other government agencies, including Federal, state, and local, and from various courts and regulatory agencies; information from foreign government agencies and international organizations; and personnel and administrative applications and forms.

Systems exempted from certain provisions of the act:

The Attorney General has exempted this system from subsections (c) (3) and (4); (d); (e) (1), (2), and (3); (e) (4) (G), (H), and (I); (e) (5) and (8); (f); (g); and (h) of the Privacy Act. These exemptions apply to the extent that information in the subsystems is subject to exemption pursuant to 5 U.S.C. 552a(j) and (k). Rules have been promulgated in accordance with the requirements of 5 U.S.C. 553 (b), (c), and (e) and have been published in the FEDERAL REGISTER as additions to Title 28, Code of Federal Regulations (28 CFR 16.99).

NATIONAL SCIENCE FOUNDATION

SCIENCE FOR CITIZENS ADVISORY COMMITTEE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Science for Citizens Advisory Committee.

Date and Time: October 21, 1977, 9 a.m. to 5 p.m., and October 22, 1977, 9 a.m. to 12 noon.

Place: Room 405, 5225 Wisconsin Avenue, Washington, D.C. 20550.

Contact person: Ms. Rachelle Hollander, Acting Program Manager, Science for Citizens Program, Office of Science and Society, National Science Foundation, Washington, D.C. 20550, telephone 202-282-7770.

Purpose of meeting: To provide advice and recommendations concerning the development of the Science for Citizens program.

Agenda: (1) Review program announcements for (a) public service science residencies and internships, and (b) forums, conferences, and workshops; and (2) development of criteria for planning grants for Public Service Science Centers and Scientific and Technological Information Institutes.

Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel and Management, Room 248, Washington, D.C. 20550.

M. REBECCA WINKLER, Acting Committee Management Officer.

SEPTEMBER 30, 1977.

[7555-01]

SUBCOMMITTEE ON ECONOMICS OF THE ADVISORY COMMITTEE FOR SOCIAL SCIENCES

Meeting

In accordance with Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Science Foundation announces the following meeting:

Name: Subcommittee on Economics of the Advisory Committee for Social Sciences.

Date and time: October 21 and 22, 1977, 9 a.m. to 6 p.m. each day.

Place: Room 1224, National Science Foundation, 1800 G Street NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact person: Dr. James H. Blackman, Program Director for Economics, Division of Social Sciences, National Science Foundation, Washington, D.C. 20550, telephone 202-632-5968.

Purpose of subcommittee: To provide advice and recommendations concerning support for research in economics.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals and projects being reviewed include information of a proprietary or confidential nature including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Acting Director, NSF, on February 18, 1977.

M. REBECCA WINKLER, Acting Committee Management Officer.

SEPTEMBER 30, 1977.

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice 571]

MISSION, TEX.

Application for Bridge Permit

Notice is hereby given that the Department of State has received an application for a permit authorizing the construction, operation and maintenance of an international bridge in the Mission-McAllen, Texas, area. The application has been filed by the City of Mission, Texas, for a permit authorizing a highway bridge and rail crossing connecting Mission with the new Industrial Park northwest of the City of Reynosa.

The Department's jurisdiction with respect to this application is based upon Executive Order 11423, dated August 16, 1968, and the International Bridge Act of 1972 (Pub. L. 92-343, 86 Stat. 731, approved September 26, 1972).

As required by E.O. 11423, the Department of State is circulating this application to concerned agencies for comment. In addition, the Office of Environmental Affairs of the Department of State is initiating an assessment of the environmental effects of the proposal to determine if an environmental impact statement will be required.

Interested persons may submit their views regarding this application in writing by November 4, 1977 to Mr. Phillip R. Trimble, Assistant Legal Adviser for Economic and Business Affairs, Room 6420, Department of State, 2201 C Street, NW., Washington, D.C. 20520.

The application and related documents made part of the record to be considered by the Department of State in connection with this application are available for inspection and copying in the Office of the Assistant Legal Adviser for Economic and Business Affairs during normal business hours.

Any questions relating to this notice may be addressed to Mr. Trimble at the above address, (202-632-0242) or to Ms. Diane Wood, (202-632-3970).

Dated: September 28, 1977.

For the Secretary of State.

PHILLIP R. TRIMBLE,
*Assistant Legal Adviser
for Economic and Business Affairs.*

[T.D. 77-243]

WHITE OR IRISH POTATOES, OTHER THAN CERTIFIED SEED—TARIFF-RATE QUOTA

Tariff-Rate Quota for the Quota Year Beginning September 15, 1977, for White or Irish Potatoes, Other Than Certified Seed

SEPTEMBER 28, 1977.

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Announcement of the quota quantity for white or Irish potatoes, other than certified seed, for the 12-month period beginning September 15, 1977.

SUMMARY: Each year the tariff-rate quota for potatoes described in item 137.25, Tariff Schedules of the United States (TSUS), is based on the estimate by the Department of Agriculture of potatoes entered during the calendar year.

EFFECTIVE DATES: The 1977 tariff-rate quota is applicable to white or Irish potatoes described in item 137.25, TSUS, entered, or withdrawn from warehouse, for consumption during the 12-month period beginning September 15, 1977.

FOR FURTHER INFORMATION CONTACT:

Helen C. Rohrbaugh, Head, Quota Section, Duty Assessment Division, Office of Operations, U.S. Customs Service, Washington, D.C. 20229 (202-566-8592).

The tariff-rate quota for white or Irish potatoes, other than certified seed, pursuant to item 137.25, Tariff Schedules of the United States, for the 12-month period beginning September 15, 1977, is 45,000,000 pounds.

The estimate of the production of white or Irish potatoes, including seed potatoes, in the United States for the calendar year 1977, made by the United States Department of Agriculture as of September 1, 1977, was in excess of 21 billion pounds.

In accordance with headnote 2, part 8A, of schedule 1, Tariff Schedules of the United States, the quota quantity is not increased because the estimated production is greater than 21,000,000,000 pounds.

JOHN A. HURLEY,
Acting Commissioner of Customs.

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 24, Rule 19; 8th Rev. Exemption No. 128]

ATCHISON, TOPEKA & SANTA FE RAILROAD CO., ET AL.

Mandatory Car Service Rules

To: The Atchison, Topeka & Santa Fe Railroad Co., Chicago & North Western Transportation Co., Chicago, Milwaukee, St. Paul & Pacific Railroad Co., Chicago, Rock Island & Pacific Railroad Co., Illinois Central Gulf Railroad Co., Louisville & Nashville Railroad Co., Missouri-Illinois Railroad Co., Missouri Pacific Railroad Co., Seaboard Coast Line Railroad Co., Southern Railway Co.

It appearing, That the ten railroads listed below have mutually agreed to the use of each other's empty plain cars having mechanical designations "XM", "FM"—less than 200,000 lbs., "GA", "GB", "GD", "GH", and "GS" and bearing reporting marks assigned to such carriers.

It further appearing, That these ten railroads have mutually agreed to participate in an Expanded Clearinghouse Project in which each road will treat the cars of the nine roads as systems, with the Car Service Division of the AAR acting as agent.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, empty plain cars described in the Official Railway Equipment Register I.C.C.-R.E.R. No. 404, issued by W. J. Trezise, or successive issues thereof, as having mechanical designations "XM", "FM"—less than 200,000 lbs., "GA", "GB", "GD", "GH", and "GS" and bearing the following reporting marks are exempt from the provisions of Car Service Rules 1 and 2, while on the lines of any of the above named railroads.

The Atchison, Topeka & Santa Fe Railroad Co., reporting marks: ATSF. Effective August 22, 1976.

Chicago & North Western Transportation Co., reporting marks: CNW-CGW-CMO-FDDM-MSTL. Effective October 17, 1976.

Chicago, Milwaukee, St. Paul & Pacific Railroad Co., reporting marks: MILW. Effective July 15, 1976.

Chicago, Rock Island & Pacific Railroad Co., reporting marks: RI-ROCK. Effective September 12, 1976.

Chicago, Rock Island & Pacific Railroad Co., reporting marks: RI-ROCK. Effective September 12, 1976.

Illinois Central Gulf Railroad Co., reporting marks: ICG-GM&O-IC. Effective August 22, 1976.

Louisville & Nashville Railroad Co., reporting marks: L&N-CIL-MON-NC. Effective August 15, 1976.

Missouri-Illinois Railroad Co., reporting marks: MI. Effective July 15, 1976.

Missouri Pacific Railroad Co., reporting marks: MP-C&EI-KO&G-T&P. Effective July 15, 1976.

[Deleted]

¹ St. Louis Southwestern Railway Co., eliminated.

Seaboard Coast Line Railroad Co., reporting marks: SCL-ACL-C&WC-SAL. Effective August 15, 1976.
Southern Railway Co., reporting marks: SOU-AEC-CG-GF-NS SA. Effective July 15, 1976.

It is further ordered, That this order will become effective for specific ownerships on dates to be set by the Car Service Division as each road is phased into the Project starting July 15, 1976, the Car Service Division to issue appropriate notification to Project participants, and to advise the undersigned.

Effective 11:59 p.m., October 1, 1977, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., September 22, 1977.

[Ex Parte No. 241; Rule 19; 13th Rev. Exemption No. 129]

BESSEMER & LAKE ERIE RAILROAD CO., ET AL.

Mandatory Car Service Rules

It appearing, That the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 404 issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44-ft. 6-in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Bessemer & Lake Erie Railroad Co., reporting marks: BLE.
Chicago, West Pullman & Southern Railroad Co., reporting marks: CWP.
Chicago, Rock Island & Pacific Railroad Co., reporting marks: RI-ROCK.
Detroit & Mackinac Railway Co., reporting marks: D&M-DM.
Illinois Terminal Railroad Co., reporting marks: ITC.
Louisville, New Albany & Corydon Railroad Co., reporting marks: LNAC.

¹ Addition.

Mandatory Car Service Rules

AMENDMENT NO. 6 TO EXEMPTION NO. 127

To: Bessemer & Lake Erie Railroad Co., The Baltimore & Ohio Railroad Co., The Chesapeake & Ohio Railway Co., Western Maryland Railway Co.

Upon further consideration of Exemption No. 127 issued June 29, 1976.

It is ordered, That, under authority vested in me by Car Service Rule 19, Exemption No. 127 to the Mandatory Car Service Rules ordered in Ex Parte No. 241 be, and it is hereby, amended to expire December 31, 1977.

This amendment shall become effective September 30, 1977.

Issued at Washington, D.C., September 22, 1977.

[7035-01]

[No. 36654]

BOYLE BROTHERS, INC.

Petition for Clarification, Publication of Arbitrariness and Weighing Charges; Instituting a Proceeding

The purpose of this notice is to inform the public that upon a petition of Boyle Brothers, Inc., filed August 9, 1977, which sought the institution of a rule-making proceeding, the Commission is starting a declaratory order proceeding pursuant to the Administrative Procedure Act (5 U.S.C. 554(e)) concerning petitioner's proposed tariff publications.

Petitioner seeks to have the Commission interpret its proposed tariff publications as reasonable. The publications involve the following: First, the establishment of an additional charge (or arbitrary) of three cents per 100 pounds,

subject to a minimum charge of \$10 on all shipments destined to any point in the State of Vermont. A proposed mileage Table No. 19, would add an additional charge of three cents per 100 pounds, minimum charge of \$12 per vehicle used, on all shipments destined to points in New York City, Nassau, and Suffolk Counties, N.Y. Second, petitioner proposes to reimburse the carrier for weighing shipments without the consent (or request) of the shipper, consignee, or other designated party responsible for payment of the freight charges.

Petitioner submits that its proposal has been rejected by the Commission's Bureau of Traffic because of an alleged violation of Rule 4(a) and 4(b) of Tariff Circular MF No. 3, as the proposal was not a "clear and explicit statement of rates" and provided "a complicated plan", prohibited by those rules. Petitioner believes that by the summary rejection of its tariff publication, the Commission's Bureau of Traffic is giving a new interpretation to Rules 4(a) and 4(b), without an opportunity for the petitioner to show on a formal record that the proposal is reasonable.

By an order served concurrently with this publication, the proceeding is being set for handling under the modified procedure. Oral hearings do not appear necessary at this time and are not contemplated.

Any interested parties subsequently permitted to intervene should comply with Rules 43 to 52 (49 CFR 1100.43 to 1100.54), inclusive, of the Commission's general rules of practice, and the filing and service of pleadings is to be as follows: (a) Opening statement of facts and arguments by petitioner and any parties supporting petitioner on or before 20 days from the date of service of this order; (b) 30 days after that date, statement of facts and argument by replicant and any supporting parties; and (c) reply by petitioner and any supporting parties 20 days thereafter.

All written submissions will be available for public inspection during regular business hours at the offices of the Interstate Commerce Commission, 12th and Constitution Avenue, Washington, D.C.

Issued in Washington, D.C., September 22, 1977.

H. G. HOMME, JR.,
Acting Secretary.

[7035-01]

[Rule 19, Ex Parte No. 241, 32nd Rev. Exemption No. 90]

CAMINO, PLACERVILLE & LAKE TAHOE RAILROAD CO., ET AL.

Exemption Under Mandatory Car Service Rules

It appearing, that the railroads named below own numerous 50-ft. plain boxcars; that under present conditions there are substantial surpluses of these cars on their lines; that return of these cars

to the owners would result in their being stored idle; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of these cars, resulting in unnecessary loss of utilization of such cars.

It is ordered, That pursuant to the authority vested in me by Car Service Rule 19, 50-ft. plain boxcars described in the Official Railway Equipment Register, I.C.C. R.E.R. No. 404, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", and bearing reporting marks assigned to the railroads named below, shall be exempt from provisions of Car Service Rules 1, 2(a), and 2(b).

1

CIVIL AERONAUTICS BOARD.

Notice of rescheduled meeting from September 30, 1977, to October 7, 1977: MA-57 amending M-63; September 28, 1977.

TIME AND DATE: 10 a.m., October 7, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: The Air Charter Tour Operators of America to make a presentation to the Board regarding the problems affecting the charter tour operators industry.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The General Counsel for the Air Charter Tour Operators of America have requested that the meeting originally scheduled for September 30, 1977, be rescheduled for October 7, 1977.

[S-1500-77 Filed 10-3-77;9:24 am]

[6320-01]

2

CIVIL AERONAUTICS BOARD.

Notice of additions of items to the September 29, 1977, meeting agenda: MA-58 amending M-61; September 28, 1977.

TIME AND DATE: 2 p.m., September 29, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 3a. Docket 30226, increase in subsidy for Kodiak-Western Alaska Airlines, Inc. (Memo No. 6669-D, BFR, OC, BOR). 3b. Docket 31428, exemption for Reeve Aleutian Airways, Inc., to continue carriage of military passengers on certain scheduled services at less than its tariff rates (Memo No. 5333-D, BFR).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: On August 29, 1977, Kodiak-Western filed a petition for an increase in its temporary subsidy rate. The carrier informally indicated to the staff that if relief is not granted on an emergency basis, it will be forced to curtail severely (or perhaps cease) its operations after October 1, 1977. On September 27, 1977, Reeve Aleutian Airways filed a petition for an exemption to transport military passengers on scheduled commercial flights during the period October 1, 1977, through September 30, 1978. Reeve Aleutian's military contract is effective October 1, 1977. The staff forwarded its recommendations to the Board concerning these cases on September 28, 1977. In order for the Board to consider these cases before October 1, 1977, it is necessary for these items to be added to the September 29, 1977, agenda. Accordingly, the following Members have voted that agency business requires the addition of items 3a and 3b to the September 29, 1977, agenda and that no earlier announcement of these additions was possible:

Chairman Alfred E. Kahn,
Vice Chairman Richard J. O'Melia,
Member G. Joseph Minetti,
Member Elizabeth E. Bailey.

3

CIVIL AERONAUTICS BOARD.

Notice of change of time for the September 29, 1977, meeting: MA-59 amending M-61; September 29, 1977.

TIME AND DATE: 3 p.m., September 29, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Scheduled meeting for September 29 as announced by M-61 as amended by MA-54, MA-55, MA-56 and MA-58.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: Chairman Kahn is appearing at a Congressional meeting today and will not be available for the meeting until 3 p.m.

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of change in subject matter of agency meeting.

At its open meeting held at 2:30 p.m. on Friday, September 30, 1977, the Board of Directors of the Federal Deposit Insurance Corporation unanimously determined, on motion of Chairman George A. LeMaistre, seconded by Director John G. Heimann (Comptroller of the Currency), that Corporation business required its addition of the following matters to the agenda for consideration at that meeting, on less than seven days' notice to the public:

Application of the Western New York Savings Bank, Buffalo, N.Y., for consent to establish a branch at 1777 Sheridan Drive, Town of Tonawanda, N.Y.

Resolution rejecting the highest bid received for the stock of First National Bank of Jefferson Parish, Gretna, La., which stock was acquired by the Corporation from the receiver of International City Bank & Trust Company, New Orleans, La.

Resolution extending to November 1, 1977, the deadline for the submission of statements of employment and financial interests by employees of the Corporation.

Resolution augmenting the budget of administrative expenses for 1977.

The Board further determined that no earlier notice of a change in the subject matter of the meeting was possible.

Dated: September 30, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

6

FEDERAL DEPOSIT INSURANCE CORPORATION.

Notice of change in subject matter of agency meeting.

At its closed meeting held at 2 p.m. on Friday, September 30, 1977, the Board of Directors of the Federal Deposit Insurance Corporation unanimously determined, on motion of Chairman George A. LeMaistre, seconded by Director John G. Heimann (Comptroller of the Currency), that Corporation business required its addition of Case Nos. 43,227-L and 43,234-L, regarding the liquidation of assets acquired by the Corporation from Northeast Bank of Houston, Houston, Tex. (in liquidation), to the agenda for consideration at the meeting, on less than seven days' notice to the public.

The Board also voted to withdraw Case No. 43,204-L, regarding the liquidation of assets acquired by the Corporation from Northern Ohio Bank, Cleveland, Ohio, from consideration, at the request of the Division of Liquidation.

The Board further determined that no earlier notice of a change in the subject matter of the meeting was possible.

Dated: September 30, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[24 CFR Part 1917]

[Docket No. FI-3474]

NORTHPORT, TUSCALOOSA COUNTY,
ALA.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Northport, Tuscaloosa County, Ala. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at McGuire Engineering Co., Northport, Ala.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor J. Frank Manderson, Drawer L, Northport, Ala. 35476.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Northport, Tuscaloosa County, Ala., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements

on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Black Warrior River	Confluence of Mill Creek	148
	Upstream of Lurleen Wallace Blvd.	152
Black Warrior Tributary No. 1	Upstream of 5th St.	151
	Downstream of 9th St.	151

PARAGOULD, GREENE COUNTY, ARK.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Adminis-
tration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Paragould, Greene County, Ark. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Post Office, 200 West Court, Paragould, Ark.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Robert Camp, 221 West Court, Paragould, Ark.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Paragould, Greene County, Ark., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed

to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 211 8th Street, Seal Beach, Calif.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Dennis Courtemarche, City Manager, Seal Beach, City Hall 211 8th Street, Seal Beach, Calif. 90740.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Seal Beach, Calif., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Local runoff from golf course retarding basin.	North and West of Lampson Ave	11

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

tration, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).

Issued: August 26, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

BOULDER COLO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Boulder, Colo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 1777 Broadway, Boulder, Colo.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Robert W. Westdyke, City Manager, City of Boulder, P.O. Box 791, Boulder, Colo. 80306.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Boulder, Colo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change

any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Boulder Creek	6th St.	5,372
	9th St.	5,390
	Broadway	5,348
	Arapahoe Ave.	5,341

THORNTON, COLO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed based flood elevations (100-year flood) listed below for selected locations in the City of Thornton, Colo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 8992 North Washington St., Thornton, Colo. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Tony E. Richter, City Hall, 8992 North Washington St., Thornton, Colo. 80229.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Thornton, Colorado, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any

existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Grange Hall Creek	Union Pacific R.R.	5,293
	Colorado Blvd.	5,146
	Liverdale Rd.	5,101
South Fork Grange Hall Creek	Washington St.	5,319
	104th Ave.	5,238
Grange Hall Creek tributary	York St.	5,240
basin 4100	Union Pacific R.R.	5,151
	Wells Rd.	5,136
Brainerd Gulch	Colorado Blvd.	5,189
Big Dry Creek	Interstate 25	5,162
	136th Ave.	5,147

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by (39 FR 2787, January 24, 1974).)

GLASTONBURY, HARTFORD COUNTY, CONN.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Glastonbury, Hartford County, Conn. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base

flood elevations are available for review at the Town Clerk's Office, Glastonbury Town Hall, 2108 Main St., Glastonbury, Conn. 06033.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify the Honorable Henry A. Kinne, Mayor, Town of Glastonbury, Glastonbury Town Hall, 2108 Main St., Glastonbury, Conn. 06033.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notices of the proposed determinations of base flood elevations (100-year flood) for the Town of Glastonbury, Connecticut, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed evaluations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected location are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Tributary B	450 ft upstream from confluence with Smith Brook	51
	50 ft downstream of Farmstead La. culvert	70
	40 ft downstream of Founders Rd. culvert	85
	At the downstream face of Carl Rd. culvert	88
	50 ft downstream of Coach Rd. culvert	90
	At culvert, 425 ft upstream of Coach Rd.	95
	At culvert, 600 ft upstream of Coach Rd.	101
Wickat Brook	At confluence with Salmon Brook	156
	At the dam, 315 ft upstream of the confluence with Salmon Brook	164

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	At the upstream face of access Rd. culvert	177
	At the downstream face of Hebron Rd. culvert	183
Connecticut River	1300 ft upstream of Hebron Rd. culvert	193
	3.45 mi downstream of Roaring Brook confluence	196
	At the confluence with Roaring Brook	27
	Upstream corporate limit	28
Roaring Brook	At the Tyson Street Bridge	27
	100 ft downstream of Main Street Bridge	31
	0.63 mi upstream of the Main St.	50
	0.43 mi downstream of of Matson Hill Rd.	122
	0.11 mi downstream of Matson Hill Rd.	161
	60 ft upstream of Matson Hill Rd.	168
	At the dam, 0.13 mi upstream of Matson Hill Rd.	181

	0.86 mi upstream of the Connecticut Route 2 culvert	116
Smith Brook	At the footbridge, 0.28 mi upstream of Main St.	28

cation of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Hall of Portland, Conn.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify First Selectman Marie T. Larson, P.O. Box 71, Portland, Conn.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Portland, Middlesex County, Conn., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hales Brook	Upstream of State Route 17	139
	Upstream of Thompson Hill Rd.	231
Reservoir Brook	Upstream of Wilcox Rd.	39
	Approximately 50 ft upstream of Thompson Hill Rd.	190
	Upstream of the Old Marlborough Turnpike	221
Connecticut River	Intersection of the southeastern corporate limits and the north bank of the Connecticut River	20
	Upstream of State Route 17A	23

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	Intersection of the northern corporate limits and the east bank of the Connecticut River	26
Carr Brook	Upstream of Strickland Rd.	25
	Upstream of Rose Hill Rd.	81
	Pennfield Hill Rd.	169

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

JUNO BEACH, FLA.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Juno Beach, Fla. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Hall, 841 Ocean Drive, Juno Beach, Fla.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Alfred M. Elder, Town Hall, 841 Ocean Drive, Juno Beach, Fla. 33408.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

PROPOSED RULES

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Juno Beach, Fla., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Atlantic Ocean	Shoreline from northern corporate limit to southern corporate limit.	7
Intersecting Waterway	East end of North 16th Ave.	7
	East end of South 12th Ave.	7
	Lake Osborne Dr. west side.	11
	West end of 22nd Ave.	11
	West end of 17th Ave.	12

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 26, 1977.

LAKE PARK, FLA.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Lake Park, Fla. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt

or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Town Hall, 535 Park Avenue, Lake Park, Fla.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Bob Carlson, Town Manager, Town of Lake Park, P.O. Box 12276, Lake Park, Fla. 33403.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Lake Park, Fla., in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lake Worth	Shoreline from northern corporate limits to southern corporate limits.	7
	Lake Shore Dr. to Cypress Dr.	7
	West end of Gateway Rd.	12
Runoff ponding	West end of Industrial Ave.	17

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: August 26, 1977.

[Docket No. FI-3486]

LAKE WORTH, FLA.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Lake Worth, Fla. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 7 North Dixie, Lake Worth, Fla. 33460.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Leamon Andrews, City Hall, 7 North Dixie, Lake Worth, Fla. 33460.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for City of Lake Worth, Fla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234, 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Atlantic Ocean	Shoreline from northern corporate limit to southern corporate limit.	7
Lake Worth	East end of North 16th Ave.	7
	East end of South 12th Ave.	7
Rainfall	Lake Osborne Dr. west side.	11
	West end of 22nd Ave.	11
	West end of 17th Ave.	12

*Flooding at these locations is caused by poor drainage.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

LAUDERHILL, FLA.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Lauderhill, Fla.

These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

PROPOSED RULES

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 1080 Northwest 47th Avenue, Lauderhill, Fla.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Eugene Cipoloni, City Hall, 1080 Northwest 47th Avenue, Lauderhill, Fla. 33313.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Lauderhill, Fla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Middle River	Florida Turnpike	8
Canal (C-15)	Inventory Dr.	8
Plantation Canal	U.S. Highway 441	8
W-12	Florida Turnpike	7
Middle River	Northwest 31st St.	8
Canal Tributary	U.S. Highway 441	8

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Adminis-

trator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

PROPOSED RULES

gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Corona, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

[24 CFR Part 1917]

[Docket No. FI-3375]

SOUTH LAKE TAHOE, CALIF.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of South Lake Tahoe, Calif. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, South Lake Tahoe, Calif.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Del Laine, City Hall, P.O. Box 7322, South Lake Tahoe, Calif. 95705.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of South Lake Tahoe, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more

stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Bijou Creek	Ralph Dr.	6,306
	Pioneer Trail	6,285
	Pairway Ave.	6,233
	U.S. Route 50	6,232
Heavenly Valley Creek	Pioneer Trail	6,245
	Johnson Rd.	6,255
Trout Creek	U.S. Route 50	6,243
Upper Truckee River	do	6,241

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administration, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

BOULDER, COLO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Boulder, Colo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 1777 Broadway, Boulder, Colo.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Frank Buchanan, P.O. Box 791, Boulder, Colo. 80306.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Boulder, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Boulder Creek	6th St.	5,372
	9th St.	5,360
	Broadway	5,348
	Arapahoe Ave.	5,341
	17th St.	5,325

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Herculaneum, Jefferson County, Mo., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Joachim Creek	1,300 ft downstream of Missouri Illinois R.R.	112
	1,000 ft upstream of Interstate 55	112
Hidden Valley Creek	At confluence with Joachim Creek	111
	100 ft downstream of Commercial Blvd.	112
	100 ft upstream of Commercial Blvd.	115
	1,650 ft upstream of Commercial Blvd.	117
	3,050 ft upstream of Commercial Blvd.	128
Burns Creek	At city limits	146
	At confluence with Joachim Creek	111
	300 ft downstream of Lake Dr.	112
	At Lake Dr.	122
	50 ft downstream of Highway 61 spur	123
	At Highway 61 spur	129
Missouri River	50 ft upstream of I-55	139
	Southern corporate limits	142
	Northern corporate limits	143

[Docket No. FI-3383]

SPRINGFIELD, MO.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Springfield, Mo. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, 830 Bloomville Street, Springfield, Mo.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Don Busch, City Manager, City of Springfield, 830 Bloomville Street, Springfield, Mo. 65801.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Springfield, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed

to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

NEWPORT, N.C.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the City of Newport, N.C. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at City Hall, Newport, N.C.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mayor Gilbert Slaughter, City Hall, P.O. Box 115, Newport, N.C. 28570.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the City of Newport, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the

NEW HANOVER COUNTY, N.C.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in New Hanover County, N.C. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the County Administration Building, 320 Chestnut St., Wilmington, N.C. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Dan Eller, County Manager, New Hanover County, County Administration Building, 320 Chestnut St., Wilmington, N.C. 28401.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for New Hanover County, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

NORTHFIELD, VT.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Northfield, Vt. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Municipal Building, Main Street, Northfield, Vt.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Robert Dorman, Town and Village Manager, Municipal Building, Main Street, Northfield, Vt. 05663.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Northfield, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968, Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its

PROPOSED RULES

own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Dog River	Wall St.	728
	Central Vermont RR.	724
	Main St.	722
Union Brook	Pleasant St.	733
	Water St.	738

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[24 CFR Part 1917]

[Docket No. FI-3390]

BRANDON, RUTLAND COUNTY, VT.

Proposed Flood Elevation Determinations
AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Town of Brandon, Rutland County, Vt. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATE: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at the Town Manager's Office, Town Office Building, Center Street, Brandon, Vt. 05733.

Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Edward Dencke, First Selectmen, Town of Brandon,

Town Office Building, Center Street, Brandon, Vt. 05733.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581 or toll free line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Town of Brandon, Rutland County, Vt., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in the flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 110-year flood elevations for selected location are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Nashobe River	500 ft downstream of Clay St.	362
	100 ft upstream of Clay St.	364
	1,300 ft upstream of Clay St.	365
	50 ft downstream of Vermont Ry.	367
	100 ft upstream of Vermont Ry.	373
	1,600 ft upstream of Vermont Ry.	374
	2,300 ft upstream of Vermont Ry.	410
	300 ft upstream of Center St. (below dam).	423
	400 ft upstream of Center St. (above dam).	430
	2,700 ft downstream of Wheeler Rd.	432
	At Wheeler Rd.	434
	800 ft downstream of Welton Rd.	436
	50 ft downstream of Welton Rd.	441
	100 ft upstream of Welton Rd.	450
	600 ft upstream of Welton Rd.	458
	100 ft downstream of Town Farm Rd.	479
	100 ft upstream of Town Farm Rd.	486

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
	1,300 ft upstream of Town Farm Rd.	487
	4,500 ft upstream of Town Farm Rd.	509
Nashobe River	100 ft upstream of State Route 53.	570
	1,600 ft upstream of State Route 53.	615
Arnold Brook	800 ft downstream of Arnold District Rd.	401
	25 ft downstream of Arnold District Rd.	439
	At Arnold District Rd.	443
	280 ft upstream of Arnold District Rd.	443

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

[24 CFR Part 1917]

[Docket No. FI-3391]

MORRISVILLE, VT.

Proposed Flood Elevation Determinations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base flood elevations (100-year flood) listed below for selected locations in the Village of Morrisville, Vt. These base flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

DATES: The period for comment will be ninety days following the second publication of this notice in a newspaper of local circulation in the above-named community.

ADDRESSES: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base flood elevations are available for review at Village Hall, Morristown, Vt. Any person having knowledge, information, or wishing to make a comment on these proposed elevations should immediately notify Mr. Adrian West, Chairman, Board of Trustees, Village of Morrisville, Village Hall, Morrisville, Vt. 05661.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, 202-755-5581, or Toll Free Line 800-424-8872, Room 5270, 451 Seventh Street, SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base flood elevations (100-year flood) for the Village of Morrisville, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.

These elevations together with the flood plain management measures required by Section 1910.3 of the program regulations are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, state or regional entities. These proposed elevations will also be used to calculate the appropriate

flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The proposed 100-year flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Beardsman Brook	Wards Pond Dam	630
	Cottage St.	613
	Vermont Route 100	613
Lincoln River	Vermont Northern RR.	639
	Bridge St.	637
	Morrisville Dam	635

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001-4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended (39 FR 2787, January 24, 1974).)

Issued: September 8, 1977.

PATRICIA ROBERTS HARRIS,
Secretary.

Title 24—Department of Housing and Urban Development

CHAPTER II—OFFICE OF ASSISTANT SECRETARY FOR HOUSING—FEDERAL HOUSING COMMISSIONER, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R 77-495]

PART 280—MOBILE HOME CONSTRUCTION AND SAFETY STANDARDS
Miscellaneous Amendments

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This final rule issues six minor amendments to the Federal Mobile Home Construction and Safety Standards. These amendments are being issued to clarify certain aspects of the standards, and to remedy a potential life-safety problem that now exists in the standards.

EFFECTIVE DATE: December 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Richard A. Mendlen, Standards Branch, Mobile Home Standards Division, Office of Neighborhoods, Voluntary Associations and Consumer Protection, Department of Housing and Urban Development, 451 Seventh Street, SW., Room 4228, Washington, D.C. 20410, telephone 202-472-4710.

SUPPLEMENTARY INFORMATION: The following is a discussion of the amendments being made to the Federal standards for mobile homes:

1. Section 280.208(d) is being amended to preclude the placement of a smoke detector on any electrical circuit protected by a ground fault circuit interrupter (GFCI). (See § 280.806(b)). This revision is being made to assure proper operation of smoke detectors since circuits protected by a GFCI are subject to nuisance tripping of the circuit breaker which may have the effect of making the detector inoperable during periods of emergency. It is necessary to make this amendment immediately and without public comment to assure that the fire protection provided by smoke detectors is not negated by nuisance tripping of a GFCI.

2. Section 280.603(b)(4)(iii) is being amended to require that the receptacle outlet provided for the use of an electrical heat tape shall not be protected by a GFCI. This amendment also makes it clear that the receptacle outlet shall be located on the underside of the mobile home within two feet of the water supply inlet. The location provisions were originally provided in Interpretative Bulletin G-1-76 as published in the *Federal Register* at 42 FR 962 on January 4, 1977. Because this amendment changes portions of that interpretation, the remaining appropriate requirements with respect to location, have been incorporated into this amendment. This change is being made since the nuisance tripping problem for circuits protected by a GFCI may negate the effectiveness of an outlet provided for the use of an electrical heat tape. This amendment is necessary to assure that any exposed water piping is protected against freezing.

3. Section 280.612(a) is being amended to correct a typographical error in the requirement for pressure testing of the water piping distribution system as published in the *Federal Register* at 40 FR 58777 on December 18, 1975. Because the pressure cited under former state and consensus standards for mobile homes reflected the correct pressure, the industry, recognizing the error, continued to use the correct pressure for performing the test under the Federal program. This typographical error was previously acknowledged by the Department in public meetings held in May 1976. This amendment merely reflects the current and correct practice for testing the water piping system.

4. Section 280.705(1)(3) is being amended to make it clear that manual shutoff valves required to be installed in the gas piping system are intended to permit servicing of individual appliances rather than to function as primary life-safety devices in the event of an emergency. This change is consistent with the National Mobile Home Advisory Council recommendation to direct occupants to leave the mobile home in the event of an emergency rather than to remain in the home and attempt to control the spread of leaking gas. Further, a master shutoff valve is usually provided at the mobile home site in conjunction with the connection of the gas piping to the utility service. This change has been concurred in by the National Mobile Home Advisory Council. The confusion with respect to this issue arose because the language "for shutoff in case of emergency" was added to this section. As discussed in Interpretative Bulletin H-3-77, issued on May 19, 1977, this language was intended only to stress the life-safety aspects of the valve and not to change the substantive requirements, as some have interpreted the language. Since the language was not intended to have a substantive effect and has only caused confusion, it is being deleted.

5. Section 280.707 is amended by adding a new paragraph (f) to make it clear that external switches, remote controls, and emergency disconnect switches are not required for oil fired heating equipment. The preamble discussion relating to oil fired heating equipment as published in the *Federal Register* on December 18, 1975, at 40 FR 58753 indicated that the Department had determined that the requirement for oil safety controls as originally published in § 280.707 (f) of the September 2, 1975, final rule was redundant. The Department stated the following reasons for its determination:

(a) Adequate safety controls are presently provided in oil fired furnaces.
(b) Equipment redesign has eliminated previous melting point problems.

(c) There may be adverse effects to furnace operation and durability associated with indiscriminate power interruption to the circulatory air blower, and
(d) The primary goal in the event of any fire is to remove all occupants from the mobile home, rather than encourage the occupant to remain in a burning unit, while attempting to cut off oil flow in case of a furnace fire.

However, certain reference standards in the table provided in § 280.703 contained a requirement for these devices. Therefore, this paragraph (f) is being added to make it clear that the requirement for external switches, remote controls, and emergency disconnect switches for oil fired heating equipment has been deleted.

While the referenced standards cited remain in the table provided in section 280.703, section 280.4 states: "Whenever reference standards are inconsistent, the requirements of this standard prevail to the extent of the inconsistency." This amendment merely codifies the practice that has been followed since publication of the preamble language discussed above.

6. Finally, § 280.708 is being amended so that the clothes dryer moisture-lint exhaust duct is no longer required to be listed as a component of the appliance since the Department has determined that such devices are not ordinarily certified as components of the appliance. However, the moisture-lint exhaust duct and termination fittings are to be installed in accordance with the appliance manufacturer's printed instructions. Under the amendment, mobile home manufacturers are required to provide printed installation instructions whenever provision for a future clothes dryer has been made. This assures that consumers and others have proper instructions on how to complete the installation of the exhaust duct system. This amendment also requires that the manufacturer install an electrical receptacle where wiring has been provided for the installation of a future electrical clothes dryer. This change is being made since confusion has arisen over what constitutes an acceptable electrical connection for future installation of an electric clothes dryer. The confusion resulted in potentially unsafe situations for consumers and others when installing electric clothes dryers. This amendment reflects present practice and the Department's interpretation of the previous language.

For the reasons stated with respect to each amendment, the Secretary has determined that it would be unnecessary and contrary to the public interest to publish these amendments for public comment. Good cause exists for making these amendments effective on publication.

A Finding of Inapplicability of Section 102(2)(c) of the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. It is available for public inspection in the office of the Rules Docket Clerk, Room 5218, U.S. Department of Housing and Urban Development, 451 Seventh Street, SW., Washington, D.C. 20410, during normal business hours.

NOTE.—It is hereby certified that the economic and inflationary impacts of the proposed rule have been carefully evaluated in accordance with OMB Circular A-107.

These amendments are being signed by two Assistant Secretaries because the standards were originally codified in the Federal Regulations Chapter assigned to the Assistant Secretary for Housing Production and Mortgage Credit, but the substantive authority for the program has been transferred to the Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection.

Accordingly, 24 CFR Part 280 is amended as follows:

1. By adding the following sentence to the end of § 280.208(d):

§ 280.208 Mobile Home Fire Detection Equipment.

(d) . . . The smoke detector shall not be placed on any branch circuit protected by a ground fault circuit interrupter. (See section 280.208(b)).

2. By revising § 280.603(b)(4)(iii) to read as follows:

§ 280.603 General requirements.

(b) . . .
(4) . . .

(i) A receptacle outlet for the use of a heat tape located on the underside of the mobile home within 2 feet of the water supply inlet. The receptacle outlet provided shall not be placed on a branch circuit which is protected by a ground fault circuit interrupter.

3. By revising the last sentence of § 280.612(a) to read as follows:

§ 280.612 Test and inspection.

(a) . . . The test shall be made by subjecting the system to air or water at 100 psi for 15 minutes without loss of pressure.

4. By revising the first sentence of § 280.705(1)(3) to read as follows:

§ 280.705 Gas piping systems.

(1) . . .

(3) Valves. A shutoff valve shall be installed in the fuel piping at each appli-

ance inside the mobile home structure, upstream of the union or connector in addition to any valve on the appliance and so arranged to be accessible to permit servicing of the appliance and removal of its components. * * *

5. By adding paragraph (f) to § 280.707 as follows:

§ 280.707 Heat producing appliances.

(f) Oil fired heating equipment. All oil fired heating equipment shall conform to UL 307(A)-1969 or ANSI 147.1-1969 and be installed in accordance with NFPA 31-1974. Regardless of the requirements of the above referenced standards, or any other reference standards, the following are not required: (1) External switches or remote controls which shut off the burner or the flow of oil to the burner, or (2) An emergency disconnect switch to interrupt electric power to the equipment under conditions of excessive temperature.

6. Section 280.708 is revised to read as follows:

§ 280.708 Exhaust duct system and provisions for the future installation of a clothes dryer.

(a) General. (1) All gas and electric clothes dryers shall be exhausted to the outside by a moisture-lint exhaust duct and termination fitting. When the clothes dryer is supplied by the manufacturer, the exhaust duct and termination fittings shall be completely installed by the manufacturer. However, if the exhaust duct system is subject to damage during transportation, it need not be completely installed at the factory when: (i) The exhaust duct system is connected to the clothes dryer, and (ii) a moisture lint exhaust duct system is roughed in and installation instructions are provided in accordance with section 280.708 (b)(3) or (c).

(2) A clothes dryer moisture-lint exhaust duct shall not be connected to any other duct, vent or chimney.

(3) The exhaust duct shall not terminate beneath the mobile home.

(4) Moisture-lint exhaust ducts shall not be connected with sheet metal screws

or other fastening devices which extend into the interior of the duct.

(5) Moisture-lint exhaust duct and termination fittings shall be installed in accordance with the appliance manufacturer's printed instructions.

(b) Provisions for future installation of a gas clothes dryer. A mobile home may be provided with "stubbed-in" equipment at the factory to supply a gas clothes dryer for future installation by the owner provided it complies with the following provisions: (1) The "stubbed-in" gas outlet shall be provided with a shutoff valve, the outlet of which is closed by threaded pipe plug or cap; (2) the "stubbed-in" gas outlet shall be permanently labeled to identify it for use only as the supply connection for a gas clothes dryer; (3) a moisture-lint exhaust duct system shall be roughed in by the manufacturer. The manufacturer shall provide written instructions to the owner on how to complete the exhaust duct installation in accordance with provisions of § 280.708(a)(1) through (5).

(c) Provisions for future installation of an electric clothes dryer. When wiring is installed to supply an electric clothes dryer for future installation by the owner, the manufacturer shall: (1) Provide a roughed in moisture-lint exhaust duct system; (2) install a receptacle for future connection of the dryer; (3) provide written instructions on how to complete the exhaust duct installation in accordance with the provisions of § 280.708(a)(1) through (5).

(Secs. 604 and 625 of the National Mobile Home Construction and Safety Standards Act of 1974, (42 U.S.C. 5403 and 5424 and § 7(d), Department of HUD Act, 42 U.S.C. 3535(d)).

Issued at Washington, D.C., September 28, 1977.

GENO C. BARONI,
Assistant Secretary for Neighborhoods, Voluntary Associations and Consumer Protection.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing, Federal Housing Commissioner.

DEPARTMENT OF HOUSING AND
URBAN DEVELOPMENTOffice of the Assistant Secretary for Neigh-
borhoods, Voluntary Associations, and
Consumer Protection

[Docket No. N-77-677]

MOBILE HOME CONSTRUCTION AND
SAFETY STANDARDSInterpretative Bulletins D-1-77 and
F-2-77AGENCY: Department of Housing and
Urban Development.

ACTION: Final interpretative bulletins.

SUMMARY: These are two final interpretative bulletins related to the Federal Mobile Home Construction and Safety Standards. Interpretative Bulletin D-1-77 clarifies how lumber moisture content is to be measured and evaluated.

The issuance of this bulletin has been prompted by the use of improper practices and evaluations made in determining if the moisture content in lumber met the requirements of the standard. Interpretative Bulletin F-2-77 provides guidance to the industry and consumers regarding the language used on the heat loss certificate.

The issuance of F-2-77 has been prompted by confusion in the industry over the substantive impact of the language on the heat loss certificate. A comprehensive index of all currently effective interpretative bulletins is also included with this notice.

EFFECTIVE DATE: December 5, 1977.
FOR FURTHER INFORMATION CONTACT:

Richard A. Mendlen, Standards Branch, Mobile Home Standards Division, Office of Neighborhoods, Voluntary Associations and Consumer Protection, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, Room 4228, telephone 202-472-4771.

SUPPLEMENTARY INFORMATION: The Department initially published these interpretative bulletins in proposed form in the FEDERAL REGISTER at 42 FR 5985 on January 31, 1977. The public comment period closed on February 28, 1977, but all comments received since that date have been considered.

INTERPRETATIVE BULLETIN D-1-77—LUMBER
MOISTURE CONTENT MEASUREMENT
AND EVALUATION

Interpretative Bulletin D-9-77 as published on January 31, 1977, has been redesignated D-1-77 to be compatible with the Department's indexing procedure. This bulletin is being issued to establish the proper methods and measurement practices to be used in assuring that dimensional and board lumber used in mobile homes not exceed 19 percent moisture content at the time of installation, as required by 24 CFR 280.304(a). The final bulletin establishes that the

NOTICES

tests to be used in evaluating the moisture content are those set out in American Society for Testing and Materials (ASTM) Standard D-2016. As a result of comments received on the proposed bulletin, the final version also states where on the lumber specimens the measurements must be taken, and it allows the moisture content reading for a piece of lumber to be corrected for temperature and species if either are different from those used to calibrate the meter being used to make the measurements.

The bulletin describes how electrode resistance type moisture meters must be used if that is the method chosen to evaluate moisture content. The final bulletin requires that a meter with insulated needles be used, since it provides a more accurate reading than a meter utilizing uninsulated needles. The bulletin also includes the originally proposed limitations on use of the meters on wet lumber and the statement that lumber in a temporarily wet condition shall be allowed time to dry before measuring moisture content.

The final bulletin remains essentially unchanged with regard to the acceptance of lumber which is identified by a nationally recognized grading agency as having a moisture content not greater than 19 percent. However, the bulletin now provides that if a lot or components of a lot of identified lumber is suspected of containing excessive moisture, it may be necessary to re-verify the moisture content as not being in excess of 19 percent by testing a random sampling of lot specimens.

The bulletin states that the moisture content of lumber that has not been identified by a nationally recognized grading agency be verified by sampling procedures described in ASTM D-2016.

In response to a public comment, the bulletin clarifies that these procedures are also applicable to lumber used in preassembled components (i.e., trusses, etc.). Also in response to public comment, this bulletin makes it clear that regardless of what method is used to establish acceptable moisture content, all lumber is subject to verification as to moisture content at the time of installation in the factory.

Finally the bulletin requires that all lumber be surface dry at the time of installation, as did the proposed bulletin.

Comments were also received, with respect to two other issues related to lumber moisture content. One commenter suggested that there be measurement requirements for lumber greater than 2" nominal thickness. The Department did not follow this suggestion because such lumber is not commonly used in mobile homes.

Another commenter suggested that there be a requirement that all lumber surfaces be tested for dryness and moisture content. The Department believes that the sampling methods provided for by the bulletin provide adequate protection and, therefore, did not adopt this suggestion.

INTERPRETATIVE BULLETIN F-2-77—HEAT
LOSS CERTIFICATE

Interpretative Bulletin F-2-77 makes it clear that the heat loss certificate required by 24 CFR 280.510(b) does not govern what type of heating equipment must be installed in the mobile home. The temperature shown on the heating certificate relating to maximum furnace operating economy and optimum energy conservation is provided only to advise consumers in selecting mobile homes that are energy efficient for the areas where they are to be located.

The proposed version of this bulletin was discussed by the National Mobile Home Advisory Council, which recommended that the Department take no action which would encourage unnecessary energy consumption in mobile homes. This interpretation and the requirements of § 280.510(b) are consistent with the recommendation because they assist the consumer in purchasing an energy efficient home.

There is currently no restriction on furnace sizing as it relates to energy conservation. The Department believes that such a restriction would be inappropriate because variations in equipment certification, temperature, wind velocity, and atmospheric pressure conditions may require larger furnaces in a particular location despite the fact that the larger furnace would not be necessary for most of the general geographical area as set out in the standards. The final bulletin includes the reference to variations in equipment certification, which was not in the proposed version.

COMPREHENSIVE INDEX—INTERPRETATIONS
OF THE MOBILE HOME STANDARDS

Included in this notice is a comprehensive index of all currently effective interpretative bulletins issued under 24 CFR Part 280. This index includes bulletins issued through publication in the FEDERAL REGISTER as well as those issued through distribution without publication in the FEDERAL REGISTER. The index deletes reference to Interpretative Bulletin G-1-76 since an amendment to section 280.603(b)(4)(iii) being published concurrently with this index renders that bulletin obsolete and unnecessary. Reference to Interpretative Bulletin H-3-77 is being deleted for the same reason.

A Finding of Inapplicability of Section 102(c) of the National Environmental Policy Act of 1969 has been made in accordance with HUD Handbook 1390.1. It is available for public inspection in the Office of the Rules Docket Clerk, Room 5218, U.S. Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C. 20410, during normal business hours.

NOTE.—It is hereby certified that the economic and inflationary impacts of the interpretative bulletins have been carefully evaluated in accordance with OMB Circular A-107.

Accordingly, 24 CFR 280.304(a) and 280.510(b) are interpreted as follows:

NOTICES

Interpretative bulletin	Subject	Section(s)
A-1-77	Identification of Manufacturer and State of Manufacturer in the Mobile Home Serial Number.	280.6.
A-2-77	Reliability of Information on Data Plate.	280.5(a).
B-1-76	Swinging Exterior Passage Door Dimensions.	280.105.
B-2-76	Interior Door Construction.	280.108, 280.301.
B-3-76	Interior Door in a Hallway.	280.113.
C-1-76	List of Material Applications not Requiring Flame Spread Certification.	280.203(a).

INTERPRETATIVE BULLETIN D-1-77

LUMBER MOISTURE CONTENT MEASUREMENT
AND EVALUATION SECTION 280.304

"Moisture content for dimensional and board lumber shall be evaluated by test methods described in ASTM D-2016. The moisture content shall be measured near the middle of the wide face of the lumber at least 20 inches from the end of the specimen being evaluated. The moisture content reading may be corrected for temperature and species if the specimen being evaluated is different from that used to calibrate the meter.

If an electrode resistance type moisture meter is used to evaluate moisture content, a meter with insulated needles shall be used. The needles shall be driven to a depth of 1/4"-3/8" for board lumber of 1" nominal thickness and 3/8" for dimensional lumber

of 2" nominal thickness. Electrical resistance meters shall not be used on material that has recently been exposed to rain, dew, or high humidity and is in a temporarily wet condition. Lumber in a temporarily wet condition shall be allowed adequate time to dry prior to checking the moisture content.

Dimensional and board lumber which is identified by a nationally recognized grading agency as having a moisture content not to exceed 19 percent may be accepted as in compliance with the requirements of this section. However, if a lot or components of a lot of identified lumber is suspected of having excessive moisture, the moisture content may be re-verified as not being in excess of 19 percent by evaluating a random sampling of lot specimens.

The moisture content of each lot of non-identified dimensional and board lumber shall be verified by sampling procedures de-

scribed in ASTM D-2016 (20 specimens or 10 percent of the lot, whichever is greater).

Regardless of the method used to establish that the moisture content of lumber does not exceed 19 percent, all lumber surfaces shall be dry and all lumber subject to verification as to moisture content at the time of installation in the factory.

The sampling and measurement criteria set out in this bulletin are also applicable to pre-assembled components containing dimensional and board lumber.

INTERPRETATIVE BULLETIN F-2-77

HEAT LOSS CERTIFICATE—SECTION 280.510(b)

The temperature shown on the heating certificate relating to maximum furnace operating economy and optimum energy conservation is provided as an advisory recommendation to consumers in selecting an energy efficient mobile home that is suitable for the climatic requirements of the area in which the home is to be installed. However, this recommendation on operating economy and energy conservation is not intended to prohibit manufacturers from installing heating equipment having a larger capacity than required to maintain an indoor temperature of 70° F in the climatic zone specified on the heating certificate. Such a prohibition would be inappropriate because variations in equipment certification, temperature, wind velocity, and atmospheric pressure conditions may require larger heating equipment to maintain an average of 70° F temperature inside of the home.

However, regardless of the size of furnace installed, the outdoor winter design temperature (97½ percent) specified on the heating certificate shall be determined in accordance with the method described in footnote 1 of § 280.510(b).

(Secs. 604, 625, National Mobile Home Construction and Safety Standards Act of 1974 (42 U.S.C. 5403, 5424); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).)

Issued at Washington, D.C., September 28, 1977.

GENO C. BARONI,
Assistant Secretary for Neigh-
borhoods, Voluntary Associa-
tions, and Consumer Protec-
tion.

INTERSTATE COMMERCE COMMISSION

[AB 156 (SDM)]

DELAWARE & HUDSON RAILWAY CO.

System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.22, that the Delaware & Hudson Railway Company, has filed with the Commission its color-coded system diagram map in docket No. AB 156 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system map and the Commission on September 19, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.

Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 156 (SDM).

H. G. HOMME, Jr.,
Acting Secretary.

SYSTEM DIAGRAM MAP

DELAWARE AND HUDSON RAILWAY COMPANY DISCUSSION OF LINES WHICH MAY BE SUBJECT TO DISCONTINUANCE APPLICATION WITHIN THREE YEARS
D&H has operating rights over the lines of Consolidated Rail Corporation between Newark (Oak Island), New Jersey, and Freemansburg (near Allentown-Bethlehem), Pennsylvania.

More particularly, D&H's operating rights in the state of New Jersey utilize (1) the line formerly operated by The Central Railroad Company of New Jersey ("CNJ") as its Newark-Elizabethport Branch between Newark (Oak Island) (Milepost 1.7) and Elizabethport (Milepost 5.5), and the former main line of CNJ between Elizabethport (Milepost 8.9) and Phillipsburg (Milepost 72.1); and (2) the former main line of Lehigh Valley Railroad Company ("LV") between Newark (Oak Island) (Milepost 6.5) and the New Jersey-Pennsylvania state line (Milepost 76.6). The lines are located in the New Jersey Counties of Essex, Union, Middlesex, Somerset, Hunterdon and Warren.

In the Commonwealth of Pennsylvania, D&H's said operating rights utilize the former main line of LV between the New Jersey-Pennsylvania state line (Milepost 76.6) and Freemansburg (Milepost 85.8). The line is located in Northampton County, Pennsylvania.

The only agency or terminal section on the line is at Newark (Oak Island), New Jersey (Milepost 1.7).

[AB No. 140]

HOBOKEN SHORE RAILROAD

DESCRIPTION OF LINE

Hoboken Shore Railroad supplies the following information regarding its System Diagram Map pursuant to 49 CFR Section 1121.21. The line set forth falls within category 1 of 49 CFR Section 1121.21(b) in that the carrier anticipates said line will be the subject of an abandonment application within a three-year period of the filing of this map: (a) Said line is designated as the entire line of the Hoboken Shore Railroad. (b) Said line is located entirely in New Jersey. (c) Said line is located entirely in Hudson County. (d) Said line commences at a point on the waterfront approximately two hundred (200) feet north of First Street in the City of Hoboken, New Jersey on property of the Port of New York Authority and continues until its connection with the Erie Railroad Company at a point just north of Seventeenth Street in the Township of Weehawken, New Jersey. (e) The stations on the line are located at Fifth Street, Eleventh Street and Fifteenth Street in Hoboken, New Jersey and are all less than one mile apart.

THOMAS E. DURKIN, JR.,
Attorney for Hoboken Shore Railroad.

SYSTEM MAP ~ THE LONG ISLAND RAIL ROAD

NOTE 1- ENTIRE LIRR SYSTEM LOCATED WITHIN NEW YORK STATE. WITH EXCEPTION OF PENN STATION. THE LIRR SYSTEM IS LOCATED ON LONG ISLAND.

NOTE 2- LIRR OPERATES WITHIN NEW YORK CITY AND NASSAU SUFFOLK STANDARD METROPOLITAN AREAS

DESCRIPTION OF LONG ISLAND RAIL ROAD SYSTEM

Following is a description of the Long Island Rail Road system as required by Ex Parte No. 274 (Sub-No. 2), Sections 1121.20 and 1121.21.

The LIRR does not have any lines which fall under categories 1, 2, 3 or 4. The following information relates to category 5 only.

Category 5—All other lines or portions of lines which the carrier owns and operates directly or indirectly.

NEW BILLING PROCEDURES FOR AGENCIES

As part of the new billing procedures announced in the FEDERAL REGISTER of August 24, 1977, and to insure that each agency is correctly billed for only its own documents, the Office of the Federal Register requests agencies to insert the proper billing code on all of their documents. The six-digit billing code should be typed or handwritten in ink at the top of the first page on all three copies of documents submitted to the Office of the Federal Register for publication, as follows:

BILLING CODE: 0000-00

The following are the billing codes assigned by the Government Printing Office follows:

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-3240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for \$5.00 per month or \$50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

INFORMATION AND ASSISTANCE

contents

AGRICULTURAL MARKETING SERVICE

Proposed Rules
Raisins produced from grapes grown in Calif. 54423

AGRICULTURE DEPARTMENT

See also Agricultural Marketing Service; Farmers Home Administration; Food Safety and Quality Service.

Rules
Exports under Agricultural Trade Development and Assistance Act; financing 54397

AIR FORCE DEPARTMENT

Notices
Environmental statements; availability, etc.:
Space Shuttle Program, Vandenberg AFB; extension of time 54443

CIVIL AERONAUTICS BOARD

Proposed Rules
Policy statements:
Domestic passenger-fare level and structure policies; petition denied 54431

Notices
Hearings, etc.:
International Air Transport Association (4 documents) 54454
Kodiak-Western Alaska Airlines, Inc. 54455
Pan American route investigation, Washington/Baltimore/Chicago service 54455

CIVIL RIGHTS COMMISSION

Notices
Meetings, State advisory committees:
Maine 54456
Wyoming 54456

COAST GUARD

Notices
Equipment, construction, and materials; approvals and terminations (2 documents) 54481, 54483

COMMERCE DEPARTMENT

Rules
Inventions, Government-owned; licensing 54415

CUSTOMS SERVICE

Rules
Organization and functions; field organization; ports of entry, etc.:
Cleveland, Ohio; correction 54415

Notices
Countervailing duty petitions and preliminary investigations:
Bromine and brominated compounds from Israel 54488

DEFENSE DEPARTMENT

See also Air Force Department.

Notices

Military Compensation, President's Commission; hearing 54443

ENVIRONMENTAL PROTECTION AGENCY

Rules
Air quality implementation plans; various States, etc.:
Pennsylvania 54416
Water pollution; effluent guidelines for certain point source categories:
Meat products and rendering industry; processing plants 54417

FARMERS HOME ADMINISTRATION

Rules
Loan and grant programs (group):
Community facility loans 54401
Rural housing loans and grants:
Policies, procedures and authorizations; eligibility of separated individuals; income determinations 54401

FEDERAL AVIATION ADMINISTRATION

Rules
Aircraft products and parts, certification:
Components and subassemblies from Japan; import approval 54408
Airworthiness directives:
Societe Nationale Industrielle Aerospatiale 54408
Control zones (2 documents) 54413
Control zones and transition areas (2 documents) 54409, 54410
Standard instrument approach procedures 54414
Transition areas (5 documents) 54409, 54410, 54412
VOR Federal airways 54411

Proposed Rules

Air carriers certification and operation, air traffic operating rules, etc.:
Aircraft cabin ozone contamination; inquiry 54427
Airworthiness directives:
DeHavilland 54428
McDonnell Douglas 54429
Control zones; effective hours alteration 54430
Jet routes and VOR Federal airways 54430

Notices

Automated low-cost weather observation system; meeting 54487
Meetings:
Aeronautics Radio Technical Commission (2 documents) 54487
Air Traffic Procedures Advisory Committee 54486

FEDERAL COMMUNICATIONS COMMISSION

Rules
Aviation services:
Aeronautical enroute stations; identification by control point location 54421

FM broadcast stations; table of assignments:
California 54420

Television broadcast stations; table of assignments:
California 54420

Proposed Rules

FM broadcast stations; table of assignments:
Alabama 54435
Arkansas; correction 54435
Maritime services, land and shipboard stations:
Radiocommunications transmission; prohibitions for vessels on land 54436
Radio broadcast services:
Public notice of intent to sell broadcast station; inquiry; extension of time 54435

Notices

Rulemaking proceedings filed, granted, denied, etc.; petitions by various companies 54444

FEDERAL DEPOSIT INSURANCE CORPORATION

Rules
Applications, requests, and submittals:
Authority delegation to General Counsel; levy civil penalties for late filing of reports 54407

FEDERAL ENERGY ADMINISTRATION

Rules
Petroleum allocation regulations, mandatory:
Synthetic natural gas feedstock allocation 54403

Proposed Rules

Petroleum allocation and price rules and regulations:
Motor gasoline, exemption; deferral of action 54423
Petroleum allocation regulations, mandatory:
Entitlements program; naphtha feedstocks; imports to Puerto Rico 54424

Notices

Middle distillates prices, monitoring, and No. 2 heating oil price level index for residential sales; hearing 54444
Privacy Act; systems of records 54450

FEDERAL INSURANCE ADMINISTRATION

Proposed Rules
Crime insurance program, Federal:
Property and life insurance agents, brokers and certain non-profit corporations and organizations; finders fee pay offer 54432

FEDERAL MARITIME COMMISSION

Notices
Freight forwarder licenses:
American Oceanair Express, Inc. 54443
Agreements filed, etc.:
Philadelphia Port Corp. et al. 54443

CONTENTS

FEDERAL POWER COMMISSION

Notices
Hearings, etc.:
Alabama Power Co. 54447
Bally, Walter E. 54466
Black Hills Power & Light Co. 54457
Brown, Maurice L., Co. (4 documents) 54459, 54460
Cities Service Gas Co. 54457
Connecticut Light & Power Co. 54457
Grand River Dam Authority 54457
Iowa Electric Light & Power Co. 54458
Kansas City Power & Light Co. 54458
Louisville Gas & Electric Co. (2 documents) 54459
Mid Louisiana Gas Co. 54460
Minnesota Power & Light Co. 54460
Mississippi Power & Light Co. 54460
Montana-Dakota Utilities Co. 54461
Montaup Electric Co. 54461

Northern States Power Co. (8 documents) 54462, 54463
Northwest Pipeline Corp. 54464
Pennsylvania Electric Co. 54464
Pioneer Gas Products Co. 54464
Rosett, Jesse Franklin 54458
South Georgia Natural Gas Co. 54465
South States Oil & Gas Co. 54465
Southern Indiana Gas & Electric Co. 54465
Texas Gas Transmission Corp. 54466
Union Electric Co. 54466
Woods, Herbert S., & Associates 54458

FEDERAL RESERVE SYSTEM

Notices
Applications, etc.:
Landmark Bancshares Corp. 54466
Sierra Petroleum Co., Inc., et al. 54467
Sun Bank of Ocala 54468
Tennessee Homestead Co. 54468
Twin Lakes Financial Corp. 54468

FISCAL SERVICE

Notices
Surety companies acceptable on Federal bonds:
Insurance Co. of the West; correction 54488

FISH AND WILDLIFE SERVICE

Rules
Hunting:
Agassiz National Wildlife Refuge, Minn. (2 documents) 54422

Notices

Pipeline applications:
Kenai National Moose Range, Alaska 54471

FOOD SAFETY AND QUALITY SERVICE

Proposed Rules
Meat and poultry products, inspection:
Tissue from ground bone, standards and labeling 54437

FOREIGN ASSETS CONTROL OFFICE

Notices
Rhodesian sanctions; imports of ferrochromium and chromium-bearing steel products from listed countries:
Denmark, Ireland and Italy 54488

HEALTH, EDUCATION, AND WELFARE DEPARTMENT

See Health Care Financing Administration; National Institute of Education.

HEALTH CARE FINANCING ADMINISTRATION

Rules
Medical assistance programs:
Medicaid, State payments for reserved beds; correction 54420

HOUSING AND URBAN DEVELOPMENT DEPARTMENT

See Federal Insurance Administration.

IMMIGRATION AND NATURALIZATION SERVICE

Proposed Rules
Immigration regulations:
Alien deportability; voluntary departure prior to commencement of hearing; correction 54423

INTERIOR DEPARTMENT

See also Fish and Wildlife Service; Land Management Bureau; Reclamation Bureau.

Proposed Rules

Hearings and appeals procedures:
Indian estates probate 54434

INTERNATIONAL TRADE COMMISSION

Notices
Import investigations:
Pipe and tube fittings, cast-iron; report to President 54471

INTERSTATE COMMERCE COMMISSION

Proposed Rules
Motor carriers:
Plant sites, new; special application procedures 54437

Notices

Fourth section applications for relief 54493
Hearing assignments (2 documents) 54492, 54493
Petitions, applications, finance matters (including temporary authorities), railroad abandonments, alternate route deviations, and intrastate applications 54493

JUSTICE DEPARTMENT

See also Immigration and Naturalization Service.

Notices

Pollution control; consent judgments; U.S. versus listed companies, etc.:
National Blank Book Co. 54472

LAND MANAGEMENT BUREAU

Notices
Applications, etc.:
New Mexico (6 documents) 54469, 54470
Wyoming 54471
Outer Continental Shelf:
Official protraction diagrams; availability, etc. 54470

Withdrawal and reservation of lands, proposed, etc.:
California 54469

MANAGEMENT AND BUDGET OFFICE

Notices
Hospital and medical care and treatment furnished by U.S., cost; rates regarding recovery from tortiously liable third persons 54480

MANPOWER POLICY, NATIONAL COMMISSION

Notices
Meetings 54473

MATERIALS TRANSPORTATION BUREAU

Notices
Applications; exemptions, renewals, etc.:
Associated Universities 54487

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510. The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

SUBTITLE A—OFFICE OF THE SECRETARY OF AGRICULTURE

PART 17—SALES OF AGRICULTURAL COMMODITIES MADE AVAILABLE UNDER TITLE I OF THE AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954, AS AMENDED

Subpart A—Regulations Governing the Financing of Commercial Sales of Agricultural Commodities

INVITATIONS FOR BIDS; PURCHASING AND/OR SHIPPING AGENTS

AGENCY: Office of the General Sales Manager, USDA.

ACTION: Final rule.

SUMMARY: This rule amends the Title I, Pub. L. 480, financing regulations to establish several new requirements applicable to purchases made on the basis of invitations for bids (IFB's) and to awards made on a "lowest landed cost" basis. Purchases of food commodities are required to be made on the basis of IFB's and payments to selling agents in connection with such sales are prohibited.

A procedure is established for the approval of a person to act as purchasing and/or shipping agent for participating countries. Such person is required to submit certain information for consideration upon such person's not acting in certain other capacities in any Title I transaction with the participating country while he is its purchasing and/or shipping agent for Title I transactions. Appeal procedures are provided for a person denied approval as shipping agent and/or purchasing agent and for one whose approval has been terminated as provided in the regulations. Appeal procedures are also provided for a person not approved or conditionally approved as supplier or selling agent.

In addition to implementing the Food and Agricultural Act of 1977, the purpose of the amendment is as follows:

To increase competition and eliminate certain potential conflicts of interest, keep the costs of the Title I, Pub. L. 480, program to the United States Government as low as possible, and insure that all persons, including small businesses, desiring to participate in the procurement, supplying and shipping of commodities financed under Title I, Pub. L. 480, receive fair and equitable treatment.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

George Pope, Office of the General Sales Manager, U.S. Department of Agriculture, Room 4085, South Building, Washington, D.C. 20250, telephone 202-447-5693.

SUPPLEMENTARY INFORMATION:

EFFECTIVE DATE

The provisions of this amendment shall not apply with respect to transactions involving purchase authorizations issued prior to October 6, 1977.

Various provisions of this regulation are required by the Food and Agriculture Act of 1977 (Pub. L. 95-113), effective October 1, 1977. Public notice of rulemaking with respect to other provisions was given in June 1977. Accordingly, it is hereby determined that compliance with any further notice of proposed rulemaking, public procedure, and 30-day effective date requirements of 5 U.S.C. 553 is impracticable and contrary to the public interest.

BACKGROUND

On June 29, 1977, the Office of the General Sales Manager published a proposed rule (42 FR 33038) to amend the regulations governing the financing of the sale and exportation of agricultural commodities made available under Title I of the Agricultural Trade Development and Assistance Act of 1954, as amended (7 U.S.C. 1691, 1701 et seq.), referred to herein as "Title I, Pub. L. 480."

Since the publication of the proposed rule on June 29, 1977, the "Food and Agriculture Act of 1977" (Pub. L. 95-113) has amended Pub. L. 480, effective October 1, 1977.

The major provisions of the legislation which relate to this rule are as follows:

1. Food commodities are required to be purchased on the basis of an IFB publicly advertised in the United States.

2. Bid offerings are required to conform to such IFB and be received and publicly opened in the United States.

3. Commissions, fees, or other payments to any selling agent are (unless waived by the Secretary) prohibited in any purchase of food commodities.

Those areas of the proposal covered by the legislation have been changed to conform therewith.

Situations in which there could be conflicts of interests are varied. Suppliers under Title I, Pub. L. 480, with economic ties and other interests in firms acting for participants as agents in the shipping or purchasing of commodities financed under the program may have an advantage in the contracting procedure stemming from advance knowledge or collaboration, involving the

arrival of the commodity and vessel at the U.S. ports, not enjoyed by other suppliers. Eliminating such possibilities gives all firms, including small businesses, a more equal opportunity to participate. The resultant increased competition should be a significant factor in keeping the Government's costs as low as possible.

Requirements that invitations for bids, publicly opened in the United States, be used in purchasing food commodities financed under Title I, Pub. L. 480, will make it easier for commodity suppliers, particularly small businesses, to participate. Potentially, this should reduce commodity prices by increasing the number of bidders.

Based on comments received and on the recent amendments to Title I, Pub. L. 480, several changes have been made in the text of this proposal, which is now being published as a final rule. These changes are pointed out in "Discussion of Major Comments."

DISCUSSION OF MAJOR COMMENTS

APPROVAL OF SHIPPING AND/OR PURCHASING AGENTS

In many of the comments addressed to the proposed requirements for approval of shipping and/or purchasing agents, the position was taken that the proposed rule was too broad and the result would be that few, if any, of the firms currently acting as shipping and/or purchasing agents would be able to qualify as being free from all disqualifying activities or affiliations. In other comments, questions were raised as to the justification for a rule which would disqualify persons from acting as shipping and/or purchasing agents on the basis of affiliations and activities unrelated to Pub. L. 480 transactions. It was also pointed out that there were no guidelines established for determining that a person who could not meet the specified standards could be approved on the basis that such approval would result in no conflict of interest or reduced competition.

In light of these comments, under the regulation a person would be disqualified from acting as shipping agent and/or purchasing agent for a participant only if he or an affiliate acted as a ships broker, ocean transportation supplier, commodity supplier, or selling agent in any Title I transaction with the participant while he was serving as purchasing and/or shipping agent for Title I transactions for the participant. This narrows the prohibition to those actions clearly providing a potential conflict of interest situation in connection with Title I transactions. The agent's activities and affiliations in non-Title I transactions

are no basis for disqualification. There is no provision for a waiver to permit approval of a person as an agent who does not meet the above requirement.

Additional questions were raised with respect to that part of the approval procedure based on "business reputation and any other factors with respect to the capability of such person to perform." The regulation now deletes the above reference, with approval of shipping and purchasing agents being based solely on standards directed toward eliminating conflicts of interest and increasing competition.

The final rule contains, as did the proposal, a procedure for appeal to the GSM by a person who was not approved as a purchasing and/or shipping agent.

"LOWEST LANDED COST" OPTION

The proposal stated that an importer purchasing under an IFB had the option of awarding on a "lowest landed cost" basis (commodity price plus ocean freight charges) under certain circumstances rather than strictly on the basis of the lowest commodity price offered. A number of comments were received opposing this option.

One comment was that the commodity supplier should know the basis on which awards would be made ("lowest landed cost" or lowest commodity price) before he submitted his offer. This would not appear relevant in a competitive bidding situation, where a supplier would be expected to offer his lowest possible price regardless of which method the importer used to determine awards. This is especially true under Title I, Pub. L. 480 transactions, since commodity and ocean freight offers are independent of each other. The wording of the proposal in this area is, therefore, retained.

Other comments recommended that the current policy governing commodity awards for rice, which requires that rice be purchased based on the lowest f.a.s. or f.o.b. commodity price, be continued. This does not permit an importer to use the "lowest landed cost" option for rice. All comments on this point have been carefully reviewed, and it has been determined that there is no justification for treating rice differently from other food commodities by precluding the lowest landed cost option for rice purchases. However, changes have been made to meet some of the underlying problems in the use of the lowest landed cost option which caused these commenters concern.

Specific comments received opposing the lowest landed cost option included the following:

The lowest landed cost option allows manipulation of results, as the importing country or commodity supplier may own or control vessels whose rates are used in the computation, and a decision on lowest landed cost based on estimated freight rates, not actual freight rates, is not valid.

The use of the lowest landed cost option precludes prompt handling of awards.

The lowest landed cost option leads to excessive retendering by the buyer.

In response to these comments, provisions have been added which preclude the use of lowest landed cost when vessels offered under the flag of the participant or importing country, or vessels controlled by the participant or importing country, are to be used; in such cases, commodity purchases must be made on the basis of the lowest f.a.s. or f.o.b. commodity offers. This will prevent manipulation of freight rates to allow the importer to accept higher commodity offers.

Also, lowest landed cost may not be used unless offers for commodity and freight are received for review by the importer at the same time. This allows the importer to make lowest landed cost awards on a timely basis and insures that actual freight rates are available for use in the computation of the lowest landed cost. From a review of Pub. L. 480 transactions it appears that the availability of the lowest landed cost option does not lead to more retendering by the importer but, in fact, results in fewer tenders, particularly when commodity and freight offers are reviewed together.

The question was raised as to why purchases on a c. and f. or c.i.f. basis ("commodity and freight" or "commodity, insurance and freight") were not permitted instead of allowing purchases on the lowest landed cost basis. The use of c. or c.i.f. sales can favor large commodity suppliers, who may own or control ocean vessels, and place smaller commodity suppliers, not controlling their own vessels, at a disadvantage.

SELLING AGENT'S COMMISSIONS

The proposed rule (§ 17.8(c)(1)(ii)) would have made commissions paid to "a selling agent . . . employed or engaged by the supplier to obtain a contract . . ." for the sale of food commodities ineligible for financing. The basis for this restriction was that there would appear to be no need for the commodity supplier to use the services of a selling agent to "obtain a contract" when purchases were required to be made under an IFB issued and publicly opened in the United States.

In several comments received the argument was made, however, that CCC should continue to finance selling agents' commissions in such cases since selling agents performed many necessary services for the supplier which are in addition to obtaining a contract, such as the handling of documentation problems and contract disputes.

The Food and Agriculture Act of 1977 amended Title I, Pub. L. 480, to prohibit the payment of a commission, fee, or payment to a selling agent in connection with the sale of food commodities financed under Title I, Pub. L. 480, unless waived by the Secretary. The regulation has been changed to conform thereto, with no provision being made for a waiver.

REGULATION OF COMMODITY SUPPLIERS AND SELLING AGENTS

In one comment the position was taken that commodity suppliers and selling agents should be covered by this rule, as there could be a conflict of interest with a commodity supplier who is also an ocean transportation supplier, for example. Currently, commodity contracts and ocean freight contracts may not be contingent upon one another (see § 17.6(a)(2)). Also, selling agents, if used, may not be affiliated with the government of the importing country (§ 17.2(c)(19)). Further regulations in this area will be proposed in accordance with the amendment of section 408 of Pub. L. 480 by the "Food and Agriculture Act of 1977" which requires further regulations to be issued within six months to prevent conflict of interest.

DEFINITION OF TERMS

There was a request in one comment for a definition of "conflict of interest" and in another for a redefinition of "affiliate." These comments were addressed to the broad ineligibility criteria which were applicable to the approval of purchasing and/or shipping agents. We feel this is not necessary in view of the manner in which conflict of interest is now handled in § 17.8(e)(3)(vi).

In another comment a comprehensive definition of the term "responsive to the IFB" to prevent inconsistent interpretation was requested and in a related comment it was requested that it be made clear how late in the bidding procedure an offer could be modified to make it responsive to the IFB. This is unnecessary since these points can be controlled by USDA review of the IFB to insure that it outlines the key elements to be expected of a responsive bid and that it provides there can be no modification of an offer after the closing date in the IFB.

IFB'S MUST BE ISSUED IN U.S.

Comments on this requirement noted that it imposes an added burden and expense on the importing country and might discourage developing countries from purchasing from the United States under Title I, Pub. L. 480. Several comments from importing countries did not indicate major problems with this regulation; one country stated that it would be inconvenient, but not impossible, for them to comply for certain commodities. The "Food and Agriculture Act of 1977" amends Pub. L. 480 to require IFB's issued and publicly opened in the United States, to be used in the purchase of food commodities financed thereunder.

For consistency, this regulation provides that when IFB's are used, whether for food or non-food commodities, they must be issued in the United States. It is felt that the concessional nature of the financing will continue to make purchases under Title I, Pub. L. 480 sufficiently attractive to participating coun-

tries to overcome any potential problems raised by this requirement.

In other comments it was noted that this requirement would not necessarily mean that many smaller firms would become direct exporters under the program. It is recognized that small firms may still prefer to serve as intermediate suppliers for reasons such as lack of expertise in export paperwork procedures; however, the amendment should provide expanded opportunity for participation by some small suppliers who may not have participated in the past when IFB's were held in the importing country.

In one comment it was suggested that OGSM consider having an observer present at IFB openings to monitor procedures. It is planned that a USDA representative attend IFB openings as an observer only.

DISTINCTION BETWEEN USE OF IFB'S FOR PURCHASE OF FOOD AND NON-FOOD COMMODITIES

In several comments disagreement was expressed with the distinction made in the regulation between food commodities, for which IFB's must be issued, and non-food commodities (cotton, tallow, and tobacco) which are not required to be purchased by IFB. This distinction was made because of the significantly different marketing practices used in purchasing non-food commodities from those for food commodities. This distinction was recognized by the Congress in the amendment of Pub. L. 480 made by the Food and Agriculture Act of 1977 which requires IFB's only for purchases of food commodities. The final rule retains this distinction.

DELAY UNTIL LEGISLATION PASSED

In some comments it was suggested that publication of the final rule be delayed until final Congressional action on legislation affecting Title I, Pub. L. 480. This has been done.

MISCELLANEOUS AMENDMENTS

No comments were received opposing the miscellaneous amendments in the proposal which changed references from "EMS" to "OGSM," amended and added definitions, and added a hearing provision applicable to approval of commodity suppliers and selling agents. They are adopted without change.

COMMENTS OUTSIDE SCOPE

Other comments were received which were outside the scope of the proposed rule. These will be filed for consideration when the sections of the regulations to which they apply are reviewed for future amendment.

AUTHORITY TO APPROVE PURCHASING AND/OR SHIPPING AGENTS

The authority to issue regulations which might bar participation of a person to act as a shipping agent for a purchaser obtaining Title I, Pub. L. 480, financing was questioned in one of the comments received. The interest of the United States Government in such

transactions is sufficient to warrant such regulation.

The Commodity Credit Corporation finances over long periods of time (up to 40 years) at low interest rates the purchase price of such commodities. The Commodity Credit Corporation also pays the ocean freight differential between the cost of shipping the commodity on United States-flag vessels and foreign-flag vessels to the extent that U.S.-flag vessels are required by the Cargo Preference Act to be used for such shipments. It is essential that there not be interference with the conduct of the program caused by actions which could result from conflicts of interest.

The Congress has recognized this in the amendment to section 408 of Title I, Pub. L. 480, made by the Food and Agriculture Act of 1977, which requires that regulations for the administration of Title I operations be issued within six months from the effective date of the Act (October 1, 1977), to prohibit conflict of interest between "(A) recipient countries (or other purchasing entities) and their agents, (B) suppliers of commodities, (C) suppliers of ships, and (D) other shipping interests." This regulation covers certain of these areas with respect to which there was proposed rulemaking. Additional regulations, to comply further with this provision, will be prepared for publication.

Accordingly, the amendments to 7 CFR Part 17 Subpart A, Regulations Governing the Financing of Commercial Sales of Agricultural Commodities, are adopted with changes as set forth below.

Dated: October 3, 1977.

KELLY HARRISON,
General Sales Manager, Office
of the General Sales Manager,
Department of Agriculture.

1. The terms "Export Marketing Service" and "EMS" are changed to read "Office of the General Sales Manager" and "OGSM," respectively, wherever they appear in the regulations and Appendices A and B.

2. Section 17.2 is amended by revising paragraphs (a) (1) and (6), renumbering paragraphs (a) (7) through (10) as paragraphs (a) (8) through (11), adding a new paragraph (a) (7), revising paragraphs (a) (8) and (10) as renumbered, revising paragraph (c) (12), and adding paragraphs (c) (22) through (26) as follows:

§ 17.2 Definition of terms.

(a) *Terms relating to the United States, its agencies, and officials.* (1) "AMS" means the Agricultural Marketing Service, U.S. Department of Agriculture.

(6) "FGIS" means the Federal Grain Inspection Service, U.S. Department of Agriculture.

(7) "OGSM" means the Office of the General Sales Manager, U.S. Department of Agriculture.

(8) "USDA" means the U.S. Department of Agriculture and includes all or

any of the offices mentioned in subparagraphs (1) through (7) of this paragraph.

(9) "Secretary" means the Secretary of Agriculture of the United States, or his designee.

(10) "General Sales Manager" and "GSM" mean the General Sales Manager, OGSM, or his designee.

(11) "United States" means the 50 States, the District of Columbia, and Puerto Rico.

(c) *Other terms.* . . .
(12) "Importer" means the legal entity which contracts with the supplier for the importation of the commodity. The importer may be the participant or any legal entity to which a participant has issued a subauthorization.

(22) "Shipping agent" means any person engaged by a participant to arrange ocean transportation.

(23) "Ships broker" means any person engaged by a supplier of ocean transportation to arrange employment of vessels.

(24) "Purchasing agent" means any person engaged by a participant to procure agricultural commodities.

(25) "Person" means an individual or other legal entity.

(26) "Invitation for bids" and "IFB" mean a publicly advertised request for offers.

3. Section 17.6 is amended by revising paragraph (a) (4), adding a new paragraph (a) (7), revising paragraph (b), and by deleting and reserving paragraph (c) as follows:

§ 17.6 Contracts between suppliers and importers.

(a) *Eligibility for financing.* . . .
(4) Commodity contracts between suppliers and importers made subject to the applicable purchase authorization shall be deemed to be conditioned on the approval by USDA of the supplier, the selling agent if any, the contract price, and, whenever purchases are made on the basis of an IFB, responsiveness to IFB terms.

(7) A supplier or selling agent who is not approved, or is approved upon any conditions established under applicable criteria of this section, shall be notified of such determination promptly. The notification shall state the reasons for the action taken or conditions established. Such person shall have the right to appeal such action to a designated USDA official and submit further information, orally or in writing, bearing on such determination.

(b) *Contracting procedures.* (1) *Purchasing—general.* Importers may purchase through negotiation with a supplier or suppliers of the importer's choice except when the regulations (§ 17.6(b)(2)) or the purchase authorization specifies that purchases must be made on the basis of IFB's.

(2) *Purchasing—food commodities.* The importer shall purchase food commodities on the basis of IFB's.

(3) *IFB's—general.* Whenever commodity purchases are made on the basis of IFB's the following conditions shall apply:

(i) The terms of the IFB must be approved by the GSM prior to issuance.

(ii) The IFB shall be issued in the United States and all offers shall be opened in public in the United States at the time and place specified in the IFB.

(iii) The IFB shall permit submission of offers from all suppliers who meet the requirements of this section.

(iv) The IFB shall not preclude offers for shipment from any United States port(s) unless the purchase authorization limits exportation to certain ports.

(v) The IFB shall not establish minimum quantities to be offered or which will be considered.

(vi) The IFB shall be in compliance with the regulations, the purchase authorization, and sound commercial standards.

(4) *Contract awards.* (i) Whenever purchases are made on the basis of an IFB, the importer shall consider only offers which are responsive to the IFB and shall make awards on the basis of the lowest commodity price(s) offered, unless the importer determines and the GSM agrees that acceptance of a higher commodity price would result in the lowest landed cost of the commodity; *Provided*, That awards may not be made on a "lowest landed cost" basis unless IFB's are issued for commodity and ocean freight so that all commodity and ocean freight offers are reviewed simultaneously; *And provided further*, That when vessels offered under the flag of the participant or importing country or vessels controlled by the participant or importing country are to be used, the participant must purchase commodities on the basis of the lowest FAS/FOB offers. (ii) Announcement of awards shall be made in the United States. The importer shall promptly submit to OGSM copies of all offers received with a copy of the IFB which was issued. No sale can be approved for financing until this information has been received by OGSM. The decision of the GSM shall be final regarding the responsiveness of offers to IFB terms in the awarding of contracts.

(c) [Reserved]

4. Section 17.8 is amended by revising paragraphs (c)(1) and (c)(2) and adding a new paragraph (e).

§ 17.8 Fees, discounts, commissions, brand names, purchasing agents, shipping agents.

(c) *Commissions.* (1) (i) For non-food commodities, a commission to a selling agent as defined in § 17.2(c)(19), employed or engaged by the supplier to obtain a contract, is eligible for financing

to the extent that such commission is included in the contract price, except as stated in this paragraph.

(ii) For food commodities, a commission, fee or other payment to a selling agent as defined in § 17.2(c)(19), employed or engaged by the supplier to obtain a contract, is prohibited.

(2) If the supplier of the commodity has employed any person or firm, other than a selling agent, to obtain a contract, the sale is not eligible for financing.

(e) *Purchasing agents; shipping agents.* (1) A participant is not required to use a purchasing agent or shipping agent; however, if a purchasing or shipping agent is to be used, the participant shall submit the nomination(s) to the GSM in writing along with a copy of the proposed agency agreement. No person may act as purchasing or shipping agent, or as both, unless approved by the Assistant Sales Manager, Pub. L. 480 Programs, in accordance with the provisions of this paragraph.

(2) The term "affiliate" shall have the meaning as provided in § 17.2(c)(1) and, in addition, persons will also be deemed to be affiliates if any of the following conditions are met:

(i) Such persons have any common officers or directors.

(ii) There is any investment by ships brokers, ocean transportation suppliers, approved commodity suppliers, or selling agents, or their officers, or directors in the purchasing agents or shipping agents.

(iii) There is any investment by the purchasing agent or shipping agent, or his officers or directors in ships brokers, ocean transportation suppliers, or approved commodity suppliers, or selling agents.

These conditions include those cases in which investment has been concealed by the utilization of any scheme or device to circumvent the purposes of this section but does not include investment in any mutual fund.

(3) A person whose nomination has been submitted to act as a purchasing agent or shipping agent, or both, shall furnish to the Assistant Sales Manager, Pub. L. 480 Programs, the following:

(i) The names of all incorporators of the firm;

(ii) The names and titles of all officers and directors;

(iii) The names and proportionate share interest of all stockholders;

(iv) If the beneficial interest in the firm is held by persons other than the named shareholders, the names of the holders of the beneficial interest and the proportionate share of each;

(v) The amount of the subscribed capital of the firm;

(vi) A written undertaking signed by such person agreeing that if he is approved neither he nor any of his affiliates, as defined in § 17.2(c)(19), will act as a ships broker, ocean transportation supplier, commodity supplier, or selling

agent in any Title I transactions with the participant during the term of the agency agreement.

(vii) A certification that the person has not arranged to give or receive any payment or other benefit in connection with his selection as agent.

(4) Consideration will not be given to approval of a person to act as a shipping or purchasing agent, or both, until the documents required to be submitted by this paragraph are received by the Assistant General Sales Manager, Pub. L. 480 Programs. Approval of a nomination for purchasing agent or shipping agent may be withheld for a period not to exceed 30 days pending completion of any investigation deemed appropriate.

(5) Approval of a purchasing agent or shipping agent to act for a participant shall be coextensive with the term of the agency agreement or such shorter period as the Assistant Sales Manager, Pub. L. 480 Programs, may determine; *Provided*, That such approval will be automatically terminated if the shipping or purchasing agent or any of the affiliates of such agent, acts as ships broker, ocean transportation supplier, commodity supplier or selling agent in connection with any Title I transaction for such participant during the term of the agency agreement.

(6) If a participant uses an unapproved purchasing agent in the procurement of commodities made available under Title I, Pub. L. 480, sales approval may be withheld.

(7) If a participant uses an unapproved shipping agent in the shipping of commodities made available under Title I, Pub. L. 480, vessel approval may be withheld or the amount of the shipping agent's commission in connection with the shipment may be deducted from the ocean freight differential to be paid.

(8) The Assistant Sales Manager, Pub. L. 480 Programs, shall promptly notify persons seeking approval as purchasing or shipping agents of his determination or of the need for further investigation. If such person is not approved, the notification shall state the reasons therefor. The determination of the Assistant Sales Manager shall be effective immediately and shall continue in effect pending the result of any appeal to the General Sales Manager. Nothing herein shall be construed as to prohibit a shipping agent or purchasing agent, whose application has been disapproved or whose approval terminated, from being nominated at a later time.

(9) Any person whose nomination has been disapproved or whose approval has been terminated pursuant to the provisions of this section shall have the opportunity, within 30 days, to present to the General Sales Manager any reasons, orally or in writing, as to why such action should not stand.

(Sec. 101-115, Pub. L. 83-480, as amended (7 U.S.C. 1701 et seq.); E.O. 10900, 26 FR 143, as amended.)

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FmHA Instruction 444.1]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart A—Section 502 Rural Housing Loan Policies, Procedures and Authorizations

INCOME DETERMINATION

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulation to establish new guidelines for the determination of family income for separated couples. The intended effect of this amendment is to make the income determinations which establish the program eligibility of separated individuals consistent with similar determinations made for interest credit eligibility.

EFFECTIVE DATE: This amendment is effective on October 6, 1977. Comments must be received on or before November 7, 1977.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, D.C. 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Wesley Harris (202-447-4295).

SUPPLEMENTARY INFORMATION: The FmHA amends § 1822.3(n)(2) and Exhibit E, paragraph 5, (c)(3)(i) of Subpart A of Part 1822, Chapter XVIII, Title 7, Code of Federal Regulations (39 FR 44993 as amended at 42 FR 1023-1025). Paragraph (n)(2)(v) of this section is added to provide guidelines under exempted income for separated couples; paragraphs 5, (c)(2) and (3) of Exhibit E are amended to allow for an exemption where the spouse has been living apart from the family without having filed for divorce or legal separation for at least six months.

It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts, shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These amendments, however, are not published for proposed rulemaking since they make loan and interest credit eligibility definitions consistent with each other. As a result the program is made available to certain individuals who are currently in need of

Assistance. For this reason delay in making these changes effective would be contrary to the public interest. Accordingly, the following changes are made.

1. Section 1822.3 (n)(2)(v) is added to exempted income.

§ 1822.3 Definitions.

(n) *Annual income.* . . .

(2) . . .

(v) The income of an applicant's spouse not living in the dwelling when:

(A) Legal papers have been filed with the appropriate court to commence divorce or legal separation proceedings, *Provided*:

(1) The applicant is informed and agrees that should the spouse begin to live in the dwelling, that spouse's income will then be counted toward annual income and the applicant may be required to graduate to other credit; and

(2) The spouse, if necessary for FmHA to obtain adequate security (as provided by State Regulations), signs the security instrument.

(B) Papers have not been filed to commence divorce or legal separation proceedings, *Provided*:

(1) The spouse has been living apart from the family for at least six months, and

(2) The conditions of paragraph (n)(2)(v)(A) (1) and (2) of this section are met.

2. Paragraphs 5, (c)(2), (2)(ii), (3) and (3)(i) of Exhibit E as amended, read as follows:

5. *Interest credits for existing loans.*

(c) . . .

(2) A borrower's spouse is living apart from the family and property, and legal papers have been filed with the appropriate court to commence divorce or legal separation proceedings provided:

(i) . . .

(ii) For FmHA recordkeeping purposes, the account is put in the remaining spouse's name only.

(3) A borrower's spouse is living apart from the family and the property, and papers have not been filed to commence divorce proceedings provided:

(1) The spouse has been living apart from the family for at least six months, and

(42 U.S.C. 1480; delegation of authority by the Secretary of Agriculture, 7 CFR 2.23; delegation of authority by the Assistant Secretary for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 23, 1977.

GORDON CAVANAUGH,
Administrator, Farmers
Home Administration.

[3410-07]

SUBCHAPTER J—LOAN AND GRANT PROGRAM (GROUP)

PART 1933—LOAN AND GRANT PROGRAM (GROUP) COMMUNITY FACILITY LOANS

Subpart A—Community Facility Loans

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration amends its regulations pertaining to Office of the General Counsel review of Construction Contracts; the dissolution of other than utility type projects by nonprofit corporations; the qualifications of independent auditors engaged to audit financial operations accounts and reports submitted to the Farmers Home Administration and specifications for flexible plastic pipe for water systems. These changes are intended to make the Community Facilities loans more procedurally efficient.

EFFECTIVE DATE: October 6, 1977. Comments must be received on or before November 7, 1977.

ADDRESSES: Submit written comments to the Office of the Chief, Directives Management Branch, Farmers Home Administration, U.S. Department of Agriculture, Room 6316, Washington, DC 20250. All written comments made pursuant to this notice will be available for public inspection at the address given above.

FOR FURTHER INFORMATION CONTACT:

Judd M. Hudson. Telephone 202-447-7667.

SUPPLEMENTARY INFORMATION: Sections 1933.8(g), 1933.17(a)(4)(v), 1933.17(a)(14)(iv)(C)(1) and 1933.18(a)(3)(ii)(C) of Subpart A, Part 1933, Title 7, Code of Federal Regulations (42 FR 24232-24252) are amended. On May 13, 1977, a document was published in the FEDERAL REGISTER (42 FR 24232-24252) containing final regulations for community facility loans but requesting comments. Based upon comments received upon publication certain procedural changes have been made in the regulations. These changes are now being published in final rulemaking form because they do not impose additional substantive requirements upon the recipients of assistance under this program and because they are the result of the comment process. However, any additional written comments will be considered and, if accepted, incorporated in a further revision of this regulation. As amended, §§ 1933.8(g), 1933.17(a)(4)(v), 1933.17(a)(14)(iv)(C)(1) and 1933.18(a)(3)(ii)(C) read as follows:

§ 1933.8 Actions subsequent to loan closing.

(g) *State Office review of loan closing.* The State Director will review the

County Supervisor's statement concerning loan closing, the security instruments, and other documents used in closing to determine whether the transaction was closed properly. All material submitted by the County Supervisor, including the executed contract documents with the certification of the attorney, along with a statement by the State Director that all administrative requirements have been met, will be referred to the OGC for post closing review. OGC will review the submitted material to determine whether all legal requirements have been met. OGC's review of FmHA's standard forms will be only for proper execution thereof, unless the State Director brings specific questions or deviations to the attention of OGC. It is not expected that facility development including construction will be held up pending receipt of the opinion from OGC. When the opinion from OGC is received, the State Director will advise the County Supervisor of any deficiencies that must be corrected and return all material that was submitted for review.

§ 1933.17 Appendix A—Community facilities.

(a)

(4) Facilities for public use. . . .

(v) Before a loan is made to an applicant other than a public body for other than utility type projects, the articles of incorporation or loan agreement will include a condition similar to the following: "In the event of dissolution of this corporation, or in the event it shall cease to carry out the objectives and purposes herein set forth, all business, property and assets of the corporation shall go and be distributed to one or more nonprofit corporations or public bodies as may be selected by the board of directors of this corporation and approved by at least 75 percent of the users or members to be used for, and devoted to, the purpose of a community facility project or other purpose of serve the public welfare of the community. In no event shall any of the assets or property, in the event of dissolution thereof, go or be distributed to members, directors, stockholders, or others having financial or managerial interest in the corporation either for the reimbursement of any sum subscribed, donated or contributed by such members or for any other purposes, provided that nothing herein shall prohibit the corporation from paying its just debts."

(14) Borrower accounting methods, management reporting and audits. . . .

(iv) Audits and financial statements.

(C) Other borrowers. . . .

(i) Independent public accountant defined. Audits shall be conducted in accordance with generally accepted auditing standards by independent certified

public accountants or by independent licensed public accountants, licensed on or before December 31, 1970, who are certified or licensed by a regulatory authority of a State or other political subdivision of the United States.

§ 1933.18 Appendix B—Community Facilities—Planning Bidding, Contracting Constructing.

(a)

(3) Design policies. . . .

(ii) Water systems. . . .

(C) Pipe. All pipe used should meet current product standards in American Society Testing Materials, further, if plastic pipe is used, its operating pressure shall not exceed $\frac{2}{3}$ of its rated working pressure, and its wall thickness shall not be less than .090. If flexible plastic pipe is used its operating pressure shall not exceed $\frac{2}{3}$ of its rated working pressure, and its wall thickness shall not be less than ".060".

(7 U.S.C. 1989; delegation of authority by the Secretary of Agriculture; 7 CFR 2.23; delegation of authority by the Assistant Secretary of Agriculture for Rural Development; 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an economic impact statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 21, 1977.

JAMES E. THORNTON,
Associate Administrator,
Farmers Home Administration.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 10—CRITERIA AND PROCEDURES FOR DETERMINING ELIGIBILITY FOR ACCESS TO RESTRICTED DATA OR NATIONAL SECURITY INFORMATION

Clarifying and Corrective Amendments

AGENCY: Nuclear Regulatory Commission.

ACTION: Clarifying and corrective amendments.

SUMMARY: The Commission's "Criteria and Procedures for Determining Eligibility for Access to Restricted Data or National Security Information" is hereby amended. The amendments substitute certain office and officer designations so as to reflect the Commission's present staff functions and organization, or to make the designations consistent throughout. The amendments also correct language inaccuracies regarding various statutory provisions of the Atomic Energy Act of 1954, as amended, and delete certain words which are superfluous.

EFFECTIVE DATE: The amendments are effective October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Royal J. Voegeli, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301-492-7437.

SUPPLEMENTARY INFORMATION:

The amendments relate to substituting office and officer designations in 10 CFR Part 10 so as to reflect the present NRC staff functions and organization, or to make the designations consistent throughout Part 10. Thus, the "[AEC] Office of the General Counsel" in § 10.22 will be changed to "Office of the Executive Legal Director", and the definition of "Hearing Counsel" in § 10.5(c) will be changed to mean an NRC attorney assigned "by the Office of the Executive Legal Director." The designation of "Executive Director of Operations" in § 10.22(f) will be changed to "Director, Office of Administration" so that the designation will be consistent with §§ 10.5(b) and 10.26(a). In various other paragraphs the word "Director" has been inserted preceding "Office of Administration", and in others the "Director, Division of Security" has been substituted for "Office of Administration" so that the designations will reflect the actual functioning of the Director of the Division of Security and the delegation of authority currently in effect. Several other changes relate to the routing of documents and staff procedures, and are set forth in the amendments to §§ 10.21, 10.22, 10.22(h), 10.24(a), 10.26(h), 10.27(j) and 10.27(q).

The amendments will also correct language inaccuracies in § 10.3 regarding the statutory provisions of Sections 141, 145(f), 161(a), 161(c) and 161(n) of the Atomic Energy Act of 1954, as amended. The present amendments will also delete certain words which are superfluous, i.e., the word "concerned" in §§ 10.27(j) and 10.30(a), and the words "from whom he received his notification letter" in § 10.29(a).

Because these amendments relate solely to minor matters, it has been found that good cause exists for omitting notice of proposed rule making, and public procedure thereon, as unnecessary, and for making the amendments effective upon publication in the FEDERAL REGISTER.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 552 and 553 of title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 10 are published as a document subject to codification.

§ 10.3 [Amended]

1. Section 10.3 is amended by substituting the word "declassification" for the word "disclosure" in Section 141; by deleting the comma following the word "investigation" in Section 145(f); by deleting the word "the" where it precedes the word "legislation" in Section 161(a); by deleting the sentence "No person shall

be excused from complying with any requirements under this paragraph because of his privilege against self-incrimination, but the immunity provisions of the Compulsory Testimony Act of February 11, 1953, shall apply with respect to any individual who specifically claims such privilege." in Sec. 161(c); by substituting "57b." for "57a(3)" in Sec. 161(n); deleting "102 (with respect to the finding of a practical value)" in Sec. 161(n); and by substituting "145f." for "145e" in Sec. 161(n).

§§ 10.5, 10.22, 10.24, 10.26, 10.28-10.34 [Amended]

2. Paragraphs 10.5(b), 10.22(c), 10.22(d), 10.24(b), 10.26(a), 10.26(b), 10.26(f), 10.26(g), 10.28(d), 10.29(a), 10.29(b), 10.29(b)(2), 10.30(a), 10.30(b), 10.30(c), 10.31(a), 10.32(c), 10.33(b) and 10.34(b) are amended by inserting "Director," before the words "Office of Administration" wherever those words appear.

§ 10.5 [Amended]

3. Paragraph 10.5(c) is amended by adding the words "by the Office of the Executive Legal Director" after the word "assigned".

§ 10.10 [Amended]

4. Paragraph 10.10(c) is amended by deleting the words "The Director, Office of Administration", and substituting the words "The Director, Division of Security, Office of Administration".

§ 10.21 [Amended]

5. Section 10.21 is amended by deleting the words "Office of Administration" where it first appears and substituting the words "Director, Division of Security, through the Director, Office of Administration"; and by deleting the words "Office of Administration" where it next appears and substituting the words "Director, Division of Security".

§ 10.22 [Amended]

6. Section 10.22 is amended by deleting the first sentence and substituting the following sentence: "A notification letter, prepared by the Division of Security, approved by the Office of the Executive Legal Director, and signed by the Director, Office of Administration, shall be presented to each individual whose eligibility for access authorization is in question."

7. Paragraph 10.22(f) is amended by deleting the words "Executive Director for Operations" and substituting the words "Director, Office of Administration".

§§ 10.22, 10.24 [Amended]

8. Paragraphs 10.22(h) and 10.24(a) are amended by inserting "Director, Division of Security, through the Director," before the words "Office of Administration".

§§ 10.25, 10.34 [Amended]

9. Paragraphs 10.25(b), 10.25(d) and 10.34(c) are amended by deleting the

words "Office of Administration" and substituting the words "Director, Division of Security".

§ 10.26 [Amended]

10. Paragraph 10.26(h) is amended by inserting "Director," before the words "Office of Administration" where it first appears; by inserting "Director, Division of Security, through the Director," before the words "Office of Administration" where it next appears; and by inserting "Director," before the words "Office of Administration" where it last appears.

§ 10.27 [Amended]

11. Paragraph 10.27(j) is amended by deleting the words "Office of Administration concerned" and substituting the words "Director, Office of Administration, that he instruct the Director, Division of Security" and paragraph 10.27(q) is amended by deleting the words "Office of Administration" in the first sentence and substituting the words "Director, Office of Administration, that he instruct the Director, Division of Security".

§ 10.29 [Amended]

12. Paragraph 10.29(a) is amended by deleting the words "from whom he received his notification letter".

§ 10.30 [Amended]

13. Paragraph 10.30(a) is amended by deleting the word "concerned".

(Sec. 161, Pub. L. 83-703, 68 Stat. 948 (42 U.S.C. 2201); Sec. 201, Pub. L. 93-438, 88 Stat. 1242 (42 U.S.C. 5841).)

Dated at Bethesda, Maryland this 29th day of September, 1977.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Acting Executive
Director for Operations.

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Amendments to Synthetic Natural Gas Feedstock Allocation Regulations

AGENCY: Federal Energy Administration.

ACTION: Final rule.

SUMMARY: The Federal Energy Administration (FEA) is amending the Mandatory Petroleum Allocation Regulations with respect to crude oil and allocated products used for the manufacture of synthetic natural gas (SNG). The purpose of these amendments is to make the regulations more responsive to the needs of priority users of natural gas and to assure consistency with the National Energy Plan.

EFFECTIVE DATE: September 30, 1977.

FOR FURTHER INFORMATION CONTACT:

Ed Vilade (Media Relations), 12th and Pennsylvania Avenue NW., Room 3104, Washington, D.C. 20461 (202-566-9833).

Joel M. Yudson (Office of the General Counsel), 12th and Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461, (202-566-9565).

SUPPLEMENTAL INFORMATION:

I. BACKGROUND

On August 30, 1977, the Federal Energy Administration (FEA) issued a notice of proposed rulemaking and public hearing with respect to the allocation of petroleum feedstocks for the production of SNG (42 FR 44551, September 6, 1977). As proposed, the regulations provided for a continuation of FEA's current policy of case-by-case review of feedstock applications for new and expanded SNG plants. A public hearing was held in Washington, D.C. on September 26 and 27, 1977 at which 22 persons testified. In addition, 20 written comments were received.

In issuing the notice of proposed rulemaking, the FEA was responding to a number of concerns and developments. As discussed in the August 30 notice, for more than a year FEA had been conducting a review of its policies related to SNG production from petroleum. Further impetus toward revision of the SNG allocation regulations was provided by the establishment of a task force in this area pursuant to the FEA's allocation regulations covering all natural gas liquids, including regulations dealing with allocation levels for SNG feedstock. Btu enrichment and use limitations (42 FR 41242, August 15, 1977).

II. COMMENTS RECEIVED

A large number of comments from the natural gas industry and other affected parties were received in connection with the five public hearings mentioned above. Comments addressed to the major areas of concern in this rulemaking proceeding are discussed below.

A. EXISTING PLANTS AND PENDING APPLICATIONS

FEA proposed that existing SNG plants which had received allocations as of July 1, 1977 for commercial operation be allowed to elect whether their current and future applications should be evaluated under the criteria existing at that time or under the new criteria set forth in the proposed rule. Such plants would be given thirty days from the date

this rule becomes effective to make such the irrevocable election. FEA further proposed that firms which have had applications for SNG feedstock allocations pending since prior to January 1, 1976, should make the same election with respect to the SNG production capacity covered by their applications.

Firms commenting generally stated that they would not be able to make an informed choice as to which set of policies set forth in the President's National Energy Plan in April 1977. As part of the efforts of the task force, a general hearing regarding SNG feedstock allocation was held on July 18, 1977 to receive comments on SNG policy, with specific reference to fifteen questions published in a notice of inquiry (42 FR 32838, June 28, 1977). The task force completed its review in August 1977 and issued two reports summarizing its findings. These were made available to the public for comment concurrently with the commencement of the comment period for the August 30 notice. In addition, a draft programmatic environmental impact statement (EIS) on FEA's SNG feedstock allocation program was issued in June 1977 (42 FR 30240, June 13, 1977), comments on which were received at a public hearing held on July 11, 1977. The final programmatic EIS was issued on August 31, 1977.

Two other related public hearings were held in September 1977 on the allocation of natural gas liquids which dealt in part with issues concerning the use of natural gas liquids by gas utilities or transmission companies. Specifically, a hearing was held on September 6, 1977, on FEA guidelines for the allocation of propane for gas utility use in propane-air peakshaving plants (42 FR 38553, July 29, 1977), and a second hearing was held on September 12 and 13, 1977, on a proposed general revision of criteria to choose. They pointed out that the new criteria are broad and untested and that certain of the existing criteria set forth in Special Rule No. 1 to Subpart A of Part 211 have been found to be unsatisfactory. In addition, the entire Special Rule has reference to, and is dependent on, the Statement of Policy, which was proposed to be deleted. Requiring an immediate election would be speculative, it was contended, particularly for those companies with allocation orders which will continue in effect for a number of years. Further, the proposal was not clear as to whether all SNG plant operators would be required to make the election or just those with applications currently pending before FEA. Most utilities requested that, rather than being given a choice of criteria to be judged under, their feedstock allocations should be "grandfathered" at full capacity operational levels for the life of their plants.

B. WINTER OPERATION

FEA proposed that allocations for the fourth and first calendar quarters be based on design winter requirements for priority gas users, a classification which would correspond to Federal Power Com-

mission (FPC) priorities 1, 2, and 3 (as set forth in Orders 467B and C), not including industrial boiler fuel uses. FEA further proposed that, if a particular heating season were warmer than a design winter, the SNG plant would be permitted to use the feedstock during that time to function as a supply buffer to meet peak demand. Although a certain amount of SNG would thereby be used to service lower priority users, FEA would place no end use restrictions on the allocation as to the amount of SNG feedstock used during the winter season. In addition, FEA requested comments as to whether a definition of a "design" winter should be adopted on a uniform basis rather than separately for each applicant.

Comments received were generally in favor of having winter allocations based on design winter requirements. It was pointed out, however, that the winter heating seasons in all parts of the country are not co-extensive and allocations for winter operation could in certain instances include parts of the second or third calendar quarter. Most commenters stated that a uniform definition of design winter is not possible, because of the varying methods by which design conditions are determined.

C. NON-WINTER OPERATION

Many commenters opposed the requirement of proposed Section 211.29(c) (3)(iii) that applicants certify that allocated feedstocks would be used for SNG production in the second or third calendar quarter only while gas service is continued to priority gas users or for industrial boiler fuel users which use up to 1500 MCF per peak day. It was stated that SNG plants must be operated year round to achieve efficiency. Such operation, it was contended, spreads the fixed cost of an SNG facility over a greater number of units of production. It was stated also that year-round operation is necessary to provide a consistent volume outlet for the feedstock supplier. Suppliers, it was contended, would be reluctant to enter into any type of agreement unless fixed delivery schedules could be maintained. It was further pointed out that pipeline companies which distribute SNG to a great number of local distribution companies would have no way to ascertain or assure the class of ultimate customers receiving gas supplies from them and therefore they could never make such a certification.

D. FEEDSTOCK STORAGE REQUIREMENT

To insure that sufficient feedstocks will be available to operate plants in the event of a supply interdiction, FEA proposed that applicants certify that a 90-day peak-load supply of feedstock be maintained in readily accessible storage which could be used without adversely affecting the distribution of such products to other users. Commenters were requested to indicate whether storage for greater or less than ninety days of operation should be required, and whether such a provision should apply

differently for various kinds of feedstocks.

Comments received in relation to the 90-day storage requirement focused on the capital expense involved, the large land-use requirements, possible technical difficulties, and the potential environmental and safety hazards, particularly where natural gas liquids (NGLs) are to be stored. In the case of naphtha feedstock, if the SNG plant is to be supplied by a nearby refinery, then it was asserted that the refinery's access to sufficient supplies of crude oil could provide the necessary assurance that the SNG plant could continue to meet the needs of priority gas uses. Furthermore, it was stated that certain utilities maintain large storage supplies of natural gas which would reduce the need for SNG feedstock storage.

A number of commenters suggested alternatives to the proposal. Among the suggested alternatives were requirements of 20, 30, or 45 days' storage, or a requirement that applicants simply demonstrate that they will have adequate storage to meet emergency situations.

E. NATURAL GAS LIQUID IMPORT REQUIREMENT

Many utilities voiced strong objection to the requirement of proposed Section 211.29(c) (3) (iv) that SNG plants be restricted to the use of non-Canadian imports where NGLs are used as feedstocks. It was argued that the restriction discriminates against the gas industry and forces high priority gas utility customers to be dependent on higher-priced and less secure imports. Some commenters urged that SNG plants should at least have access to Canadian NGLs, because Canadian imports will be at lower prices and are from a more secure supply source than overseas imports.

F. PRIOR STATE APPROVAL

FEA proposed that an applicant for SNG feedstock certify that approval for the proposed new or expanded SNG facility has been obtained from the state public service commission having the appropriate authority (if the SNG plant were subject to such authority) in at least one state to be served by the facility. It was contended that such a requirement would lead to extra delay and costs. The suggestion was made that the regulation require only that an application be filed with the appropriate state public service commission and that prior approval should not be necessary.

G. OTHER COMMENTS

Comments were also submitted alleging that the detailed informational requirements imposed on applicants would be burdensome. As to the proposed audit provision, it was alleged that such a provision could hamper the efforts of firms to obtain financing because of the constant threat of rescission of an allocation. Further, the objection was raised that the proposal was silent as to audit standards and due process safeguards. One commenter also stated that the requirement of proposed § 211.29(c) (4) (v), re-

quiring a clear and convincing demonstration of the need for SNG to overcome a severe environmental problem, imposed too difficult a standard for an applicant to meet.

III. AMENDMENTS ADOPTED

The FEA has concluded, based on all the comments received in this proceeding and other information available to FEA, including the analysis presented in the programmatic EIS and in the two reports prepared for the SNG Task Force, that the proposal should be adopted in a modified form as explained below.

A. EXISTING PLANTS AND PENDING APPLICATIONS

In the rule adopted today, FEA is not requiring firms that operate existing SNG plants to choose whether their applications should be evaluated under the criteria contained in Special Rule No. 1 or under new criteria adopted, as was proposed. FEA has concluded that the criticisms of the proposed election procedure are valid.

Special Rule No. 1 is being deleted, together with the Statement of Policy which accompanies it, and all applications for SNG feedstock or Btu enrichment, including those now pending, will be evaluated under the new criteria adopted hereby.

However, a special provision is adopted with respect to applications received prior to July 1, 1977 relating to the capacity of SNG facilities existing as of that date or to proposed capacity which was the subject of an application pending before FEA as of that date. Any action that FEA will take under these amendments shall result in allocations no less favorable to the applicant than those which would have been provided by FEA under § 211.29 and Special Rule No. 1 as in effect on July 1, 1977. The allocations of firms which were grandfathered under Paragraph No. 4 of Special Rule No. 1 as in effect on July 1, 1977 will not be affected by the adoption of these amendments.

Applications filed subsequent to July 1, 1977 for new SNG facilities or expansions of existing SNG facilities will be evaluated under the new criteria without regard to what treatment they would have received under Special Rule No. 1.

B. CRITERIA AND REQUIREMENTS

1. *Winter Operations.* The proposal required a demonstration by an applicant of the need for the requested volumes of SNG feedstock or Btu enrichment material in the fourth and first calendar quarters to meet priority gas uses under design conditions. The final rule provides in § 211.29(c) (2) (i) that for the entire winter heating season, the allocation will be based on those natural gas volumes which will be required under design winter conditions to meet priority gas uses. FEA has concluded that basing the need for SNG on requirements for priority gas uses only in the fourth and first calendar quarters

as set out in the proposal is inappropriate in view of the fact that temperature-sensitive priority requirements may extend for either a shorter or a longer period, depending upon a company's location and the nature of their demand profile. The gas requirements will take into account the applicant's entire supply of gas from all sources other than propane-air used for peak shaving and the incremental amount necessary to be supplied by the SNG facility will be determined.

The definition of design winter has also been revised. For most companies, a design winter is an analytical device which is based on the experiences of past winters and uses a number of variables and criteria in order to estimate future winter heating season requirements under the most severe conditions which could reasonably be expected. Although an unusually severe winter may have requirements which exceed those of a design winter, as was the case for some companies during the winter of 1976-77, FEA has concluded that design winter requirements are an appropriate measure of a company's future potential need for gas, including SNG. FEA recognizes further that such requirements will vary from utility to utility. For purposes of these regulations, "design winter" will mean a specified level of estimated natural gas requirements for a future winter heating season which the system capacity and other engineering specifications can reliably meet and which has previously been recorded with either a state public service commission or the Federal Power Commission, or, in the case of an unregulated utility, can be demonstrated to have been used for such purposes prior to July 1, 1977.

2. *Non-winter use.* FEA is modifying the provision in the proposal which required that an applicant certify that it would not use naphtha or an allocated natural gas liquid product for SNG production in the second and third calendar quarters while continuing gas service to customers which would be classified in FPC priorities 4 through 9. FEA has concluded, based on comments detailing specific problems that could occur as a result of a complete prohibition of service to customers other than for priority gas uses and small industrial boiler fuel use, that such a prohibition is inappropriate. A utility may find that short-term supplies of gas may become available as a result of various circumstances, but because an SNG plant, for technical reasons, cannot be closed down and restarted during such a short period, it must choose between refusing the extra gas which would be available to serve industrial customers or to receive the gas for a short period and serve such customers in violation of its required certification. Further, as indicated in the discussion of the comments, pipeline transmission companies do not control the class of customer served by their utility customers and could not operate an SNG plant during non-winter months without substantial risks of non-

compliance with prohibitions as to priorities of customers served.

Therefore, to afford companies a measure of flexibility to respond to unforeseen opportunities to receive additional supplies of gas, FEA will not prohibit the use of allocated SNG feedstocks during non-winter months when customers other than those in FPC priorities 1 through 3 receive gas service. FEA will, pursuant to § 211.29(c) (2) (ii), continue to determine the volumes of SNG feedstock or Btu enrichment material for non-winter use (which is not necessarily co-extensive with the second and third calendar quarters) based on those volumes of natural gas required to meet priority gas uses and industrial boiler fuel use which require up to 1,500 MCF per peak day. It is altogether possible that if a utility's other gas supplies are sufficient to meet its entire requirements for priority gas uses and industrial boiler fuel loads of up to 1,500 MCF per peak day, its allocation of SNG feedstock for non-winter months will be zero. However, under the regulations as adopted there is no prohibition as to classes of customers served and, where unanticipated short-term supplies of natural gas become available, an SNG plant with a non-winter allocation could operate while gas service is provided to customers which would be in FPC priorities 4-9.

FEA will continue to monitor the classes of customers served by the utility with non-winter allocations and, if it finds that such service to lower priorities is of a regular rather than a sporadic nature, it may consider taking action to reduce the SNG plant's allocation.

3. *Feedstock storage.* In the final rule, FEA is requiring that an applicant demonstrate it will maintain a thirty (30) day peak-load supply of feedstock in readily accessible storage which can be used without adversely affecting the distribution of such product to other users. The comments were persuasive that requiring certification of a ninety-day peak-load feedstock supply in storage, while desirable to maintain gas service in the event of a feedstock supply interruption, would be costly and difficult for utilities to implement.

4. *State public commission approval.* Although comments expressing a contrary position were received, FEA has concluded it is appropriate for an applicant to obtain prior approval from the appropriate state regulatory agency, where such approval is required by a state which would receive the SNG. FEA's decision is based on the states' significant interest in the impacts of SNG provided to their residents and FEA's desire to coordinate its actions with such states. The final rule provides that if more than one state requires such approval, the approval of only one state which would receive the SNG is necessary prior to the granting of an allocation.

5. *Natural gas liquid feedstock import requirement.* The FEA is amending the proposed requirement that an applicant

certify that any allocated natural gas liquid product to be used for SNG feedstock, SNG Btu enrichment or SNG plant fuel will be a non-Canadian import. FEA has concluded that any import, including Canadian imports of allocated natural gas liquid products, may be used for SNG use.

The easing of the prohibition as to Canadian imports is not based on the comments alleging discriminatory treatment of utilities or those contending that utilities should be given access to lower-priced product. FEA remains aware that the cost of the SNG feedstock will in most instances be rolled-in to prices for ultimate customers. FEA believes that the Canadian NGL supply situation is such that, in a select number of situations, allowing the use of Canadian imports by utilities for SNG use will not impact adversely upon other historical users of such products. FEA intends to examine carefully each application requesting the use of Canadian imports to assure other firms reliant on Canadian feedstocks will not be prejudiced by any action taken by the Agency.

6. *Environmental review.* FEA believes that it will be sufficiently difficult for an applicant to demonstrate that SNG is necessary to overcome or mitigate a significant environmental problem, and therefore § 211.29(c)(3)(vi) of the final rule does not impose a "clear and convincing" burden of proof requirement upon an applicant in this regard.

7. *Other criteria.* One additional criterion is included in the final rule which was not contained in the proposal. This factor, which is set forth at § 211.29(c)(3)(vii), provides FEA the flexibility to grant an allocation for unique or special circumstances not encompassed by the other criteria. The need for this factor was demonstrated by the pending application of one firm commenting for a small prototype SNG plant, which is to be built for testing and demonstration purposes only. Such an application could not be properly evaluated under the other enumerated criteria.

Certain of the criteria have been adopted substantially as proposed and are not discussed above, including the requirement that utility customer growth to be served by the SNG plant be limited to priority uses only and that allocations will be for a term of years.

C. INFORMATIONAL REQUIREMENTS

FEA has determined that applications should set forth all of the information required in the proposal, with the exception of the rate structure of the SNG manufacturer's gas utility customers, with those items claimed to be proprietary marked as such. FEA believes that all the information required to be submitted is clearly necessary to evaluate an SNG feedstock or Btu enrichment application.

D. REVIEW

Under this final rule, FEA has retained the ability to review at its discretion any allocation to assure that a firm is continuing to operate an SNG plant in ac-

cordance with the factual basis for and the terms and conditions of the allocation order and the applicable regulations. On the basis of such a review, the FEA may determine that adjustment or rescission of the allocation is appropriate. Any such rescission or adjustment to an allocation order is required to be upon reasonable notice to all interested parties, with an opportunity for a hearing provided to the operator of the affected SNG plant.

E. OTHER PROVISIONS

The remainder of the regulatory provisions have been adopted substantially as proposed, except that the definition of synthetic natural gas has been changed to clarify that gas produced from sources other than liquid hydrocarbons is not subject to the regulation.

Comments were requested as to whether the standards proposed for SNG plants should also be adopted for base loading propane-air facilities. FEA intends to resolve this issue in the near future and the rulemaking is continued in this regard.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159; as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

1. Section 211.29 is amended to read as follows:

§ 211.29 Synthetic natural gas production.

(a) *General.* Notwithstanding any inconsistent provision of §§ 211.12 and 211.13, a firm which purchases or acquires crude oil and allocated products for use in the production of synthetic natural gas (SNG), including feedstock use, SNG Btu enrichment use, and plant fuel use, shall comply with the provisions of this section. Any firm which has requirements for an SNG plant that exceed its base period volume or which has no base period volume may seek an adjustment of its base period volume or establishment of a base period volume only upon application to the FEA National Office in accordance with Subparts B or C, respectively, of Part 205 of this chapter.

(b) *Existing plants and pending applications.* (1) This paragraph applies to firms which had received allocations for SNG feedstock, SNG enrichment, or plant fuel for SNG production prior to July 1, 1977, or which had applied prior to July 1, 1977, for an SNG feedstock allocation.

(2) The allocations of firms which have received allocations of naphtha for SNG production pursuant to paragraph

(4) of Special Rule No. 1 to Subpart A of Part 211 of this chapter, as in effect on July 1, 1977, shall remain in full force and effect.

(3) Any action FEA takes under this section with respect to applications related to the July 1, 1977, capacity of SNG facilities existing as of that date or related to the proposed capacity which was the subject of an application pending before FEA as of that date shall result in allocations no less favorable to the applicant than those which would have been provided by FEA under Special Rule No. 1 and this section as in effect on July 1, 1977.

(c) *Criteria and requirements.* In evaluating an application for assignment or adjustment of base period volumes for SNG feedstock, Btu enrichment or SNG plant fuel, FEA shall impose the following requirements and consider the following factors, in addition to the criteria set forth in Subparts B or C of Part 205.

(1) Unless otherwise waived by FEA for good cause shown, applicants shall demonstrate that:

(i) Approval for a proposed new or expanded SNG facility has been obtained from the state regulatory agency having the appropriate jurisdiction in at least one state to be served by the facility (no such approval is required where no state agency has such jurisdiction or where no state approval is required).

(ii) Any allocated natural gas liquid product to be used for SNG feedstock, SNG Btu enrichment or SNG plant fuel will be imported for such use.

(iii) All new growth by the applicant or the applicant's gas utility customers which would be served by the SNG plant will be for priority gas uses.

(iv) A thirty (30) day peak-load supply of feedstock, which can be used without adversely affecting the distribution of such product to other users of such product, will be maintained in readily accessible storage.

(2) The volumes allocated for SNG feedstock or Btu enrichment use shall take into account all projected sources of natural gas supplies other than propane-air used for peak shaving and shall be calculated so as to provide, together with such natural gas supplies,

(i) For the winter heating season, those natural gas volumes which will be required under design winter conditions to meet priority gas uses, and

(ii) For other than the winter heating season, those natural gas volumes which will be required to meet priority gas uses and industrial boiler fuel uses which require up to 1500 MCF per peak day.

(3) The following factors shall also be considered by FEA in its evaluation of applications under this paragraph (c):

(i) The effects on the distribution and storage systems serving the market area.

(ii) The effect of allocating domestic rather than imported feedstocks.

(iii) The effect of allocation of the requested product for SNG production on the supply of and demand for such product in a particular market area, with

due regard to the impacts on competing uses.

(iv) The security of feedstock supply from the proposed source of supply.

(v) The ability of a new plant to use a variety of feedstocks.

(vi) The environmental impact of the requested allocation within a market area. If the applicant contends that the production of SNG is required to overcome a significant environmental problem, the applicant shall demonstrate the need for SNG to overcome or mitigate such problem. Notwithstanding the other requirements contained in this paragraph (c), if such a showing is made, an allocation may be granted to the applicant to serve other than priority gas users under design winter conditions or other than priority gas users and industrial boiler fuel users up to 1,500 MCF per peak day during other than the winter heating season.

(vii) Any unique or special factors not addressed in the above criteria.

(d) *New applications.* Any application for adjustment or assignment shall contain, in addition to the information specified in §§ 205.24 or 205.34 of Part 205 of this chapter, the following information:

(1) The applicant's projected pipeline supply of natural gas for the period for which the allocation is sought.

(2) All other current and projected sources of gas supplies, including, but not limited to, underground storage, liquefied natural gas (LNG), propane-air, SNG from coal, and the efforts the applicant has made to obtain such supplies.

(3) The projected demand for gas (design winter and other estimates—by volume and number of customers) in the applicant's market area, by consuming sector (set forth by FPC priority or other readily identifiable categories with separate identification of industrial boiler fuel requirements), including estimates of that portion of the demand for which the SNG will be required.

(4) The projected rate of growth of gas consumption in the applicant's market area for each consuming sector.

(5) The projected schedule of curtailments of pipeline supplies of gas for the allocation period, and a description of any curtailment plan in effect for the market area to be served by the SNG plant and an estimate of the effect of such plan.

(6) A description of the rate structures of the SNG manufacturer including pricing policies for SNG and other supplemental sources of gas.

(7) A complete description of the proposed feedstock, including the supplier(s), volumes, prices, and technical specifications of the feedstock.

(8) The design and practical feedstock capacity of the SNG plant.

(9) The proposed product needed for Btu-enrichment requirements of the SNG plant, including source, volumes, and price.

(10) The proposed SNG plant fuel, including source and volumes.

(11) Other information which may be identified by FEA as necessary for a comprehensive evaluation of the application.

(e) *Special limitations.* Unless directed by FEA upon application pursuant to Subpart G of Part 205 of this chapter, no supplier shall supply and no wholesale purchaser or end-user shall accept or use naphtha or any allocated natural gas liquid product in excess of one hundred percent of base period use for synthetic natural gas plant feedstock use.

(f) *Reporting requirements.* Each SNG manufacturer shall report to FEA in a manner prescribed by FEA on the usage of crude oil or allocated products for SNG production.

(g) *Review.* Each firm operating an SNG plant shall be subject to review at the discretion of FEA to assure that the firm is continuing to operate the plant in accordance with the factual basis for and the terms and conditions of the allocation order and the applicable regulations. On the basis of such a review the FEA may determine that adjustment or rescission of the allocation is appropriate. Any such rescission or adjustment to an allocation order shall be upon reasonable notice given to all interested parties, with an opportunity for a hearing provided to the operator of the affected SNG plant.

2. Special Rule No. 1 to Subpart A of Part 211 and the Statement of Policy following Special Rule No. 1 are deleted.

3. Section 211.51 is amended by deleting the definition of "synthetic natural gas plant" and by inserting the following definitions of "design winter," "priority gas uses," and "synthetic natural gas" in the appropriate alphabetical order:

§ 211.51 General definitions.

"Design winter" means a specified level of estimated natural gas requirements for a future winter heating season which the system capacity and other engineering specifications can reliably meet and which has previously been recorded with either a state public service commission, the Federal Power Commission, or, in the case of an unregulated utility, can be demonstrated to have been used for such purposes prior to July 1, 1977.

"Priority gas uses" means usage of natural gas for residential use, commercial use, storage injection requirements, and firm industrial requirements for plant protection, feedstocks, process uses, or other non-boiler fuel uses.

"Synthetic natural gas" or "SNG" means gas chemically reformed from any allocated liquid hydrocarbon source material and having the same characteristics as natural gas, and which is, or may easily be made, fungible with natural gas.

Title 12—Banks and Banking

CHAPTER III—FEDERAL DEPOSIT
INSURANCE CORPORATION

SUBCHAPTER A—PROCEDURE AND RULE OF
PRACTICE

PART 303—APPLICATIONS, REQUESTS,
AND SUBMITTALS

Delegation of Authority To Levy Civil
Penalties

AGENCY: Federal Deposit Insurance
Corporation (FDIC).

ACTION: Final rule.

SUMMARY: The Board of Directors of the FDIC ("Board") has delegated to the General Counsel of FDIC or his designee the authority to levy civil penalties for the late filing of Reports of Condition and Reports of Income, or such other reports as the Board may from time to time require. The purpose of the delegation is to promote flexibility, expedition and efficiency in operations.

EFFECTIVE DATE: These amendments shall become effective immediately.

ADDRESSES: Alan R. Miller, Executive Secretary, Federal Deposit Insurance Corporation, 550 17th Street, N.W., Washington, D.C. 20429.

FOR FURTHER INFORMATION CONTACT:

Arthur L. Beamon, Attorney, Legal Division, Federal Deposit Insurance Corporation, Washington, D.C. 20429 (202-389-4422).

SUPPLEMENTARY INFORMATION: In connection with the June 30, 1976 Call for Reports of Condition and Reports of Income FDIC revised the reporting schedule to provide that both reports are due within 30 days after the Call date. Previous to that time reports had been due within 10 days after the end of the reporting period. At the same time, FDIC announced that insured State non-member banks which fail to submit reports within 30 calendar days of the Call date will be subject to a penalty of up to \$100 per day for each delinquent report. Notice of adoption of a statement of policy on the imposition of such penalties was published in the FEDERAL REGISTER on July 12, 1976 at 41 FR 28583.

This policy was implemented for the first time on September 7, 1976, when the Board of Directors of FDIC levied penalties on 89 insured State non-member banks. The policy has been followed on each Call since that time.

Since the levying and enforcement of civil penalties involves primarily legal functions, the Board of Directors of FDIC has delegated to the General Counsel or his designee authority to levy and collect civil penalties for late filing of Reports of Condition and Reports of Income, or such other reports as the Board may require under the authority of section 7(a)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1817(a)(1)). In the exercise of the delegated authority, the General Counsel will be required to

consult with the Director of the Division of Bank Supervision or his designated representative.

Section 303.13 of FDIC rules and regulations (12 CFR 303.13) is amended to reflect the delegation. The amendment is adopted pursuant to the authority of sections 7(a)(1) and 9 (Seventh and Tenth) of the Federal Deposit Insurance Act (12 U.S.C. 7(a)(1) and 9 (Seventh and Tenth)).

Section 303.13 is amended to read as follows:

§ 303.13 Other delegations of authority.

(i) *Imposition of Civil Penalties.* The Board of Directors has delegated to the General Counsel or his designee the authority for the levying and enforcement of civil penalties under Section 7(a)(1) of the Federal Deposit Insurance Act (12 U.S.C. § 1877(a)(1)) for the late filing of Reports of Condition and Reports of Income, and such other reports as the Board may require under the authority of that Section. In the exercise of the delegated authority, the General Counsel shall consult with the Director of the Division of Bank Supervision or his designated representative before imposing any penalty. At its discretion, the Board may review any action taken under authority of this paragraph.

The rulemaking procedures set forth in the Administrative Procedure Act (5 U.S.C. 553 (b) and (d) and the rules and regulations of the Federal Deposit Insurance Corporation (12 CFR 302.1, 302.2, and 302.5) with respect to notice, public participation, and deferred effective date were not followed in connection with this amendment because they constitute rules of internal FDIC practice and procedure and are not substantive in nature.

By order of the Board of Directors, September 30, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 10492; Amdt. SFAR 26-11]

PART 21—CERTIFICATION PROCEDURES FOR PRODUCTS AND PARTS

Interim Approval of Import Aircraft Components and Subassemblies From Japan

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment extends the effectivity of a current Special Federal Aviation Regulation which provides for the interim approval of certain air-

craft components and subassemblies that are manufactured in Japan. The extension is needed to facilitate the completion of the renegotiation of a related bilateral agreement with Japan.

DATE: Effective October 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Raymond E. Ramakis, Regulatory Projects Branch, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone: 202-755-8716.

SUPPLEMENTARY INFORMATION: SFAR 26 provided for approvals on a selective basis of aircraft engines, propellers, materials, parts and appliances manufactured in a foreign country with which the United States has an agreement for the acceptance of powered aircraft for export and import. SFAR 26 was adopted to provide these approvals on an interim basis pending appropriate amendments to certain of those bilateral agreements where such amendments are in the mutual interest of the United States and the foreign country involved. The termination date for SFAR 26 has been extended by Amendments SFAR 26-1 through Amendment SFAR 26-10, and is currently scheduled to terminate on October 1, 1977.

At the time the current termination date of SFAR 26 was established, the negotiation of amendments to the existing bilateral agreements had been concluded with all foreign countries to the extent then involved except Japan, and the FAA believed that the Japanese bilateral agreement would be concluded by October 1, 1977. However, these negotiations will not be concluded by that date and the government of Japan has requested a 60-day extension of SFAR 26 to allow time for final negotiations and processing of the agreement in order to assure uninterrupted trade flow. The reasons which justified the adoption of SFAR 26 still exist with respect to Japanese aircraft components and subassemblies. In view of the above, the FAA believes that it is in the public interest to extend the termination date of SFAR 26 from October 1, 1977, to December 1, 1977, for Japanese aircraft components and subassemblies produced under existing contracts with United States manufacturers.

Since this amendment continues in effect the provisions of a currently effective Special Federal Aviation Regulation and imposes no additional burden on any person, I find that notice and public procedure hereon are unnecessary and it may be made effective in less than 30 days.

The principal authors of this document are N. S. Dobi, Flight Standards Service, and J. D. Jeffrey, Office of the Chief Counsel.

ADOPTION OF AMENDMENT

Accordingly, effective October 1, 1977, the last paragraph of Special Federal Aviation Regulation No. 26 (35 FR

12748), as amended by Amendments SFAR 26-1 through SFAR 26-10 (42 FR 35634), is further amended by striking out the words "October 1, 1977" and inserting the words "December 1, 1977" in place thereof, and paragraph 6 is amended to read: "After October 1, 1977, this special regulation applies only to aircraft components and subassemblies produced in Japan pursuant to contracts between Japanese manufacturers and United States product manufacturers entered into prior to October 1, 1977."

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 30, 1977.

LANGHORNE BOND,
Administrator.

[FR Doc. 77-29308 Filed 10-5-77; 8:45 am]

[4910-13]

[Docket No. 17238; Amdt: 39-3053]

PART 39—AIRWORTHINESS DIRECTIVES
Societe Nationale Industrielle Aerospatiale (Formerly Nord Aviation) Nord 262 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires the installation of certain modifications to the fuel tanks on Societe Nationale Industrielle Aerospatiale (formerly Nord Aviation) Nord 262 series airplanes to prevent the fuel surging that is associated with the failure of one engine and that results in the exposure of fuel tank booster pumps and interruption of fuel flow to the operating engine.

EFFECTIVE DATE: October 31, 1977.

Compliance is required within the next 300 hours time in service after the effective date of this AD, unless already accomplished.

ADDRESSES: The applicable service bulletins may be obtained from Aerospatiale, BP 475, 36003 Chateauroux, France.

A copy of each of the service bulletins is contained in the Rules Docket, Rm. 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

M. E. Gaydos, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, telephone 513.38.30.

SUPPLEMENTARY INFORMATION: The FAA has determined during flight tests that flight operations with less than 700 pounds (110 gals) of fuel in each tank introduces the possibility of complete power loss in the event of failure of one engine on Societe Nationale Industrielle Aerospatiale (formerly Nord Aviation) Nord 262 Series Airplanes. Fuel surging associated with failure of one engine causes exposure of fuel tank booster pumps and consequent interruption of fuel flow to the operating engine. Since this condition is likely to exist or develop on other airplanes of the same type design, an airworthiness directive is being issued which requires the incorporation of partitions in the boost-pump area of the fuel tanks to restrain fuel surging.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are M. E. Gaydos, Europe, Africa, and Middle East Region, F. H. Kelley, Flight Standards Service, and K. May, Office of the Chief Counsel.

ADOPTION OF AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

SOCIETE NATIONALE INDUSTRIELLE AEROSPATIALE (formerly Nord Aviation). Applies to all Nord 262 Series Airplanes certificated in all categories.

Compliance is required within the next 300 hours time in service after the effective date of this AD, unless already accomplished.

To prevent interruption of fuel flow to the operating engine as a consequence of failure of one engine, accomplish the following:

(a) For airplanes not equipped with auxiliary tanks in center wing, install a rigid metal partition inside fuel tank No. 1 (LH and RH) in accordance with Paragraph II "Embodiment Instructions" of NORD 262-FREGATE Service Bulletin No. 28-18 (MOD. 825), dated June 23, 1977, or an FAA-approved equivalent.

(b) For airplanes equipped with auxiliary tanks in center wing, install a rigid metal partition inside fuel tank No. 1 (LH and RH) in accordance with Paragraph II "Embodiment Instructions" of NORD 262-FREGATE Service Bulletin No. 28-19 (MOD. 826), dated June 23, 1977, or an FAA-approved equivalent.

(c) After accomplishing paragraph (a) or (b) of this AD, adjust the zero point on the fuel quantity indicator in accordance with Paragraph II "Accomplishment Instructions" of NORD 262-FREGATE Service Bulletin No. 28-20 (MOD. 828), dated June 23, 1977, or an FAA-approved equivalent.

This amendment becomes effective October 31, 1977.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 28, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[4910-13]

[Airspace Docket No. 77-CE-11]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area at Columbus, Nebr.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this amendment is to alter the Columbus, Nebr., control zone and transition area due to relocation of the Columbus, Nebr., VOR to provide additional airspace to protect aircraft executing approach and departure procedures at the Columbus, Nebr., Municipal Airport.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary W. Tucker, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-538, FAA, Central Region, Federal Building 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3408.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Subparts F and G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to alter the Columbus, Nebr., control zone and transition area. The notice of proposed rulemaking was published in the FEDERAL REGISTER on April 18, 1977 (42 FR 20147, 20148). The proposal resulted from the relocation of the Columbus, Nebr., VOR. Relocation of the VOR requires adjustment of the instrument flight procedures based on that navigational aid. Alteration of controlled airspace (control zone, transition area), at Columbus, Nebr., is necessary to compensate for the adjustment of the instrument approach procedures so that aircraft will be afforded continuous airspace protection at or above 700 feet AGL (Above Ground Level) in which to execute the adjusted instrument approaches. No objections were received on the proposal.

DRAFTING INFORMATION

The principal authors of this document are Gary W. Tucker, Operations, Procedures and Airspace Branch, Air Traffic Division, and John L. Fitzgerald, Jr., Office of the Regional Counsel.

Accordingly, Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 3, 1977 (42 FR 440), is amended, effective 0901 G.m.t. December 1, 1977, by adding the following transition area to read:

§ 71.171 [Amended]

1. By amending § 71.171 (42 FR 371) so as to alter the following control zone to read:

COLUMBUS, NEBR.

Within a five mile radius of the Columbus Municipal Airport (latitude 41°26'49" N., longitude 97°20'31" W.), and within 4.5 miles each side of the 323° bearing from the Columbus Airport extending from the five mile radius zone to 11 miles northwest of the airport, and within three miles each side of the 157° radial of the Columbus VOR extending from the five mile radius zone to 8.5 miles southeast of the VOR. This Control Zone shall be effective during the times established by a notice to airman or as published in the Airman's Information Manual.

§ 71.181 [Amended]

2. By amending section 71.181 (42 FR 475) so as to alter the following transition area to read:

COLUMBUS, NEBR.

The airspace extending upward from 700' above the surface within a 6.5 mile radius of the Columbus Municipal Airport (latitude 41°26'49" N., longitude 97°20'31" W.); and within 4.5 miles each side of the 323° bearing from the Columbus Airport extending from the 6.5 mile radius area to 11.5 miles northwest of the Airport.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.69 of the Federal Aviation Regulations (14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Mo., on September 26, 1977.

C. R. MELUGIN, Jr.,
Director, Central Region.

[Docket No. 77-SO-39]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Laurel, Mississippi, Transition Area

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Laurel, Mississippi, Transition Area. The name of the Laurel Municipal Airport has been changed to Hessler-Noble Field. The action of the City of Laurel, officially changing the name, requires this to be reflected in the transition area description.

EFFECTIVE DATE: 0901 Gmt, December 1, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320. Telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: In a regular meeting, the City of Laurel officially changed the name of the Laurel Municipal Airport to Hesler-Noble Field. Therefore, it is necessary to alter the description of the Laurel, Mississippi, Transition Area to reflect the name change. Since this alteration is editorial in nature, notice and public procedures hereon are not necessary.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel.

ADOPTION OF AMENDMENT

Accordingly, Part 71 of the Federal Aviation Regulations is amended, effective 0901 Gmt, December 1, 1977, as follows:

§ 71.181 [Amended]

In Subpart G, § 71.181 (42 FR 440), the Laurel, Mississippi, Transition Area is amended as follows:

"* * * Laurel Municipal Airport * * *" is deleted and

"* * * Hesler-Noble Field * * *" is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Georgia, on September 27, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc. 77-29120 Filed 10-5-77; 8:45 am]

[4910-13]

[Docket No. 77-SO-42]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Memphis, Tennessee, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Memphis, Tenn., transition area. The Memphis VORTAC is being relocated to a position on the Memphis International Airport. This relocation requires deletion of controlled airspace no longer required for aircraft executing instrument approaches predicated upon the former Memphis VORTAC location.

EFFECTIVE DATE: 0901 GMT, December 1, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Ronald T. Niklasson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. Telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: On December 1, 1977, the Memphis VORTAC navigational aid will be relocated to a position on the Memphis International Airport. Therefore, it is necessary to alter the description of the Memphis, Tennessee, transition area to delete controlled airspace which was required for aircraft executing instrument approach procedures predicated upon the former location. Since this alteration lessens the burden on the public, notice and public procedure hereon are not necessary.

DRAFTING INFORMATION

The principal authors of this document are Ronald T. Niklasson, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, Part 71 of the Federal Aviation Regulations is amended effective 0901 GMT, December 1, 1977, as follows:

In Subpart G, § 71.181 (42 FR 440), the Memphis, Tennessee, area is amended by deleting the following: "* * * within 1.5 miles each side of Memphis VORTAC 265° radial, extending from the 6.5-mile radius area to the VORTAC * * *" and "* * * within 3 miles each side of Memphis VORTAC 311° radial, extending from the 6.5-mile radius area to 32.5 miles northwest of the VORTAC * * *".

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Georgia, on September 27, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

FEDERAL REGISTER, VOL. 42, NO. 194—THURSDAY, OCTOBER 6, 1977

[4910-13]

[Docket No. 77-SO-41]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Mobile, Ala., Control Zone (Aerospace Airport) and Mobile, Ala., Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule amends the Federal Aviation Regulations by altering the Mobile, Alabama, control zone (Aerospace Airport) and Mobile, Alabama, transition area. The existing control zone and transition area extensions will be realigned. This is necessary due to revision of the VOR instrument approach procedure to Mobile Aerospace Airport.

EFFECTIVE DATE: 0901 GMT December 1, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7947.

SUPPLEMENTARY INFORMATION: The final approach radial of the Brookley VORTAC for the VOR Runway 32 approach to Mobile Aerospace Airport will be realigned from the 146° radial to the 153° radial. Therefore, it is necessary to alter the control zone and transition area extensions to coincide with the revised final approach course of the instrument approach procedure. Since this alteration is minor in nature, notice and public procedure hereon are not considered necessary.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, Part 71 of the Federal Aviation Regulations (14 CFR 71) is amended, effective 0901 G.m.t., December 1, 1977, as hereinafter set forth.

In Subpart F, § 71.171 (42 FR 355), the Mobile, Alabama (Aerospace Airport) control zone is amended as follows:

"* * * within 3.5 miles each side of Brookley VORTAC 150° radial * * *" is deleted and "* * * within 3.5 miles each side of Brookley VORTAC 157° radial * * *" is substituted therefor.

In Subpart G, § 71.181 (42 FR 440), the Mobile, Alabama, transition area is amended as follows:

"* * * within 3.5 miles each side of Brookley VORTAC 150° radial * * *" is deleted and "* * * within 3.5 miles each side of Brookley VORTAC 157° radial * * *" is substituted therefor.

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Georgia, on September 27, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[4910-06]

[Airspace Docket No. 76-SO-67]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of VOR Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will alter the low altitude VOR airway structure in the vicinity of Memphis, Tenn., and Gilmore, Ark., commensurate with the relocation of the Memphis, Tenn., VORTAC at Lat. 35° 03' 45" N., Long. 89° 58' 53" W., and the establishment of the Gilmore, Ark., VOR/DME at Lat. 35° 20' 49" N., Long. 90° 28' 41" W. These actions are part of an overall plan to improve and upgrade the air traffic capabilities in and around the Memphis, Tenn., International Airport, thereby providing more efficient services to the airspace users.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. David F. Solomon, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone: 202-426-8530.

HISTORY

On March 31, 1977, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the VOR airway structure in the vicinity of Memphis, Tenn., commensurate with the relocation of the Memphis, Tenn., VORTAC and establishment of the Gilmore, Ark., VOR/DME (42 FR 17138). Interested persons were invited to participate in this rule making proceeding by submitting written comments on the proposal to the FAA. One comment was received from the Southern Region U.S. Air Force Representative concerning VOR Airway (V-11) transiting the Columbus 3 Military Operations Area (MOA) and possibly derogating the military use of this area. The FAA Southern Region assured the Air Force

Representative that whenever the Columbus 3 MOA was activated, ATC controlled IFR aircraft would not be routed via V-11 within the Columbus 3 MOA.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) alters the low altitude VOR airway structure in the vicinity of Memphis, Tenn., and Gilmore, Ark., commensurate with the relocation of the Memphis, Tenn., VORTAC and the establishment of the Gilmore, Ark., VOR/DME. Subsequent to the publication of the NPRM further airway refinements, in the interest of route design efficiency, were found to be in order. These refinements are as follows:

In V-7 an east alternate from Graham, Tenn., to Central City, Ky., via Nashville, Tenn., is not required. Other airways are established along this route, therefore, the elimination of this east alternate will reduce route duplication.

In V-9 the final site selection of the Gilmore VOR/DME has eliminated the requirement for a dogleg airway between Greenwood, Miss., and Gilmore, Ark. This route segment will now proceed direct between these facilities.

In V-16 after Jacks Creek, Tenn., the route alignment will remain as it is presently established.

In V-124 from Jacks Creek, Tenn., this route will now proceed via Shelbyville, Tenn., to Hinch Mountain, Tenn.

In view of the extensive airway/alternate airway structure in the vicinity of Nashville and Crossville, Tenn., retaining the designation V-16 for the airways over these locations will lessen the impact of these changes, and a comprehensive study shows that no useful purpose will be served in changing the nomenclature of the airways. This change will switch the airway numbers only for those segments between Jacks Creek and Hinch Mountain, Tenn.

In V-52 a north alternate airway is designated between Nashville, Tenn., and Central City, Ky., in order to provide flexibility for terminal procedures.

In V-74 between Jackson and Greenville, Miss., this route was realigned slightly to the west in order to have 15 degrees divergence between the main and alternate airway.

These airway refinements are considered to be within the scope of the original notice (42 FR 17138). Therefore, the FAA believes that additional public comment is unnecessary.

DRAFTING INFORMATION

The principal authors of this document are Mr. David F. Solomon, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 307) and amended (42 FR 30607) is further amended, effective 0901 G.m.t., December 1, 1977, as follows:

1. In V-7 "Graham, Tenn.; Nashville, Tenn.; Central City, Ky.; including an east alternate;" is deleted and "Graham, Tenn.; Central City, Ky.;" is substituted therefor.

2. In V-9 "Memphis, Tenn., including an E alternate and also a W alternate; Maiden, Mo., including a W alternate;" is deleted and "Gilmore, Ark.; Maiden, Mo.;" is substituted therefor.

3. In V-11 "Jackson, Miss. From Memphis, Tenn., Dyersburg, Tenn., including a W alternate via INT Memphis 001° and Dyersburg 235° radials, and an E alternate via the INT Memphis 045° and Dyersburg 182° radials;" is deleted and "Jackson, Miss.; Greenwood, Miss.; Holly Springs, Miss., including a W alternate via the INT Greenwood 010° and Holly Springs 225° radials; Dyersburg, Tenn.;" is substituted therefor.

4. In V-16 "Pine Bluff, Ark.; Memphis, Tenn., including a S alternate; Jacks Creek, Tenn., including a N alternate via INT Memphis 045° and Jacks Creek 260° radials; Graham, Tenn., including a S alternate from Memphis to Graham via INT Memphis 078° and Graham 238° radials;" is deleted and "Pine Bluff, Ark.; Holly Springs, Miss.; Jacks Creek, Tenn.; Graham, Tenn.;" is substituted therefor.

5. In V-47 "From Little Rock, Ark., via Walnut Ridge, Ark.; Malden, Mo.;" is deleted and "From Pine Bluff, Ark.; Gilmore, Ark.; Dyersburg, Tenn.;" is substituted therefor.

6. In V-49 "Graham, Tenn.; INT Graham 006° and Bowling Green, Ky., 230° radials; Bowling Green, including an E alternate from Decatur to Bowling Green via Nashville, Tenn.;" is deleted and "Nashville, Tenn.; Bowling Green, Ky., including a W alternate from Decatur to Bowling Green via Graham, Tenn., and INT Graham 006° and Bowling Green 230° radials;" is substituted therefor.

7. In V-52 After "Evansville, Ind.;" Central City, Ky.; Nashville, Tenn., including a N alternate;" is added.

8. In V-54 "Memphis, Tenn., including a N alternate; Muscle Shoals, Ala., including a N alternate via INT Memphis 078° and Muscle Shoals 293° radials and also a S alternate via Holly Springs, Miss., and INT Holly Springs 099° and Muscle Shoals 255° radials;" is deleted and "Holly Springs, Miss.; Muscle Shoals, Ala.;" is substituted therefor.

9. In V-67 "From Chattanooga, Ky.;" is deleted and "From Chattanooga, Tenn.; Shelbyville, Tenn.; Graham, Tenn.; Cunningham, Ky.;" is substituted therefor.

10. In V-69 "Pine Bluff, Ark.; INT Pine Bluff 040° and Walnut Ridge, Ark., 187° radials" is deleted and "Pine Bluff, Ark.; INT Pine Bluff 038° and Walnut Ridge, Ark., 187° radials;" is substituted therefor.

11. In V-74 After "Pine Bluff 006° radials.;" Greenville, Miss., including a N alternate; INT Greenville 147° and Jackson, Miss., 325° radials; Jackson, including a N alternate;" is added.

12. In V-94 "Greenville, Miss., including a W alternate; INT Greenville 036° and Memphis, Tenn., 205° radials; to Memphis. The airspace within R-5103A is excluded." is deleted and "Greenville, Miss., including a S alternate; Holly Springs, Miss., including a N alternate via INT Greenville 021° and Holly Springs 268° radials; Jacks Creek, Tenn.; Bowling Green, Ky. The airspace within R-5103A is excluded." is substituted therefor.

13. In V-124 "Memphis, Tenn.;" is deleted and "Gilmore, Ark.; Jacks Creek, Tenn.; Shelbyville, Tenn.; to Hinch Mountain, Tenn.;" is substituted therefor.

14. In V-140 "Livingston 232°" is deleted and "Livingston 226°" is substituted therefor.

15. In V-159 "Holly Springs, Miss., including an east alternate from Birmingham to Holly Springs via INT Birmingham 313° and Holly Springs 099° radials; Memphis, Tenn., including a west alternate from Hamilton to Memphis via INT Hamilton 273° and Memphis 136° radials; Walnut Ridge, Ark.;" is deleted and "Holly Springs, Miss., including an east alternate from Birmingham to Holly Springs via INT Birmingham 313° and Holly Springs 099° radials; Memphis, Tenn., including a west alternate from Hamilton to Memphis via INT Hamilton 273° and Memphis 136° radials; Walnut Ridge, Ark.;" is substituted therefor.

[Docket No. 77-SO-32]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area,
Columbia, Miss.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule designates a 700-foot transition area in the vicinity of Columbia, Mississippi. This action provides the necessary controlled airspace for accommodation of IFR operations at the Columbia-Marion County Airport.

EFFECTIVE DATE: 0901 G.m.t., December 1, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7947.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking was published in the FEDERAL REGISTER on Monday, August 8, 1977 (42 FR 39994), which proposed the designation of the Columbia, Mississippi, transition area. No objections were received from this notice.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

ADOPTION OF AMENDMENT

Accordingly, Subpart G of Part 71 of the Federal Aviation Regulations (14

CFR 71) is amended, effective 0901 GMT, December 1, 1977, by adding the following:

COLUMBIA, MISS.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Columbia-Marion County Airport (Lat. 31°17'45" N., Long. 89°48'50" W.)

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); (14 CFR 11.69)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on September 2, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[4910-13]

[Airspace Docket No. 77-CE-15]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area—
Gothenburg, Nebr.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate a transition area at Gothenburg, Nebr., to provide controlled airspace for aircraft executing a new instrument approach procedure to the Gothenburg Municipal Airport which is based on a Non-directional Radio Beacon (NDB) navigational aid being installed at the airport.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary W. Tucker, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-538, FAA, Central Region, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3408.

SUPPLEMENTARY INFORMATION: The City of Gothenburg, Nebr., is installing a Non-directional Radio Beacon (NDB) on the Gothenburg Municipal Airport. This navigational aid will provide new navigational guidance for aircraft utilizing this airport. The establishment of an instrument approach procedure based on this navigational aid entails designation of a transition area at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to ensure adequate controlled airspace for aircraft executing the new instrument approach procedures at the Gothenburg Municipal Airport.

DRAFTING INFORMATION

The principal authors of this document are Gary W. Tucker, Operations, Procedures and Airspace Branch, Air Traffic Division and John L. Fitzgerald, Jr., Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On page 36270 of the FEDERAL REGISTER dated July 14, 1977, the Federal Aviation Administration published a notice of proposed rulemaking which would amend section 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Gothenburg, Nebr. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the notice of proposed rulemaking.

§ 71.181 [Amended]

Accordingly, Subpart G, § 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 3, 1977 (42 FR 440), is amended, effective 0901 G.m.t. December 1, 1977, by adding the following transition area to read:

GOTHENBURG, NEBR.

That airspace extending upward from 700 feet above the surface within a 5 mile radius of the Gothenburg Airport (latitude 40°55'45" N., longitude 100°09'00" W.) within 3 miles each side of the Gothenburg NDB 136° true bearing, extending from the 5 mile radius to 8 miles southeast of the NDB.

(Section 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); sec. 11.69 of the Federal Aviation Regulations (14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Mo., on September 26, 1977.

JOHN E. SHAW,
Acting Director,
Central Region.

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area—
Mountain View, Mo.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this federal action is to designate a transition area at Mountain View, Missouri, to provide controlled airspace for aircraft executing a new instrument approach procedure to the Mills Memorial Airport, Mountain View, Missouri, which is based on a

Non-directional Radio Beacon (NDB) navigational aid being installed at the airport.

EFFECTIVE DATE: December 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Dwaine E. Hiland, Airspace Specialist, Operations, Procedures and Airspace Branch, Air Traffic Division, ACE-537, FAA, Central Region, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106, telephone 816-374-3408.

SUPPLEMENTARY INFORMATION: The City of Mountain View, Missouri, is installing a Non-directional Radio Beacon (NDB) on the Mills Memorial Airport. This navigational aid will provide new navigational guidance for aircraft utilizing this airport. The establishment of an instrument approach procedure based on this navigational aid entails designation of a transition area at and above 700 feet above ground level (AGL) within which aircraft are provided air traffic control service. The intended effect of this action is to ensure adequate controlled airspace for aircraft executing the new instrument approach procedure at the Mills Memorial Airport.

DRAFTING INFORMATION

The principal authors of this document are Dwaine E. Hiland, Operations, Procedures and Airspace Branch, Air Traffic Division and John L. Fitzgerald, Jr., Office of the Regional Counsel.

DISCUSSION OF COMMENTS

On Page 20635 of the FEDERAL REGISTER dated April 21, 1977, (the period in which to comment being extended in the FEDERAL REGISTER of May 31, 1977, at Page 27603), the Federal Aviation Administration published a Notice of Proposed Rule Making which would amend Section 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a transition area at Mountain View, Missouri. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No objections were received as a result of the Notice of Proposed Rule Making.

Accordingly, Subpart G, Section 71.181 of the Federal Aviation Regulations (14 CFR 71.181) as republished on January 3, 1977 (42 FR 440), is amended, effective 0901 G.m.t. December 1, 1977, by adding the following transition area to read:

MOUNTAIN VIEW, MO.

That airspace extending upward from 700' above the surface within a 5 mile radius of the Mills Memorial Airport, (latitude 36°59'33" N., longitude 91°42'42" W.); and within 3 miles each side of the 106° bearing from the Mills Memorial Airport, extending from the 5 mile radius area to 8 miles east of the airport.

(Sec. 307(a), Federal Aviation Act of 1958 as amended (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Sec. 11.69 of the Federal Aviation Regulations (14 CFR 11.69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Kansas City, Missouri, on September 26, 1977.

C. R. MELUGIN, Jr.,
Director, Central Region.

[Docket No. 77-SO-40]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Redesignation of Control Zone, Valdosta, Ga. (Moody AFB)

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the effective hours of the Valdosta, Georgia (Moody AFB) Control Zone. On September 3, 1977, the Air Base operating hours were reduced on weekends and Federal holidays.

EFFECTIVE DATE: 0901 G.m.t., December 1, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

Harlen D. Phillips, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7946.

SUPPLEMENTARY INFORMATION: In Subpart F, § 71.171 (42 FR 355) of FAR Part 71, the Valdosta, Ga. (Moody AFB) Control Zone is designated as part time, 0700 to 2300 hours, local time, daily. Since the Air Base operating hours on Saturday, Sunday, and Federal holidays have been reduced to 0800 to 1600 local time, it is necessary to alter the description to reflect the changes. The aforementioned action will reduce the constraints and, in effect, the impact on the user imposed by the Control Zone operation. Consequently, we have elected to omit circularization of the change for comment.

DRAFTING INFORMATION

The principal authors of this document are Harlen D. Phillips, Airspace and Procedures Branch, Air Traffic Division, and Ronald R. Hagadone, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

ADOPTION OF AMENDMENT

Accordingly, Part 71 of the Federal Aviation Regulations, is amended effective 0901 GMT, December 1, 1977, as follows:

In Subpart F, § 71.171 (42 FR 355), the Valdosta, Georgia (Moody AFB), Control Zone is amended by adding the following:

"... This Control Zone is effective from 0700 to 2300 hours, local time, daily * * * is deleted and * * * This Control Zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airmen's Information Manual * * * is substituted therefor.

(Sec. 307(a), of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on September 27, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[4910-13]

[Docket No. 77-SO-37]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation of Control Zone, Selma, Ala.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action revokes the Selma, Alabama, control zone because Craig AFB has been deactivated, all instrument approach procedures cancelled, and air traffic control services discontinued.

EFFECTIVE DATE: December 1, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Ga. 30320.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320, telephone 404-763-7947.

SUPPLEMENTARY INFORMATION:

The Selma, Alabama, control zone, described in Subpart F, § 71.171 (42 FR 355), was designated to provide controlled airspace protection for IFR operations at Craig Air Force Base. The IFR approach procedures have been cancelled and the Air Force Base deactivated. Therefore, it is necessary to revoke the control zone. Since this amendment lessens the burden on the public, notice and public procedure hereon are unnecessary.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) revokes the Selma, Alabama, control zone.

DRAFTING INFORMATION

The principal authors of this document are William F. Herring, Airspace and Procedures Branch, Air Traffic Division, and Eddie L. Thomas, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

ADOPTION OF AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71, of the Federal Aviation Regulations (14 CFR, Part 71) is amended, effective 0901 GMT, December 1, 1977, by revoking the Selma, Alabama, control zone.

(Sec. 307(a), of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)) (14 CFR 11.69)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 10949, and OMB Circular A-107.

Issued in East Point, Ga., on September 27, 1977.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc. 77-29119 Filed 10-5-77; 8:45 am]

[4910-13]

[Docket No. 17237; Amdt. No. 1093]

**PART 97—STANDARD INSTRUMENT
APPROACH PROCEDURES**
Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—(1) FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; (2) The FAA Regional Office

of the region in which the affected airport is located; or (3) The Flight Inspection Field Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from: (1) FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, D.C. 20591; or (2) The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed weekly, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is \$150; add \$30 for each additional copy mailed to the same address.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591. Telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. § 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4 and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impracticable. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA Form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aro-

autical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

§ 97.23 [Amended]

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

• • • Effective December 1, 1977.

Dallas, TX—Addison, VOR Rwy 15, Amdt. 14.

§ 97.25 [Amended]

2. By amending § 97.25 SDF-LOC-LDA SIAPs identified as follows:

• • • Effective December 1, 1977.

Memphis, TN—Memphis International, LOC (BC) Rwy 27, Amdt. 19.

• • • Effective November 17, 1977.

Jamestown, ND—Jamestown Municipal, LOC/DME BC Rwy 12, Amdt. 2.

§ 97.27 [Amended]

3. By amending § 97.27 NDB/ADF SIAPs identified as follows:

• • • Effective December 1, 1977.

Washington, DC—Washington National, NDB Rwy 15, Amdt. 1.
Washington, DC—Washington National, NDB Rwy 36, Amdt. 4.
Olive Branch, MS—Olive Branch, NDB Rwy 18, Amdt. 1.
Olive Branch, MS—Olive Branch, NDB Rwy 36, Amdt. 1.

• • • Effective November 17, 1977.

Jamestown, ND—Jamestown Municipal, NDB Rwy 30, Amdt. 3.
Wichita Falls, TX—Kickapoo Downtown Airpark, NDB-A, Amdt. 3.

§ 97.29 [Amended]

4. By amending § 97.29 ILS-MLS SIAPs identified as follows:

• • • Effective December 1, 1977.

Washington, DC—Washington National, LDA Rwy 18, Amdt. 8.
Washington, DC—Washington National, ILS Rwy 36, Amdt. 29.
Memphis, TN—Memphis International, ILS Rwy 9, Amdt. 22.
Memphis, TN—Memphis International, ILS Rwy 17L, Amdt. 4.
Memphis, TN—Memphis International, ILS Rwy 17R, Amdt. 2.
Memphis, TN—Memphis International, ILS Rwy 35L, Amdt. 4.
Memphis, TN—Memphis International, ILS Rwy 35R, Amdt. 3.

• • • Effective November 17, 1977.

Jamestown, ND—Jamestown Municipal, ILS Rwy 30, Amdt. 3.

§ 97.31 [Amended]

5. By amending § 97.31 RADAR SIAPs identified as follows:

• • • Effective December 1, 1977.

Washington, DC—Washington National, RADAR-1, Amdt. 20.

• • • Effective November 3, 1977.

Longview, TX—Gregg County, RADAR-1, Original.

• • • Effective October 20, 1977.

Rockford, IL—Greater Rockford, RADAR-1 Original.

§ 97.33 [Amended]

6. amending § 97.33 RNAV SIAPs identified as follows:

• • • Effective December 1, 1977.

Washington, DC—Washington National, RNAV-A, Amdt. 2.
Washington, DC—Washington National, RNAV Rwy 3, Amdt. 4.
Washington, DC—Washington National, RNAV Rwy 33, Amdt. 2.

(Secs. 307, 313(a), 601, and 1110, Federal Aviation Act of 1958 (49 U.S.C. §§ 1348, 1354 (a), 1421, and 1510); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); Delegation: 25 FR 6489 and Paragraph 802 of Order FS P 1100.1, as amended March 9, 1973.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on May 12, 1969.

Issued in Washington, D.C., on September 30, 1977.

JAMES M. VINES,
Chief,

Aircraft Programs Division.

[3510-04]

Title 15—Commerce and Foreign Trade
**SUBTITLE A—OFFICE OF THE
SECRETARY OF COMMERCE**

**PART 17—LICENSING OF GOVERNMENT-
OWNED INVENTIONS IN THE CUSTODY
OF THE DEPARTMENT OF COMMERCE**

**Licensing of Rights in Domestic Patents
and Patent Applications**

AGENCY: Department of Commerce.

ACTION: Final rule.

SUMMARY: The General Services Administration (GSA) has issued Government-wide rules prescribing the terms, conditions, and procedures for the licensing of rights in domestic patents and patent applications vested in the United States of America (41 CFR 101-4.1). The Department of Commerce is adopting this rule to make clear the applicability of the GSA licensing rules to the Department and intends that this rule will provide a convenient reference for individuals wishing to obtain domestic licenses for patents and patent applications in the custody of the Secretary of Commerce.

DATES: This rule has been effective since October 1, 1975.

FOR FURTHER INFORMATION: Inquiries concerning this rule or the licensing activities of the DoC should be addressed as follows:

Mr. Ted Mann, Attorney-Advisor, Office of Assistant General Counsel for Science and Technology, U.S. Department of Commerce, Washington, D.C. 20230, telephone 202-377-5394.

SUPPLEMENTARY INFORMATION: It is intended that this rule will provide a convenient reference for individuals wishing to obtain domestic licenses for patents and patent applications in the custody of the Secretary, Department of Commerce, by establishing a new Part 17 to Title 15, Code of Federal Regulations. Part 17 is entitled "Licensing of Government-Owned Inventions in the Custody of the Department of Commerce" with Subpart A entitled "Licensing of Rights in Domestic Patents and Patent Applications". A Subpart B of Part 17, entitled "Licensing of Rights in Foreign Patents and Patent Applications" is reserved for future use. Public comment on this rule prior to its issuance is unnecessary since this rule merely states for the Department of Commerce the Government-wide domestic licensing rules which were subject to public comment before adoption by the General Services Administration.

15 CFR Subtitle A is amended by adding a new Part 17, reading as follows:

**Subpart A—Licensing of Rights in
Domestic Patents and Patent Applications**

§ 17.1 Licensing rules.

(a) The Government-wide rules for the licensing of rights in domestic patents and patent applications vested in the United States of America, found at 41 CFR 101-4.1, are applicable to all such licensing activities of the Department of Commerce, subject to the following minor clarifications:

(a) The term "Government agency" as defined at 41 CFR 101-4.102(c) means the United States Department of Commerce or a designated operating unit within the Department.

(b) The term "The head of the Government agency", as defined at 41 CFR 101-4.102(d), means the Secretary of Commerce or a designee.

(Sec. 205(c), 63 Stat. 390 (40 U.S.C. 486(c)).

Subpart B—Licensing of Rights in Foreign Patents and Patent Applications

[Reserved]

WILLIAM T. KNOX,
Director, National
Technical Information Service.

CHAPTER I—ENVIRONMENTAL
PROTECTION AGENCY
SUBCHAPTER C—AIR PROGRAMS
[FRL 801-8]

PART 52—APPROVAL AND PROMULGA-
TION OF IMPLEMENTATION PLANS
Pennsylvania Revision

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: A revision to the Commonwealth of Pennsylvania's State Implementation Plan (SIP) is approved to include the requirement that the Pennsylvania Department of Transportation (Penn DOT) restrict the usage of liquid bituminous cutback asphalt material in the Penn DOT paving and road surface maintenance program. This action is taken by the Commonwealth of Pennsylvania in order to obtain non-methane hydrocarbon (NMHC) emission offsets, pursuant to the requirements of Section 110 of the Clean Air Act (as amended, 1977) and the Environmental Protection Agency's (EPA) December 21, 1976 Interpretative Ruling (41 FR 55524), for the accommodation of the construction and operation of the Volkswagen Manufacturing Company of America, Inc., automobile assembly plant in New Stanton, Pennsylvania.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CON-
TACT:

Glenn Hanson, Regional Air New Source Coordinator, Air and Hazardous Materials Division, Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania, 19106 (215-597-8170).

SUPPLEMENTARY INFORMATION: Under Section 110 of the Clean Air Act (as amended, 1977) and the EPA December 21, 1976 Interpretative Ruling, a major new stationary source may locate in an area currently exceeding any National Ambient Air Quality Standard(s) (NAAQS) provided certain conditions are met. Those conditions include:

(1) Air pollutant emissions resulting from the construction and operation of the proposed new source must be controlled to the lowest achievable emission rate(s).

(2) For the pollutant(s) emitted by the proposed new source which will cause or contribute to a violation of any NAAQS(s), there must be a reduction in similar emissions from existing sources which will more than offset those emissions resulting from the construction and operation of the proposed new source.

(3) The required emission offsets must provide for some reasonable progress towards attainment of the NAAQS(s).

On May 20, 1977, the Commonwealth of Pennsylvania submitted to EPA a pro-

posed amendment to the Pennsylvania SIP. The proposed amendment was subsequently published by EPA in the FEDERAL REGISTER on June 14, 1977 (42 FR 30393) as a proposed revision to the Pennsylvania SIP and written public comments were solicited.

The purpose of this revision to the Pennsylvania SIP is to provide for emission reductions or offsets in order to accommodate the construction and operation of the proposed Volkswagen Manufacturing Company of America, Inc., automobile assembly plant in New Stanton, Pennsylvania. This revision is necessary because the geographical area in which the proposed Volkswagen facility is to be located is an area currently exceeding the photochemical oxidant NAAQS and it has been determined that the operation of the proposed Volkswagen facility will result in an increase in non-methane hydrocarbon air emissions, primary contributors to the formation of photochemical oxidants. Therefore, it is necessary that non-methane hydrocarbon air emissions be reduced so as to provide for some reasonable progress towards attainment of the photochemical oxidant NAAQS as required under conditions 2 and 3 as stated above.

Today's approved revision to the Pennsylvania SIP will provide for a net reduction in non-methane hydrocarbon emissions of one thousand and twenty-five tons (1025) per year. This reduction is achieved through the requirement that the Pennsylvania Department of Transportation (Penn DOT) restrict the usage of non-methane hydrocarbon (NMHC) based liquid bituminous cutback asphalts in road surfacing and maintenance programs. To achieve this objective Penn DOT will restrict the usage of NMHC based liquid bituminous cutback asphalts to less than twenty (20) percent of the total amount of asphalt paving material used in the following sixteen (16) county area in the southwest portion of the State; Allegheny, Armstrong, Beaver, Butler, Cambria, Clarion, Fayette, Greene, Indiana, Jefferson, Lawrence, Mercer, Somerset, Venango, Washington and Westmoreland Counties. Section 7.5.9.8 of the Penn DOT Pavement Maintenance Policy has been amended to include the above requirement.

In order to assure that reasonable further progress towards attainment of the photochemical oxidant NAAQS is provided for, the Volkswagen Company of America, Inc., construction and operating permit, issued by the Pennsylvania Department of Environmental Resources and enforceable by EPA, requires that at no time will NMHC air emissions ever exceed eight hundred and ninety-eight (898) tons per year. Further, the Volkswagen Company of America, Inc., has committed to a program which will provide for a reduction in NMHC emissions from six hundred and twenty (620) tons of NMHC's per year to two hundred and eighty (280) tons of NMHC's per year over a three year period. These reductions will be achieved through the substitution of water based/high solids paint

for NMHC based paint in Volkswagen's automobile paint spraying operations. These reductions are based upon paint spraying operations of eight hours per day, five days per week, fifty weeks per year.

During the written public comment period, EPA did receive comments concerning this revision. Some comments addressed the legal authority under which the Commonwealth of Pennsylvania would restrict the usage of liquid bituminous cutback asphalts. The Penn DOT is authorized by Pennsylvania statutory law to formulate and implement the NMHC emissions reduction program; Pa. Stat. Ann., tit. 71, Sections 511, 515(b) (Purdon). Today's approval of the NMHC emissions reduction program; Pa. a revision to the Pennsylvania SIP makes the NMHC emissions reduction program enforceable by EPA as well as by the Commonwealth of Pennsylvania (Specific provisions have been added in a new section to 40 CFR Part 52 to ensure enforceability by EPA).

EPA has assessed the issues relating to the monitoring of compliance with the Penn DOT NMHC emissions reduction program including the monitoring, recording, and reporting of total usages of liquid bituminous cutback asphalts. A specific provision has been added to 40 CFR Part 52 requiring Penn DOT to forward to the Pennsylvania Department of Environmental Resources, on a quarterly basis, reports which list for each of the affected counties the numbers of gallons of each class of asphalt used. This information will be used to compute the total NMHC usage in each county. The first quarterly reports will be submitted in October 1977 for the period between July 1, 1977 and September 30, 1977. Copies of all reports will also be forwarded to Region III, EPA, and the NMHC emissions data will be entered into the EPA National Emissions Data System.

After evaluation of the State's submittal, the Administrator has determined that the Pennsylvania revision meets the requirements of the Clean Air Act (as amended, 1977), the EPA December 21, 1976 Interpretative Ruling and 40 CFR Part 51. Accordingly, this revision is approved as a revision to the Pennsylvania Implementation Plan.

(Sec. 110, sec. 301, Clean Air Act, as amended, (42 U.S.C., 1857c-5, 1857g))

Dated: September 29, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40, Code of Federal Regulations, is amended as follows:

Subpart NN—Pennsylvania

1. Section 52.2020(c), paragraph (15) is revised to read as follows:

§ 52.1120 Identification of plan.

(c) The plan revision listed below was submitted on the dates specified . . .

(15) Pennsylvania Department of Transportation change to section 7.5.9.8 of the Paving Maintenance Manual Creditable as emission offsets submitted by the Secretary of the Pennsylvania Department of Environmental Resources on July 15, 1977, as addenda to the Pennsylvania Air Quality Implementation Plan.

2. Section 52.2054 is added to read as follows:

§ 52.2054 Control of asphalt paving material.

(a) Notwithstanding any provisions to the contrary in the Pennsylvania Implementation Plan, the Pennsylvania Department of Transportation shall restrict the annual usage of asphalts to the limits listed below in the following sixteen county area of Pennsylvania: Allegheny, Armstrong, Beaver, Butler, Cambria, Clarion, Fayette, Green, Indiana, Jefferson, Lawrence, Mercer, Somerset, Venango, Washington, and Westmoreland Counties:

(1) No more than twenty percent of the total amount of liquid bituminous asphalt paving material used shall be cutback asphalt; and

(2) No more than 2,615,000 gallons of cutback asphalts shall be used, of which no more than 1,400,000 gallons may be used for dust palliative work on roadways and shoulders; and

(3) No more than 2,500,000 gallons total of emulsion Class E-4 and Class E-5 shall be used unless an equivalent reduction in the use of cutbacks is made to balance the additional hydrocarbon emissions from emulsions.

(b) The Pennsylvania Department of Transportation is required to submit to the Pennsylvania Department of Environmental Resources, on a quarterly basis, reports which list for each of the affected Counties the number of gallons of each class of asphalt used. The first quarterly reports will be submitted in October 1977 for the period between July 1, 1977, and September 30, 1977. Copies of all reports will also be forwarded to Region III, EPA.

SUBCHAPTER N—EFFLUENT LIMITATIONS
GUIDELINES FOR EXISTING SOURCES AND
NEW SOURCE PERFORMANCE STANDARDS
[FRL 802-1]

PART 432—INDEPENDENT RENDERING
INDUSTRY

Effluent Limitations and New Source
Performance Standards

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This document sets forth final regulations establishing effluent limitations and new source performance standards for processing plants in the in-

dependent rendering industry. The independent renderer recovers salable products such as fats, oils and proteinaceous meal from discarded animal materials. The regulations were proposed on May 23, 1977 (42 FR 26226) after EPA completed a restudy of the industry as directed by the U.S. Court of Appeals for the Eighth Circuit. The regulations will make certain pollutant limitations for existing plans (1983 requirements) less stringent and will make requirements for new plants more stringent than those originally promulgated. The final rule does not differ from the proposed rule, except that this regulation adds a new § 432.105(b). This corrects an omission in the proposed regulation and restores the allowance for cattle hide curing contained in the original new source regulation. The hide curing allowance for BAT is contained in § 432.103(b) of the original regulation which is unchanged.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CON-
TACT:

Harold B. Coughlin, Effluent Guidelines Division (WH-552), Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202-426-2560).

SUPPLEMENTARY INFORMATION:
BACKGROUND AND BASIS FOR AMENDMENTS

On May 23, 1977 the Environmental Protection Agency (EPA) published a proposed rule (42 FR 26226) to revise the present standards of performance for new sources (NSPS) and those portions of the regulations which set forth effluent limitations guidelines representing best available technology economically achievable (BATEA) for existing sources.

The above action was taken in part in response to a court order. The new source performance standards for the renderer subcategory of the Meat Products and Rendering Processing Point Source Category, published on January 3, 1975 and codified as 40 CFR 432.105 (Subpart J) were remanded to the Agency for further study on August 30, 1976 by the U.S. Court of Appeals for the Eighth Circuit (*National Renderers Association, et al., v. EPA, et al.*, 541 F.2d 1281). The BATEA limitations for this subcategory were not remanded but nonetheless were also reevaluated by the Agency.

EPA has reevaluated the technical and economic information on which the original regulations were based, and has reviewed new information in both areas. The rules proposed on May 23 reflected this substantial reevaluation.

LEGAL AUTHORITY

The original regulations were promulgated and today are amended pursuant to sections 301(b), 304(b) and 306 of the Federal Water Pollution Control Act Amendments of 1972.

ECONOMIC IMPACT ANALYSIS

This section summarizes the economic and inflationary impacts of the BATEA

effluent limitations guidelines and the new source performance standards on the independent rendering processing point source category.

The Agency has considered the economic impact of the internal costs (investment plus cost of operation, maintenance, capital and depreciation) and external costs (price increases and impeded growth). For each model rendering plant, the following impact indicators were analyzed: required price increases, after-tax income, return on sales and invested capital.

Following is the impact analysis of BATEA regulations on existing plants and a condensed summary of the impact of NSPS standards (a more detailed summary of the impact of NSPS is contained in the preamble to the proposed regulations).

The final BATEA requirements for BOD₅, TSS and ammonia are less stringent than those originally promulgated. The investment and annual costs necessary to meet the amended BATEA requirements in almost all cases are lower than those found for the original limitations. The cost involved to reach BATEA requirements is for internal controls in the form of air-cooled or shell and tube condensers. The impact of the BATEA regulations is expected to be minimal for the industry. No plant closures due to BATEA regulations are projected. Required price increases and effects on employment, growth, and international trade are expected to be minimal. The estimated total industry investment to install BATEA technology is expected to be no more than \$4.5 million. This assumes that all plants are currently meeting the BPCTCA regulations. Annual costs are projected to be \$591,000.

Small plants: Small plants (less than 75,000 pounds of raw material per day) are exempted from BPCTCA and BATEA regulations and NSPS. Therefore, an economic impact analysis was not performed for these model plants.

Medium batch and continuous plants. Medium batch plants process 75,000 to 250,000 pounds of raw material per day, while medium continuous plants process 250,000 to 350,000 pounds of raw material per day. Technology investment costs ranged from \$69,000 for the batch plant to \$96,000 for the continuous plants. Annual costs were \$12,000 and \$16,000, respectively, for the two model plants. Decreases in after-tax income were 10 percent for the continuous model plants and 12 percent for the batch model plants. The packinghouse batch model plant showed the greatest percentage decrease, with a \$13,000 reduction from \$105,000. The packinghouse batch model plant also had the greatest percentage decrease in after-tax return on sales, declining from 5.7 percent to 4.7 percent. After-tax return on sales for the other medium model plants showed similar reductions. After-tax returns on invested capital declined between 17 percent and 20 percent. The medium poultry batch plant had the greatest percentage decline, decreasing from 33.5

percent to 26.8 percent. However, these declines in financial conditions were not judged to result in closures for the medium plants.

Large batch and continuous plants. Technology costs ranged from \$148,000 for the large batch plants to \$165,000 for the large continuous plant. Annual costs were \$24,000 for the batch plant and \$27,000 for the continuous plant. After-tax income for the packinghouse batch plant decreased from \$337,000 to \$318,000, while after-tax return on sales declined from 5.4 percent to 4.7 percent. After-tax returns on invested capital for the packinghouse batch plant decreased from 25.3 percent to 20.4 percent, while the decline in net present value was 5 percent. The other large plants showed similar, but somewhat smaller, declines. Reductions in profitability are not projected to cause plant closures.

The external cost analysis showed that the required price increases to maintain profitability similar to that before installation of pollution control equipments to be minimal. The maximum price increase required to maintain pre-BAT conditions was 1.4 percent for the medium poultry batch and continuous plants. Impacts of this regulation on employment and international trade will be insignificant.

The NSPS requirements are more stringent than those originally promulgated for BOD₅, TSS, oil and grease, and ammonia. The impact of the standards is expected to be minimal for the industry. It is anticipated that no construction would be impeded by the imposition of the pollution control costs. Plants that would be built in the absence of pollution control costs would also be built in the presence of such costs. Required price increases are expected to be minimal, as are the effects on employment, growth and international trade.

An inflationary impact assessment is not necessary because this regulatory action would not exceed any of the following four (4) criteria established by the Administrator:

1. Annualized costs will total more than \$100 million.
2. Total additional cost of production is more than 5 percent.
3. Net national energy consumption will be increased by the equivalent of 25,000 barrels of oil a day.
4. Additional annual demands for scarce resources is increased more than 3 percent.

PUBLIC COMMENT

The public was provided 30 days within which to submit suggestions and criticisms of the proposal. Two commenters responded, the National Renderers Association (NRA) and the North Carolina Department of Natural and Economic Resources.

No comments were received regarding limitations for BOD₅, TSS, pH and fecal coliform. No adverse comments were received relative to the economic impact analysis or with respect to making the requirements for both BATEA and NSPS equivalent.

The NRA requested that oil and grease not be limited because (1) control of BOD₅ to the levels specified in the proposed regulations will result in reduction of oil and grease to the proposed effluent levels, (2) oil and grease from rendering operations is not subject to pretreatment limitations when discharged to publicly owned treatment works (POTW) which have typical biological treatment systems, and (3) monitoring for oil and grease will impose extra operating costs which provide no pollution control benefits.

Oil and grease is a major constituent of rendering wastes. It is a significant parameter in measuring materials recovery and effectiveness of waste treatment systems. The pollutant has physical and chemical properties that are environmentally significant. For example, it can form ugly scums on stream banks and objectionable surface slicks on water. Soluble and emulsified material may adhere to the gills of fish or coat and destroy algae and other plankton. Chemically, its constituents vary in composition and have different degrees of degradability not readily accounted for in the BOD₅ test. For the above reasons, it has been determined that monitoring and control of oil and grease are necessary.

In answer to the NRA comment, the Agency considered the use of BOD₅ as a surrogate for oil and grease. However, analyses of treated effluents from exemplary plants as listed in tables V-1 and V-2 of the Supplement to the Development Document showed no relationship between the two. Further, efficiency of oil and grease removal could not be predicted from BOD₅ and TSS removal efficiencies. In addition, BOD₅ test results cannot be considered to represent the total amount of oil and grease present. The accepted method for determining and limiting oil and grease is by Freon extraction. This test is designed to reflect total oil and grease of any composition. The short term BOD₅ test measures only a part of oil and grease.

Use of BOD₅ as a surrogate was also considered inappropriate because the preparation and dilution techniques used in the BOD₅ test preclude obtaining representative amounts of oil and grease. Also, composite sampling as practiced for obtaining BOD₅ samples is different from sampling for oil and grease (see *Standards Methods for the Examination of Water and Waste Water*).

The pretreatment issue raised by the commenter is not germane to effluent limitations for the direct discharger. The oil and grease in rendering wastes sent to POTW is intermixed and diluted with other wastes. That sent to on-site treatment plants is not. Pretreatment regulations concern the levels of pollutants present in industrial waste waters prior to municipal treatment. These regulations, on the other hand, concern the levels of pollutants in waste waters after treatment.

The commenter also stated that monitoring for oil and grease will result in extra costs with no attendant benefits.

Typically, the costs for monitoring oil and grease are very nominal and would be between 40 and 80 dollars per month as discussed in the Supplement to the Development Document. This cost is comparable to that for testing BOD₅ and is not a burden for the size of operations involved. Data on oil and grease are very significant to plant managers, treatment plant operators and regulatory agencies. It signals the effectiveness of in-plant equipment used to remove reusable oil and grease from process waste and the end-of-pipe treatment system. If the amount of oil and grease in the discharge from a large renderer increased from 10 to 100 milligrams per liter, approximately 15,000 pounds of potential product would be lost each year. The data also provide regulatory agencies specific information on a pollutant whose physical characteristics can cause stream and plant operational problems.

Comments from the North Carolina Department of Natural and Economic Resources said the Department concurred with the proposed rules. The Department reported that sample data on several rendering plants in the state do not show a correlation between BOD₅ and oil and grease. However, the Department noted that there would be no objection to a procedure for withdrawing oil and grease monitoring requirements on a case-by-case basis where correlation can be demonstrated.

EPA approval for use of alternate test procedures can be obtained, as explained in the Amendments to the Guidelines Establishing Test Procedures for the Analysis of Pollutants, 40 CFR Part 136 (41 FR 52781). Such approval can be obtained for specific NPDES permit holders or for nationwide use.

CONCLUSION

As a result of the above review along with information previously available to the Agency, it has been determined that the oil and grease limitations should be retained in the regulation. It is essential to have a direct measure and limitation for this pollutant, rather than rely on an indirect limit such as BOD₅, especially when there is no established correlation between oil and grease and BOD₅ values in rendering wastes.

All available information indicates the BOD₅, TSS, pH and fecal coliform limitations as proposed are appropriate.

PUBLICATION OF INFORMATION

In conformance with Section 304(e) of the Act, the manual supporting this regulation titled "Supplement to the Development Document for Effluent Limitations Guidelines and New Source Performance Standards for the Rendering Segment of the Meat Products and Rendering Processing Point Source Category" will be published and will be available for purchase from the Government Printing Office, Washington, D.C. 20402, for a nominal fee.

Copies of the economic analysis document supporting the regulation titled "Economic Analysis of the Effluent Limitations Guidelines and New Source Performance Standards for the Independent

Rendering Segment of the Meat Products and Rendering Processing Point Source Category" and "Economic Analysis of the Effluent Limitations Guidelines for BATEA for the Independent Rendering Segment of the Meat Industry" will be available from the National Technical Information Service, Springfield, Va. 22151.

SMALL BUSINESS ADMINISTRATION LOANS

Section 8 of the FWPCA authorizes the Small Business Administration, through its economic disaster loan program, to make loans to assist any small business concerns in effecting additions to or alterations in their equipment, facilities, or methods of operation so as to meet water pollution control requirements under the FWPCA, if the concern is likely to suffer a substantial economic injury without such assistance.

For further details on this Federal loan program, write to EPA, Office of Analysis and Evaluation, WH-586, 401 M Street, S.W., Washington, D.C. 20469.

As a result of the data, information, and comments assembled for this study of the industry, the new source performance standards and the effluent limitations guidelines based on the use of best available technology economically achievable for this industry (40 CFR Part 432, Subpart J) are to be amended as set forth below.

Dated: September 29, 1977.

DOUGLAS M. COSTLE,
Administrator.

Subpart J—Rendering Subcategory

1. § 432.103(a) is revised to read as follows:

§ 432.103 Effluent limitations guidelines representing the degree of effluent reduction attainable by the application of the best available technology economically achievable.

(a) Subject to the provisions of paragraph (b) of this section, the following limitations establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a point source subject to the provisions of this subpart after application of the best available technology economically achievable:

Effluent characteristics	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 Kg of raw material)	
BOD ₅	0.18.....	0.09
TSS.....	0.22.....	.11
Oil and grease.....	0.10.....	.05
Ammonia.....	0.14.....	.07
pH.....	Within the range 6.0 to 9.0	
Fecal coliforms.....	Maximum at any time 400 mpn/100 ml.	

Effluent characteristics	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	English units (Pounds per 1,000 lb of raw material)	
BOD ₅	0.18.....	0.09
TSS.....	0.22.....	.11
Oil and grease.....	0.10.....	.05
Ammonia.....	0.14.....	.07
pH.....	Within the range 6.0 to 9.0	
Fecal coliforms.....	Maximum at any time 400 mpn/100 ml.	

2. Section 432.105 is revised to read as follows:

§ 432.105 Standards of performance for new sources.

(a) Subject to the provisions of paragraph (b) of this section, the following standards of performance establish the quantity or quality of pollutants or pollutant properties, controlled by this section, which may be discharged by a new source subject to the provisions of this subpart:

Effluent characteristics	Effluent limitations	
	Maximum for any 1 day	Average of daily values for 30 consecutive days shall not exceed—
	Metric units (kilograms per 1,000 Kg of raw material)	
BOD ₅	0.18.....	0.09
TSS.....	0.22.....	.11
Oil and grease.....	0.10.....	.05
Ammonia.....	0.14.....	.07
pH.....	Within the range 6.0 to 9.0	
Fecal Coliforms.....	Maximum at any time 400 mpn/100 ml	
	English units (pounds per 1,000 lb of raw material)	
BOD ₅	0.18.....	0.09
TSS.....	0.22.....	.11
Oil and grease.....	0.10.....	.05
Ammonia.....	0.14.....	.07
pH.....	Within the range 6.0 to 9.0	
Fecal coliforms.....	Maximum at any time 400 mpn/100 ml.	

(b) The standards given in paragraph (a) of this section for BOD₅ and TSS are derived for a renderer which does no cattle hide curing as part of the plant activities. If a renderer does conduct hide curing, the following empirical formulas should be used to derive an additive adjustment to the standards for BOD₅ and TSS.

Title 45—Public Welfare

CHAPTER II—SOCIAL AND REHABILITATION SERVICE (ASSISTANCE PROGRAMS), DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 250—ADMINISTRATION OF MEDICAL ASSISTANCE PROGRAMS

Payment for Reserved Beds in Institutions
Correction.

In FR Doc. 77-26758 appearing on page 46536 in the issue for Friday, September 16, 1977, on page 46537, § 250.30(d), (2) was revised and reads in its entirety as follows:

§ 250.30 Reasonable charges.

(d) Federal financial participation.

(2) Payments during recipient's absence from institution. Federal financial participation is available in payments made to reserve a bed during a recipient's temporary absence from an inpatient facility. For purposes of this paragraph:

(i) The State plan must provide for such payments and must indicate any limitations placed on the reserved bed policy, and

(ii) The patient's plan of care must provide for absences other than for hospitalization.

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 20727; RM-2557; FCC 77-668]

PART 73—RADIO BROADCAST SERVICES
Television Broadcast Stations in Riverside and Santa Ana, California; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: This Order makes the re-assignment of TV Channel 40 from Riverside, California, to Santa Ana, California, effective and terminates the proceeding. A previous Report and Order in this docket, 42 FR 41125, August 15, 1977 discussed the reasons for this action but final disposition was postponed pending Mexican concurrence. Such concurrence has been obtained and the action is now final.

EFFECTIVE DATE: November 9, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau, (202-632-7792).

SUPPLEMENTARY INFORMATION:

In the matter of amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations, (Riverside and Santa Ana, California), Docket No. 20727, RM-2557, Order (Proceeding Terminated).

Adopted: September 21, 1977.

Released: September 30, 1977.

1. On July 27, 1977, the Commission adopted a Report and Order, 42 FR 41125 (Aug. 15, 1977), in this proceeding which reassigned UHF TV Channel 40 from Riverside, California, to Santa Ana, California. The action was taken subject to receipt of concurrence from the Mexican government and was to become effective after adoption of an Order terminating this proceeding (see para. 15 of the Report and Order).

2. By letter of August 15, 1977, the Mexican government gave notification of its concurrence with the assignment of the channel to Santa Ana.

3. Accordingly, it is ordered, effective November 9, 1977, Section 73.606(b) of the Commission's Rules is amended with respect to the following communities:

City	Channel No.
Riverside, Calif.	46
Santa Ana, Calif.	40, *50-

4. It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc. 77-29431 Filed 10-5-77; 8:45 am]

[6712-01]

[Docket No. 20916; RM-2685; RM-2707]

PART 73—RADIO BROADCAST SERVICES
FM Broadcast Stations in Santa Barbara and Ventura, Calif.; Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

¹ Authority for this action is found in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended.

SUMMARY: This action assigns Channel 296A to Ventura, Calif., as its third FM channel and substitutes noncommercial educational Channel 220 for Channel 218 at Santa Barbara, Calif. The Ventura assignment intermixes classes of channels there but the Class A proponent expresses a willingness to compete. The Santa Barbara substitution increases the coverage area of Station KCSB-FM and eliminates a short-spacing of 90 kilometers (56 miles).

EFFECTIVE DATE: November 11, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mark N. Lipp, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION: In the matter of amendment of §§ 73.202(b) and 73.504(a), Table of Assignments, FM Broadcast Stations (Santa Barbara and Ventura, Calif.), Docket No. 20916, RM-2685, RM-2707. Report and order, (Proceeding Terminated).

Adopted: September 27, 1977.

Released: September 30, 1977.

1. The Commission has before it for consideration its Notice of Proposed Rule Making, 41 FR 43196 (Sept. 30, 1976) adopted September 16, 1976, and comments thereto (See also 41 FR 49859, Nov. 11, 1976). The Notice proposed in the alternative the assignment of commercial FM Channel 221A to Ventura, Calif., or the substitution of noncommercial educational Channel 220 for Channel 218 at Santa Barbara, Calif. Comments have been submitted by the Ventura petitioners, Charles V. Martin and John A. Popejoy and by the Santa Barbara petitioner, the University of California. No oppositions have been submitted.

2. Ventura (pop. 57,964)² is the seat of Ventura County (pop. 378,497). It has two AM stations, KVEN and KBBQ (both fulltime) and two Class B FM stations, KBBY (Channel 236) and KNAY (Channel 264). Supporting demographic data for the assignment of a third FM channel were set forth in the Notice and will not be repeated here.

3. Santa Barbara (pop. 70,215) is the seat of Santa Barbara County (pop. 264,324). A change in frequencies for the only non-commercial educational station in Santa Barbara is sought by the University of California to solve a short-spacing problem which existed prior to the adoption of Section 73.504³

¹ Due to mileage separation requirements, stations on Channel 221A and Channel 220 must be separated by 105 kilometers (65 miles). Santa Barbara is 66 kilometers (41 miles) from Ventura.

² Population data are taken from the 1970 U.S. Census, as corrected.

³ In accordance with the U.S.-Mexican Treaty, Section 73.504 (then Section 73.507) was adopted to set forth a Table of non-commercial educational FM assignments within approximately 320 kilometers (199 miles) of the border.

(then Section 73.507) of the Commission's Rules. The University of California's Station KCSB-FM (Channel 218) is short spaced by 90 kilometers (56 miles) to Station KUSC (Channel 218), Los Angeles, California. Modification of the Station KCSB-FM license to specify the new channel is also requested.

4. In view of the conflict in the two proposals, the Notice invited suggestions regarding other channels which could be used for either of the two communities. In response several channels were suggested for assignment at both communities and it was discovered by the Commission's staff that Channel 296A can be assigned at Ventura without affecting any other existing FM assignments. The assignment of this channel will also make possible the substitution of Channel 220 for Channel 218 at Santa Barbara as requested.

5. The comments of the respective parties primarily address the comparative factors involved in choosing between an additional Ventura FM channel or an increase in service from the Santa Barbara station through removal of the short-spacing problem. The availability of Channel 296A makes it possible to respond to both needs.

6. The assignment of Channel 296A will result in intermixture at Ventura, but as previously discussed in the Notice, this factor does not represent a bar to the assignment since there is a willingness to utilize the Class A channel in competition with two existing Class B stations. The assignment will provide a third FM station for this sizable community which has shown substantial growth in recent years.

7. The substitution of Channel 220 at Santa Barbara is also desirable since it is anticipated that the resulting gain in the Santa Barbara coverage area would include some 3,224 square kilometers (1,240 square miles). Also it would be possible for Station KUSC at Los Angeles to gain in coverage area by some 10 percent, as now could apply to operate non-directionally. Therefore, we find it to be in the public interest to substitute Channel 220 at Santa Barbara. No other interest has been expressed in the proposed Santa Barbara channel, and in such circumstances there is no impediment to the modification of the license of Station KCSB-FM to specify the new channel.

8. Mexican concurrence has been obtained for both channel assignments.

9. Accordingly, pursuant to authority contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281(b)(6) of the Commission's Rules, it is ordered, That effective November 11, 1977, the FM Table of Assignments, Section 73.202(b) of the Commission's Rules is amended with respect to the community listed, as follows:

City	Channel No.
Ventura, Calif.	236, 264, 296A

10. It is further ordered, That effective November 11, 1977, the noncommercial

educational FM Table of Assignments, Section 73.504(a) of the Commission's Rules IS AMENDED with respect to the community listed, as follows:

City	Channel No.
Santa Barbara, Calif.	220

11. It is further ordered, That effective November 11, 1977, pursuant to authority contained in Section 316 of the Communications Act of 1934, as amended, the license of Station KCSB-FM, Santa Barbara, Calif., is modified to specify operation on Channel 220. In addition:

(a) At least 30 days before operating on Channel 220, the University of California shall submit to the Commission the technical information normally required of an applicant for a construction permit on Channel 220.

(b) At least 10 days prior to commencing operations on Channel 220, the University of California shall submit the measurement data required of an applicant for an FM broadcast station license; and

(c) The University of California shall commence operation on Channel 220 only with prior Commission authorization.

12. It is further ordered, That this proceeding is terminated.

(Secs. 4, 5, 303, 48 Stat., as amended, 1066, 1068, 1082; 47 U.S.C. 154, 155, 303)

FEDERAL COMMUNICATIONS COMMISSION,
MARTIN I. LEVY,
Acting Chief,
Broadcast Bureau.

[6712-01]

[Docket No. 21180; FCC 77-661]

PART 87—AVIATION SERVICES

Permitting Aeronautical Enroute Stations Which Are a Part of an Off-Set Carrier Network to Identify by the Location of Their Principal Control Point

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This rule permits aeronautical enroute stations to identify by the location of their control points. Because of technical and operational difficulties, it is not practical for each station along an aircraft route to be individually identified by presently allowable methods.

EFFECTIVE DATE: November 9, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

R. P. DeYoung, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION: In the matter of amendment of § 87.115 (g) of the rules to permit aeronautical enroute stations which are a part of

an off-set carrier network to identify by the location of their principal control point (Docket No. 21180). Report and Order (proceeding terminated).

Adopted: September 21, 1977.

Released: September 30, 1977.

1. On April 1, 1977, the Commission released a Notice of Proposed Rule Making in the captioned matter (FCC 77-223) (42 FR 19498, April 14, 1977). The time for filing of comments and reply comments has passed. Comments were filed by Aeronautical Radio Inc. (ARINC) and by the Aircraft Owners and Pilots Association (AOPA).

2. The comments favored adoption of the rule as proposed. ARINC noted variations in wording between the text of the Notice and of the rule as proposed in the appendix. These variations concerned the use of the words "off-set" to characterize enroute networks and of the word "principal" to characterize control point. The Commission intended to permit this method of identifying enroute networks notwithstanding the techniques used on such networks.

3. Because some networks have more than one authorized control point and because authorized control points are listed on the station license, ready location of a station in a network is possible. Consequently, station identification by means of any authorized control point will be permitted. For these reasons, the rule will be adopted as proposed in the Appendix.

4. Accordingly, it is ordered, That the Commission's rules are amended, effective November 9, 1977, as set forth below. Authority for this action is contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

5. It is further ordered, That this proceeding is terminated.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 87 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

Section 87.115(g) is amended to read as follows:

§ 87.115 Station identification.

(g) A land station in the aviation services may use radio station call letters, its location, or the name of the city, area, or airdrome which it serves together with such additional identification as may be required. An aeronautical enroute station which is a part of multistation network may also be identified by the location of its control points.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Agassiz National Wildlife Refuge, Minnesota, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening of hunting of Agassiz National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 5, 1977 to November 20, 1977 and November 26, 1977 to November 28, 1977, all dates inclusive from sunrise to sunset.

FOR FURTHER INFORMATION CONTACT:

Joseph Kotok, Refuge Manager, Agassiz National Wildlife Refuge, Middle River, MN 56737, (218) 449-4115, or Regional Director, U.S. Fish & Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

SUPPLEMENTARY INFORMATION: § 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of white tailed deer is permitted on the Agassiz National Wildlife Refuge, Minnesota in all areas except those designated by closed area signs.

The open area comprises approximately 57,600 acres and is delineated on a map available at the Refuge Head-

quarters. Hunting shall be in accordance with all applicable State regulations covering the hunting of deer.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 28, 1977.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

JOSEPH KOTOK,
Refuge Manager.

SEPTEMBER 29, 1977.

PART 32—HUNTING

Opening of Agassiz National Wildlife Refuge, Minnesota, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Agassiz National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: December 3, 1977 through December 11, 1977, all dates inclusive from sunrise to sunset.

FOR FURTHER INFORMATION CONTACT:

Joseph Kotok, Refuge Manager, Agassiz National Wildlife Refuge, Middle

River, MN 56737, (218) 449-4115, or Regional Director, U.S. Fish & Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of moose on the Agassiz National Wildlife Refuge, Minnesota, is permitted on all areas except those designated by closed area signs. This open area comprises approximately 57,600 acres and is delineated on a map available at refuge headquarters at Middle River, Minnesota and from the Regional Director. Hunting shall be in accordance with all applicable State regulations subject to the following special conditions:

1. All parties hunting Agassiz National Wildlife Refuge are required to report to the Agassiz check station located 11 miles east of Holt, Minnesota, before they begin to hunt.

2. All moose killed on Agassiz Refuge must be registered at the Agassiz Refuge check station within 48 hours of the kill.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32, and are effective through December 11, 1977.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

JOSEPH KOTOK,
Refuge Manager.

SEPTEMBER 29, 1977.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 989]

RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

Notice of Reopening of Time for Receipt of Written Data, Views, or Arguments

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The notice of proposed rulemaking provides additional time for the receipt of written comments on the proposal to add Golden Seedless and Dipped Seedless raisins under a weight dockage system for immaturity. A comment objecting to the inclusion of these raisins under this system was submitted. The reopening of the comment period will give interested persons an opportunity to reconsider the proposal in light of the comment received.

DATES: Comments must be received by October 17, 1977.

ADDRESSES: Comments should be addressed to the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, D.C. 20250. Two copies of all written comments should be submitted, and they will be available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetables Division, Agricultural Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250 (202-447-3545).

SUPPLEMENTARY INFORMATION: Pursuant to the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674) a notice of proposed rulemaking was published in the August 19, 1977, issue of the FEDERAL REGISTER (42 FR 41867) regarding proposed changes to improve administrative operating procedures under the Federal marketing order for California raisins (7 CFR Part 989; 42 FR 37200). The proposal was based on a recommendation of the Raisin Administrative Committee.

The notice afforded interested persons an opportunity to submit written data, views, or arguments. A raisin handler submitted a comment objecting to the proposed change in § 989.210 of Subpart—Supplementary Regulations (7 CFR 989.201-989.231) to include

Golden Seedless and Dipped Seedless raisins under a weight dockage system for immaturity. Currently, this system is applicable only to Natural (sun-dried) Seedless raisins.

The commentator's main objection was that Golden Seedless and Dipped Seedless raisins do not have the same stemming characteristics as do Natural (sun-dried) Seedless raisins because they are stickier. He contended that these two artificially dried raisins are therefore much less free flowing during the stemming operation and more difficult to process in removal of immature raisins than sun-dried raisins. The commentator stated that through their experience in past years they often failed minimum processed inspection standards for substandard raisins when running lots that were high in substandard prior to processing. Thus, it appears that the risk of failure is present regardless of the care taken during processing.

It was further contended that the proposed change transfers a grower problem to the handler. The problem results from the grower making raisins from immature grapes. The commentator believes that the more the maturity standard is relaxed, the more likely will be the tendency by growers to pick earlier—hence, before the grapes are ready to be picked—and that this will have a disadvantageous market effect.

Therefore, to give interested persons opportunity to reconsider the proposal in light of the comment, the time for receipt of written data, views, or arguments on the proposal to include Golden Seedless and Dipped Seedless raisins under the weight dockage system prescribed in § 989.210 is reopened. Any comments must be received by October 17, 1977.

Dated: September 30, 1977.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Parts 210, 211 and 212]

EXEMPTION OF MOTOR GASOLINE FROM THE MANDATORY PETROLEUM ALLOCATION AND PRICE REGULATIONS

Deferral of Action on Proposal

AGENCY: Federal Energy Administration.

ACTION: Notice.

SUMMARY: The Federal Energy Administration gives notice that it has elected to defer taking action on its proposal to exempt motor gasoline from the Mandatory Petroleum Allocation and Price Regulations (42 FR 40915, August 12, 1977). This will permit this issue to be evaluated under procedures that become effective October 1, 1977, which afford the Federal Energy Regulatory Commission jurisdiction to consider a proposal by the Secretary of Energy to take such action.

FOR FURTHER INFORMATION CONTACT:

Everard A. Marseglia, Jr. (Office of General Counsel), Federal Energy Administration, Room 5138, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9567).

SUPPLEMENTARY INFORMATION: On August 8, 1977, FEA issued a Notice of Proposed Rulemaking and Public Hearing to amend 10 CFR Parts 210, 211, and 212 to exempt gasoline on November 1, 1977 from the Mandatory Petroleum Allocation and Price Regulations, and to establish a transitional assignment program for gasoline to alleviate possible supply dislocations following deregulation. This proposal followed a preliminary analysis by FEA of the impact of regulation of gasoline pursuant to the Emergency Petroleum Allocation Act of 1973, as amended ("EPAA", Pub. L. 93-159), and FEA's tentative conclusion that gasoline should be exempted from the Allocation and Price Regulations.

FEA proposed two amendments to be submitted as energy actions to Congress in accordance with the provisions of Section 12 of EPAA, Section 551 of the Energy Policy and Conservation Act (Pub. L. 93-163), and section 102 of the Energy Conservation and Production Act (Pub. L. 94-385), to exempt gasoline, effective November 1, 1977, from the application of the Allocation and Price Regulations,

thereby converting the EPAA to standby authority with respect to the allocation and pricing of motor gasoline.

A National hearing was held in Washington, D.C. on September 7, 1977, and regional hearings were held in Atlanta, New York, Chicago, Dallas, Denver, and San Francisco, during the period September 6 through September 8. Written comments have also been received by FEA.

Section 402(c)(1) of the Department of Energy Organization Act ("DOEOA"), Pub. L. (5-91) provides:

Pursuant to the procedures specified in section 404 and except as provided in paragraph (2), the Commission shall have jurisdiction to consider any proposal by the Secretary to amend the regulation required to be issued under section 4(a) of the Emergency Petroleum Allocation Act of 1973 which is required by section 8 and 12 of such Act to be transmitted by the President to, and reviewed by, each House of Congress, under section 551 of the Energy Policy and Conservation Act.

On September 13, 1977, the President signed Executive Order 12099 (42 FR 46267, September 15, 1977), establishing October 1, 1977 as the effective date for the Department. Accordingly, as of October 1, 1977, the Commission will have jurisdiction to consider a proposal by the Secretary to decontrol gasoline, as it involves amendments that must be submitted for Congressional review.

Final action with respect to this proposal will not be taken by FEA prior to the October 1, 1977 effective date of the Department inasmuch as FEA has concluded that the data and comments received in connection with the proposal should be evaluated under the procedures that will become effective October 1, 1977. This is particularly appropriate inasmuch as there does not appear to be pressing need for final action before October 1.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYER,
Acting General Counsel,
Federal Energy Administration.

[3128-01]

[10 CFR Part 211]

ENTITLEMENTS PROGRAM TO REVISE FACTOR USED TO DETERMINE ENTITLEMENT VALUE OF NAPHTHA FEEDSTOCKS IMPORTED INTO PUERTO RICO

Proposed Amendments

AGENCY: Federal Energy Administration.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Federal Energy Administration ("FEA") hereby gives notice of a proposed rulemaking and public hearing to amend its domestic crude oil allocation ("entitlements") program (10 CFR 211.67), by revising the factor which is used in calculating the imputed cost of domestically produced

naphtha for purposes of determining the entitlement value awarded with respect to the naphtha imports of firms operating petrochemical plants in Puerto Rico. FEA believes that this revision is necessary to compensate more accurately under the entitlements program for the feedstock cost disadvantage of the petrochemical plants in Puerto Rico, which is reliant on imported naphtha, as compared with mainland petrochemical producers that have access to naphtha produced by domestic refiners.

DATES: Comments by November 15, 1977, 4:30 p.m.; Requests to speak by October 21, 1977, 4:30 p.m.; Hearing date: November 3, 1977, 9:30 a.m.

ADDRESSES: Comments and requests to speak to: Executive Communications, Room 3317, Federal Energy Administration, Box PX, Washington, D.C. 20461; Hearing location: Room 2105, 2000 M Street NW., Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION:

- I. Background.
- II. Proposed Amendments.
- III. Specific Comments Requested.
- IV. Comment Procedures: A. Written Comments;
- B. Public Hearing: 1. Request Procedure;
2. Conduct of the Hearing.

I. BACKGROUND

On July 20, 1976, FEA adopted amendments to 10 CFR § 211.67 to include within its entitlements program naphtha feedstocks imported into Puerto Rico for petrochemical use (41 FR 30321; July 23, 1976). These amendments were intended to alleviate the competitive disadvantage of the Puerto Rican petrochemical industry which, because of its dependence upon imported naphtha for feedstock use, had been adversely affected by increases in world crude prices taken in conjunction with the imposition of domestic price controls.

In the 1960's, the Federal Government encouraged the establishment and development of refining and petrochemical industries in Puerto Rico. The viability of the petrochemical industry was premised upon the availability of low cost imported feedstock, particularly naph-

tha from Caribbean refiners, to provide a feedstock cost advantage over petrochemical producers on the mainland. Such a cost advantage was necessary in order to offset higher shipping and other costs (including necessary investments) incurred in starting up the industry in the relatively underdeveloped economy of Puerto Rico.

Since its inception in the 1960's, the petrochemical industry in Puerto Rico has grown to the extent that it now constitutes an important segment of total United States petrochemical capacity. However, as FEA noted in the proposed rulemaking relating to the inclusion of naphtha feedstocks imported into Puerto Rico under the entitlements program (41 FR 21936; May 28, 1976), the Puerto Rican petrochemical industry was at a severe competitive disadvantage due to its reliance upon imported feedstocks:

The imposition of the Arab oil embargo and the consequent increases in world crude prices dramatically increased feedstock costs for the entire Puerto Rican petrochemical industry. However, while world prices were rising, the imposition of domestic price controls kept the overall feedstock costs of domestic firms much lower than those of import dependent Puerto Rican companies and placed these companies at a severe competitive disadvantage.

The elimination of the supplemental import fee on crude oil on December 22, 1975 increased the disparity between domestic and imported crude oil costs and placed the Puerto Rican based petrochemical industry at an even greater competitive disadvantage than previously existed. In addition, the domestic crude oil price roll back mandated by the pricing provisions of the Energy Policy and Conservation Act, which were implemented on February 1, 1976, has also contributed to competitive imbalances with respect to Puerto Rican firms. (41 FR at 21936-21937.)

To alleviate this situation, FEA amended the entitlements program to permit Puerto Rican petrochemical producers to receive entitlement benefits for imported naphtha feedstocks. Section 211.67(d)(5) of the amended regulations permits inclusion in a refiner's monthly crude oil runs to stills of the total number of barrels of naphtha imported into Puerto Rico utilized as a petrochemical feedstock at a petrochemical plant owned or operated by that refiner. A firm other than a refiner that owns a petrochemical plant in Puerto Rico is also eligible to receive entitlements with respect to naphthas processed at that plant on the same basis as a refiner.

In adopting these amendments, FEA determined that it would be inappropriate to grant the full crude oil entitlement benefit to naphtha imports when, due to fluctuations in naphtha prices in the world market, the differential between the prices of imported and domestic naphtha is less than the per barrel entitlement value for the month in question. Accordingly, FEA adopted a procedure whereby the entitlement value of naphtha imported into Puerto Rico would not exceed the differential between the weighted average imported naphtha costs of the affected firms and an imputed domestic naphtha price. The maximum entitlement value that can be re-

ceived, however, is the actual per barrel crude oil entitlement value.

Under the procedure adopted by FEA, each eligible firm reports for each month its volumes of naphtha imported into Puerto Rico and used as a petrochemical feedstock. Entitlements are issued with respect to each such barrel of imported naphtha on the same basis as for a barrel of crude oil included in a refiner's crude oil runs for that month, unless the weighted average imported naphtha costs of firms reporting imports into Puerto Rico for this purpose exceed the imputed cost of domestically produced naphtha for that month by less than the per barrel crude oil entitlement value. In the latter case, the entitlement value for each barrel of imported naphtha is equal to the differential between such weighted average imported naphtha costs and the imputed cost of domestic naphtha. For purposes of calculating the imputed cost of domestically produced naphtha, a factor of one hundred twenty percent (120%) is applied to the weighted average cost of crude oil for all domestic refiners for the month in question.

FEA originally developed the factor for calculating the imputed cost of domestically produced naphtha after analyzing the differentials in naphtha prices and crude oil costs over the year preceding the date of the rulemaking (July 20, 1976), with reference to Rotterdam naphtha postings as compared with the estimated delivered costs of Arabian Light crude oil to Rotterdam. At the time, FEA found it necessary to use naphtha postings in the world market because prices for domestic naphthas (the large portion of which are not sold in the marketplace but are used for gasoline production in the refinery where they were produced) are extremely difficult to obtain.

In adopting this factor, FEA requested comments as to whether the factor was an accurate representation of the normal differential between crude oil and the type of naphtha used as a petrochemical feedstock. FEA stated in the July 20, 1976 final rule that if, on the basis of such comments or its own further analysis, FEA determined the factor to be inaccurate, it would propose an appropriate modification.

II. PROPOSED AMENDMENTS

Change in imputed domestic naphtha ratio. It has recently come to FEA's attention that, in light of the fluctuations in world naphtha market prices and the steady decline in naphtha values over the past year, the factor for calculating the imputed cost of domestic naphtha as currently set forth in the regulations is too high. FEA's review of current data relating to naphtha prices and crude oil costs indicates that if FEA were to use its original methodology (i.e., a comparison of Rotterdam naphtha posting with the estimated delivered costs of Arabian Light crude oil to Rotterdam) in calculating the factor at the present time, the proper factor would be one hundred thirteen percent (113 percent) rather

than one hundred twenty percent (120 percent).

The following table sets out the naphtha-to-crude price ratios from 1974 through August 1977 for Arabian Light crude oil, with prices per metric ton con-

verted to dollars per barrel on the basis of 8.51 barrels per metric ton (the API conversion factor used in FEA's original calculations) and on the basis of 8.75 barrels per metric ton (the factor used by the 1976 World Naphtha Survey).

COMPARISON OF NAPHTHA/CRUDE RATIOS

MO./YR.	AVERAGE NAPHTHA PRICE--\$/B		NAPHTHA/ARABIAN LIGHT CRUDE RATIO	
	PRICE--\$/B		8.51 FACTOR	
	8.51 FACTOR	8.75 FACTOR	8.51 FACTOR	8.75 FACTOR
5/74	17.55	17.07	1.49	1.45
6/74	14.93	14.53	1.25	1.22
10/74	11.48	11.17	0.96	0.93
1/75	10.83	10.54	1.00	0.98
4/75	12.74	12.40	1.19	1.15
5/75	13.29	12.93	1.22	1.19
6/75	12.81	12.46	1.18	1.14
7/75	12.45	12.11	1.12	1.09
8/75	12.83	12.48	1.16	1.13
9/75	13.03	12.67	1.18	1.15
10/75	13.57	13.20	1.15	1.12
11/75	15.02	14.62	1.27	1.24
12/75	15.11	14.70	1.24	1.20
1/76	15.38	14.96	1.28	1.24
2/76	15.91	15.48	1.30	1.27
3/76	16.46	16.01	1.36	1.33
4/76	16.09	15.65	1.33	1.29
5/76	15.74	15.31	1.29	1.26
6/76	15.75	15.32	1.31	1.28
7/76	15.73	15.30	1.29	1.25
8/76	15.07	14.67	1.24	1.20
9/76	14.71	14.31	1.21	1.18
10/76	15.17	14.76	1.25	1.22
11/76	14.16	13.78	1.15	1.12
12/76	14.57	14.17	1.19	1.16
1/77	14.62	14.23	1.07	1.04
2/77	15.01	14.61	1.19	1.16
3/77	15.27	14.85	1.20	1.16
4/77	15.39	14.97	1.23	1.20
5/77	14.98	14.57	1.19	1.16
6/77	14.85	14.44	1.19	1.16
7/77	14.82	14.42	1.13	1.09
8/77	14.83	14.43	1.11	1.08

As the table indicates, the naphtha-to-crude oil price ratios in the first eight months of 1977 are significantly lower than those in 1976. If the conversion factor of 8.51 barrels per metric ton is used, the average ratio is 1.27 for 1976 and 1.16 for 1977. Using the conversion factor of 8.75 barrels per metric ton, the average ratio is 1.23 for 1976 and 1.13 for 1977.

As a result of the discrepancy between the factor set forth in the regulations and the 1977 average naphtha-to-crude price ratio, FEA believes that petrochemical producers located in Puerto Rico may not be receiving sufficient entitlement value for the naphtha feedstocks that they import, thus resulting in a relative competitive disadvantage for these petrochemical producers as compared with mainland firms. To alleviate this situation, FEA is proposing to revise the factor for calculating the imputed cost of domestic naphtha from one hundred twenty percent (120 percent) to one hundred thirteen percent (113 percent). The proposed factor, like the factor currently provided for in the regulations,

is derived by comparing Rotterdam naphtha postings with the estimated delivered costs of Arabian Light crude oil to Rotterdam. In calculating the proposed factor, however, FEA has used the conversion factor of 8.75 barrels per metric ton rather than the factor of 8.51 barrels per metric ton previously used to calculate the current factor of one hundred twenty percent (120 percent). FEA believes that application of the 8.75 conversion factor, which is used by the 1976 World Naphtha Survey for naphtha of the type used in petrochemical production and traded in Rotterdam, produces a more accurate naphtha-to-crude price ratio than the 8.51 API conversion factor, for purposes of these entitlement program provisions.

Therefore, FEA proposes to amend § 211.67(d)(5)(iii) to provide that for purposes of determining the volume of naphthas eligible for inclusion in the volume of a refiner's crude oil runs to stills for a particular month, the imputed per barrel cost of domestically produced naphtha is calculated by applying to the weighted average per barrel cost of crude oil for all domestic refiners for that

month a factor of one hundred thirteen percent (113 percent).

Change in calculation of imported naphtha costs. Due to the relief being received by Commonwealth Oil Refining Company from FEA's Office of Exceptions and Appeals (5 FEA 183.132, April 14, 1977) with respect to its naphtha imports into Puerto Rico, FEA further proposes that the naphtha costs of any firm receiving this type of exception relief be excluded from the calculation of the weighted average per barrel cost of naphtha imported into Puerto Rico for purposes of § 211.67(d) (5) (iii). FEA believes that the inclusion of the average imported naphtha costs of a firm receiving the type of exception relief provided in this decision in the entitlement calculations for other affected companies is not appropriate, since the value of that firm's entitlement issuances are not calculated by reference solely to the regulatory provisions.

III. SPECIFIC COMMENTS REQUESTED

It is FEA's objective in this rulemaking proceeding to adopt a factor for calculating the imputed cost of domestically produced naphtha which accurately represents the normal differential between crude oil and the type of naphtha used as a petrochemical feedstock. Therefore, FEA requests comments on the appropriateness of the factor proposed in this notice and the methodology used to obtain it. In this connection, FEA invites comments on whether Arabian Light crude oil is the appropriate crude oil to use for purposes of the naphtha-to-crude price ratio or whether another type of crude oil should be used as the basis of comparison with naphtha postings. FEA also solicits views as to whether, in light of the fluctuations in world market naphtha prices, the factor ultimately adopted should be periodically reviewed and, if market conditions warrant, adjusted.

FEA is particularly interested in ascertaining whether there is an alternative methodology for imputing the cost of domestically produced naphtha that would be more accurate than the methodology upon which the proposed factor is based. For example, FEA believes that the price of JP-4 (a naphtha-based jet fuel used by the military) could be used as a surrogate for the cost of domestic naphtha, with adjustments made to the price of JP-4 to take into account the difference in density between the naphtha used to produce JP-4 and the naphtha used in petrochemical production.

Another possible method for imputing the cost of domestically produced naphtha is to determine the value of naphtha as a feedstock for gasoline. Under this method, it would be necessary to identify an appropriate price for gasoline (such as the average of refiners' rack prices for regular leaded gasoline in the United States) and to subtract from that price the cost of reforming naphtha into gasoline. This method would require FEA to determine the normal

operating costs associated with the reforming process, including perhaps an appropriate allowance for a return on an investment. FEA therefore specifically invites comments as to what costs are involved in reforming naphtha into gasoline, what would constitute an appropriate return on investment for reforming capacity and whether, in general, such a procedure would be an appropriate, as well as administratively feasible, method to determine the imputed cost of domestically produced naphtha.

A third possible methodology would be to identify the actual market prices of domestically produced naphthas. As mentioned previously, the difficulty with this approach is that most domestic naphthas are sold in the marketplace but are used for gasoline production in the refineries in which they are produced. However, FEA is aware that some firms do purchase domestically produced naphthas and is interested in receiving information as to whether these naphtha prices could be used in the entitlement calculations that are the subject of this proposal.

FEA requests comments on the alternate methodologies described above, as well as on any other appropriate methods for determining the cost of domestically produced naphtha.

Finally, FEA invites specific comments on whether naphtha imported by firms on the mainland for use as petrochemical feedstock (but not for use as synthetic natural gas feedstock) should be included under the entitlements program on the same basis as naphtha imports into Puerto Rico. In the previous rulemaking proceeding on this issue, FEA determined not to extend entitlement benefits to mainland importers of naphtha on the basis that the volumes of naphtha imports into the mainland for petrochemical use were not significant enough to warrant such an extension of the entitlements program at that time. FEA, however, is currently reevaluating this issue in light of advice to the Agency as to the reliance by certain mainland petrochemical producers on imports of naphtha.

IV. COMMENT PROCEDURES

A. Written comments. Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposals set forth in this notice. Comments should be submitted to the address indicated in the addresses section of this preamble and should be identified on the outside envelope with the designation "Amendments to Entitlements Program to Revise Factor Used to Determine Entitlement Value of Naphtha Feedstocks Imported into Puerto Rico." Fifteen copies should be submitted. All comments received by FEA will be available for public inspection in the FEA Reading Room, Room 2107 Federal Building, 12th and Pennsylvania Avenue, NW., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidentiality status of the information or data and to treat it according to its determination.

B. Public hearing. 1. *Request procedure.* The time and place for the public hearing is indicated in the dates section of this preamble. If necessary to present all testimony, the public hearing will be continued to 9:30 a.m. of the first business day following the hearing date shown above.

Any person who has an interest in the proposed amendments or who is a representative of a group or class of persons that has an interest in the proposed amendments may make a written request for an opportunity to make an oral presentation. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through the day before the hearing.

Each person selected to be heard will be so notified by the FEA before 4:30 p.m., e.d.t., October 26, 1977, and must submit 100 copies of his or her statement to Regulations Management, Room 2214, 2000 M Street, NW., Washington, D.C., before 4:30 p.m., e.d.t. on November 1, 1977.

2. *Conduct of the hearing.* The FEA reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing, to Executive Communications before 4:30 p.m., e.d.t., November 1, 1977. Any person who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by FEA and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Ave. NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

As required by section 7(c) (2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments on this proposal.

In accordance with Executive Order 11821 and OMB Circular A-107, FEA is considering the inflationary impact of this proposal.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C. September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

1. Section 211.67 is amended in paragraph (d) (5) (iii) to read as follows:

§ 211.67 Allocation of domestic crude oil.

(d) *Adjustments to volume of crude oil runs to stills.*

(5) * * *

(iii) The volume of naphthas eligible for inclusion in the volume of a refiner's crude oil runs to stills for a particular month under this subparagraph (5) shall be reduced by the application of a fraction the denominator of which is equal to the entitlement value for a barrel of crude oil included in the volume of a refiner's crude oil runs to stills for that month (without giving effect to the provisions of paragraphs (e) and (d) (4) of this section), and the numerator of which is equal to the weighted average per barrel cost of all naphthas imported into Puerto Rico for that month as to which entitlement issuances are sought (excluding the per barrel imported naphtha cost for firms receiving relief from FEA's Office of Exceptions and Appeals with respect to such imports), less the imputed per barrel cost of domestically produced naphthas for that month. For purposes of

this subparagraph (5) (iii), the imputed per barrel cost of domestically produced naphthas for a particular month shall be equal to one hundred thirteen percent (113%) of the weighted average per barrel cost of all the crude oil receipts for all domestic refiners for that month.

DEPARTMENT OF TRANSPORTATION

FEDERAL AVIATION ADMINISTRATION

[Docket No. 16854; Notice No. 77-22]

[14 CFR Parts 23, 25, 91, 121, and 135]

AIRCRAFT CABIN OZONE CONTAMINATION

Advance Notice of Proposed Rulemaking

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Federal Aviation Administration is considering rulemaking to amend the Federal Aviation Regulations (FAR) by revising aircraft design and operational procedures in order to prevent or reduce aircraft cabin ozone contamination during high altitude flights. This action is being taken as a result of crewmember and passenger complaints of physical discomfort on high altitude flights.

DATES: Comments must be received on or before December 6, 1977.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Office of the Chief Counsel, Attention: Rules Docket (AGC-24) Docket No. 16854, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond E. Ramakis, Regulatory Projects Branch, Safety Regulations Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Ave., SW., Washington, D.C. 20591, telephone 202-755-8716.

SUPPLEMENTARY INFORMATION: This advance notice of proposed rulemaking is being issued in accordance with the FAA's policy for early institution of public proceedings in actions related to rulemaking. An "advance" notice to invite early public participation in the identification and selection of a course or alternate courses of action with respect to a particular rulemaking problem.

Air carriers, aircraft manufacturers, crewmember organizations, high altitude research organizations, health organizations and other interested persons are invited to participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to: Federal

Aviation Administration, Office of the Chief Counsel, Attention: AGC-24, 800 Independence Avenue, SW., Washington, D.C. 20591. All communications received on or before December 6, 1977, will be considered by the Administrator before drafting the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

During the winter of 1976, the FAA became aware of crew and passenger complaints of physical discomfort on high altitude flights. By March of 1977, information from FAA air carrier inspectors, air carriers, and aircraft manufacturers led to the discovery that ozone gas (O₃) was the probable cause of many of the crew and passenger complaints.

On April 19, 1977, FAA Flight Standards Service completed a draft advisory circular which defined ozone irritation, discussed its causes and symptoms, and described a means of dealing with the problem should it occur in flight. This advisory circular, AC No. 00-52, Ozone Irritation During High Altitude Flight, was published July 21, 1977.

By letter of May 27, 1977, Lawrence M. Noble, Staff Attorney, Aviation Consumer Action Project (ACAP), P.O. Box 19029, Washington, D.C. 20036, petitioned to "immediately issue a rule requiring FAA Part 121 air carriers to give adequate notice to airline passengers of the possibility of exposure to high levels of ozone gas on certain high altitude flights and the ensuing health and safety risks."

ACAP contends that "this emergency action is required because of high concentrations of ozone encountered in the cabins of high altitude flights and the physical discomfort and illness which exposure to this gas is causing among both passengers and flight crews." It states that "studies undertaken by the airlines, aircraft manufacturers and government agencies—many of which were done over a decade ago—clearly show that passengers may frequently be exposed to levels of ozone on high altitude flights that exceed the maximum limits for human exposure recommended by the Occupational Safety and Health Administration (OSHA) and the 1975 Federal Ambient Air Quality Standards established by the Environmental Protection Agency (EPA)."

ACAP further states that "because the airlines fear losing passengers and the aircraft manufacturers fear losing sales of their aircraft, the airlines and manufacturers are reluctant to give passengers notice of the present possibility and danger of exposure to ozone."

For these reasons, ACAP requests "that the Administrator take immediate action to require each certificate holder operating passenger-carrying aircraft that fly above 35,000 feet to ensure that a warning of the possibility of exposure of high levels of ozone, and the ensuing health effects, be posted at every ticket-selling location, be inserted with each passenger ticket for every flight that may exceed an altitude of 35,000 feet, and be orally given by an appropriate crewmember before take-off of the aircraft." These ac-

tions. It asserts, "are required to permit and allow airline passengers to make informed choices concerning air travel, to avoid unnecessary health risks, and to assist the airlines and the FAA in identifying flights that encounter high levels of ozone, so that proper precautionary action can be taken."

The FAA believes that the OSHA standard referenced in the ACAP petition is not a maximum limit for human exposure as stated in the petition. It is rather the maximum exposure average over a single 8-hour work shift in a 40-hour week to which industrial workers may be exposed. OSHA has not established a maximum limit ("ceiling limit") for exposures to ozone of less than 8 hours duration. In fact, levels of ozone measured in the air of several U.S. cities have approached 10 times the OSHA standard without any observable effects on the population.

Ozone concentrations exceeding accepted values may cause irritation of the eyes, nose, mouth, and throat. Higher concentrations can bring about shortness of breath and coughing. The degree of irritation generally increases with increasing levels of ozone concentration, exposure time, and physical activity. The probability of more serious health effects is quite remote, based on measurements of atmospheric and cabin ozone levels at jet operating altitudes and the relatively short periods of exposure.

Scientific studies have shown that concentrations of ozone at jet operating altitudes are generally highest when the tropopause comes closest to the earth. This cycle normally takes place in the late winter and early spring in the northern hemisphere. Because the northern hemisphere is entering the declining phase in the ozone cycle, immediate health problems related to aircraft cabin ozone contamination are not likely. This is also borne out by the substantially reduced number of complaints from passengers and crewmembers since April.

Based on the available information on aircraft cabin ozone contamination, the FAA believes that emergency action rule making is not warranted. However, because of the number and extent of the responses to the FAA draft advisory circular, the ACAP petition for rule making, and the intricacies of this source of airborne irritation, the FAA believes that it is important to review all relevant data on ozone to determine if amending Parts 23, 25, 91, 121, and 135 of the FARs could bring about action which would prevent or reduce aircraft ozone contamination.

To this end, the FAA solicits data, views, and arguments from all interested persons on the question set forth below. Through these questions, the FAA hopes to determine the extent of the ozone problem and to gather information on the available solution aspects. Data supporting an answer should be submitted and sufficiently identified so that the FAA may use it most effectively.

1. Submit any statistics available on aircraft cabin ozone contamination, including aircraft type, date, altitude, position, and severity of symptoms.

2. What are the health aspects of aircraft cabin ozone contamination in relation to ozone concentration (expressed in parts per million by volume) and exposure time?

3. What design changes to present and future aircraft would be required to prevent or reduce aircraft cabin contamination?

4. Is a cabin ozone meter operationally feasible and functional? What types of meters are available? How should they be used?

5. Can atmospheric ozone concentrations at jet operating altitudes be forecast with enough accuracy to aid flight dispatch? How?

6. What operational procedures would aid flight crews in avoiding or reducing aircraft cabin ozone contamination?

7. Considering the aircraft type, the flight altitude, the route of flight and the season of the year, what combination of potential remedies (i.e. aircraft design changes, operational procedures, etc.) would provide the best solution to the aircraft cabin ozone contamination problem?

8. Should the FARs be amended to require each certificate holder to warn its passengers of the possibility of exposure to high levels of ozone and the ensuing health effects?

DRAFTING INFORMATION

The principal authors of this document are Charles H. Huettner, Flight Standards Service, and Marshall S. Filler, Office of the Chief Counsel.

(Secs. 313, 601, 603, and 604 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c) of the Department of Transportation Act 49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949; and OMB Circular A-107.

Issued in Washington, D.C., on September 29, 1977.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[14 CFR Part 39]

(Docket No. 77-EA-53)

AIRWORTHINESS DIRECTIVES

DeHavilland Aircraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require alteration to wiring and shielding of relays in the reverse current relay of DHC-6 type airplanes. The proposed AD is needed to prevent a fire in one generating system destroying the remaining generating system, which could result in complete loss of electrical power.

DATES: Comments must be received on or before November 10, 1977.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Office of Regional Counsel, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430. The applicable service bulletins may be obtained from the manufacturer DeHavilland of Canada, Ltd. at Downsview, Ontario, Canada. A copy of the service bulletin is contained in the docket at the Office of Regional Counsel, FAA, Federal Building, Eastern Region, J.F.K. International Airport, Jamaica, N.Y. 11430 telephone 212-995-2815.

FOR FURTHER INFORMATION CONTACT:

M. Mavricos, Systems & Equipment Section, AEA-213, Engineering and Manufacturing Branch, Flight Standards Division, Federal Building, J.F.K. International Airport, Jamaica, N.Y. 11430, telephone 212-995-3372.

SUPPLEMENTARY INFORMATION:

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

There have been reports of in-flight electrical fires in the reverse current relay box which resulted in a total loss of electrical power. While the electrical system has two parallel d.c. sources, the collocation of the reverse current relays permitted a fire in one to disable the other. Since this condition exists in other airplanes of similar type design, the proposal would require alteration of the wiring and installation of shielding around the relays in the reverse current relay box.

DRAFTING INFORMATION

The principal authors of this document are M. Mavricos, Flight Standards Service, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

DeHavilland. Applies to DeHavilland of Canada DHC-6 series aircraft serial numbers 1 through 530.

Compliance required within 800 hours time in service after the effective date of this AD unless already accomplished, or DeHavilland modification 6/1598 is incorporated.

To preclude the possibility of total electrical failure due to contact welding of the reverse current relay and subsequent burning of the adjacent wiring, the other reverse current relay and the battery circuit wiring, install DeHavilland modification 6/1598 in accordance with DeHavilland Service Bulletin No. 6/353 dated May 13, 1977, or later revision, or an equivalent approved by the Chief, Engineering and Manufacturing Branch, FAA Eastern Region.

Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, 49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation, 49 U.S.C. 1655(c); 14 CFR 11.85.

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Jamaica, N.Y., on September 27, 1977.

WILLIAM E. MORGAN,
Director, Eastern Region.

[Docket No. 77-WE-26-AD]

AIRWORTHINESS DIRECTIVES

McDonnell Douglas Model DC-9 Series Airplanes Including Military Type C-9A, C-9B, and VC-9C

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require repetitive inspections of the McDonnell Douglas Model DC-9 Series airplane elevator spar for stress corrosion cracking that could, if allowed, to grow beyond certain limits, result in structural failure and loss of an elevator surface.

DATES: Comments must be received on or before November 15, 1977.

ADDRESSES: Send comments on the proposal to: Department of Transportation Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

Persons affected by this AD may obtain copies of Douglas DC-9 Service Bulletin 55-28 by writing to:

McDonnell Douglas Corp., 3855 Lakewood Boulevard, Long Beach, Calif., 90846. Attention: L.A. Eisenberg, CI-750, 54-60.

Also, a copy of the service bulletin may be reviewed at, or a copy obtained from:

Rules Docket in Room 916, FAA, 800 Independence Avenue SW., Washington, D.C. 20591, or Rules Docket in Room 6W14, FAA Western Region, 15000 Aviation Boulevard, Hawthorne, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Jerry J. Presba, Executive Secretary, Airworthiness Directives Review Board, Federal Aviation Administration, Western Region, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009, Telephone: 213-536-6351.

SUPPLEMENTARY INFORMATION:

Several DC-9 operators have reported finding cracks in elevator spar, Douglas P/N 9918450-1 or 501, upper and lower flanges. These cracks have been attributed to stress corrosion. Several of the spars have more than one crack, usually running from one fastener hole to another. If these individual cracks were allowed to grow or join to form longer cracks, the structural integrity of the spar could be degraded to the point where it could no longer carry design loads and failure of the elevator surface could occur.

The manufacturer has performed an analysis of the spar structure to determine permissible crack limits and associated inspection periods to ensure continued airworthiness of the elevator structure. Dye penetrant and X-ray inspection procedures have been developed to detect cracks and a standard repair is available in the DC-9 Structural Repair Manual. If the old 7075-T651 are replaced with 7075-T7351 spars P/N 9918450-503, no further repetitive inspections are considered necessary, as the 7075-T7351 aluminum has a much higher stress corrosion cracking threshold than 7075-T651. DC-9 aircraft with fuselage No. 840 and subsequent have 7075-T7351 elevator spars installed during manufacture and are not included in this AD.

McDonnell Douglas has issued DC-9 Service Bulletin 55-28 containing crack limits and inspection and repair instructions. Since this condition is likely to exist or develop in other aircraft of the same type design, the proposed AD would require compliance with the inspection and crack limits of DC-9 Service Bulletin 55-28.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Information on the economic, environmental, and energy impact that might result because of the adoption of the proposed rule is also requested. Communications should identify the airworthiness docket number and be submitted in duplicate to the Department of Transportation, Federal Aviation Administration, Western Region, Attention: Regional Counsel, Airworthiness Rule Docket, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

Also, a copy of the service bulletin may be reviewed at, or a copy obtained from:

tained in the notice may be changed in light of comments received. All comments will be available, both before and after the closing date for comments, in the Airworthiness Rule Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rule Docket.

DRAFTING INFORMATION

The principal authors of this document are Everett W. Pittman, Aircraft Engineering Division, and Richard G. Wiltry, Office of the Regional Counsel.

PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

McDONNELL DOUGLAS: Applies to Model DC-9 Series airplanes, certificated in all categories including military type C-9A, C-9B, and VC-9C, F/N's 1 through 839.

Compliance required within the next 1200 hours time in service, unless already accomplished within the past 2400 hours time in service, and thereafter at intervals not to exceed 3600 hours time in service, on all airplanes with over 10,000 hours time in service as of, and after, the effective date of this AD.

To detect cracks and prevent failure of the elevator spar, comply with the following:

(a) Perform an X-ray or dye-penetrant inspection of the elevator spars, P/N 9918450-1 or -501, in accordance with the inspection procedures of McDonnell Douglas DC-9 Service Bulletin 55-28 dated August 29, 1977, or later FAA approved revision, or McDonnell Douglas All Operators Letter AOL 9-1000 dated November 3, 1978.

(b) Cracked parts found during any of the inspections of paragraph (a) which do not exceed the crack limits in McDonnell Douglas DC-9 Service Bulletin 55-28 dated August 29, 1977, or later FAA approved revision, may be continued in service. However, in addition to the 3600 hour repetitive general inspection requirements of paragraph (a), the area 12 inches inboard and outboard of all cracks must be X-ray or dye penetrant inspected at intervals not to exceed the following:

(1) Length of longest crack up to two inches—800 hours time in service.

(2) Length of longest crack between two and four inches—400 hours time in service.

(c) If cracks are found during any of the inspections of Paragraph (a) or (b) which exceed the crack limits of McDonnell-Douglas DC-9 Service Bulletin 55-28 dated August 29, 1977, or later FAA approved revision, the cracked spar must be repaired or replaced before further flight.

(d) Equivalent inspections and repairs may be used when approved by the Chief, Aircraft Engineering Division, FAA Western Region.

(e) If the original 7075-T651 spars (P/N 9918450-1 or -501) are replaced with 7075-T7351 spars (P/N 9918450-503), the repetitive inspection requirements of this AD will not apply to that airplane.

(f) Special flight permits may be issued in accordance with FAR's 21.197

and 21.199 to authorize operation of an airplane to a base for the accomplishment of the inspections required by this AD.

(g) Upon request of the operator, an FAA maintenance inspector, subject to prior approval of the Chief, Aircraft Engineering Division, FAA Western Region, may adjust the repetitive inspection intervals specified in this AD to permit compliance at an established inspection period of the operator if the request contains substantiating data to justify the increase for that operator.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Los Angeles, Calif. on September 27, 1977.

WILLIAM R. KRIEGER,
Acting Director,
FAA Western Region.

[14 CFR Part 71]

CONTROL ZONE EFFECTIVE HOURS

Alteration of Control Zone Effective Hours
AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice (NPRM) proposes to reduce the control tower hours of operation at the Worcester Municipal Airport, Worcester, Massachusetts, from 24 hours to 0700 to 2300 hours local time daily. This alteration is necessary due to the limited aeronautical activity between the hours of 2300 and 0700 local time at the Worcester Municipal Airport which do not warrant full-time operation of the Worcester, Massachusetts, Control Tower. Since the effective hours of the Worcester Control Zone are contingent upon the availability of weather updating service provided by the Worcester Tower, this airspace action is required.

DATES: Comments must be received on or before November 7, 1977 (Proposed effective date, January 26, 1978).

ADDRESSES: Send comments in triplicate to the Federal Aviation Administration, Office of the Regional Counsel, ANE-7, Attention: Rules Docket Clerk, Docket No. 77-NE-17, 12 New England Executive Park, Burlington, Mass. 01803.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, 12 New Eng-

land Executive Park, Burlington, Mass. 01803.

FOR FURTHER INFORMATION CONTACT:

Richard G. Carlson, Operations Procedures and Airspace Branch, ANE-536, Federal Aviation Administration, Air Traffic Division, 12 New England Executive Park, Burlington, Mass. 01803, telephone 617-273-7285.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making process by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Office of the Regional Counsel, ANE-7, Attention: Rules Docket Clerk, Docket No. 77-NE-17, Federal Aviation Administration, 12 New England Executive Park, Burlington, Mass. 01803. All communications received on or before November 7, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this Notice of Proposed Rule Making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling 202-426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering amending Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to reduce the control tower hours of operation at the Worcester Municipal Airport, Worcester, Mass., from 24 hours to 0700 to 2300 hours local time daily. This alteration is necessary due to the limited aeronautical activity between the hours of 2300 and 0700 local time at the Worcester Municipal Airport which do not warrant full-time operation of the Worcester, Massachusetts, Control Tower. Since the effective hours of the Worcester Control Zone are contingent upon the availability of weather updating service provided by the Worcester Tower, this airspace action is required. Aeronautical maps and charts will reflect this change in control tower hours of operation.

DRAFTING INFORMATION

The principal authors of this document are Richard G. Carlson, Air Traffic Division, New England Region, and George

L. Thompson, Associate Regional Counsel, New England Region.

THE PROPOSED AMENDMENT

Accordingly, the FAA proposes to amend § 71.171 of Part 71 of the Federal Aviation Regulations as follows:

§ 71.171 [Amended]

1. In § 71.171 of Part 71 (42 FR 440), the following control zone is amended to read as follows:

WORCESTER, MASSACHUSETTS, CONTROL ZONE

"Within a 5-mile radius of the Worcester Municipal Airport (Latitude 42°18'05" N., Longitude 71°52'20" W.). This control zone is effective from 0700 to 2300 hours, local time daily or during the specific dates and time established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airmen's Information Manual."

(Secs. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)); and Section 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Burlington, Massachusetts, on September 26, 1977.

WILLIAM E. CROSSBY,
Acting Director,
New England Region.

[14 CFR Parts 71 and 75]

VOR FEDERAL AIRWAYS AND JET ROUTES

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to alter VOR Federal Airways identified as V-3, V-7, V-35, V-51, V-97 and V-267 to alter Jet Routes identified as J-53, J-79 and J-85 in the state of Fla. A review of the airway/jet route structures in the state of Fla., indicated a need for several changes in the airway/jet route structures to reflect the present day traffic flow. These proposed actions would provide for more efficient use of the navigable airspace.

DATES: Comments must be received on or before November 7, 1977.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Southern Region, Attention: Chief, Air Traffic Division, Docket No. 77-SO-35, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. The official docket may be examined at the following locations:

¹ Maps filed as part of original.

lowing location: FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Ave. SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Ave. SW., Washington, D.C. 20591, telephone 202-426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before November 7, 1977 will be considered before action is taken on the proposed amendments. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Ave. SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering amendments to Subpart C of Part 71 and Subpart B of Part 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) to alter six federal airways and three jet routes identified as V-3, V-7, -35, V-51, V-97, V-267, J-53, J-79 and J-85 in the state of Florida. The proposed actions would: (1) Realign V-3 from over Biscayne Bay, Fla., VOR direct to Ft. Lauderdale, Fla., VOR direct to Palm Beach, Fla., VOR. This action would assure that V-3 and V-51E between Biscayne Bay and Ft. Lauderdale overlie; (2) Realign V-7 from over Biscayne Bay, Fla., VOR direct to Ft. Myers, Fla., VOR including an east alternate from Biscayne Bay, Miami, Fla., INT of Miami 337° and Ft. Myers 101° radials, Ft. Meyers, INT of Ft. Myers 022° and Lakeland 154° radials, Lakeland. The realignment of V-7E between Ft. Myers and Lakeland

would establish an airway along a route that is presently being used as an alternate routing between Ft. Myers and Lakeland. (3) Realign the west alternate of V-35 between Ft. Myers and St. Petersburg, Fla., via the INT Ft. Myers 311° and Sarasota, Fla., 156° radials; Sarasota VOR. The realignment of V-35W would improve arrival procedures and afford unrestricted descents into Ft. Myers Airport. (4) Realign V-51 from over Biscayne Bay, Fla., Miami, Fla., INT of Miami 337° and Pahokee, Fla., 174° radials; Pahokee; including an east alternate from Biscayne Bay; Ft. Lauderdale, Fla.; INT of Ft. Lauderdale 339° and Pahokee 124° radials; INT Pahokee 009° and Vero Beach, Fla., 193° radials; Vero Beach. (5) Amend V-97 by adding an east alternate between Miami and LaBelle, Fla., via Miami 337° and LaBelle 124° radials. (6) Realign V-267 between Biscayne Bay and Orlando, Fla., from over Biscayne Bay; INT Biscayne Bay 340° and Pahokee, Fla., 150° radials; Pahokee; including an east alternate from Biscayne Bay; INT Biscayne Bay 340° and Palm Beach, Fla., 201° radials; Palm Beach; INT Palm Beach 326° and Orlando 162° radials. (7) Realign J-53 between Biscayne Bay and Orlando via direct routing. (8) Realign J-79 between Key West, Fla., and Vero Beach via Key West; Miami; Palm Beach; Vero Beach. (9) Realign J-85 between Biscayne Bay and Lakeland via Biscayne Bay, INT Biscayne Bay 328° and Lakeland, Fla., 140° radials, Lakeland. All radials in this proposal have the same magnetic and true values. These actions, items 5-9, would align the above airways/routes along the present routings being provided to departures from the Miami Terminal Area.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 and § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Parts 71 and 75) as republished (42 FR 307 and 707) and subsequently amended (41 FR 45819, 49805, 53318, 56789 and 42 FR 7121, 12167, 20619 and 30606) as follows:

§ 71.123 [Amended]

§ 75.100 [Amended]

1. In V-3 between Biscayne Bay; and Palm Beach, Fla.; "Ft. Lauderdale, Fla.;" would be added.

2. In V-7 all before "Ormond Beach, Fla.;" would be deleted and "From Biscayne Bay, Fla., via Ft. Myers, Fla., including an east alternate from Biscayne Bay via Miami, Fla., INT of Miami 337° and Ft. Myers 101° radials, Ft. Myers; Lakeland, Fla., including an east alternate via INT Ft. Myers 022° and Lakeland 154° radials;" would be substituted therefor.

3. In V-35 after "St. Petersburg, Fla., including a west alternate" and before "INT St. Petersburg" "via Ft. Myers, INT Ft. Myers

311° and Sarasota, Fla., 156° radials, Sarasota, St. Petersburg;" would be added.

4. In V-51 all before "Ormond Beach, Fla.;" would be deleted and "From Biscayne Bay, Fla.; Miami, Fla.; INT Miami 337° and Pahokee, Fla., 174° radials; Pahokee, including an east alternate from Biscayne Bay, Ft. Lauderdale, Fla., INT Ft. Lauderdale 339° and Pahokee 124° radials, INT Pahokee 009° and Vero Beach, Fla., 193° radials, Vero Beach;" would be substituted therefor.

5. In V-97 "Miami 343° and LaBelle 121°" would be deleted and "Miami 337° and LaBelle 124°" would be substituted therefor.

6. In V-267 all before "INT Palm Beach" would be deleted and "From Biscayne Bay, Fla., INT Biscayne Bay 340° and Pahokee, Fla., 150° radial; Pahokee; Orlando, Fla., including an east alternate from Biscayne Bay, INT Biscayne Bay 340° and Palm Beach, Fla., 201° radials; Palm Beach;" would be substituted therefor.

7. In Jet Route No. 53 "Key West, Fla., via Miami, Fla.;" would be deleted and "Biscayne Bay, Fla., via Orlando, Fla.;" would be substituted therefor.

8. In Jet Route No. 79 all before "Ormond Beach, Fla.;" would be deleted and "From Key West, Fla., via Miami, Fla.; Palm Beach, Fla.; Vero Beach, Fla.;" would be substituted therefor.

9. In Jet Route No. 85 all before "Lakeland;" would be deleted and "From Biscayne Bay, Fla., via INT Biscayne Bay 328° and Lakeland, Fla., 140° radials;" would be substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on September 27, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air
Traffic Rules Division.

[FR Doc.77-29274 Filed 10-5-77; 8:45 am]

CIVIL AERONAUTICS BOARD

[6320-01]

[14 CFR Part 399]

[PSDR-49B; Docket 31290; Dated: September 30, 1977]

DOMESTIC PASSENGER-FARE LEVEL POLICIES, AND DOMESTIC PASSENGER-FARE STRUCTURE POLICIES

Supplemental Advance Notice of Proposed Rulemaking

AGENCY: Civil Aeronautics Board.

ACTION: Supplemental advance notice of proposed rulemaking.

SUMMARY: This notice announces the denial of a request for extending the filing date for reply comments in the rulemaking proceeding concerning modification of the Board's DPFI policies. The requested extension was filed by American Airlines, Inc.

DATES: As prescribed by PSDR-49, the filing date continues to be: Reply Comments: October 6, 1977.

ADDRESSES: Comments should be sent to: Docket 31290, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Comments may be examined at the Docket Section, Civil Aeronautics Board, Room 711, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C., as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Norman D. Schwartz, Legal Division, Bureau of Fares and Rates, Civil Aeronautics Board, 1825 Connecticut Avenue NW., Washington, D.C. 20428 (202-673-5056).

SUPPLEMENTARY INFORMATION: In a telegraph dated September 30, 1977, counsel for American Airlines, Inc. requested an extension of one week for the filing of reply comments in this proceeding. In support of his request, counsel states that he did not receive the comments of the Department of Justice until September 27, 1977 and late-filed comments of the Department of Transportation until September 28, 1977.¹

The requested extension is denied. As we explained in PSDR-49A, the Board has established a very tight schedule in this rulemaking in order to complete it before our decision in the *Chicago-Midway Low-Fare Route Proceeding* (Docket 30277). This schedule does not permit extension of any of the dates established.

We should emphasize, however, that we expect all parties to comply with these dates. Whether late-filed comments will be accepted will be decided by the Board. The undersigned finds that good cause has not been shown for the granting of the requested delay.

Accordingly, pursuant to authority delegated in section 385.20(d) of the Board's Organization Regulations (14 CFR 385.20(d)), the request for extending the time for filing reply comments is denied.

(Sec. 204(a) of the Federal Aviation Act of 1958, as amended, 72 Stat. 743, 49 U.S.C. 1324.)

STEPHEN L. BARCOCK,
Acting Associate General Counsel,
Rules Division.

[FR Docket 77-29445 Filed 10-5-77, 8:45 am]

¹ Comments of the Department of Justice were filed with the Board on the due dates of September 21, 1977; and counsel for the DOJ certified that he served copies of these comments upon all interested persons on that date. However, the comments of the Department of Transportation were not filed with the Board until September 26, 1977 and were accompanied by a motion to submit a late-filed document.

[4210-01]

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1930]

[Docket No. R-77-466]

FEDERAL CRIME INSURANCE PROGRAM

Offer To Pay Finders Fee to Property and Life Insurance Agents, Brokers and Certain Nonprofit Corporations and Organizations

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: This proposed rule would, if adopted, amend existing provisions for compensating persons who sell policies of Federal Crime Insurance under the Federal Crime Insurance Program.

Increasing amounts of evidence indicate that the public is still largely unaware of the availability of Federal Crime Insurance and that marketing of policies is not aggressively conducted in urban areas where the need for the Program appears to be the greatest.

This proposed rule would, if adopted, provide a method of compensating property and life insurance agents and brokers with a one-time finders fee and provide for the designation of certain nonprofit community corporations and organizations as eligible for a finders fee. The proposed rule would, therefore, furnish an increased incentive for publicizing and marketing Federal crime insurance in urban areas.

DATES: Comments must be received on or before November 4, 1977.

ADDRESS: Comments should be submitted to the Rules Docket Clerk, Department of Housing and Urban Development, Room 5218, 451 Seventh Street SW., Washington, D.C. 20410.

FOR FURTHER INFORMATION CONTACT:

Mr. James M. Rose, Jr., Assistant Administrator, Office of Urban Property Insurance—Riot and Crime, 755-6555, Room 5248, 451 Seventh Street SW., Washington, D.C. 20410.

SUPPLEMENTARY INFORMATION: The Federal Crime Insurance Program, since its creation in August 1971, has relied upon property insurance agents and brokers for the sale of Federal crime insurance. Approximately 34,000 policies are currently in force in the District of Columbia and nineteen States eligible for Federal crime insurance. There are

nonprofit community organizations and also life insurance agents which operate in urban areas but current regulations contain no provision for compensating such organizations or persons for publicizing and marketing Federal crime insurance. Section 1930.4 of the Federal Crime Insurance Regulations, Title 24 provides only for the payment of commissions to property insurance agents and brokers. This proposed rule would, if adopted, provide for designating qualified nonprofit community organizations, and compensating them with a finders fee for each valid application leading to the issuance of a Federal Crime Insurance Policy, thus furnishing an incentive for them to publicize and market Federal crime insurance to the citizens for whose benefit those organizations exist. It would also provide for compensating with a finders fee property and life insurance agents or brokers who market Federal crime insurance policies.

Revisions can best be effectuated by deleting the current § 1930.4 and inserting in its place § 1930.4a, which will read basically the same as the current § 1930.4 which describes the procedure for compensating property insurance agents and brokers, and a § 1930.4b which will provide for and describe a finders fee procedure for compensating qualified community organizations. To give both property and life insurance agents and brokers a fair opportunity to compete in the marketing of crime insurance, § 1930.4b would also make the finders fee concept available to them, and for property insurance agents and brokers this would provide an alternative to their current commission procedures. Because no renewal fees will be paid, the one-time fee will be larger than the current minimum commission, thus providing maximum incentive for the sale of policies.

A \$40 fee would be paid for commercial policies and a \$20 fee for residential policies. The Administrator proposes initially to exercise the authority in a limited number of metropolitan areas and with respect to a limited number of specially trained and qualified organizations in order to evaluate the results of the new procedure. The Administrator proposes to compare the marketing effectiveness of the nonprofit corporations and organizations with efforts by agents and brokers.

A Finding of Inapplicability respecting the National Environmental Policy Act of 1969 has been made in accordance with HUD Regulations published at 38 FR 19182, 19186. A copy of this Finding of Inapplicability is available for public inspection during regular business hours at the following address:

Rules Docket Clerk, Department of Housing and Urban Development, Room 5218, 451 Seventh Street SW., Washington, D.C. 20410.

NOTE:—It is also certified that the economic and inflationary impacts of this proposed regulation have been carefully evaluated in accordance with OMB Circular A-107.

Subchapter C of Chapter X of Title 24 is proposed to be amended as follows:

PART 1930—DESCRIPTION OF PROGRAM AND OFFER TO PROPERTY AND LIFE INSURANCE AGENTS, BROKERS AND CERTAIN NONPROFIT CORPORATIONS AND ORGANIZATIONS

Present § 1930.4 is deleted and §§ 1930.4a and 1930.4b are added to read as follows:

§ 1930.4a Offer to pay commissions to property insurance agents and brokers to sell Federal crime insurance.

(a) The insurer hereby offers to pay to any eligible property insurance agent or broker a commission in an amount equal to the specified percentage of the applicable policyholder premium with respect to each Federal crime insurance policy he procures for an eligible applicant in accordance with the provisions of this subchapter. The actual submission of a valid and complete application, together with the applicable premium, resulting in the issuance of a policy to an eligible insured, all on approved forms and in accordance with the provisions of this subchapter, shall be deemed an acceptance of this offer: *Provided*, The agent or broker promptly submits the application and transmits the gross amount of the policyholder premium then due to the servicing company and complies, with respect to such policy, with any additional procedural requirements the insurer may then have imposed. It shall be a further condition of this offer that the agent or broker must certify on the application that he has fully carried out any duties set forth in the application. The amount of the commission shall be prorated in the event of the cancellation of any validly issued policy, and the agent or broker shall repay to the servicing company the amount of any unearned commission in excess of the minimum annual commission applicable to the then current term of the policy resulting from any such cancellation. Premiums must be paid by a check or money order made payable to the Federal Insurance Administration, and no agent or broker shall cause any applicant to make any Federal Crime Insurance premium payable to anyone other than the Federal Insurance Administration.

(b) Commissions earned by eligible agents and brokers under the authority of paragraph (a) of this section shall be paid to them in a lump sum by the servicing company either monthly or on such other equitable basis as the insurer may approve.

(c) Subject to a minimum annual commission of \$15 on each commercial policy and \$5 on each residential policy, the specified commission percentages of the policyholder premium for both residential and commercial insurance cover-

ages shall be the following: Initial policies, territory 01, 16 percent; 02, 15 percent; 03, 14 percent; and for all renewal business the commission shall be 12 percent. The renewal commission rate shall apply to any property that has previously been insured under the program unless the lapse of time since the termination of the previous policy is in excess of 1 year: *Provided*, That the commission for any such renewed policy shall be deemed payable only to the agent or broker, if any, who actually submits the renewal application.

(d) No service, placement, or other fee of whatsoever nature shall be charged by any agent, broker, or servicing company to any applicant or property owner under the program as a condition of placement; nor shall any applicant be compelled to purchase any other services or merchandise as a condition for having his application submitted.

(e) For the purposes of this offer, an eligible agent or broker means an agent or broker who is, at the time of making application for the policy, licensed and authorized to act as an agent or broker with respect to the State where the insured premises are located and who has not been suspended or debarred by the insurer. An eligible applicant is one whose premises to be insured are located in a State then currently designated as eligible for the sale of Federal crime insurance in § 1931.1 of this chapter.

(f) Insureds will be billed directly by the servicing company for all installment and renewal payments and insureds should make payment by check or money order payable to the Federal Insurance Administration and mail such payment to the servicing company and not to the agent or broker. But, nevertheless, in the event that an insured makes a timely installment payment (after the initial payment submitted with the application) to any agent or broker, proof of the timely receipt by the agent or broker shall be deemed proof of timely payment to the insurer.

(g) Neither this § 1930.4a nor any acceptance of this offer shall be deemed to confer upon any agent or broker any authority to act for, represent, or bind the insurer or the United States except as otherwise expressly provided herein.

§ 1930.4b Offer to pay finders fees to licensed property insurance and life insurance agents and brokers and to qualified nonprofit corporations and organizations to sell Federal crime insurance.

(a) The insurer hereby offers to pay to any eligible property or life insurance agent or broker and to any nonprofit corporation or organization, specifically designated by the Administrator, a finders fee of \$20 for each residential policy and \$40 for each commercial policy which such agent or broker or nonprofit corporation or organization procures for an eligible applicant in accordance with the provisions of this subchapter. The Administrator may in his discretion designate such nonprofit corporations or organizations which, after examination by his office, he concludes are qualified

to participate in the marketing of Federal Crime Insurance. No such corporation or organization shall be designated unless the Administrator determines that there has been conducted for the benefit of such corporation or organization a training program approved by and under the supervision of the Administrator which, in his judgment, assures that those who are to explain the Federal Crime Insurance Program to the public are adequately educated concerning the Program and are worthy of trust and confidence. The Administrator shall also determine that any corporation or organization to be designated has demonstrated a proven capability of serving the public interest. If at any time the Administrator determines that any such corporation or organization has failed to comply with the regulations governing the Program, he may upon giving thirty days written notice revoke his designation and no finders fee shall thereafter be paid to such corporation or organization. It is the intention of the Administrator to designate initially a limited number of nonprofit corporations and associations in a limited number of metropolitan areas. As the Program progresses, the Administrator may designate additional such corporations or associations in additional cities and States. For property insurance agents and brokers, this procedure for compensation is an alternative to that described in § 1930.4a and such an agent or broker choosing to be compensated under this § 1930.4b may not thereafter receive any commissions with respect to any policy written under this § 1930.4b. The actual submission of a valid and complete application, together with the applicable premium, resulting in the issuance of a policy to an eligible insured, all on approved forms and in accordance with the provisions of this subchapter, shall be deemed an acceptance of this offer: *Provided*, The agent or broker or nonprofit corporation or organization promptly submits the application and transmits the gross amount of the policyholder premium then due to the servicing company and complies with respect to such policy with any additional procedural requirements the insurer may then have imposed. Premiums must be paid by a check or money order made payable to the Federal Insurance Administration, and no property or life insurance agent, broker, nonprofit corporation or organization shall cause any applicant to make any Federal crime insurance premium payable to anyone other than the Federal Insurance Administration.

(b) Fees shall be paid in a lump sum by the servicing company either monthly or on such other equitable basis as the insurer may approve.

(c) No finders fee shall be payable for any policy with respect to a premises that has previously been insured under the program unless the lapse of time since the termination of the previous policy is in excess of 1 year.

(d) No service, placement, or other fee of whatsoever nature shall be charged to any applicant by any property or life insurance agent, broker, nonprofit corpora-

[4310-10]

DEPARTMENT OF THE INTERIOR

Office of the Secretary

[43 CFR Part 4]

PROCEEDINGS IN INDIAN PROBATE

Miscellaneous Changes in Certain Rules

AGENCY: Department of the Interior, Office of the Secretary.

ACTION: Proposed amendments to rules.

SUMMARY: Amendments pertain to the probate of individual Indian estates held in trust by the Federal Government are being proposed. The effect of these changes would be to permit an Administrative Law Judge of proper jurisdiction to (1) reopen an estate after 3 years to prevent a manifest injustice without first obtaining permission to do so from the Interior Board of Indian Appeals (IBIA) located in Arlington, Va., (2) remove the limits on the scope of review on appeals to the IBIA from an Administrative Law Judge's ruling, and (3) require the IBIA to distribute its decisions to interested parties immediately on issuance.

DATES: All comments received on or before November 7, 1977, will be considered.

ADDRESS: Interested persons may participate in these proposed changes of the rules by submitting written comments to the United States Department of the Interior, Office of Hearings and Appeals, Board of Indian Appeals, Room 1105, 4015 Wilson Boulevard, Arlington, Va. 22203.

FOR FURTHER INFORMATION CONTACT: Alexander H. Wilson, Room 1105, 4015 Wilson Blvd., Arlington, Va. 22203 (703-557-1400).

SUPPLEMENTARY INFORMATION: 43 CFR 4.242(h) of the present probate procedure does not permit an Administrative Law Judge to reopen an Indian trust estate probated by the Department of the Interior more than 3 years after entry of a final decision. He must consider any petition requesting reopening and then if he believes there is a possibility to correct a manifest injustice refer it along with his recommendation to the Interior Board of Indian Appeals (IBIA), which is a part of the Department of the Interior, Office of Hearings and Appeals, Arlington, Va. If the recommendation is accepted by the Board, the petition may be returned to the Administrative Law Judge for further proceedings and decision, subject to an appeal to the IBIA. The proposed regulation change would permit an Administrative Law Judge to reopen an estate which has been closed more than 3 years and take such action as he considers appropriate subject to appeal to the IBIA. The proposed amendment sets forth restrictions which must be satisfied in reopening estates after 3 years and contains provisions to ensure

that all parties concerned will receive an adequate opportunity to be heard.

Present requirements under 43 CFR 4.290 limit the scope of review in appeals to the IBIA to issues which were before the Administrative Law Judge when a ruling was made on a petition for rehearing or reopening. It is believed that this is an unnecessary restriction on the Board of Indian Appeals in its scope of review. The proposed change would delete this limitation.

Under the present 43 CFR 4.291, IBIA decisions are sent to the Administrative Law Judges for distribution. The proposed amendment would require the IBIA to distribute its decisions to all interested parties and offices upon issuance. The primary author of this document is Alexander H. Wilson, Chief Administrative Judge, Board of Indian Appeals, Office of Hearings and Appeals, 703-557-1400.

It is proposed to amend 43 CFR Part 4 in the following manner:

1. Section 4.242 is amended by revising paragraph (h) to read as follows:

§ 4.242 Reopening.

(h) If a petition for reopening is filed more than 3 years after the entry of a final decision in a probate, it shall be allowed only upon a showing that a manifest injustice will occur; that a reasonable possibility exists for correction of the error; that the petitioner had no actual notice of the original proceedings; and that petitioner was not on the reservation or otherwise in the vicinity at any time while the public notices were posted. A denial of such petition may be made by the Administrative Law Judge on the basis of the petition and available Bureau records. No such petition shall be granted, however, unless the Administrative Law Judge has caused copies of the petition and all other papers filed by the petitioner to be served on those persons whose interest in the estate might be adversely affected by the granting of the petition, and after allowing such persons an opportunity to resist such petition by filing answers, cross petitions or briefs as provided in (c) of this rule.

2. Section 4.290 is revised to read as follows:

§ 4.290 Who may appeal.

Any party in interest aggrieved by the action taken by an Administrative Law Judge on a petition for rehearing or on a petition for reopening shall have a right of appeal to the Board of Indian Appeals. The Board shall not be limited in its scope of review and may exercise the inherent authority of the Secretary to correct a manifest injustice or error where appropriate.

3. Section 4.296 is revised to read as follows:

§ 4.296 Decisions.

Decisions of the Board will be made in writing. Immediate distribution of decisions shall be made by the Board to all parties and offices concerned, including

the Administrative Law Judge, the Superintendent, the title plant designated under § 4.236(b), and to such other persons as the Board in its discretion deems appropriate. Decisions of the Board, which are final upon issuance, shall not be executed prior to the expiration of 60 days following the date of issuance of the decision. Immediately upon expiration of such period, the Administrative Law Judge shall issue any implementing or supplemental order which may be necessary in accordance with the Board's decision and shall notify the same offices and parties who received the decision of the Board.

NOTE.—The Department of the Interior has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: September 29, 1977.

JAMES A. JOSEPH,
Under Secretary.

PUBLIC NOTICE OF INTENT TO SELL BROADCAST STATION

Order Extending Time For Filing Comments and Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: Action taken herein extends the time for filing comments and reply comments to a Notice of Inquiry concerning public notice of intent to sell a broadcast station. Haley, Bader and Potts, a law firm, stated that because of intense client response it needs additional time to complete a process of consultation with its clients and prepare a response.

DATES: Comments must be received on or before November 3, 1977. Reply comments must be received on or before December 1, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION: Adopted: September 23, 1977.

Released: September 28, 1977.

By the Chief, Broadcast Bureau: 1. On July 27, 1977, the Commission adopted a Notice of Inquiry and Memorandum Opinion and Order, 42 Fed. Reg. 41141, August 15, 1977 concerning the above-captioned proceeding. The dates for filing comments and reply comments are October 3, and November 1, 1977, respectively.

2. On September 22, 1977, the law firm of Haley, Bader and Potts ("Haley") filed a request seeking an extension of time for filing comments and reply comments to and including November 3, and December 1, 1977, respectively. Haley states that it represents a number of licensees of stations in each of the broadcast services and, because of the importance of this proceeding, it has taken special efforts to alert its clients to the implications involved and to develop a response to the Commission's Notice. Haley notes that as a result of intense client interest, it is still in the process of receiving opinions and suggestions for such a response. Haley states that the additional requested time will permit the process of consultation to be completed and will be conducive to a more useful participation by the firm and its clients.

3. We believe the requested additional time is warranted in order to assure development of a sound and comprehensive record on which to base a decision in this proceeding. Accordingly, *It is ordered*, That the dates for filing comments and reply comments in Docket 21352 are extended to and including November 3, and December 1, 1977, respectively.

4. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

FEDERAL COMMUNICATIONS COMMISSION,

WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[Docket No. 21427; RM-2933]

FM BROADCAST STATION IN MARION, ALA.

Proposed Changes in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Proposed rule making.

SUMMARY: Action taken herein proposes the assignment of a first FM channel to Marion, Ala. Petitioners, Jimmie F. Mizell and Samuel M. Shiller, state the proposed channel would provide for a first full-time service for Marion, and Perry County.

DATES: Comments must be received on or before November 10, 1977. Reply comments must be received on or before November 30, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Mildred B. Nesterak, Broadcast Bureau, 202-632-7792.

SUPPLEMENTARY INFORMATION: Adopted: September 23, 1977.

Released: September 30, 1977.

In the Matter of Amendment of §73.202 (b), Table of Assignments, FM Broadcast Stations. (Marion, Alabama).

By the Chief, Broadcast Bureau: 1. *Petitioner, Proposal and Comments:* (a) Petition for rule making¹, filed July 22, 1977, by Jimmie F. Mizell and Samuel M. Shiller ("petitioners"), proposing the assignment of Channel 280A to Marion, Ala., as a first FM assignment to that community.

(b) The channel could be assigned in conformity with the minimum distance separation requirements provided the transmitter site of the proposed channel is located 4.8 kilometers (three miles) west-northwest of Marion. No responses were made to the petition.

(c) Petitioners state they will promptly apply for the channel, if assigned.

2. *Community Data:* (a) *Location:* Marion, seat of Perry County, is located approximately 40 kilometers (25 miles) northwest of Montgomery, Ala.

(b) *Population:* Marion—4,289; Perry County—15,388.²

(c) *Local Broadcast Service:* Marion has a daytime-only AM station, WJAM, licensed to Radio Marion, Inc.

3. *Economic Data:* Petitioners state that Marion is on the threshold of industrial growth. They note that a new plant which will employ approximately 150 people and add \$1 million in annual payroll to the local economy has recently been located in the community. They indicate that Marion is under con-

¹ Public Notice was given of the petition on August 8, 1977 (Report No. 1069).

² Population figures are taken from the 1970 U.S. Census.

tion or organization receiving finders fees under the Federal Crime Insurance Program; nor shall any applicant be compelled to purchase any other services or merchandise as a condition for having his application submitted.

(e) An eligible applicant is one whose premises to be insured are located in a State then currently designated as eligible for the sale of Federal crime insurance in § 1931.1 of this chapter.

(f) Insureds will be billed directly by the servicing company for all installments and renewal payments, and insureds should make payment by check or money order payable to the Federal Insurance Administration and mail such payment to the servicing company.

(g) Neither this § 1930.4b nor any acceptance of this offer shall be deemed to confer upon any property or life insurance agent or broker, nonprofit corporation, or any other person or organization any authority to act for, represent, or bind the insurer or the United States except as otherwise expressly provided herein.

(h) Failure of any person to comply with any provision of these regulations may result in the immediate suspension or debarment of the violator from any further participation in the Program.

Paragraphs (b) and (c) of present § 1930.3 are amended to read as follows:

§ 1930.3 Operation of program and inapplicability of State laws.

(b) No Federal crime insurance policy issued by or on behalf of the insurer shall be subject to any State or local tax or insurance law or regulation, nor shall any property of life insurance agent, broker, servicing company and nonprofit corporation or organization designated by the Federal Insurance Administrator be subject thereto with respect to any monies received or action taken in providing Federal crime insurance to the public under the authority of this subchapter; nor shall any person be subject thereto with respect to any action taken to make the public aware of Federal crime insurance.

(c) Nothing in this § 1930.3 shall be construed as authorizing or denying any State or subdivision thereof the right to impose any income or other tax on fees, commissions, or profits earned by property or life insurance agents, brokers, or any other persons solely for their own account or to prosecute any such agent of broker or other person for theft or embezzlement of monies received in connection with the Federal Crime Insurance Program.

(Sec. 7(d), 79 Stat. 670; 42 U.S.C. 3535(d); sec. 1103, 82 Stat. 566 (12 U.S.C. 1749bbb-17))

Issued at Washington, D.C., September 23, 1977.

JAY JANIS,
Secretary of Housing
and Urban Development.

[FR Doc. 77-29339 Filed 10-5-77; 8:45 am]

sideration as a possible site for two other large companies. Petitioners add that the existence of two colleges, Judson College and Marion Military Institute and their influence upon the community, gives rise to greater needs for self expression. Petitioners state that the proposed assignment would provide for a first full-time service for Marion and Perry County.

4. In view of the apparent need for a full-time local aural broadcast service in Marion and Perry County, we believe that consideration of the proposed FM assignment in a rule making proceeding would be in the public interest.

5. Accordingly, it is proposed to amend the FM Table of Assignments, § 73.202 (b) of the Commission's Rules, with regard to Marion, Alabama, as follows:

Channel No. Present Proposed
City Marion, Ala. 280A

6. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached Appendix and are incorporated herein.

NOTE.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

7. Interested parties may file comments on or before November 10, 1977, and reply comments on or before November 30, 1977.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

§ 73.202 [Amended]

1. Pursuant to authority found in Sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and section 0.31(b) (6) of the Commission's Rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's Rules and Regulations, as set forth in the Notice of Proposed Rule Making to which this Appendix is attached.

2. Showings required. Comments are invited on the proposal(s) discussed in the Notice of Proposed Rule Making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. Cut-off procedures. The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission Rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. Comments and reply comments; service. Pursuant to applicable procedures set out in sections 1.415 and 1.420 of the Commission's Rules and Regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of Proposed Rule Making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b), and (c) of the Commission Rules.)

5. Number of copies. In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. Public inspection of filings. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 N Street NW., Washington, D.C.

[Docket No. 21405; FCC 77-662]

STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

Prohibiting Transmission of Radiocommunications by Ship Stations in the Maritime Services When the Vessels Are on Land

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: The amendment of the Commission's rules is proposed to specifically prohibit the transmission of radiocommunications by ship stations in the maritime services when the vessels are on land. An increasing number of inquiries and complaints have been received concerning the operation of ship stations on land. This action is intended to clarify the rules and avoid confusion regarding the utilization of such shipboard stations on land.

DATES: Comments must be received on or before November 9, 1977, and reply comments must be received on or before November 21, 1977.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT:

Robert H. McNamara, Safety and Special Radio Services Bureau, 202-632-7197.

SUPPLEMENTARY INFORMATION:

Adopted: September 21, 1977.

Released: September 30, 1977.

In the Matter of Amendment of Part 83 of the rules to specifically prohibit the transmission of radiocommunications by ship stations in the maritime services when the vessels are on land.

By the Commission: 1. Notice of Proposed Rule Making is hereby given.

2. The Commission has been receiving an increasing number of inquiries and complaints regarding the transmission of radiocommunications by ship stations aboard vessels on land. Apparently the most common such occurrences involve recreational boats parked in driveways, backyards, adjacent to marinas, traveling along roadways, and the like. Part 83 of the Commission's rules (Stations on Shipboard in the Maritime Services) makes no provision for the operation of ship stations while they are on land. Generally transmissions by land borne ship stations would be considered beyond the scope of authority of such stations and thus in violation of the rules. However, rather than rely on a case by case interpretation of the rules, it is felt that confusion can best be avoided by including a specific statement in the rules prohibiting the transmission of signals or communications by ship stations while on land.

3. Accordingly, we propose to amend the rules by adding a new subparagraph (f) to Section 83.178 to indicate that stations subject to Part 83 shall not transmit signals or communications while on board vessels being transported, stored, parked or otherwise located on land. However, for the purposes of this proposed subparagraph, vessels which are aground as a result of a distress situation or in drydock undergoing repairs would not be considered as located on land.

4. The proposed amendment as set forth in the attached appendix, is issued pursuant to the authority contained in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

5. Pursuant to the applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before November 9, 1977, and reply comments on or before November 21, 1977. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other

relevant information before it, in addition to the specific comments invited by this notice.

6. In accordance with the provisions of Section 1.419 of the Commission's rules, an original and 5 copies of all statements, briefs or comments shall be furnished the Commission. All comments received in response to this Notice of Proposed Rule Making, will be available for public inspection in the Docket Reference Room in the Commission's Offices in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 83 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

Section 83.178(f) is added to read as follows:

§ 83.178 Unauthorized transmissions.

(f) Transmit signals, or communications while on board vessels being transported, stored, parked or otherwise located on land. (Vessels which are aground as a result of a distress situation or in drydock undergoing repairs are not considered to be located on land for the purposes of this subparagraph.)

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1062]

[Ex Parte No. MC-110]

SPECIAL REGULATIONS, FOR-HIRE MOTOR CARRIERS ENGAGED IN THE TRANSPORTATION FOR RECYCLING OR REUSE OF "WASTE" PRODUCTS IN FURTHERANCE OF RECOGNIZED POLLUTION CONTROL PROGRAMS¹

Service at New Plantsites

AGENCY: Interstate Commerce Commission.

ACTION: Initiation of rulemaking proceedings.

SUMMARY: The Interstate Commerce Commission is initiating this rulemaking proceeding to investigate the feasibility of permitting motor carriers to serve newly opened plantsites without the necessity of going through formal application procedures presently required under the Commission's Rules of Practice. This proceeding was prompted by recommendation number 12 of the Staff Task Force report on improving motor carrier entry regulation.

DATES: Comments due on or before December 5, 1977.

ADDRESSES: Send comments to: Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg, Assistant Deputy Director, Section of Operating Rights, Office of Proceedings, Interstate Com-

merce Commission, Washington, D.C. 20423. Phone: 202-275-7292.

SUPPLEMENTARY INFORMATION: On July 6, 1977, a specially appointed Commission Staff Task Force submitted its report to the Commission on recommendations for improving motor carrier entry regulation. One of the recommendations dealt with the situation where new plantsites are opened and applications are filed by motor carriers seeking to provide transportation services from the new plantsite.

When a plantsite opens, many applications are filed by carriers seeking to provide service. Although protestants may hold paper authority to provide some or all of the needed service, they have never served the new plantsite. It is difficult to see how these protestants will be harmed by grants of operating authority to serve the new plantsite. We question the necessity of requiring applicants to apply formally for authority to serve the new plantsite when existing carriers cannot be harmed.

We suggest that a carrier (presently authorized or new entrant) could apply to serve a new plantsite during a specified period prior to or after its opening. The carrier would be required only to demonstrate its fitness, to submit a brief affidavit of shipper support, and, possibly to submit certain other basic information. Comments are requested on this or any alternative procedure.

Among the questions that should be addressed are:

- (1) Is the proposal likely to lead to over-capacity at new plantsites?
- (2) Should existing carriers have standing to protest?
- (3) For what period of time prior to or after the opening of a "new plantsite" should these shortened procedures be operative?
- (4) How would implementation of such a proposal affect existing precedents?
- (5) What is meant by "new plantsite"?
- (6) Is this proposal a fair and equitable one?
- (7) Are there alternative implementation procedures?

PUBLIC COMMENTS INVITED

Interested persons are invited to comment on the proposal and suggest alternatives.

This document is promulgated under the authority of 49 U.S.C. § 204, 206, and 207; and 5 U.S.C. § 553, and was adopted at a General Session of the Interstate Commerce Commission held at its office in Washington, D.C., on the 28th day of September, 1977.

By the Commission:

H. G. HOMME, Jr.,
Acting Secretary.

¹ If adopted, Part 1062 will be re-titled "Part 1062—Special Application Procedure."
² A statement by Commissioner Stafford, dissenting, is filed as part of the original document.

FEDERAL REGISTER, VOL. 42, NO. 194—THURSDAY, OCTOBER 6, 1977

[3410-37]

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

[9 CFR Parts 317 and 319]

STANDARDS AND LABELING REQUIREMENTS FOR TISSUE FROM GROUND BONE

AGENCY: Food Safety and Quality Service, Meat and Poultry Inspection, U.S. Department of Agriculture.

ACTION: Proposed rulemaking.

SUMMARY: This document sets forth a proposed definition (including parameters for measuring compliance), permitted uses, and labeling requirements for a meat food product prepared by mechanical processing of tissue from ground bone. This proposal is based on new information, data, and arguments submitted to the Department in response to the April 27, 1976, proposal regarding mechanically deboned meat, as well as recommendations from a select Panel on Health and Safety Aspects of Use of Mechanically Deboned Meat and information and data available to the Department prior to publication of the first proposal.

DATE: Comments must be received on or before December 5, 1977.

ADDRESS: Any person wishing to submit written data, views, or arguments concerning the proposed rules may do so by filing them in duplicate with the Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250. All such submissions made pursuant to this notice will be made available for public inspection in the Office of the Hearing Clerk during regular hours of business. Comments on the proposal should bear a reference to the date and page number of this issue of the FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

Irwin Fried, Product Labeling and Standards Staff, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, area code 202-447-6042.

SUPPLEMENTARY INFORMATION:

THE FIRST PROPOSAL

On April 27, 1976, the Administrator published a notice of proposed rulemaking titled "Definition of Meat and Classes of Meat, Permitted Uses, and Labeling Requirements." It appeared in Vol. 41, No. 82, pages 17560-17566 of the FEDERAL REGISTER with a comment period which closed on August 25, 1976. That proposed rulemaking included, among other things, a proposal for the permitted manufacture of "Mechanically Deboned Meat" and related products.

As proposed, these materials were defined as the product resulting from the mechanical separation and removal of most of the bone from attached skeletal muscle tissue. The proposed parameters for the three classes are given in Table 1.

TABLE 1

Proposed names	Meat class	Maximum percent calcium	Minimum percent protein	Minimum percent essential amino acids or minimum protein efficiency ratio	Maximum percent fat
Mechanically deboned meat	7	0.75	14	2.5 or 33	30
Mechanically deboned meat for processing	8	1.0	10	2.5 or 33	
Mechanically deboned meat for rendering	9				

As the table shows, limits for Mechanically Deboned Meat were to be lower for calcium and fat and higher for protein than parameters for the other two classes. Mechanically Deboned Meat for Processing was to have a requirement for protein quality, as measured by PER or proportion of essential amino acids, that was equal to the requirements for Mechanically Deboned Meat. No nutritional parameters were to be set for Mechanically Deboned Meat for Rendering, which was not to be used as such in the formulation of meat food products. No limitation on amount used in products was proposed for Mechanically Deboned Meat, but Mechanically Deboned Meat for Processing was to be limited to 20 percent of the total meat, meat by-products, poultry products, or poultry meat content of the product. The proposal also specified those products in which Mechanically Deboned Meat or Mechanically Deboned Meat for Processing were to be permitted as ingredients.

COMMENTS ON THE PROPOSAL

More than 1,100 comments were received in response to the proposal for redefining meat. The great majority of these comments dealt, in whole or in part, with the three proposed classes of mechanically deboned product (hereafter referred to as MDM). Many of these comments were complex, dealing with more than one aspect of the proposed redefinition. Also, many approaches to the same basic questions were used by the different commenters, further adding to the complexity of summarizing the issues. Therefore, no attempt has been made to provide exact tallies of the number of people commenting on any one issue in the discussion of that issue.

A general description of the comments and their sources follows:

Total comments	1100
Based on review of the proposal	175
Based on reports from secondary sources	925
From consumers (includes 13 organizations)	975
From industry (includes 17 trade groups)	80
From government agencies (Federal, State, local)	15
From university and college faculty	20
From health professionals (MD, RN, and OD primarily)	10

Of the 860 comments specifically addressed to the question of whether or not MDM should be allowed to be prepared and used in other products, 355 were yes and 505 were no. Many of these comments were based on reports in the

news media rather than on readings of the proposal itself.

Of the comments based on readings of the proposal itself, consumers generally questioned the proposal, while others favored it. Comments by consumers fell into the following broad categories:

1. **Labeling.**—Concern was consistently expressed that if MDM was used, its presence should be identified in ingredients statements on product labels, so that the consumer could have knowledge needed to select or avoid such products as desired. Many of the concerns about labeling were tied to another concern, that of economics.

2. **Economics.**—Because there is a potential for the eventual use of one billion pounds of MDM yearly, consumers believed there would be a definite economic impact. They wanted savings, if any, passed on to them.

3. **Health.**—Issues related to health and safety aspects of use of MDM were of primary importance to consumers. Their concerns fell into the following categories:

a. **Bone.**—What effects would the amount of calcium permitted in MDM, the size of bone particles, and the digestibility of the calcium in bone have on calcium-related diseases and disorders such as diverticulitis?

b. **Trace elements.**—To what extent would there be problems of health and safety because of the presence or absence in bone of trace elements such as lead, fluorine, strontium-90, iron, nickel or zinc, and chemical and pesticide residues? Would any of these constituents be present in product containing MDM in amounts great enough to have toxic effects? Would any be helpful in improving nutrition?

c. **Lipids.**—Would there be changes in the amounts and kinds of fat in meat food products if they contained MDM? If so, would these changes be harmful to persons eating these meat products?

d. **Microbiological safety.**—Would meat food products containing MDM carry higher bacterial loads than meat food products without MDM? Should there be limits to the amounts of bacteria allowed in MDM?

Comments which were based on direct readings of the proposal, and which favored it, gave the following reasons:

1. The calcium contained in MDM is digestible and would be a useful addition to American diets.

2. The extra meat product so recovered would add a significant amount of high quality protein food to the world food supply.

3. Safety of the meat product recovered by this process need not be questioned because of the history of usage of mechanically deboned poultry (10-15 years) and mechanically deboned fish (20 years), and present usage of mechanically deboned red meat in approximately 40 countries throughout the world.

Industry spokesmen stated that proposed uses for MDM were too restrictive and should be expanded, both in permitted amounts and in the number of meat food products in which MDM could be used. Competition would see that if savings were realized, they would be passed on to the consumer.

Comments from industry also questioned the need for labeling other than species labeling (beef, pork, etc.) on the basis that there was no precedent for identifying the method of production in an ingredient statement, and mechanical deboning is a process resulting in a traditional ingredient. Specific labeling, according to some of these comments, would result in higher costs. Most health professionals and university faculty, on the other hand, favored either specific labeling of MDM in ingredient statements, or labeling for calcium content of final products, or both.

Comments from several consumer oriented organizations and Government agencies showed concern over whether or not use of MDM would result in adulteration, particularly if specific labeling of MDM in ingredient statements was not required.

A number of comments from industry and university faculty addressed themselves to technical aspects of the nutritional requirements for MDM (maximum contents of calcium and fat, and minimum requirements for amount and quality of protein). These comments were concerned not only with what the requirements should be, but also what measurements should be used to monitor these requirements.

Comments were also received concerning whether or not nutrition labeling should be required for products containing MDM and asking questions concerning flavor and texture of meat food products containing MDM.

THE INTERIM REGULATION

Also on April 27, 1976, in the issue of the FEDERAL REGISTER containing the proposed Redefinition of Meat, a regulation which included interim standards for MDM was published. The interim standards were to remain in effect pending final rulemaking on the proposal, unless rescinded before rulemaking was completed. The interim regulation was considered necessary in order to develop data, previously unavailable except on an experimental basis, for determining if the analytical parameters were effective in assuring nutritional quality of the products.

After the interim regulation was issued, a coalition of consumer oriented organizations and the Attorney General of Maryland took legal steps to have the interim regulation repealed. Following two court hearings, a Preliminary Injunction was issued on September 10,

1976, enjoining the Secretary from using the provisions of the interim regulation with respect to MDM. In the Court's opinion, the Department had not adequately assessed the potential health hazards of MDM in three areas:

(1) Possible gastroenterological side effects which may result from frequent ingestion of bone particles;

(2) The possibly unduly high levels of strontium-90 which may be contained in bone particles; and

(3) The possible long term effects of the fat content present in MDM on the cardiovascular systems of those Americans for whom processed meat products constitute a significant portion of their diets.

The Court further indicated that until such assessments were made, MDM was considered adulterated and an adulterant. Following the September 10 Court Order, the Department ordered discontinuation of the placement of the official mark of Federal inspection on all MDM, which in effect stopped the production and use of it.

THE SELECT PANEL AND ITS FINDINGS ON HEALTH AND SAFETY ASPECTS OF MDM

In order to respond to the questions on health and safety raised by the Court, an intensive analytical program was initiated to develop data on representative amounts of nutrients and problem substances in MDM. Samples for analysis were obtained from materials which had been commercially produced prior to the court ordered ban and had been maintained in frozen storage. The samples were analyzed in the laboratories of the Food Safety and Quality Service, using standard methods of analysis. To assure reliability of the procedures as applied to these samples, cross-check analyses for critical substances were made on some of the same samples by expert analysts in other Government laboratories.

To evaluate findings from this analytical program and pertinent information and data gathered from other sources, a panel of eminent Government scientists who are expert in a wide range of subject areas dealing with health and safety aspects of foods was convened.

Members of this group, hereafter called the Panel, were asked to respond to questions which had been raised both by the Court and in the comments on health and safety aspects of use of MDM. The summary of the Panel's conclusions and recommendations follows:

The Panel, after reviewing all pertinent data and information and the reports of the subcommittees, unanimously accepted those reports and drew the following conclusions and made the following recommendations:

A. Bone particle size as obtained with mechanical deboners currently available presents hazards to health. However, the Panel recommended that limits for maximum particle size be included in any regulation to be promulgated allowing the production of MDM.

B. A slight nutritional benefit is to be expected for most people from the calcium in MDM, especially for persons whose customary intake of calcium falls below the Recommended Dietary Allowance. The calcium

which would be added to the diet by MDM is not so great in amount as to pose a hazard to the health of most people, except for those persons who are hyper-absorbers of calcium and likely already to be under medical supervision to limit their calcium intakes.

C. The fluoride content of MDM poses no health problem for adults. Fluoride intakes of children need to be controlled more closely than intakes of adults in order to avoid mottling of teeth. Since little is known about the fluoride intake of children, caution is advised. Data on projected consumption of MDM show that intakes of fluoride from MDM would be negligible, even for children consuming much higher than average quantities of MDM with a high fluoride content. MDM in the Panel's judgment presents no problem for children. However, fluoride intake of infants is known to be high. The Panel, therefore, concluded that prudence dictates that MDM not be incorporated into baby and junior foods at present. This recommendation is based primarily on lack of information rather than evidence of a hazard and should be subject to further evaluation as data are gathered.

D. The Panel concurred with the subcommittee evaluation that, based on currently available data and relative to the magnitude of other environmental sources of lead, the amount of lead which would be provided by MDM is toxicologically insignificant for children and adults.

E. Amounts of cadmium in MDM are so small as to be not detectable by current analytical procedures, and are of no public health significance.

F. Selenium was judged not to be a health problem. There is no evidence to indicate that selenium concentrates in bone.

G. Increases in dietary intakes of strontium-90 from use of MDM would be negligible, amounting to about a one-percent increase in exposures which are already well below tolerable limits. MDM poses no health hazards in regard to strontium-90.

H. Cobalt, copper, iron, nickel, zinc, arsenic, and mercury pose no potential problems in relation to use of MDM. Consumption data indicate that MDM would probably provide about 1 percent of the expected daily intake of cobalt. Additional iron from MDM would be in the order of 2.5 percent of the total iron intake, and should be readily available to the body. Zinc content of MDM is essentially the same as zinc in hand-deboned meat, and use of MDM should not affect bioavailability of zinc from other dietary sources. Arsenic has not been found in mechanically deboned poultry, and poultry would be expected to have greater relative intakes of arsenic than red meat animals. Therefore, arsenic should present no problem in MDM. Mercury does not accumulate in bone.

I. Chlorinated hydrocarbon residues present no special problem in MDM, because if present in measurable amounts, they are found in quantities well below established tolerance or action limits.

J. Data presently available on the lipid spectrum of MDM show that it is comparable to the lipid pattern found in hand-deboned meats. However, because of concern over the general problem of excessive intakes of fat and their effect on health, the Panel recommended that limits be placed on the fat content of MDM, on the basis of good manufacturing practices, and that limits also be placed on the fat content of products in which MDM could be used.

K. Proposed standards for protein content and quality (PER) are reasonable. Efforts should be continued to find more rapid and economical methods for monitoring protein quality, to replace the cumbersome PER assay.

L. The microbiology of MDM presents no unique hazards and should not be a problem if good manufacturing practices and quality control programs are employed.

M. Tetracyclines accumulate in the bones of young animals, and a recent German study has found tetracyclines in calf bones. The amounts are such that even at the highest level found, residues in products made with MDM derived from calf bones would be within present permitted tolerance. The U.S. slaughters comparatively few calves, and it is unlikely that there will be calf MDM. Tetracyclines in older cattle and swine present no problem. Though it is apparent that the use of tetracyclines in calves is on the decline in the United States, controls should be established to assure that if MDM is prepared from calves it will not exceed established tolerances for such drugs.

N. The Panel agreed that MDM contained in food products should be so labeled in the ingredients statement, so that persons who must stringently restrict calcium intake could avoid these products. The Panel further agreed that there was no need for health or safety reasons to make nutrition labeling mandatory for products containing MDM, although nutrition labeling of all food products containing MDM, although nutrition labeling of all food products should be encouraged.

O. The Panel recommended that efforts should be made to inform and educate health and medical professionals and the general public about dietary effects of use of MDM, especially in relation to calcium fluoride.

P. The Panel recommended that further research should be encouraged on MDM when it is again produced commercially. Suggestions for research are given in several of the subcommittee reports. (End of Panel's conclusions and recommendations.)

Single copies of the complete report of the Panel may be obtained without charge from the Office of Information, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250. The report is entitled, "Health and Safety Aspects of the Use of Mechanically Deboned Meat, Volume I. Final Report and Recommendations, Select Panel."

THE REVISED PROPOSAL

Because of the large number of questions of substantive concern, the widespread interest, and the court activity which were generated by the proposal and the interim regulation allowing production of MDM, it appears that several changes are needed in the proposed regulation, and that it would be highly desirable to provide an opportunity for the public to comment further on the proposed rule. Therefore, a revised proposal is being issued for standards and labeling requirements for Tissue from Ground Bone.

The new proposal contains the following provisions:

1. The product would be named "Tissue from Ground Bone". This appears to be an accurate descriptive name for the product.

2. Tissue from Ground Bone would be classified as a meat food product rather than as a class of meat. This change is indicated because of the presence in Tissue from Ground Bone of bone marrow and of minerals such as calcium and fluoride, which minerals are present in large amounts than found in the muscle and accompanying fatty tissue which have been traditionally defined as meat.

The change is further indicated by the fact that the United States District Court for the District of Columbia has held that this product is not meat as traditionally defined. However, Tissue from Ground Bone would be a meat food product, which is defined under the Federal Meat Inspection Act as, "... made wholly or in part from any meat or other portion of the carcass ..."

3. The number of classes of such product has been reduced from three to one. The classes originally designated as Mechanically Deboned Meat and Mechanically Deboned Meat for Processing have been combined. This was done because a single use limitation for Tissue from Ground Bone is being proposed making separate classes unnecessary.

4. The calculation of percent of essential amino acids will be in terms of total amino acids, rather than in terms of total protein. Also, data on the essential amino acid, tryptophan will be excluded in making this calculation.

The change to calculating in terms of total amino acids follows recommendations of university and industry scientists, who state that greater accuracy can be achieved by this procedure than by calculating as percent of total protein. Tryptophan is present in small and relatively constant proportions that would have little effect on the total percentage of amino acids. Also, tryptophan must be determined by a separate method from that used for the other amino acids, so deleting the requirement for its analysis would help control costs of measuring compliance.

5. A requirement has been added that size of the openings in the sieves, screens, or ports of the equipment used in processing Tissue from Ground Bone should be no greater than 0.5 mm. in diameter.

This change follows the recommendation of the Select Panel that quality control measures be instituted in order to limit particle size to those levels presently associated with good manufacturing practice.

6. The requirements for minimum protein and maximum fat for Tissue from Ground Bone would be set at 14 percent and 30 percent respectively. These limits compare with minima of 14 percent and 10 percent for protein, and maxima of 30 percent and no limit for fat proposed for Mechanically Deboned Meat and Mechanically Deboned Meat for Processing, respectively. Tissue from Ground Bone thus compares with Mechanically Deboned Meat in that it has the same minimum protein content and the same maximum fat content but, as is discussed in 9 below, the same limit on usage in finished products as did Mechanically Deboned Meat for Processing. The Panel, in its deliberations, was reluctant to approve a product that would increase the total fat composition of meat products in which it was used. We believe that the proposed limitations satisfy the concerns of the Panel, especially since large portions of the meat diet, such as frankfurters, hamburger and ground beef, and beef sausage, are limited to 30 percent fat levels.

A 14 percent protein requirement on Tissue from Ground Bone with a 30 per-

cent fat level precludes adulteration with water.

7. The provision that would allow Tissue from Ground Bone to be labeled by species only (beef, pork) rather than as a specific ingredient has been deleted. The species name would be used only in the ingredient statement and the term "Tissue from Ground Bone" would be used in conjunction with the product name.

The change to specific labeling follows the Panel's recommendation that food products containing Tissue from Ground Bone should be so labeled in the ingredient statement, so that persons who must stringently restrict calcium intakes could avoid these products. Specific labeling was also overwhelmingly desired by consumers and health professionals who commented on the original proposal.

8. Tissue from Ground Bone would not be allowed in baby (strained), junior, or toddler foods.

This change follows the recommendation of the Select Panel, which concluded that prudence dictates that Tissue from Ground Bone should not be incorporated into baby, junior, and toddler foods at present. This recommendation was based on lack of information rather than evidence of a hazard. The Panel's concern was that fluoride intakes of infants from birth to six months were known to be high, that long term data on the fluoride content of Tissue from Ground Bone are not available at present, and that the fluoride content of Tissue from Ground Bone may vary in different localities and may also depend on the age of the animal from which it is produced.

It should be noted that the Panel's concern for controlling fluoride intakes of infants was based not on a possible health hazard, but on the possibility of development of mottling of the teeth. Mottling can occur at much lower levels of fluoride intake than are required to develop fluorosis. Thus, controlling intakes of fluoride at levels which do not permit the development of mottled teeth would automatically insure that fluoride intakes stayed far below levels at which they were a health hazard.

Consumption studies reviewed by the Panel showed that projected increases in fluoride intakes from use of Tissue from Ground Bone would be negligible for all infants and children (ages 0 to 18 years), even at the top one percent level of consumption. Thus, the Panel concluded that it was not necessary to further restrict the use of Tissue from Ground Bone for reasons of safety. The Panel also indicated that the restriction on baby, junior, and toddler foods should be subject to further evaluation as data are gathered.

9. A limit of usage for Tissue from Ground Bone in any product would be set at 20 percent.

The original proposal set a use limit for Mechanically Deboned Meat for Processing of no more than 20 percent of the meat block (total of all meat, meat byproducts, poultry products and poultry meat) used in the formulation. No use limit was set for Mechanically Deboned Meat. The interim stand-

ard had stricter limits, permitting Mechanically Deboned Meat for Processing to make up no more than 15 percent, and Mechanically Deboned Meat no more than 20 percent, of the meat block of formulated products. Developmental research had showed that finished products retaining characteristic sensory qualities could be prepared with about 20 percent of the meat block as Tissue from Ground Bone, so these limitations on tissue were judged to be reasonable for purposes of data gathering. The limit is proposed to provide for caution in the introduction of this new product.

The need to proceed cautiously was emphasized by the evidence from analytical data that Tissue from Ground Bone is higher in content of fluoride and lead than is hand-deboned meat. A limitation of 20 percent Tissue from Ground Bone in the meat block was therefore built into calculations projecting the increased consumption of minerals from such tissue. The resulting consumption data were those used by the Select Panel in making its evaluation and recommendations. Safety at higher usage levels has been neither established nor disproved. Therefore, it has been concluded that permission for higher use levels would not be warranted at present.

10. Tissue from Ground Bone would not be allowed in ground beef, hamburger, fabricated steaks, barbecued meats, roast beef—parballed and steam roasted, corned beef cuts, lima beans with ham and similar products, beef with gravy and gravy with beef, and meat pies.

The Department believes that inclusion of Tissue from Ground Bone in the above listed products would impair the basic characteristics of such products. For example, in most of these products, the consumer expects solid pieces of meat. In other cases (hamburger, ground meat, and fabricated steaks), the consistency normally expected by the consumer is significantly different than that contributed by Tissue from Ground Bone. These considerations led to a study by the Select Panel of consumption data. Its deliberations led the Department to propose the exclusion of these products. Expanding the usage of Tissue from Ground Bone to such products may require reconsiderations of the 20 percent usage level.

The proposed rule retains the following provisions from the earlier proposal:

1. The requirement for maximum calcium is set at 0.75 percent (the proposed maximum for class 7, MDM), and the minimum protein quality is set at a Protein Efficiency Ratio of 2.5 (the proposed minimum for classes 7 and 8, MDM and MDM for Processing).

Analytical data gathered after the first proposal was issued indicate that it is possible to routinely prepare Tissue from Ground Bone containing no more than 0.75 percent calcium. Furthermore, because significant and positive correlations were found between the content of calcium and the content of fluoride or lead in Tissue from Ground Bone, control of calcium may hold promise as a way of controlling content of these two potentially toxic elements. In addition,

data gathered to date indicate that when calcium content of Tissue from Ground Bone is maintained at 0.75 percent or less, the protein quality (PER) is highly likely to equal or exceed 2.5, the proposed minimum. Therefore, it is proposed that a maximum of 0.75 percent calcium in Tissue from Ground Bone shall be included in the standards for this meat food product.

It is also proposed to maintain the protein quality requirement of a minimum PER of 2.5 for Tissue from Ground Bone. This requirement was recommended by the Select Panel, along with the provisions for measuring PER discussed below in item 2. Requiring a minimum PER of 2.5 would assure a product of high protein quality, equal to the quality of the milk protein casein. In addition, data gathered since publication of the previous proposal indicated that Tissue from Ground Bone which meets this standard for PER can be routinely prepared when good manufacturing practices (especially control of calcium) are employed.

2. Use of the value of percent of essential amino acids as a measure of protein quality would be allowed as an alternate to use of the Protein Efficiency Ratio.

The Select Panel found the proposed standards for protein content and quality (PER) to be reasonable, but recommended that efforts should be continued to find more rapid and economical methods for monitoring protein quality, to replace the cumbersome PER assay. In response to these recommendations, it is proposed that the standard for protein quality should be based on the PER, and rat feeding tests should be the only recognized method of determining the PER; that following the effective date of these amendments to the regulations, an amino acid profile which had a minimum of 33 percent of the essential amino acids isoleucine, leucine, lysine, methionine, phenylalanine, threonine, and valine should be accepted in lieu of data on PER; and that after the expiration of approximately 12 to 18 months following the effective date of these amendments, a decision will be made as to the continued use of the alternate method, based on all information available to the Department, including data furnished by meat processors.

3. No standards are being set for maximum microbiological content of Tissue from Ground Bone.

In its analytical programs, the Department has found no evidence whatsoever that there is any bacterial health hazard associated with Tissue from Ground Bone when handled in keeping with good manufacturing practices. Furthermore, there is evidence, from the experience of the State of Oregon with bacterial standards for ground meat that the standards were not effective in reducing bacterial content of the ground meat, that the standards were unfair to consumers, who might be led to believe they resulted in meat with a lower bacterial content and thus improved quality, and that the cost of enforcing the standards was not justified by the benefits derived.

The Department has strict sanitary requirements, and handling practices (including times and temperature at which processed and stored) are expected to be such that product would not be abused. Federal meat inspection regulations already in effect require operators of establishments to institute appropriate control programs to assure the maintenance of their establishments and the preparation, marking, labeling, packaging and other handling of their products are strictly in accordance with sanitary and other requirements of the regulations. Inspectors are knowledgeable about perishability of meat products, sanitation, and proper handling practices. The meat inspection regulations provide ample authority for reinspection as deemed necessary using appropriate means, which may include statistically sound sampling to assure a high level of confidence in the final evaluation of the product.

The Department uses in other products, and intends to use in Tissue from Ground Bone, microbiological data as a basis for assuring that processing procedures are maintained in such a manner as to produce wholesome food. Handling practices would be monitored on a continuing basis.

4. Product failing to meet the requirements for Tissue from Ground Bone could be used for rendering.

Because of health considerations discussed above, product failing to meet the requirements for Tissue from Ground Bone because of high calcium may only be used for the production of animal fats. Until such time as standards are set for the low temperature rendered product, such product produced from Tissue from Ground Bone failing to meet the requirements for reasons other than high calcium may be used in the production of imitation products as well.

On the basis of all the foregoing, the following amendments to the Federal meat inspection regulations (9 CFR Parts 317 and 319) are proposed:

1. Section 317.2(j) would be amended by adding a new subparagraph (13) to read as follows:

§ 317.2 Labels: definitions; required features.

• • • • •

(j) • • • • •

(13) When any Tissue from Ground Bone described in 319.5 of this subchapter is used as an ingredient in the preparation of a meat food product the name of the finished product shall be further qualified by the phrase, "Tissue from Ground Bone Added." Examples of such label declarations are: "Pork Sausage—Tissue from Ground Bone Added"; "Frankfurter—Tissue from Ground Bone Added"; "Cooked Salami—Tissue from Ground Bone Added". Any phrase qualifying the product name shall be at least ½ the size of the product name. In addition, the ingredient statement shall include in proper order of predominance the tissue from ground (species) bone; e.g., Tissue from Ground Beef Bone.

• • • • •
§§ 319.2—319.4 [Reserved]

2. Sections 319.2, 319.3 and 319.4 would be reserved, and a new § 319.5 would be

added to the meat inspection regulations to read as follows:

§ 319.5 Standards for tissue from ground bone.

(a) Any tissue resulting from the mechanical separation and removal of most of the bone from attached skeletal muscle, and subsequent straining through a screen, sieve, or port. The openings in such screens, sieves or ports shall not exceed 0.5 millimeter in diameter. The tissue resulting from the separating process shall not have a calcium content exceeding 0.75 percent; shall have a minimum protein content or not less than 14.0 percent with a minimum PER of 2.5 (except as modified in paragraph (e) (1) of this section), and a fat content of not more than 30 percent. Such tissue failing to meet the calcium requirements of this paragraph shall only be used in producing animal fats. Such tissue failing to meet any of the other requirements of this paragraph shall only be used in producing animal fats or, alternatively, may be used in the formulation of imitation products.

(b) [Reserved]

(c) [Reserved]

(d) [Reserved]

(e) (1) An essential amino acid content of at least 33 percent of the total amino acids present in Tissue from Ground Bone shall be accepted as evidence of compliance with the protein quality requirement set forth in paragraph (a) of this section. The percent of essential amino acid content is calculated as the total of the percentages of isoleucine, leucine, lysine, methionine, phenylalanine, threonine, and valine, divided by the percentage of total amino acids and multiplied by 100.

(2) A prerequisite for the production of Tissue from Ground Bone shall be a plant quality control system that the Administrator finds meets the requirements of this section. Acceptance is based on the ability of the system to provide the controls and information necessary to assure that the product will meet the requirements described in § 319.5(a) and to enable establishment personnel and Program employees to monitor the system for effectiveness. As a minimum, the system shall include a written description of the methods used by the establishment to maintain the wholesomeness and uniformity of the raw ingredients used in manufacturing product, to control the blending of the raw ingredients, and to control the handling and processing of the raw ingredients and the finished product, and shall contain provisions for chemical analyses of the product to determine compliance with standards for the product. Analyses to verify basic finished product constituents of fat, protein, calcium, essential amino acid content, and protein efficiency ratio shall be performed by the operator of the establishment or its agent to assure that finished product will meet the requirements in § 319.5(a). Finished product samples shall be analyzed by a laboratory in accordance with methods prescribed in the current "Official Methods of Analysis of the Association of Official Analytical

Chemists,"² or by other appropriate analytical procedures approved by the Administrator in each case.

3. A new § 319.6 would be added to the Federal meat inspection regulations (9 CFR 319.6) to read as follows:

§ 319.6 Limitations with respect to use of Tissue from Ground Bone.

(a) When the Tissue from Ground Bone described in § 319.5 of this Part is used as an ingredient in other meat food products, the finished product shall be labeled in accordance with § 317.2(j) (13) of this subchapter. Products required to be prepared from meat or meat products of one species may contain Tissue from Ground Bone only of the species.

(b) Tissue from Ground Bone described in § 319.5 of this Part may constitute up to 20 percent of the meat portion of any meat food product except listed in paragraph (c) of this section.

(c) Tissue from Ground Bone described in § 319.5 of this Part may not be used in baby (strained), junior or toddler foods, ground beef, hamburger, fabricated steaks (319.15 (a), (b) and (d)), barbecued meats (319.80), roast beef—parboiled and steam roasted (319.81), corned beef cuts (319.100), lima beans with ham and similar products (319.310), beef with gravy and gravy with beef (319.313), and meat pies (319.500).

4. The second sentence of § 319.14(c) would be amended to read:

§ 319.15 Miscellaneous beef products.

(c) . . . Binders or extenders, Tissue from Ground Bone used in accordance with § 319.6, and/or partially defatted beef fatty tissue may be used without added water or with added water only in amounts such that the product's characteristics are essentially that of a meat patty.

§ 319.100 [Amended]

5. Section 319.100 "Corned Beef" would be amended by adding the following immediately after the second sentence: "Tissue from Ground Bone may be used in accordance with § 319.6."

§ 319.105 [Amended]

6. Section 319.105 "Chopped Ham" would be amended by adding a new subsection (b) (10) to read as follows: "Tissue from Ground Bone used in accordance with § 319.6."

7. The first sentence of section 319.141 would be revised to read:

§ 319.141 Fresh pork sausage.

"Fresh Pork Sausage" is sausage prepared with fresh pork or frozen pork or both, and may contain Tissue from Ground Bone in accordance with § 319.6, but not including pork byproducts, and may be seasoned with condimental substances as permitted under Part 318 of this subchapter. . . .

8. The first sentence of § 319.142 would be revised to read:

§ 319.142 Fresh beef sausage.

"Fresh Beef Sausage" is sausage prepared with fresh beef or frozen beef, or

both, and may contain Tissue from Ground Bone used in accordance with § 319.6, but not including beef products, and may be seasoned with condimental substances as permitted under Part 318 of this subchapter. . . .

9. The first sentence of § 319.143 would be revised to read:

§ 319.143 Breakfast sausage.

"Breakfast Sausage" is sausage prepared with fresh and/or frozen meat; or fresh and/or frozen meat and meat byproducts, and may contain Tissue from Ground Bone in accordance with § 319.6, and may be seasoned with condimental substances as permitted in Part 318 of this subchapter. . . .

10. The first sentence of § 319.144 would be revised to read:

§ 319.144 Whole hog sausage.

"Whole Hog Sausage" is sausage prepared with fresh and/or frozen meat from swine in such proportions as are normal to a single animal, and may include any Tissue from Ground Bone produced from the animal and used in accordance with § 319.6, and may be seasoned with condimental substances as permitted under Part 318 of this subchapter. . . .

§ 319.145 [Amended]

11. Section 319.145(a) (1) would be amended to read:

(1) "Italian Sausage" shall be prepared with fresh or frozen pork, or pork and pork fat, and may contain Tissue from Ground Bone in accordance with § 319.6.

12. Section 319.145(a) (2) would be amended by adding the following sentence immediately after the first sentence of that subparagraph: "Tissue from Ground Bone may be used in accordance with § 319.6."

13. Section 319.145(a) (3) is amended by adding the following sentence to the end of that subparagraph: "Tissue from Ground Bone may be used in accordance with § 319.6."

§ 319.180 [Amended]

14. The sixth sentence of § 319.180(a) would be revised to read: "Such products may contain raw or cooked poultry meat not in excess of 15 percent of the total ingredients, excluding water, in the sausage, and Tissue from Ground Bone used in accordance with § 319.6."

15. The seventh sentence of § 319.180 (b) would be revised to read: "These sausage products may contain poultry products, individually or in combination, not in excess of 15 percent of the total ingredients, excluding water, in the sausage, and may contain Tissue from Ground Bone in accordance with § 319.6."

16. The second sentence in § 319.180 (c) would be changed to read: "When such sausage products are prepared with meat from a single species of cattle, sheep, swine, or goats they shall be labeled with the term designating the particular species in conjunction with the generic name, e.g., 'Beef Frankfur-

ter', and when such sausage products are prepared in part with Tissue from Ground Bone in accordance with § 319.6, they shall be labeled in accordance with § 317.2(j) (13) of this subchapter."

§§ 319.104, 319.182, 319.260, 319.261, 319.280, 319.281, 319.300, 319.301, 319.305, 319.306, 319.312, 319.760 [Amended]

17. The following sentence would be inserted immediately after the first sentence of each of the following sections: §§ 319.104(f) Pressed ham, spiced ham, and similar products, 319.182 Liver sausage and braunschweiger, 319.260 Luncheon meat, 319.261 Meat loaf, 319.280 Scrapple, 319.281(a) (1) Bockwurst, 319.300 Chili con carne, 319.301 Chili con carne with beans, 319.305 Tamales, 319.306 Spaghetti with meat balls and sauce, spaghetti with meat and sauce, and similar products, 319.312 Pork with barbecue sauce and beef with barbecue sauce, and 319.760(a) Deviled ham, deviled tongue, and similar products: "Tissue from Ground Bone may be used in accordance with § 319.6."

§§ 319.281, 319.302, 319.304, 319.307, 319.311, 319.600, 319.762 [Amended]

18. The following sentence would be added at the end of the following sections: §§ 319.281(a) (1) Bockwurst, 319.302 Hash, 319.304 Meat stews, 319.307 Spaghetti sauce with meat, 319.311 Chow mein vegetables with meat and chop suey vegetables with meat, 319.600(a) and 319.600(b) Pizza, and 319.762 Ham spread, tongue spread, and similar products: "Tissue from Ground Bone may be used in accordance with § 319.6."

19. Section 319.303 is amended by adding a new subsection (b) (9) to read:

§ 319.303 Corned beef hash.

(b) . . .

(9) Tissue from Ground Bone when derived from carcasses of cattle may be used in accordance with § 319.6.

**PRESIDENT'S COMMISSION ON MILITARY
COMPENSATION**

Notification of Public Hearing

Pursuant to Pub. L. 92-463 notice is hereby given of a Public Hearing to be held by the President's Commission on the Military Compensation from 1 p.m. to 5 p.m., October 19, 1977, at the Hilton Hotel, 200 South Alamo, San Antonio, Tex.

The following rules and regulations govern participation by the public at this hearing:

(1) The hearing will be open to the public.

(2) Presentation of no more than 15 minutes may be made to the Commission, provided application is made in writing by October 14, 1977. A copy of the presentation must be received by the Commission not later than one day before the hearing. Address is 666 11th St. NW., Suite 520, Washington, D.C. 20001. Telephone 202-693-1290.

(3) The local area representative of the Commission for the purposes of the public hearing is Captain V. Starkes, USAF, Randolph Air Force Base, San Antonio, Tex. Telephone 512-652-6601.

(4) The agenda of the public hearing will be determined by the Commission, based on the following factors:

a. Order of receipt of application.
b. Desire to hear from as many different groups and individuals as possible.

(5) Applicants are encouraged to offer prepared remarks of no more than 10 minutes in order to permit questioning by the Commissioners.

(6) Questions and statements from the gallery will not be accepted.

MAURICE W. ROCHE,
Director, Correspondence and
Directives OASD (Comptroller).

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder
License No. 1405]

AMERICAN OCEANAIR EXPRESS, INC.

Order of Revocation

By letter dated August 30, 1977, Mr. Paul Donatelli, President, American Oceanair Express, Inc., 10910 La Cienega Blvd., Inglewood, Calif. 90304 was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1405 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before September 28, 1977.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

American Oceanair Express, Inc., has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised) Section 5.01 (c) dated June 30, 1975:

It is ordered, that Independent Ocean Freight Forwarder License No. 1405 issued to American Oceanair Express, Inc. be returned to the Commission for cancellation.

It is further ordered, that Independent Ocean Freight Forwarder License No. 1405 be and is hereby revoked effective September 28, 1977.

It is further ordered, that a copy of this order be published in the FEDERAL

REGISTER and served upon American Oceanair Express, Inc.

LEROY F. FULLER,
Director, Bureau of Cer-
tification and Licensing.

**PHILADELPHIA PORT CORP. AND LAVINO
SHIPPING CO.**

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before October 26, 1977.

Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Francis A. Scanlan, Esquire, Deasey, Scanlan & Bender, Ltd., Suite 2900, Two Girard Plaza, Philadelphia, Pa. 19102.

Agreement No. T-2553-A, between the Philadelphia Port Corporation (Port) and Lavino Shipping Company (Lavino), provides for: (a) An extension of the Packer Avenue Container Terminal crane rails approximately 730 feet upriver onto the Packer Avenue Marine Terminal (a breakbulk facility which is also operated by Lavino); and (b) the demolition of transit shed A/3, which is located on the

Packer Avenue Marine Terminal. As compensation, the Port is to receive 10.36 percent annually of the capital cost of these improvements.

By Order of the Federal Maritime Commission.

Dated: October 3, 1977.

FRANCIS C. HURNEY,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

National Institute of Education

PANEL FOR THE REVIEW OF LABORATORY AND CENTER OPERATIONS

Meeting

Notice is hereby given that the next meeting of the Panel for the Review of Laboratory and Center Operations will be held on October 22-23, 1977, at the National Institute of Education, 1200 19th Street NW., Washington, D.C., in Room 823. The Panel will meet from 9 a.m. until 5 p.m. on October 22 and from 9 a.m. until 12:30 p.m. on October 23.

The Panel for the Review of Laboratory and Center Operations is established under Section 405 of the General Education Provisions Act as amended by Section 403(d) of the Education Amendments Act of 1976, 20 U.S.C. 1221e. Its functions include:

(a) Preparing recommendations on initial long-range funding and program plans submitted by the 17 educational laboratories and research and development centers;

(b) Reviewing and assessing the operations of the laboratories and centers and making recommendations for the improvement and continuation of individual laboratories and centers and for the support of new laboratories and centers.

The entire meeting will be open to the public. The tentative agenda is as follows:

Saturday, October 22

9 a.m.—Convene.
9-9:15—Approve September 11-12 minutes.
9:15-10—General business.
10-12—Discussion of the development of criteria for the review of long-range plans.
12-1:30—Lunch.
1:30-5—Resume discussion of above.

Sunday, October 23

9-11:30—Resume discussion of the development of criteria for the review of long-range plans.
11:30-12:30—Discussion of future meeting dates and agenda.

Members of the public are invited to attend the sessions. Written statements relevant to an agenda item (or to any other items considered of interest to the Institute) may be submitted at any time and should be sent to Ms. Carolyn Breedlove at the address shown below.

In accordance with the announcement previously made, 42 FR 43131, August 26, 1977, copies of the records of all Panel proceedings can be obtained by con-

NOTICES

tacting Ms. Carolyn Breedlove. Minutes require approval by the Panel at a subsequent meeting and are available to the public two weeks following their approval hereafter.

In order to verify the tentative agenda, or assure adequate seating arrangements, interested persons are requested to contact Ms. Carolyn Breedlove whose address and telephone number are listed below:

Panel for the Review of Laboratory and Center Operations, National Institute of Education, Washington, D.C. 20208 (202-254-5680).

Dated: October 3, 1977.

CAROLYN BREEDLOVE,

Staff Director Panel for the Review of Laboratory and Center Operations.

FEDERAL ENERGY ADMINISTRATION

MONITORING OF MIDDLE DISTILLATE PRICES

Public Hearing

AGENCY: Federal Energy Administration.

ACTION: Notice of public hearing.

SUMMARY: FEA proposes to continue a monitoring system for the prices of middle distillates and to establish a price level index for residential sales of No. 2 heating oil. The proposal would permit a comparison of actual prices charged for residential sales of No. 2 heating oil with the prices which FEA estimates would have prevailed under continued controls. If actual prices exceed the index price level, FEA proposes to take appropriate action.

DATES: Comments by October 21, 1977, 4:30 p.m.; Requests to speak by October 14, 1977, 4:30 p.m.

HEARING DATES

Washington Hearing: October 19, 1977, 9:30 a.m. Boston Hearing: October 20, 1977, 9:30 a.m. New York Hearing: October 17, 1977, 9:30 a.m. Chicago Hearing: October 17, 1977, 9:30 a.m.

ADDRESSES: All comments to: Executive Communications, Room 3317, Federal Energy Administration, Box PW, Washington, D.C. 20461.

REQUESTS TO SPEAK

Washington Hearing: Attn: Executive Communications, 12th and Pennsylvania

Avenue NW., Room 3317, Box PW, Washington, D.C. 20461. Boston Hearing: Federal Energy Administration, Attn: D. Novick, 150 Causeway Street, Room 700, Boston, Mass. 02114. New York Hearing: Federal Energy Administration, Attn: Eugene W. Hennessy, 26 Federal Plaza, Room 3200, New York, N.Y. 10007. Chicago Hearing: Federal Energy Administration, Attn: Charles Swank, 175 West Jackson Boulevard, Chicago, Ill. 60604.

HEARING LOCATIONS

Washington Hearing: Room 3000A, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461. Boston Hearing: John F. Kennedy Federal Building, Room 2003, Government Center, Boston, Mass. 02114. New York Hearing: Federal Building, Room 305C, 26 Federal Plaza, New York, N.Y. 10007. Chicago Hearing: Federal Building, Room 3619, 230 South Dearborn Street, Chicago, Ill. 60604.

SUPPLEMENTARY INFORMATION:

I. Background.
II. Proposals.
III. Comment Procedures.

NOTICES

I. BACKGROUND

A. DEREGULATION OF MIDDLE DISTILLATES

On June 15, 1976, FEA issued and submitted to the Congress two separate amendments which provided for the exemption of middle distillates from allocation and price controls. These amendments became effective July 1, 1976.

In response to concerns expressed by some members of Congress, FEA committed to take certain actions following the effectiveness of the exemption to insure that no unwarranted price increases would occur once controls were removed. FEA stated that it would adopt a system for monitoring prices of middle distillates, which would compare actual prices with projections of what prices would have been if controls had remained in effect.

In addition, FEA informed the Congress that a set-aside procedure to be administered by FEA's regional offices would be established to operate to insure that during the transitional period following removal of controls no marketer would lose its supply source without adequate time to arrange for a new supplier.

FEA's commitment with respect to price monitoring expired March 31, 1977, but the weekly monitoring system was nevertheless extended through April 30, 1977, and a monthly monitoring system has been maintained.

B. PRICE MONITORING SYSTEM ADOPTED

On September 15, 1976, FEA adopted the following price monitoring system. (41 FR 41155, September 21, 1976.)

1. *National Index Price.* In general, two separate national index prices were computed based on actual average June 1976 prices for No. 2 heating oil and No. 2-D diesel fuel, adjusted to take into account: (1) seasonal price variations of both products during 1960-1967, (2) actual increases or decreases in the prices of imported and domestic crude oil, (3) actual increases or decreases in the prices of imported middle distillates (weighted by their monthly relative volumes in 1972, the last normal import year before the embargo), (4) increases in non-product costs of refiners, as defined and limited under FEA cost passthrough regulations, and estimated increases in operating costs of resellers and retailers, and (5) a two-cent per gallon flexibility factor.

Prices for No. 1-D diesel fuel, kerosene, and other middle distillates not included in the index were periodically monitored by FEA using sales price data reported to FEA by refiners and large resellers. If price increases for such products not in the index differed significantly from price increases for products in the index, FEA undertook to investigate and take appropriate action.

2. *National Monitoring.* FEA surveyed actual average national prices for No. 2 heating oil and No. 2-D diesel fuel at the retail level (i.e., prices to all end users, including residential, commercial, and industrial), and compared these prices with the national index prices for

the corresponding period. FEA also monitored prices at the refiner and reseller levels to determine relative price changes for refiners, resellers, and retailers.

3. *Remedial Process.* If actual average national prices exceeded the national index prices, FEA undertook to hold public hearings within ten days to determine the causes and appropriate remedies for the pricing excess.

4. *Regional Index Prices and Monitoring.* FEA adopted a system of regional index prices, which were computed and monitored on essentially the same basis as the national index prices, to protect against unduly disproportionate price increases in one or more regions even though actual average national prices might not exceed the national index prices.

Actual regional price data were determined in a manner similar to that used for monitoring actual national price levels. FEA also monitored "rack" prices by state. If actual average regional retail prices exceeded the index prices for that region FEA undertook to initiate remedial action in accordance with the same procedures outlined for national index prices. Four regions were adopted: Northeast, North Central, South, and West.

5. *Two-Month Cost Lag Replaced by One-Month Lag.* Index prices were originally calculated so that the factors for increased crude oil costs, increased prices for imported middle distillates and refiners' increased nonproduct costs were included with a two-month lag, which allowed these costs to be based on actual data reported to the FEA. Thus, except to the extent that actual increases in middle distillate prices resulting from an increase in crude oil prices, import prices, or refiners' increased nonproduct costs were absorbed by a two-cent per gallon flexibility factor, the index prices assumed that refiners would absorb these increased costs for two months. However, under continued controls, FEA would have required refiners to absorb any such increase for only one month before passing it through. Because such a result was not consistent with the intent of the index value mechanism, FEA revised the index methodology effective February 1, 1977, to reduce the two-month lag to one month (42 FR 9415, February 16, 1977).

6. *North Central Regional Index Prices Exceeded by Actual Prices.* In March 1977, FEA recalculated the weekly middle distillate monitoring system figures for January to include final information received on actual prices for all sales to ultimate customers. FEA found that actual prices exceeded the index price by 0.4 of a cent in the North Central region during January. Preliminary calculations indicated that actual prices exceeded the index price in the North Central region during March. Therefore, FEA held hearings in Chicago on April 4 and April 12. On May 26, 1977, FEA announced that it would take no action with respect to the previous heating season, but issued a Further Notice of Pro-

posed Rulemaking and Public Hearing on the monitoring of middle distillate prices to consider further action, if appropriate, with respect to middle distillate prices during the following heating season.

7. *Hearings on Further Action with Regard to Middle Distillate Prices.* In the period July 11 through 15, 1977, FEA held regional hearings in the following cities: Boston, New York, Chicago, Seattle, and Atlanta. National hearings were also held in Washington, D.C., from August 2, 1977, to August 4, 1977.

II. PROPOSALS

A. COMMENTS ON FURTHER ACTION WITH RESPECT TO MIDDLE DISTILLATE PRICES

FEA received 99 oral and written comments with regard to the operation of the monitoring system during the previous heating season addressed to what action, if any, should be taken for the 1977-78 heating season. These comments encompassed a broad spectrum of viewpoints, including: Member of U.S. Congress (1); State Governments (15); Fuel Oil Dealers/Distributors (6); Major Fuel Consumer (1); Community Action/Consumer Organizations (3); Fuel Terminal Operator (1); Trade Associations (29); Major Refiners (14); Independent Refiners (6); Business Organizations (9); Other Trade Groups (2); Religious Organization (1); Truck Rental (1); Dealers (2); Small Refiners (3); and Transit Authorities (2). Most of these comments centered on retention of the monitoring system and the possible reimposition of controls on middle distillates.

The possible reimposition of controls elicited the most responses. Those who opposed reimposition of controls greatly outnumbered those who favored their reimposition. Industry spokesmen pointed out that the severe winter had caused problems with deliveries to consumers and that if middle distillates had been under controls, dealers could not have responded as quickly, as they had. These comments urged that controls would have caused disastrous conditions during the 1976-77 winter and that the reimposition of controls would in effect, have the same results in the following heating season. Consumer groups clearly favored reimposition of controls, stating that: (1) The effects of deregulation fell more heavily on low and fixed-income persons, and (2) the monitoring system adopted by FEA did not accurately reflect the situation faced by consumers and did not serve to maintain reasonable and equitable prices.

On the basis of the comments received by FEA, and based upon the data currently available, FEA has determined not to reimpose price and allocation controls on middle distillates for the coming heating season, because the supply problems of last winter would most likely have been much more severe if the supply response had been constrained by controls. Moreover, market disruptions following decontrol may have resulted, in large part, in index prices having been ex-

ceeded last winter; and because those disruptions are not likely to continue now that the market has adjusted to decontrol, FEA does not expect index prices to be exceeded this winter. Nevertheless, as is more fully discussed below, FEA will retain the option of reimposing controls in the event that index prices are exceeded this winter.

Over twice as many comments opposed continuation of the monitoring system as comments which favored its retention. Industry spokesmen stated that the monitoring system imposed stricter constraints on prices than continued controls because the index price did not include banked costs which would have been allowed for pass through under continued controls. They also contended that the index was understated due to its inability to recognize additional costs incurred last winter, such as extraordinary transportation costs and increased costs of blending No. 1 heating oil with No. 2 heating oil, and that the index provided a disincentive to the importation of middle distillates during shortages because the impact of increased import costs on the index was limited by the use of 1972 import volumes as a "cap."

Among state governments and consumer groups there was strong support for retention of the monitoring system. However, many of these comments indicated that the system did not reflect the actual market situation faced by residential consumers since the system combined sales of No. 2 heating oil for residential use and for non-residential use into one category, even though prices charged to residential customers generally exceed those charged to non-residential customers. Several comments suggested that the system could have more precisely reflected market conditions through the separate monitoring of refiners, resellers, and retailers.

Comments also indicated that the use of four regions did not accurately reflect price conditions in many sections of the country since, in some instances, these regions grouped areas which traditionally had lower prices with areas which traditionally had higher prices. Had FEA established a monitoring system on a state or FEA regional level, these comments stated that the index price would have been exceeded in many of the individual states or regions.

Consumer groups expressed concern that there was insufficient justification for the two cent flexibility factor, and that the use of a two cent factor resulted in unjustified profits for major refiners.

Some comments stated that the system of weekly updates to the monitoring system, which were based on estimates, did not provide a reliable indication of what the more accurate monthly monitoring system would disclose. These comments pointed to the month of April 1977 when the weekly indices were exceeded on a national basis by one-tenth to two-tenths of a cent, in the South Region by five-tenths to six-tenths of a cent, and in the North Central Region by 1.1 to 1.2 cents. The subsequent and more accurate monthly index was exceeded only in the North Central Region.

As a result of FEA's analysis and evaluation of these comments and on the basis of FEA's experience with the current monitoring system, FEA is proposing to continue the monitoring system for the 1977-78 heating season, but is soliciting comments on modifications to the system to correct for some of the deficiencies highlighted by the comments.

B. PRICE MONITORING PROPOSAL

1. *General.* The following monitoring system, which FEA proposes for the coming heating season, would monitor prices for residential sales of No. 2 heating oil by developing national and regional index prices, representing the average price levels which FEA estimates would have prevailed had No. 2 heating oil remained under price controls. Unlike the monitoring system used during the past heating season, the proposed system would calculate an index price level only for residential sales of No. 2 heating oil in order to provide a more accurate description of prices charged to residential consumers.

FEA does not propose to compute separate residential indices for refiners, since refiners' direct sales to consumers account for only a small portion of total residential sales. However, FEA would calculate No. 2 heating oil margins (based on survey data) for refiners as an analytical tool in determining the source of unwarranted price increases, if any.

FEA does not propose to continue computation of No. 2 diesel fuel index values, but the survey of No. 2 diesel fuel prices will continue, with FEA's Retail Motor Fuels Service Station survey replacing the Lundberg survey when it is available.

2. *Survey and Publication of Data.* Under the proposal, FEA would measure average actual prices at the retail level and calculate index prices on a monthly basis during the heating season, publishing index values and survey prices two months after the month to which they pertain. Survey prices will be adjusted by one-tenth of a cent at the national level and two-tenths of a cent at the regional level to allow for statistical errors. Weekly updates to the index price would be discontinued since during the last heating season such updates were not as accurate as the monthly figures and resulted in confusion as to whether the index price had actually been exceeded.

3. *National Index Price.* In general, the national index price would be computed each month based on actual average June 1977 prices for residential sales of No. 2 heating oil. The following adjustments to the base price would be made to compute monthly national index prices:

$$\text{Index price} = \text{Seasonal Factor} \times \left[\text{June 1977 Price} + \text{Distillate Reverse Tilt} \right] \times \left[\frac{\text{Change in Crude Oil Costs} + \text{Change in Refiners Nonproduct Costs}}{\text{Change in Refiners Nonproduct Costs}} + \frac{\text{Change in Retailers Margin}}{\text{Change in Refiners Nonproduct Costs}} \right] + \text{Adjustment for Imports}$$

a. Monthly changes in refiners' crude oil costs would be added to or subtracted from the base price.

b. Monthly changes in refiners' non-product costs would be added to or subtracted from the base price. FEA proposes to permit refiners to include within this category extraordinary transportation costs which refiners can substantiate. These costs should present no problem as to quantification and their inclusion might help to insure the delivery of heating oil to distant customers.

c. A "reverse tilt" factor representing the less than proportionate share of costs allocated to No. 2 heating oil would be applied to the refiners' crude oil and nonproduct costs. Inasmuch as the "reverse tilt" factor would be included in the calculation of the index price for No. 2 heating oil to provide consistency between the index for No. 2 heating oil and any proposed index for gasoline which would include a "gasoline tilt" factor, FEA proposes to adopt such a reverse tilt only if gasoline is decontrolled and a monitoring system is adopted. The reverse tilt would take into account the amount of costs attributable to distillates on a volumetric basis, shifted to gasoline prices during the period that controls allowed for such a shift. Since costs attributable to middle distillates cannot be passed through to prices of gasoline as long as it remains subject to controls, FEA has calculated this factor based on data during the period when both gasoline and middle distillates were controlled. The factor also reflects the fact that such cost reallocations affected all middle distillates and not merely No. 2 heating oil.

d. Monthly changes in retailers margins would be added to or subtracted from the base price.

e. A "seasonal factor", which would simulate the normal historical seasonal pattern of prices for residential sales of No. 2 heating oil, would be applied to the sum of the base price, changes in crude oil costs, changes in refiners nonproduct costs and changes in retailers' margins.

f. Monthly changes in the cost of imported No. 2 heating oil would be added to or subtracted from the base price. FEA proposes to abandon the use of the 1972 import ratio as a cap to the magnitude of this figure since such a cap might prove a disincentive to imports of No. 2 heating oil during a severe winter. Therefore, FEA proposes to base the import adjustment on actual import prices and volumes, with a one-month lag.

A summarized form of the equation which FEA proposes to use to determine the national index price follows:

Appendix 1 contains a more detailed explanation of the formula in equation form, for both the national index and the regional indices.

3. *Regional Monitoring System.* Regional index prices would be computed on essentially the same basis as the national index price, except that the June 1977 price and some of the adjustment factors would of course, relate to the region concerned rather than the nation.

To achieve a more valid sample of prices in the various sections of the nation, FEA proposes to implement monitoring systems for the ten FEA regions instead of the four regions used during the last heating season. FEA regions were chosen for three reasons: (1) They are the most disaggregated of standard governmental regional classifications; (2) they provide reasonable approximations to heating oil marketing areas; and (3) they facilitate the administration of the survey by the FEA regional offices.

Moreover, FEA proposes to expand the sampling universe to provide statistically valid state average prices, which would be less precise than the regional average prices, for those states with significant sales of residential heating oil. This would necessitate augmentation of the sample for those states and calculation of base residential prices. State averages would be used to respond to consumer inquiries about heating oil prices but would not be used for comparison against index values. A listing of the states for which FEA would compile average prices appears in Appendix II.

4. *Remedial Actions.* FEA proposes to consider various actions if prices exceed index levels. In this regard, FEA solicits comments on a broad range of options which might be available in the event that any such action becomes necessary.

a. *National or Regional Index Exceeded.* In the event that either the National or one or more of the Regional indices was exceeded, FEA would at the earliest possible time schedule regional and/or national hearings to determine the causes for the particular index or indices having been exceeded, and to consider appropriate remedies to correct for prices having been greater than was anticipated.

For purposes of this proceeding, FEA solicits comments as to whether FEA should schedule such hearings in response to a particular index having been exceeded for one month only, or whether FEA should continue to monitor prices in subsequent months to determine if the index having been exceeded in a particular month reflected such anomalies as not to warrant the immediate scheduling of a public hearing.

FEA proposes to retain a significant degree of flexibility with respect to its actions if a particular Regional index has been exceeded. Thus, public hearings might be scheduled only after a significant number of Regional indices had been exceeded in a particular month, depending upon the particular factors associated with the index or indices having been exceeded.

Following the receipt of comments at a public hearing, FEA could take corrective action consisting of reimposition of complete price and allocation controls for some or all regions, as well as specific actions with respect to particular firms as discussed below. FEA has preliminarily determined that unless there were a strong showing that immediate reimposition of partial or complete controls was absolutely necessary during the current heating season, such reimposition of controls would be considered for the heating season following the one in which the index was exceeded.

b. *Actions with respect to Individual Firms.* FEA solicits comments addressed to the following possible actions against individual firms. FEA proposes to conduct preliminary audits of selected refiners and retailers in order to identify those firms that appear to be contributing to the possibility of a particular index being exceeded, by increasing prices for sales of No. 2 heating oil in excess of the particular firm's actual increased costs attributable to No. 2 heating oil. To the extent that a preliminary audit has indicated that a firm might have exceeded its historical margin, FEA would conduct a comprehensive audit of the firm concerned, and would afford the firm an opportunity for a non-public hearing at which to justify increased prices for sales of No. 2 heating oil in excess of historical margins. In order to deter firms from unjustified price increases which would contribute to indices having been exceeded, FEA would on the basis of its findings of audits and hearings publish on a periodic basis a list of those firms that have unjustifiably increased prices in excess of increased costs, and are thus responsible for price excesses.

Moreover, FEA seeks to ensure that individual firms are deterred from exceeding historical margins in the belief that excessive price increases effected during a period of decontrol would be permitted to be retained following reimposition of controls. Also, FEA believes that should the reimposition of controls become necessary, it would be inequitable to require remedial actions of firms that did not contribute to pricing excesses. Accordingly, should reimposition of controls become necessary, FEA would require firms that increased prices to levels that reflect more than actual increased costs to make corresponding adjustments to prices subsequent to the reimposition of controls to reflect revenues received during the period of decontrol in excess of actual increased costs.

5. *Request for specific comments.* While comment is solicited on any aspect of this Notice, comments are particularly sought with respect to the following:

Several refiners expressed the opinion that calculation of the price index should reflect the cost of blending No. 1 heating oil with No. 2 heating oil. However, it appears that this practice occurs only in a few areas of the nation and only in very limited circum-

stances. FEA invites further comments on this practice, and any data which might show the actual extent of this practice and its effects on the price of No. 2 heating oil, so that FEA can determine whether to propose the inclusion of a factor in the price index formula to reflect such blending.

FEA has analyzed and evaluated the two cent flexibility factor used under the current monitoring system and has concluded that two cents represented a fair figure to account for the pricing changes that were anticipated following the deregulation of middle distillates. However, FEA believes that the readjustments to an unregulated market that were associated with deregulation of middle distillates should by this time be fully accounted for and not likely to continue to occur. June 1977 prices represent, on a nation wide basis, a full utilization of the two cent factor, and should serve for the future as a fair indication of target prices for residential sales of No. 2 heating oil. Therefore, the proposed price index would not include any flexibility factor. FEA invites further comments on whether the price index should include a flexibility factor and if so, the appropriate value for such a factor. It should be noted in this regard that although this proposal is to use June 1977 as the base month for the index price, it may be necessary to use August 1977 if the necessary forms for collection of June data are not approved for use prior to the implementation of the proposed monitor system. Comments on whether there would be any significant difference resulting from the use of August rather than June as the base month are therefore requested.

III. COMMENT PROCEDURES

Interested persons are invited to participate in this matter by submitting data, views, or arguments with respect to the proposals set forth in this notice to Executive Communications, Room 3317, Federal Energy Administration, Box PW, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to FEA Executive Communications with the designation "Proposal for Monitoring Middle Distillate Prices." Fifteen copies should be submitted. All comments received by October 21, 1977, before 4:30 p.m., e.s.t., will be considered by FEA before final action is taken in this matter.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

The times and places for the hearings are indicated in the dates section of this preamble. If necessary to present all testimony, the hearing will be continued at 9:30 a.m. of the next business day following the first day of the hearing.

Any person who has an interest in this matter, or who is a representative of a group or class of persons that has an

interest in this matter, may make a written request for an opportunity to make oral presentation. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through October 14, for regional hearings and October 17 for the national hearing. Each person selected to be heard will be so notified by FEA before 4:30 p.m., October 14, 1977, for regional hearings and by October 17 for the National hearing. Each person must submit 100 copies of his or her statement to the address given above for requests to speak, for the National hearing, before 4:30 p.m., October 18, 1977. Persons scheduled to speak at regional hearings must bring 100 copies of his or her statement to the hearing.

FEA reserves the right to select the persons to be heard at the public hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing, which will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions, to be asked of any person making a statement at the hearing. Such questions must be submitted to the address indicated above for requests to speak, before 4:30 p.m., October 17, 1977, for the National hearing. Questions to be asked at regional hearings should be brought to the hearing. Any person who wishes to ask a question at the hearing

may submit the question, in writing, to the presiding officer. FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be re-

tained by FEA and made available for inspection at the FEA Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

Issued in Washington, D.C., September 30, 1977.

ERIC J. FYGI,
Acting General Counsel.

APPENDIX I

The general format of the formula is as follows:

$$\text{Index price} = \text{Seasonal Factor} \times \left[\frac{\text{June 1977 Price}}{\text{Distillate Tilt}} + \frac{\text{Change in Crude Oil Costs}}{\text{Change in Refiners Costs}} + \frac{\text{Change in Nonproduct Costs}}{\text{Change in Retailers Margin}} + \frac{\text{Adjustment for Imports}}{\text{Adjustment for Imports}} \right]$$

The specific calculations for the middle distillate index prices are detailed below:

a. National index price for residential heating oil sales.

$$P_h^t = S^t \left\{ P_h^a + K_h \left[(C^{t-1} - C^b) + \frac{(N^{t-1} - N^b)}{V^{t-1}} \right] + d \left(\frac{N^{t-1}}{N^b} - 1 \right) M \right\} + [R^{t-1}(I_f^{t-1} - I_f^b) + \Delta R^{t-1}(I_f^b - I_d^b)]$$

b. Regional index price for residential heating oil sales.

$$P_{hr}^t = S^t \left\{ P_{hr}^a + K_h \left[(C^{t-1} - C^b) + \frac{(N^{t-1} - N^b)}{V^{t-1}} \right] + d \left(\frac{N^{t-1}}{N^b} - 1 \right) M \right\} + [R^{t-1}(I_{rf}^{t-1} - I_{rf}^b) + \Delta R^{t-1}(I_{rf}^b - I_{rd}^b)]$$

Where:

- P_h^t = predetermined price for sales of No. 2 heating oil to residential users nationwide during month t.
- P_{hr}^t = weighted average price for No. 2 heating oil sold nationwide to residential users during June 1977, determined by a statistically valid sample of sellers of No. 2 heating oil to residential users.
- S^t = Multiplicative seasonal adjustment factor for heating oil. Seasonal factor derived from Bureau of Labor Statistics No. 2 heating oil consumer price index for the period 1960 through 1967.
- C^{t-1} = unit crude oil costs in month t-1 reported to FEA on FEA Form P-110-M-1.
- C^b = unit crude oil costs in May 1977.
- N^{t-1} = nonproduct costs for refiners during the month t-1 reported to the FEA on Form P-302-M-2. These costs represent the amount of nonproduct costs that refiners are permitted to pass through under current pricing regulations, plus extraordinary transportation costs that can be substantiated.
- N^b = nonproduct costs for refiners in May 1977.
- V^{t-1} = total volume of sales of refined products in month t-1 derived from refining operations. Total derived from refined product volumes reported to the FEA on Form P-302-M-1, or Form P-302-M-2 when available, adjusted for import volumes.
- d = percentage of No. 2 heating oil sales to residential users accounted for by nonrefiners nationwide, estimated from No. 2 heating oil sales data reported to the FEA.
- d_r = percentage of No. 2 heating oil sales to residential users accounted for by nonrefiners in region r estimated from No. 2 heating oil sales data reported to the FEA.
- W^{t-1} = Bureau of Labor Statistics wage index for Truckers and Warehousemen (SIC42) for the month t-1.
- W^b = Bureau of Labor Statistics wage index for Truckers and Warehousemen (SIC42) for August 1977.

M = gross margin in cents per gallon for sales to residential users nationwide by nonrefiners for the month June 1977 estimated from FEA's No. 2 Heating Oil Monitoring System.

M_r = gross margin in cents per gallon for sales to residential users by nonrefiners selling No. 2 heating oil in region r for the month June 1977 estimated from FEA's No. 2 Heating Oil Monitoring System.

K_h = heating oil tilt factor to measure the less than proportionate allocation of costs to No. 2 heating oil measured on the basis of costs and wholesale prices over the period July 1975 to June 1977 (preliminary estimate = .983).

I_f^{t-1} = the imported price of distillates for the nation in month t-1, obtained from the Monthly Petroleum Product Price Report (Form P-302-M-1), or Form P-302-M-2 when available.

R^{t-1} = fraction of total sales of distillates nationwide accounted for by imports during time period t-1, obtained from FEA's Monthly Petroleum Product Price Report (Form P-302-M-1), or Form P-302-M-2 when available.

R_r^{t-1} = change in the above fraction nationwide from May 1977 to time period t-1.

I_f^b = price of distillates imported nationally in May 1977.

I_d^b = wholesale price for domestic sales of distillates nationwide during May 1977.

I_{rf}^{t-1} = the imported price of distillates for region r in month t-1, obtained from the Monthly Petroleum Product Price Report (Form P-302-M-1), or Form P-302-M-2 when available.

R_r^{t-1} = fraction of total sales of distillates in region r accounted for by imports during time period t-1, obtained from FEA's Monthly Petroleum Product Price Report (Form P-302-M-1), or Form P-302-M-2 when available.

R_r^b = change in the above fraction from May 1977 to time period t-1 in region r.

P_{hr}^t = predetermined price for sales of No. 2 heating oil to residential users in region r during month t.

P_{hr}^a = weighted average price for No. 2 heating oil sold to residential users in region r during June 1977, determined by a statistically valid sample of sellers of No. 2 heating oil to residential users.

S^t = Multiplicative seasonal adjustment factor for heating oil. Seasonal factor derived from Bureau of Labor Statistics No. 2 heating oil consumer price index for the period 1960 through 1967.

C^{t-1} = unit crude oil costs in month t-1 reported to FEA on FEA Form P-110-M-1.

C^b = unit crude oil costs in May 1977.

N^{t-1} = nonproduct costs for refiners during the month t-1 reported to the FEA on Form P-302-M-2. These costs represent the amount of nonproduct costs that refiners are permitted to pass through under current pricing regulations, plus extraordinary transportation costs that can be substantiated.

N^b = nonproduct costs for refiners in May 1977.

V^{t-1} = total volume of sales of refined products in month t-1 derived from refining operations. Total derived from refined product volumes reported to the FEA on Form P-302-M-1, or Form P-302-M-2 when available, adjusted for import volumes.

d = percentage of No. 2 heating oil sales to residential users accounted for by nonrefiners nationwide, estimated from No. 2 heating oil sales data reported to the FEA.

d_r = percentage of No. 2 heating oil sales to residential users accounted for by nonrefiners in region r estimated from No. 2 heating oil sales data reported to the FEA.

W^{t-1} = Bureau of Labor Statistics wage index for Truckers and Warehousemen (SIC42) for the month t-1.

W^b = Bureau of Labor Statistics wage index for Truckers and Warehousemen (SIC42) for August 1977.

i_b = price of distillates imported into region r in May 1977.
 r_f
 i_b = wholesale price for domestic sales of distillates in region r during May 1977.
 r_d

Superscripts used in the formulae refer to time periods as follows:

- a refers to June 1977.
- b refers to May 1977.
- t refers to the month for which the index is being computed.
- $t-1$ refers to the month one month before the month for which the index is being computed.

Subscripts used in the formulae refer to the following:

- d refers to domestic middle distillates.
- f refers to imported middle distillates.
- h refers to No. 2 heating oil.
- r refers to a particular region.

[3128-01]

PRIVACY ACT OF 1974

Proposed New Systems of Records

AGENCY: Federal Energy Administration.

ACTION: Notice of Proposed New Systems of Records.

SUMMARY: Notice is hereby given that the Federal Energy Administration (FEA) is proposing to add to its existing and previously proposed systems of records, as published on September 30, 1977 (42 FR 53480), two additional systems to be designated as "FEA-24, Strategic Petroleum Reserve Personnel List" and "FEA-25, Low-Income Weatherization Program Home Report Records." In accordance with 5 U.S.C. 552(a)(1), Office of Management and Budget (OMB) Circular No. A-108 and the transmittal memorandum thereto, a report on these systems of records has been filed, concurrent with this publication, with the Acting Director of the Office of Management and Budget, the Speaker of the House of Representatives, the President of the Senate, and the Privacy Protection Study Commission.

Written comments will be received with respect to these proposals; however, it is the intent of FEA to operate the proposed systems of records at the expiration of the advance notice period if no comments to the contrary are received.

DATES: Comments by November 7, 1977, 4:30 p.m.

ADDRESS: Written comments to: Executive Communications, Room 3317, Federal Energy Administration, Box PU, Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

John Treanor, Privacy Act Officer, Room 2121, 12th and Pennsylvania

Avenue NW., Washington, D.C. 20461 (202-566-9840).

William D. Luck, Office of General Counsel, Room 6144, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461 (202-566-9296).

SUPPLEMENTARY INFORMATION:

I. Narrative Statement for FEA-24, as required by the Privacy Act of 1974 and OMB Circular No. A-108: A. Purposes; B. Authority; C. Potential consequences on individual privacy; and D. Safeguards against unauthorized access.

II. Narrative Statement for FEA-25, as required by the Privacy Act of 1974 and OMB Circular No. A-108: A. Purposes; B. Authority; C. Potential consequences on individual privacy; and D. Safeguards against unauthorized access.

III. Comment procedures: Narrative statements as required by the Privacy Act of 1974 and OMB Circular No. A-108.

I. FEA-24, Strategic Petroleum Reserve Emergency Personnel List.
 A. Purposes. The information contained in this system is used as a reference for the telephone numbers of persons involved with the operation of the Strategic Petroleum Reserve Program. The establishment of this system is a necessary precaution to guard against an emergency situation during which the appropriate FEA personnel or contractors or other Government personnel could not be contacted.

B. Authority. The authority for the maintenance of this system is as listed in the proposed system notice. This system is established under the authority vested in the FEA Administrator contained in: (i) Section 153 of the Energy Policy and Conservation Act (Pub. L. 94-163) to exercise authority over the establishment, management and maintenance of the United States' Strategic Petroleum Reserve; and (ii) section 7(c) of the Federal Energy Administration Act of 1974 (Pub. L. 93-275) to promulgate such

rules, regulations, and procedures as may be necessary to carry out his functions; as well as (iii) his authority under 5 U.S.C. 301 to prescribe regulations for the performance of FEA business and for the custody, use, and preservation of FEA records, papers, and property.

No change to existing rules is required for this proposed new system.

C. Potential consequences on individual privacy. FEA does not deem that the maintenance of this system will have any substantial effect on the privacy and other personal or property rights of individuals. No information is retained in the system other than that which is given voluntarily to the agency by the subject individuals. The use of the system is limited to those requiring the information contained therein for official purposes. With FEA's stringent access controls and the limited use of the records contained in this system, the operation of the system will have minimal effect on an individual's privacy and other personal or property rights.

Because this system is designed to facilitate the internal administrative operations of the agency, its operation will have no effect on the preservation of the constitutional principle of federalism and separation of power.

D. Safeguards against unauthorized access. The risk of unauthorized access has been minimized by locating this system in lockable containers within rooms secured when authorized users or the system managers are not present. Control over these facilities is given only to the system manager and those qualifying for access under the routine uses listed in the proposed system notices.

Distribution of the list will be made to the FEA personnel, contractors, and other Government agency personnel involved with the operation of the Strategic Petroleum Reserve Program. Each such person receiving a copy of the list will be instructed to take care that the information be appropriately safeguarded and that disclosure to unauthorized persons is strictly prohibited.

The lower risk alternative of maintaining the system in locked cabinets within secured rooms and not distributing copies of the list was considered. However, the presence of responsible FEA personnel in the system manager's office was considered to be sufficient to prevent unauthorized access to the system at that location. Additionally, the alternative of making distribution to authorized personnel and cautioning them against further disclosure was considered preferable to keeping the list only at the system manager's office, since the more restrictive alternative is far less likely to enable rapid contact with affected personnel during the emergency situations for which the list is maintained.

II. FEA-25, Low-Income Weatherization Program Home Report Records.

A. Purpose. In section 411 of the Energy Conservation and Production Act (Pub. L. 94-385) (ECPA), Congress made the following findings:

(1) dwellings owned or occupied by low-income persons frequently are inadequately insulated;

(2) low-income persons, particularly elderly and handicapped low-income persons, can least afford to make the modifications necessary to provide for adequate insulation in such dwellings and to otherwise reduce residential energy use;

(3) weatherization of such dwellings would lower utility expenses for such low-income owners or occupants as well as save thousands of barrels per day of needed fuel; and

(4) States, through community action agencies established under the Economic Opportunity Act of 1964 and units of general purpose local government, should be encouraged, with Federal financial and technical assistance, to develop and support coordinated weatherization programs designed to ameliorate the adverse effects of high energy costs on such low-income persons, to supplement other Federal programs serving such persons, and to conserve energy.

As a result, the ECPA directs the Administrator of the Federal Energy Administration (FEA) to develop and conduct a weatherization program. In developing and conducting this program, the Administrator is authorized to make grants to States. Such grants shall be made for the purpose of providing financial assistance with regard to projects designed to provide for the weatherization of dwelling units, particularly those where elderly or handicapped low-income persons reside, in which the head of the household is a low-income person.

The FEA Office of Conservation and Environment, through the Office of Weatherization Assistance, is implementing the described weatherization program. On April 1, 1977, draft regulations for the program were published (42 Fed. Reg. 17470) and on June 1, 1977 the final regulations were adopted (42 Fed. Reg. 27899). These regulations are located at 10 CFR, Part 440. Pursuant to 10 CFR 440.12, States were to submit grant applications to FEA within 90 days of the publication of the final rule and by August 31, 1977, all States had submitted such applications.

Under criteria contained in the regulations the FEA determines whether and to what extent to award a grant to a State making application therefor. The grant is made to a State by the appropriate FEA Regional Administrator whose Region contains the State making application for funds. The State then in turn makes subgrants of the funds received to one or more local Community Action Agencies (CAA). CAAs are private corporations or public agencies established pursuant to the Economic Opportunity Act of 1964, Pub. L. 88-452, which are authorized to administer funds received from Federal, State, local or private funding entities to assess, design, operate, finance and oversee antipoverty programs.

The CAA's, through various "out-reach" services (e.g. by referral from other local service organizations or welfare agencies), discover eligible candidates for weatherization assistance. Information is collected from each individ-

ual weatherization candidate on a "Building Weatherization Report." The categories of information collected are listed in the proposed system notices, as are the purposes and routine uses of the information. After determining the work to be done on a dwelling the CAA is responsible for performing the requisite repairs and certifying that the work was in fact done.

Additionally, the CAA's will maintain copies of a "Fuel Information Release Form." This form is a waiver form to authorize the individual's utility company(ies) to disclose to the CAA historical data on fuel consumption and also costs for the individual's dwelling. The purpose of this form is to ensure compliance with the requirement of section 421 of the Energy Conservation and Production Act, 42 U.S.C. 6801 et seq. That section requires an annual report to Congress regarding the weatherization assistance program, including the results of periodic evaluations and monitoring activities. In order to assure the effective provision of weatherization assistance, it is necessary to compile accurate historical data on both fuel costs and fuel quantity before and after weatherization repairs. The "Fuel Information Release Form" is designed to accomplish this objective. It should be stressed that the form is voluntary and that weatherization assistance will not be denied any person who declines to make the authorization sought in this form.

B. Authority. The specific authority for the maintenance of the Building Weatherization Reports is in section 416 and 417 of the ECPA. Additionally, the FEA Administrator has general authority by section 7(c) of the Federal Energy Administration Act of 1974 (Pub. L. 93-275), to promulgate such rules, regulations and procedures as may be necessary to carry out his functions.

The Building Weatherization Reports are required by the FEA to be maintained by the CAA's as indicated in the proposed system notice and as authorized by section 417 of the ECPA. No change to existing rules is required for this proposed new system. The FEA is a routine user of the records, to enable the agency to discharge the statutory obligation in sections 416 and 417 of the ECPA that it monitor and evaluate the effectiveness of the weatherization program.

C. Potential consequences on individual privacy and D. Safeguards against unauthorized access. FEA does not deem that the maintenance of this system will have a substantially negative effect on the privacy and other personal property rights of individuals. No information is retained in the system other than that which is given voluntarily to the CAA's by the subject individuals and persons performing repair work. Without this information, the programmatic purpose of better weatherizing the dwelling units of low-income persons could not be achieved. As a result of the maintenance of these records, the homes of eligible individuals are improved and their fuel

bills should be reduced. These are clearly positive effects. And, with the FEA's insistence that each subgrantee CAA maintain records in accordance with the provisions of the Privacy Act of 1974 and that diligence be exercised in controlling access to the records and that only authorized persons be allowed to use the data, the operation of this system should have a minimal negative effect on an individual's privacy and other personal or property rights. Moreover, given the grant application and award structure of 10 C.F.R. Part 440, under which monies are distributed to the various states and the sub-grantee CAA's, and the legal requirement of the ECPA that the FEA monitor the effectiveness of the weatherization program, the operation of this system of records will not affect the constitutional principle of federalism and separation of power.

III. Comment Procedures. As provided by section 3(e)(11) of the Privacy Act of 1974 (5 U.S.C. 552a(e)(11)), interested persons are invited to submit written data, views, or arguments related to these proposals to Executive Communications, Federal Energy Administration, Box PU, Washington, D.C. 20461. Hand-carried comments may be delivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m. to 4:30 p.m., Monday through Friday, except on legal public holidays.

Comments should be identified on the outside of the envelope and on the documents submitted to FEA Executive Communications with the designation "Privacy Act System of Records" and include the appropriate system number(s). Fifteen copies should be submitted. All comments received on or before November 7, 1977, will be available for public inspection in the FEA Reading Room, Room 2107, Federal Building, 12th and Pennsylvania Avenue NW., Washington, D.C., between the hours of 8 a.m., and 4:30 p.m., Monday through Friday, except on legal public holidays. These comments and all other relevant information, will be considered by FEA before the proposed systems are adopted in their final form.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

It is the intent of the Federal Energy Administration to operate the systems of records as proposed at the expiration of the advance notice period if no comments to the contrary are received.

The FEA has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Privacy Act of 1974, Pub. L. 93-579; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended; Energy Conservation and Production Act, Pub. L. 94-385, as amended; Executive Order 11790, 39 F.R. 23185.)

In consideration of the foregoing, the adoption of the two systems of records set forth below is proposed.

Issued in Washington, D.C. September 30, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

FEA-24

System name:

Strategic Petroleum Reserve Emergency Personnel List.

Security classification:

Unclassified.

System location:

Strategic Petroleum Reserve Office, Federal Energy Administration, 1726 M Street NW., Washington, D.C. 20036.

Categories of individuals covered by the system:

Individuals (a) employed by FEA and by other Federal agencies and Departments, and (b) FEA contractors, who are involved in the operation of the Strategic Petroleum Reserve Program.

Categories of records in the system:

Name, address, and business and home telephone numbers.

Authority for maintenance of the system:

5 U.S.C. 301; Federal Energy Administration Act of 1974, as amended; Energy Policy and Conservation Act, as amended; Executive Order 11790.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

Distribution of the list will be made to the FEA personnel, contractors, and other Government agency personnel involved with the operation of the Strategic Petroleum Reserve Program. The information will be used in order to enable contact with appropriate personnel in the event of a program emergency.

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Paper records.

Retrievability:

Name.

Safeguards:

Records are located in a lockable metal file cabinet with access limited to those whose official duties require access.

Retention and disposal:

Records are revised when appropriate, at which point the older records are destroyed.

System manager(s) and address:

Associate Assistant Administrator for Operations, Strategic Petroleum Reserve, 1726 M Street NW., Washington, D.C. 20036.

Notification procedure:

Requests by an individual to determine if a system of records contains

information about him should be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461, in accordance with FEA's Privacy Act Regulations (10 CFR 206.3, 40 FR 45610 (October 2, 1975)).

Record access procedures:

Requests by an individual for access to a system of records that contains information about him should be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461, in accordance with FEA's Privacy Act Regulations (10 CFR 206.3, 40 FR 45610 (October 2, 1975)).

Contesting records procedures:

Requests by an individual to correct or amend the content of a record containing information about him should be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461, in accordance with FEA's Privacy Act Regulations (10 CFR 206.7, 40 FR 45613 (October 2, 1975)).

Record source categories:

The subject individual.

Systems exempted from certain provisions of the Act:

None.

FEA-25

System name:

Low income Weatherization Program Home Report Records.

Security classification:

Unclassified.

System location:

For each State participating in this program, the records will be located in the Community Action Agency designated by the State to implement the program. A list of participating States and Community Action Agencies is available from the Director, Office of Weatherization Assistance, Office of Conservation and Environment, Federal Energy Administration, Washington, D.C. 20461.

Categories of individuals covered by the system:

All persons eligible for weatherization assistance participating in Federal Energy Administration-sponsored weatherization programs.

Categories of records in the system:

Information about weatherization program participants, including name, address, annual income, whether participant receives public assistance, whether the participant owns or rents, and number of elderly, handicapped, native American, migrants and total members in a participant's household; information about the characteristics of a participant's dwelling, including fuel use data; before and after information about improvements to the dwelling to be undertaken in connection with the program and information about the costs of such improvements; information about the hours and source of labor involved in making the improvements.

Authority for maintenance of the system:

Federal Energy Administration Act of 1974; sections 416 and 417 of the Energy Conservation and Production Act; Executive Order 11790.

Routine uses of records maintained in the system, including categories of users and the purpose of such uses:

The participating community action agencies will use the records maintained for the following purposes: determination of whether and which improvements should be undertaken; determination of correlation of the demographic and building characteristics to the quantity, quality and cost of the work undertaken; enable the Federal Energy Administration to monitor the effectiveness of the program.

The Federal Energy Administration will use the records for the following purposes: assure the effective provision of weatherization assistance for the dwelling units of low-income persons; carry out periodic evaluations of the program.

Also, the routine uses listed in Appendix B to the most recent annual republication of FEA's systems of records, 42 FR 53480 (September 30, 1977).

Policies and practices for storing, retrieving, accessing, retaining and disposing of records in the system:

Storage:

Paper records.

Retrievability:

Name.

Safeguards:

The contracts with the Community Action Agencies stipulate that the Community Action Agencies will exercise all diligence in controlling access to the records maintained under this program and that only authorized members of the Community Action Agency and other routine users will be allowed to use the data. All personnel that handle or process the data are to be instructed and cautioned as to the confidentiality of the data and its proper disposition.

Retention and disposal:

Records will be retained for three years or until the completion of the low-income weatherization program.

System manager(s) and address:

For each State participating in the program, the system manager will be the head of the Community Action Agency designated by the State to implement the program. A list of participating States and Community Action Agencies is available from the Director, Office of Weatherization Assistance, Office of Conservation and Environment, Federal Energy Administration, Washington, D.C. 20461.

Notification procedure:

Requests by an individual to determine if a system of records contains information about him should be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461 in accordance with FEA's Privacy Act Reg-

ulations (10 CFR 206.2, 40 FR 45610 (October 10, 1975)). The requests will in turn be forwarded to the appropriate participating Community Action Agency maintaining the complete record pertaining to the individual.

Record access procedures:

Requests by an individual for access to a system of records that contains information about him should be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. FEA's Privacy Act Regulations (10 CFR 206.3, 40 FR 45610 (October 2, 1975)). Requests will in turn be forwarded to the appropriate participating Community Action Agency maintaining the complete record pertaining to the individual.

Contesting record procedures:

Requests by an individual to correct or amend the content of a record containing information about him should be directed to the Privacy Act Officer, Federal Energy Administration, Washington, D.C. 20461 in accordance with FEA's Privacy Regulations (10 CFR 206.7, 40 FR 45613 (October 2, 1975)). Requests will in turn be forwarded to the appropriate participating Community Action Agency the complete record pertaining to the individual.

Record source categories:

The individual who is the subject of the record persons who will evaluate the need for repairs and those who will perform work undertaken in connection with the program.

Systems exempted from certain provisions of the Act:

None.

[6320-01]

CIVIL AERONAUTICS BOARD
INTERNATIONAL AIR TRANSPORT
ASSOCIATION (IATA)

Order

SEPTEMBER 23, 1977.

[Order No. 77-9-114; Docket No. 29123, Agreement C.A.B. 26895, R-1 and R-2; Agreement C.A.B. 26896, R-1 through R-3; Docket No. 30332, Agreement C.A.B. 26897, R-1 through R-5]

Issued under delegated authority. Agreements adopted by the Traffic Conferences of the International Air Transport Association relating to passenger fares, cargo rates, and currency matters.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolution of the Traffic Conferences of the International Air Transport Association (IATA). Agreement 26895 was adopted at the 76th meeting of the TC2 Passenger Traffic Conference held in Geneva during Sep-

tember 1977; Agreements C.A.B. 26896 and C.A.B. 26897 were adopted by mail vote.

The agreements would amend the currency adjustment factors for application with passenger fares and cargo rates from Portugal to points worldwide, in order to relate local currency selling fares and rates more closely to fluctuating foreign exchange values. The agreements have application in air transportation as defined by the Act, insofar as

they affect either fares and rates to from U.S. points or fares and rates which are combinable with fares and rates to/from U.S. points, and will be approved.

Pursuant to authority duly delegated by the Board's Regulations, 14 CFR 385.14:

1. It is not found that the following resolutions, which have direct application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

Agreement	IATA No.	Title	Application
CAB 26896:			
R-1.....	022g	Adjustment Factors for Sales of Passenger Air Transportation (amending).	1 2 (North Atlantic), Do.
R-2.....	022hdo.....do.....
CAB 26897:			
R-2.....	022dd	Adjustment Factors for Sales of Cargo Air Transportation (amending).	2 3 4 2 3.
R-3.....	022ggdo.....	1 2 (North Atlantic), Do.
R-4.....	022hhdo.....do.....

2. It is not found that the following resolutions, which have indirect application in air transportation as defined by the Act, are adverse to the public interest or in violation of the Act:

Agreement	IATA No.	Title	Application
CAB 26895:			
R-1.....	022a	TC2 (within Europe) Adjustment Factors for Sales of Passenger Air Transportation (amending).	2.
R-2.....	022b	TC2 (except within Europe) Adjustment Factors for Sales of Passenger Air Transportation (amending).	2.
CAB 26896:			
R-3.....	022i	Adjustment Factors for Sales of Passenger Air Transportation (amending).	1 2 (South Atlantic), Do.
CAB 26897:			
R-1.....	022aa	Adjustment Factors for Sales of Cargo Air Transportation (amending).	2 (Europe/Africa Middle East).
R-5.....	022ii	Adjustment Factors for Sales of Cargo Air Transportation (amending).	1/2 (South Atlantic), Do.

Accordingly, it is ordered, That: Agreements C.A.B. 26895, C.A.B. 26896, and C.A.B. 26897, set forth in finding paragraphs 1 and 2 above, are approved. Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Fares and Rates.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-29436 Filed 10-5-77;8:45 am]

[6320-01]

[Order No. 77-9115; Docket No. 29123, Agreement C.A.B. 26898]

INTERNATIONAL AIR TRANSPORT
ASSOCIATION (IATA)

Order

SEPTEMBER 23, 1977.

Issued under delegated authority. Agreement adopted by the Joint Traffic Conferences of the International Air

Transport Association relating to passenger fare matters.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Joint Traffic Conferences of the International Air Transport Association (IATA). The agreement was adopted at a meeting on Resolution 015 held August 23-25, 1977, in New York and has been assigned the above C.A.B. agreement number.

The agreement amends North Atlantic proportional fares used to construct through international fares between U.S. interior points and points in Europe/Middle East/Africa. The changes are occasioned by the recently granted two percent increase in U.S. domestic fares and as such will be approved. However, note "L" of the agreement sets forth special proportional fares for use with the super-APEX fares recently disapproved by the Board in Order 77-9-55, September 16, 1977, and will be disapproved.

Pursuant to authority duly delegated by the Board's Regulations 14 CFR 385.14:

1. It is not found that the following resolution, incorporated in Agreement C.A.B. 26898 as indicated, is adverse to the public interest or in violation of the Act, provided that approval is subject, where applicable, to all conditions previously imposed by the Board:

Agreement	IATA No.	Title	Application
CAB 2688	015	North American Proportional Fares—North Atlantic (amending) (except sec. 1, note "L").	1/2.

2. It is found that the following resolution, incorporated in Agreement C.A.B. 26898 as indicated, is adverse to the public interest and in violation of the Act:

Agreement	IATA No.	Title	Application
CAB 26898	015	North American Proportional Fares—North Atlantic (amending) (sec. 1, 1.2, note "L").	

Accordingly, it is ordered, That:

1. That portion of Agreement C.A.B. 26898 set forth in finding paragraph one is approved, subject, where applicable, to conditions previously imposed by the Board; and

2. That portion of Agreement C.A.B. 26898 set forth in finding paragraph two above is disapproved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review thereof is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-29437 Filed 10-5-77;8:45 am]

[6320-01]

[Order No. 77-9-116, Docket No. 30332, Agreement C.A.B. 26887]

INTERNATIONAL AIR TRANSPORT ASSOCIATION (IATA)

Order

SEPTEMBER 23, 1977.

Issued under delegated authority.

Agreement adopted by Traffic Conference 2 of the International Air Transport Association relating to cargo rates.

An agreement has been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of Traffic Conference 2 of the International Air Transport Association (IATA). The agreement, adopted by mail vote, has been assigned the above C.A.B. agreement number.

The agreement would amend the resolution governing cargo rates between Ireland and the United Kingdom. In general, the unit load device (ULD) charges between Dublin and London would be

amended to enable the carriers serving this market to rate their services at comparable levels. The agreement would also extend the ULD program to Cork/Shannon, on the one hand, and various U.K. provincial points, on the other hand, by establishing ULD charges between these points; these rates represent reductions from otherwise applicable freight-all-kinds rates. The agreement has indirect application in air transportation insofar as the rates established are combinable with rates to/from United States points, and it will be approved.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that Resolution 200 (Mail 166) 004], incorporated in Agreement C.A.B. 26887 and which has indirect application in air transportation as defined by the Act, is adverse to the public interest or in violation of the Act.

Accordingly, it is ordered, That: Agreement C.A.B. 26887 is approved. Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Fares and Rates.

PHYLLIS T. KAYLOR,
Secretary.

[Order 77-9-127; Docket 27813, Agreement CAB 26291; Docket 29123, Agreements CAB 26157-R through R3 and 26260-R17; Agreement CAB 26096]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Order Deferring Action; Agency Matters

Issued under delegated authority September 27, 1977.

There have been filed, pursuant to section 412(a) of the Federal Aviation Act of 1958, as amended (the Act), and Part 261 of the Board's Economic Regulations,

certain agreements among the members of the International Air Transport Association (IATA) to establish or amend certain IATA resolutions on agency matters. The resolutions were adopted by the

Composite Passenger Traffic Conference held in Miami on September 2-15, 1976, or by mail vote.

The agreements are identified as follows:

Agreement	IATA resolution designator No.	Title of IATA resolution affected
CAB: 26096	100 (mail 51) 860a	Payment of Interline Commission (new)
26157-R1	300 (mail 51) 86a	Passenger Sales Agency Rules (U.S.A. only) (amending)
26157-R2	174 810a (U.S.A. only) 11	Passenger Sales Agency Rules (except U.S.A.) (amending)
26157-R3	174 810a (except U.S.A.)	Passenger Sales Agency Rules (except U.S.A.) (amending)
26260-R17	174 820a	Passenger Sales Agency Agreement (amending)
26291	174 820a	Interline Agreements with Non-IATA Carriers (amending)
	174 851	Industry Incentive Scheme for Approved Passenger Sales Agents (amending)
	200 (mail 78) 815	
	200 (mail 78) 815	
	300 (mail 78) 815	

In Order 75-12-141, December 23, 1975, the Board deferred action on Agreements CAB 25606-R1 through R4.¹ In Order 76-7-56, July 16, 1976, it refused to grant interim approval of the agreements and instituted an investigation into the principal issue raised by the agreements, viz, whether or not the establishment of a uniform commission rate payable to agents for the sale of international air transportation is adverse to the public interest. In Order 77-8-14, August 3, 1977, the Board denied a request by National Airlines, Inc. (National) for interim approval of the agreements. In doing so, it found that the apparent effects of the current open commission rate situation did not warrant a reversal of the Board's earlier determination not to grant interim approval.

Upon review of agreements subsequently filed by IATA for Board approval, it appears that the agreements listed above relate in a substantive manner to

¹ The agreements at issue are CAB 25606, R1 through R4, which, respectively, establish or amended IATA Resolutions 0022, 016d, 815 and 860. Resolutions 0022 and 815 establish a uniform commission rate of 8 percent (with a few exceptions). An additional commission of 3 percent is provided for sales of inclusive tours. An additional 4 percent incentive commission is paid to agents who increase their industry sales by 10 percent in a given year. Resolution 860 establishes commissions on interline sales. Resolution 016d undertakes a conference study of tour and travel organizations. The texts of the agreements are reproduced in the Appendix to Order 75-12-141. See also, Order 76-3-83.

² Agreements CAB 26096, 26157-R1 through R3, 26260-R17, and 26291, respectively, provide that the commission rates schedule established by Agreement CAB 25606-R1 be applicable in certain localities within TC1 and TC3; further amend that commission rate schedule and amend the IATA Sales Agency Rules and Sales Agency Agreement to reflect those changes; modify the resolution governing interline agreements with non-IATA carriers to reflect the provisions of Agreements 25606-R1 and R3; and delay introduction of the industry incentive scheme in Lebanon.

issues which ultimately will be determined by the investigation being conducted in Docket 28672.² In denying National's motion for interim approval of Agreements 25606-R1 through R3, the Board found that there had been no concrete showing that the public interest had been adversely affected by the open commission rate situation. With respect to the agreements listed above, IATA has presented no new supporting argument which would suggest a decision different from that reached by the Board in Order 75-12-121 and reiterated in Order 77-8-14.

Therefore, pursuant to authority duly delegated by the Board in the Board's Economic Regulations, 14 CFR 385.3, it has been decided to defer action on these agreements, pending completion of the investigation of the IATA commission rate structure. Upon completion of the investigation, the agreements will be considered on their merits.

Accordingly, it is ordered, That: 1. Action on Agreements CAB 26096, 26157-R1 through R3, 26260-R17, and 26291 be deferred; and

2. This order shall be served on IATA and its U.S. member air carriers, the Air Traffic Conference of America and its member air carriers, the American Society of Travel Agents, Inc., the Association of Retail Travel Agents, the American Automobile Association, the Association of Bank Travel Bureaus, the International Airfreight Agents Association, the Travel Agents' Legal Action Committee, Unitours, Inc., and the United States Department of Justice and Transportation.

Persons entitled to petition the Board for review of this order pursuant to the Board's Economic Regulations, 14 CFR 385.50, may file such petitions within 10 days after the date of service of this order.

This order will be published in the FEDERAL REGISTER.

PHYLLIS T. KAYLOR,
Secretary.

[Docket No. 30682]

INVESTIGATION OF PAN AMERICAN'S WASHINGTON/BALTIMORE/CHICAGO SERVICE, ROUTES 117 AND 130

Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a hearing in the above-entitled proceeding will be held on November 1, 1977, at 10 a.m. (local time), in Room 1003, Hearing Room B, 1875 Connecticut Avenue NW., Washington, D.C. 20428, before the undersigned.

For information concerning the issues involved and other details in this proceeding, interested persons are referred to the prehearing conference report served on July 26, 1977, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., October 3, 1977.

[6320-01]

[Order 77-9-133; Docket 30226]

KODIAK-WESTERN ALASKA AIRLINES, INC.

Order To Show Cause; Subsidy Mail Pay Increase

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 30th day of September 1977.

On August 29, 1977, Kodiak-Western Alaska Airlines, Inc. (Kodiak-Western) filed a second amendment to its petition for increased subsidy filed December 16, 1976. In the amendment, Kodiak-Western requests a further increase in its subsidy mail rate. The carrier projects a need of \$571,931 for the year ending December 31, 1977, to cover its expected operating losses and to pay its net interest expense.

The Board granted Kodiak-Western a temporary increase in annual subsidy from \$129,509 to \$188,277 in the spring of 1977.¹ The increase was based on the carrier's cash-flow crisis and its need for immediate relief to meet current obligations. In the order proposing the new temporary rate, the Board noted that the carrier expected its financial situation to improve by summer and that if the improvement failed to materialize, a full investigation of Kodiak-Western's operations might be instituted.²

It is evident from data contained in Form 41 reports and in Amendment Two to its subsidy petition that Kodiak-Western's condition has deteriorated rather than improved. Consequently, temporary emergency action is again

¹ Order 77-4-9, April 4, 1977.

² Order 77-3-136, March 23, 1977.

needed in order to maintain service levels during the fall and winter months and to provide the Board and the carrier with time to explore possible long-term solutions to Kodiak-Western's chronic problems.

Based on our analysis of pertinent reported financial and operating data, we tentatively conclude that the temporary subsidy rate (expressed in annual amounts) for Kodiak-Western's scheduled service should be increased from \$188,277 to \$500,235 as indicated in Appendix A.² We also tentatively conclude that the new rate should be effective from October 1, 1977, through March 31, 1978, and the rate will then automatically revert to \$188,277 annually; or, a new rate will be established based on conditions existing then and on prospects for the future.

In the interim, the carrier is directed to examine all aspects of its operations to determine what rationalization, restructuring, and retrenchment can be undertaken which might produce a long-range solution to its financial difficulties. Among the areas we expect Kodiak-Western to consider in this evaluation are:

1. Modification or restructuring of the carrier's operating authority including the withdrawal of services at points where alternative services would be provided by other carriers;
2. Retrenchment in the levels of service provided at any of the points served;
3. Disposal of equipment which is not absolutely essential to the carrier's operations; and

4. Rationalization of Kodiak-Western's rate structures and levels.

If the carrier cannot develop by January 16, 1978, a reasonable and workable plan for continuing services to the Kodiak and Bristol Bay areas of Alaska at subsidy costs closer to the levels historically needed by the carrier to operate its system, the Board will be compelled to institute an investigation aimed at finding alternative ways of providing air services to these areas.

We, therefore, find it reasonable and in the public interest to provide Kodiak-Western with a temporary subsidy rate of \$500,235 annually for the period October 1, 1977, through March 31, 1978.

On the basis of the foregoing, we tentatively find and conclude that the fair and reasonable temporary rate of compensation to be paid to Kodiak-Western Alaska Airlines, Inc., for the transportation of mail by aircraft, the facilities used and useful therefore, and the subsidy-eligible services connected therewith between the points between which the carrier has been, is presently, or hereafter may be authorized to transport mail by its certificate of public convenience and necessity, is the sum of (a) the service mail rates as heretofore and hereafter established for the carrier by order of the Board, and (b) subsidy as follows: For each calendar month on and after October 1, 1977, in which miles des-

ignated by the Postmaster General for the transportation of mail are flown, an amount determined by multiplying the appropriate rates stated in Appendix B by the scheduled subsidy-eligible aircraft-miles flown during the month, or by the appropriate monthly base aircraft-miles, whichever is lower.

The scheduled revenue aircraft-miles flown shall be computed on the basis of the direct airport-to-airport mileage⁴ between the points actually served on each revenue trip operated over Kodiak-Western's authorized subsidy-eligible routes pursuant to its flight schedules filed with the Board, including all revenue trips operated as extra sections.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, particularly sections 102, 204, and 406, and the regulations promulgated in 14 CFR 302.

It is ordered, That: 1. Kodiak-Western Alaska Airlines, Inc., be directed to show cause why the Board should not fix, determine, and publish the aforesaid rate as the fair and reasonable temporary rate of compensation to be paid Kodiak-Western for the transportation of mail by aircraft, the facilities used and useful therefore, and the services connected therewith, over the carrier's subsidy-eligible system pending the fixing of a final rate in the instant proceeding;

2. Kodiak-Western Alaska Airlines, Inc., be further directed to examine all aspects of its operations and to submit a plan for restructuring its operations to the Board no later than January 16, 1978;

3. Further procedures with respect to the temporary rate proposed here shall be in accordance with the Board's Rules of Practice, particularly Rule 302, et seq., and, if there is any objection to the rate specified here, notice must be filed within eight days, and, if notice is filed, written answer and supporting documents must be filed within 15 days, after the date of service of this order;

4. If notice of objection is not filed within eight days, or if notice is filed and answer is not filed within 15 days, after service of this order, or, if an answer timely filed raises no material issue of fact, all parties shall be deemed to have waived the right to a hearing and all other procedural steps short of a final decision by the Board, and the Board may enter an order fixing the temporary subsidy rate specified here;

5. If notice of objection and answer are filed presenting issues for hearing, issues regarding the establishment of these fair and reasonable rates shall be limited to those specifically raised by such answers except as otherwise provided in 14 CFR, § 302.307;

6. This proceeding shall remain open pending entry of an order fixing final rates retroactive to such date as the Board may determine, which final rates may be lower or higher than the temporary rates fixed here; and

7. This order shall be served upon all parties to this proceeding.

⁴ 14 CFR 247.1.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.⁵

[6325-01] COMMISSION ON CIVIL RIGHTS

MAINE ADVISORY COMMITTEE Agenda; Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Maine Advisory Committee (SAC) of the Commission will convene at 7:30 p.m. and will end at 10 p.m. on October 27, 1977, Maine Teachers Association, 25 Community Drive, Augusta, Maine.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Northeastern Regional Office of the Commission, 26 Federal Plaza, Room 1639, New York, N.Y. 10007.

The purpose of this meeting is to discuss the transition from SACs to RACs.

This meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., October 3, 1977.

JOHN I. BINKLEY,
Advisory Committee Management
Officer.

[FR Doc.77-29448 Filed 10-5-77;8:45 am]

[6325-01] WYOMING ADVISORY COMMITTEE

Agenda; Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Wyoming Advisory Committee (SAC) of the Commission will convene at 12:30 p.m. and will end at 2:30 p.m. on October 29, 1977, in the Natrona Public Library, Durbin and 2nd Streets, Casper, Wyoming 82601.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Rocky Mountain Regional Office of the Commission, Executive Tower Inn, Suite 1700, 1405 Curtis Street, Denver, Colorado 80202.

The purpose of this meeting is to discuss agenda for consultation on civil rights to be held on November 11-12 in Cheyenne.

This meeting will be conducted pursuant to the provisions of the Rules and Regulations of the Commission.

Dated at Washington, D.C., October 3, 1977.

JOHN I. BINKLEY,
Advisory Committee
Management Officer.

⁵ All Members concurred.

[6740-02] FEDERAL POWER COMMISSION

[Project No. 618]

ALABAMA POWER CO.

Application for Approval of Change in Land Rights

SEPTEMBER 29, 1977.

Public notice is hereby given that an application was filed on April 26, 1976, and amended on November 11, 1976, under the Federal Power Act, 16 U.S.C. 791a-825r, by Alabama Power Co. (Applicant) (Correspondence to: Mr. F. L. Clayton, Jr., Vice President, Alabama Power Co., P.O. Box 2641, Birmingham, Ala. 35291) for Commission approval of a change in land rights at Project No. 618, known as the Jordan Dam Project. Project No. 618 is located on the Coosa River in Elmore, Chilton, and Coosa Counties, Ala.

Applicant seeks Commission approval of the conveyance to the Wallsboro-Santuck Water and Fire Protection Authority of an easement over project lands for the purpose of installing and maintaining a water distribution system in Sections 6, 8, 9, 10, 14, 15, and 16 T. 19 N., R. 18 E., Elmore County, Ala. The proposed distribution system would include 7.27 miles of 3-inch-diameter plastic pipeline and 0.92 mile of 8-inch-diameter plastic pipeline. The lines would be laid a minimum of 30 inches below the ground surface. The proposed system would serve approximately 500 families, and would replace existing lake water systems and individual wells, drawing water instead from the City of Montgomery, Alabama's 20 mgd water treatment plant.

Any person desiring to be heard or to make any protest with reference to said application should, on or before November 7, 1977, file with the Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1977). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02] [Docket No. E-9605]

BLACK HILLS POWER & LIGHT Application

SEPTEMBER 29, 1977.

Take notice that on September 22, 1977, Black Hills Power & Light Co. (Ap-

plicant) filed an application for authority, pursuant to section 203 of the Federal Power Act, to sell certain electric facilities to the City of Gillette, Wyo.

Applicant is incorporated under the laws of the State of South Dakota with its principal business office at Rapid City, S. Dak., and is engaged in the electric utility business in the States of Wyoming, Montana, and South Dakota.

Any person desiring to be heard or to make any protest with reference to the application, should on or before October 11, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. This application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02] [Docket No. RP76-135]

CITIES SERVICE GAS CO. Filing of Settlement Agreement

SEPTEMBER 30, 1977.

Take notice that on September 13, 1977, Cities Service Gas Co. (Cities Service) tendered for filing a Stipulation and Agreement proposed in settlement of this general rate proceeding. Cities Service states that the stipulation and agreement, if approved by the Commission, will resolve all issues in the proceeding except for the propriety of a rate design modification proposed by the Commission Staff.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before October 14, 1977. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02] [Docket No. E-7743]

CONNECTICUT LIGHT & POWER CO. Compliance Filing

SEPTEMBER 29, 1977.

Take notice that Connecticut Light & Power Co. (CL&P) on September 19, 1977, tendered for filing a revised summary cost of service and tariff sheets.

CL&P states that this filing is in compliance with the Commission's findings and orders contained in Opinion No. 761, issued April 28, 1976, as modified by Opinion No. 761-A, issued July 20, 1977.

Any person desiring to protest said filing should file a petition to protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with § 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.10). All such protests should be filed on or before October 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

[6740-02] [Project No. 1494]

GRAND RIVER DAM AUTHORITY

Application for Approval of Change in Land Rights

SEPTEMBER 29, 1977.

Public notice is hereby given that an application was filed on May 16, 1977, under the Federal Power Act, 16 U.S.C. 791a-825r, by Grand River Dam Authority (Applicant) (Correspondence to: Mr. Robert W. Sullivan, Jr., General Counsel, Grand River Dam Authority, Administrative Headquarters, Drawer G, Vinita, Okla. 74301) for Commission approval of a change in land rights at Project No. 1494, located on the Grand River in Mayes, Craig, Delaware, and Ottawa Counties, Okla., and McDonald County, Mo.

Applicant seeks Commission approval of the sale of a 0.4677-acre triangular tract of land located in the SW¼SE¼, Section 9, T. 24 N., R. 23 E., Delaware County, Okla. The land would be sold to a development company for possible housing construction.

Any person desiring to be heard or to make any protest with reference to said application should, on or before November 7, 1977, file with the Federal Power Commission, 825 N. Capitol Street NE., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 1.8 or 1.10 (1977). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

The application is on file with the Commission and is available for public inspection.

[Docket No. R177-128]

HERBERT S. WOODS & ASSOCIATES

Petition for Special Relief

SEPTEMBER 29, 1977.

Take notice that on August 29, 1977, Herbert S. Woods & Associates (Woods), P.O. Box 1367, El Dorado, Ark., requested, pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76) a special relief rate of \$2 Mcf for sales of gas to Natural Gas Pipe Line Co. of America (Natural) from the J. L. Swiney No. 1 Well, Jack County, Ark.

Woods states that it will cost \$133,000 to recondition the well in order to economically recover the remaining 200,000 Mcf of reserves. Woods avers that during the past 20 years of production, expenses exceeded revenues resulting in a negative cash flow. Woods says that he has received a net revenue for his gas of 12.6 cents/Mcf over the last 20 years.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-29384 Filed 10-5-77;8:45 am]

[6740-02]

[Docket No. ES77-61]

IOWA ELECTRIC LIGHT & POWER CO.

Application

SEPTEMBER 29, 1977.

Take notice that on September 23, 1977, the Iowa Electric Light and Power Co. (Applicant) filed an application pursuant to section 204 of the Federal Power Act with the Federal Power Commission seeking authority to issue and sell at competitive bidding \$25,000,000 principal amount of First Mortgage Bonds.

Applicant is incorporated under the laws of the State of Iowa and is authorized to do business in the States of Iowa, Minnesota, Colorado, and Nebraska with its principal business office at Cedar Rapids, Iowa. Applicant is engaged primarily in the generation, transmission and sale at retail of electric energy in 55 counties in the State of Iowa.

The First Mortgage Bonds which are to mature December 1, 2007, will be issued on approximately December 7, 1977 under the Applicant's Indenture of Mortgage and Deed of Trust, dated August 1,

1940, as heretofore amended and supplemented by forty-five supplemental indentures and as to be further supplemented by a forty-sixth supplemental indenture to be dated December 1, 1977 between the Applicant and the First National Bank of Chicago, as Trustee. The rate of interest to be paid by the Applicant will be determined by competitive bidding in accordance with the Commission's regulations under the Federal Power Act.

The purpose for which the said securities are to be issued is for the Applicant's continuing construction program and for the repayment of commercial paper anticipated to be outstanding at the time the Bonds are sold.

Any person desiring to be heard or to make protest with reference to this Application should on or before October 14, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions of protest in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The Application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. R177-133]

JESSE FRANKLIN ROSETT

Petition For Special Relief

SEPTEMBER 30, 1977.

Take notice that on September 15, 1977, Jesse Franklin Rosett (Petitioner), 715 Edgemont Street, Shreveport, La. 71106, filed in Docket No. R177-133 a petition for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76). Petitioner seeks to collect a rate in excess of the established applicable ceiling rate for the sale of natural gas to United Gas Pipe Line Co. from the T. A. Glass No. 1 and M. A. Blackwell No. 1 wells located in the Cotton Valley Field, Webster Parish, La. Petitioner states that production from the subject wells is presently shut down due to a complete breakdown in the compressor and engine. In order to restore production, Petitioner states that it will be necessary to repair the present compressor or to purchase or rent a new compressor.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 21, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Com-

mission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-29407 Filed 10-5-77;8:45 am]

[6740-02]

[Docket No. E-7477]

KANSAS CITY POWER & LIGHT CO.

Application

SEPTEMBER 29, 1977.

Take notice that on September 26, 1977, Kansas City Power & Light Co. (Applicant) filed a seventh supplemental application seeking authority pursuant to Section 204 of the Federal Power Act to issue up to \$100,000,000 principal amount of short-term, unsecured promissory notes to be outstanding at any one time, of which aggregate amount a maximum of \$45,000,000 may be in the form of commercial paper, said notes to be issued not later than December 31, 1978, with maturities not later than December 31, 1979. By prior supplemental order issued November 26, 1976, the Commission authorized Applicant to issue prior to December 31, 1977, up to \$75,000,000 short-term promissory notes to be outstanding at any one time, of which aggregate amount up to \$36,000,000 could be in the form of commercial paper, with final maturities not later than December 31, 1978.

Applicant is incorporated under the laws of the State of Missouri and its principal business office at Kansas City, Missouri, and authorized to do business in the State of Kansas.

The interest rate applicable to the promissory notes will be, in the case of demand notes issued to commercial banks, the prime rate in effect at the time of issuance; in the case of notes issued to commercial paper dealers, the market rate (or discount rate) at the date of issuance for commercial paper of comparable quality and of the particular maturity sold to commercial paper dealers; and in the case of commercial paper placed directly with regular purchasers of such commercial paper for their own accounts, the market rate (or discount rate) at the date of issuance for commercial paper of comparable quality and of the particular maturity placed directly by the issuer thereof. The Applicant contemplates the issuance of promissory notes, including the "roll-over" of commercial paper promissory notes, without further application to this Commission, at any time from time to time prior to December 31, 1978, each of such notes to have a maturity date of not later than December 31, 1979.

The proceeds will be used to finance in part Applicant's construction program to December 31, 1979. The authorization to issue up to \$100,000,000 of said short-term, unsecured promissory notes will allow the Applicant more freedom in selecting the appropriate times under market conditions to fund its short-term debt.

Any person desiring to be heard or to make any protest with reference to the application should, on or before October 19, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). The Application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-29386 Filed 10-5-77;8:45 am]

[6740-02]

[Docket No. ES77-60]

LOUISVILLE GAS AND ELECTRIC CO.

(KENTUCKY)

Application

SEPTEMBER 29, 1977.

Take notice that on September 21, 1977, Louisville Gas and Electric Co. (Applicant) of Louisville, Ky., filed an application pursuant to section 204 of the Federal Power Act seeking an order authorizing the issuance of unsecured Promissory Notes to commercial banks, to trust companies, and to commercial paper dealers in amounts not exceeding in the aggregate \$80,000,000 outstanding at any one time.

The Promissory Notes to be issued by the Applicant to commercial banks will be issued on various days during the two year period ending December 31, 1979, but no Note will mature more than twelve months after date of issue or renewal. The interest rate of such Notes will be at the prime loan interest rate of the banks in effect from time to time.

The Promissory Notes to be issued as trust demand notes (master notes) to commercial banks and trust companies will be issued on various days during the period ending December 31, 1979, but no Note will mature more than nine months after date of issue. The interest rate on master notes will be dependent upon the money market conditions prevailing during the life of the Note.

The Promissory Notes issued to commercial paper dealers will be issued on various days during the period ending December 31, 1979, but no Note will mature more than nine months after date of issue nor will any Note be extended or renewed. The interest rate on such Notes will be dependent upon the term of the Notes and the money market conditions at the time of issuance.

According to the application, the aggregate amount of commercial paper to be outstanding at any one time will not exceed the sum of (1) the dollar amount of Applicant's receivables arising out of

the sale of electric and gas service, (2) the dollar amount of Applicant's inventory of fuel and gas stored underground, and (3) the dollar amount of depreciation and amortization charges on plant and equipment for the preceding month.

The proceeds from the issuance of the Notes will be added to the general funds of the Applicant which general funds will be used, among other things, to finance in part the Applicant's 1978-1979 construction program. Applicant estimates that construction expenditures for the years ending December 31, 1978 and 1979 will total about \$67,400,000 and \$89,000,000, respectively.

Any person desiring to be heard or to make any protest with reference to said application should, on or before October 14, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). The application is on file and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-29387 Filed 10-5-77;8:45 am]

[6740-02]

[Docket No. ER77-613]

LOUISVILLE GAS AND ELECTRIC CO.

Proposed Tariff Change

SEPTEMBER 30, 1977.

Take notice that Louisville Gas and Electric Co. (Louisville) on September 26, 1977, tendered for filing proposed changes in its Interconnection Agreement between Louisville and Big Rivers Electric Corp. (Big Rivers) designated FPC Rate Schedule No. 27. Louisville indicates that the proposed changes would increase revenues from jurisdictional sales and service by \$288,500 based on the 12 months ended August 31, 1977.

Louisville states that the purpose of this filing is to increase the demand charge for short term power as set forth on Service Schedule C from 45c per kilowatt per week to 60c per kilowatt per week. Louisville states that this proposed revision reflects a desire on the part of both parties to attain the optimum benefit from the interconnection of their systems.

Louisville requests that the Commission establish an effective date of October 30, 1977, for the changes proposed in this filing.

Louisville indicates that copies of the filing were served upon Big Rivers and the Public Service Commission of Kentucky.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before October 13, 1977. Protests will be considered by the Commission in deter-

mining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. R177-126]

MAURICE L. BROWN CO.

Petition for Special Relief

SEPTEMBER 29, 1977.

Take notice that on September 6, 1977 The Maurice L. Brown Co. (Petitioner), 9229 Ward Parkway, Kansas City, Oklahoma 64114, filed a petition for special relief pursuant to § 2.76 of the Commission's Statements of General Policy and Interpretations (18 C.F.R. 2.76). Petitioner seeks to collect a rate of \$1.9403 per Mcf for the sale of natural gas to United Gas Pipeline Company from the Ruby Russell Gas Unit No. 1, Bethany Field, Harrison County, Texas. Petitioner states that unless the requested increase is granted, further production would be uneconomical.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing herein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. R177-130]

MAURICE L. BROWN CO.

Petition For Special Relief

SEPTEMBER 29, 1977.

Take notice that on September 9, 1977, The Maurice L. Brown Co. (Petitioner), 9229 Ward Parkway, Kansas City, Mo. 64114, filed a petition for special relief in Docket No. R177-130 pursuant to § 2.76 of the Commission's Rules of Practice and Procedure.

Petitioner states that the current rate of 81.66 cents per Mcf for gas sold to United Gas Pipeline Company from Newton-Whiteside Gas Unit No. 1, Harrison County, Tex. is no longer economical, and therefore requests an increase

in this rate to \$2.33 per Mcf. Petitioner does not propose that any additional work be done on the Newton-Whiteside gas Unit No. 1.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to the proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. RI77-125]

MAURICE L. BROWN CO.
Petition For Special Relief

SEPTEMBER 30, 1977.

Take notice that on September 1, 1977, The Maurice L. Brown Company (Petitioner), P.O. Box 11320, Kansas City, Mo. 64112, filed in Docket No. RI77-125 a petition for special relief pursuant to section 2.76 of the Commission's General Policy and Interpretations (18 CFR § 2.76). Petitioner seeks authorization for the working interest owner to collect an increase in rate from 27.29 cents per Mcf to \$1.5879 per Mcf for the sale of natural gas to Northern Natural Gas Company from the Strackeljohn Gas Unit No. 1 Well located in Finney County, Kans. Petitioner states that current production from the well is uneconomical at current prices.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 21, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 77-29404 Filed 10-5-77; 8:45 am]

¹The petition states that Leslie Oil and Gas Co. owns a 100% working interest in the subject well.

[6740-02]

[Docket No. RI77-124]

MAURICE L. BROWN CO.
Petition For Special Relief

SEPTEMBER 30, 1977.

Take notice that on September 1, 1977, the Maurice L. Brown Co. (Petitioner), P.O. Box 11320, Kansas City, Mo. 64112, filed in Docket No. RI77-124, a petition for special relief pursuant to section 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76). Petitioner seeks to collect a rate of 184.69 cents per Mcf for the sale of natural gas to United Gas Pipe Line Co. from the Sneed Gas Unit No. 1 and Sneed Gas Unit No. 2 Wells located in the Bethany Field, Harrison County, Tex. Petitioner indicates that the proposed rate increase is necessary in order for Petitioner to continue economic operations so that it may maintain its oil and gas leases pending future development.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 21, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

MID LOUISIANA GAS CO.
Informal Conference

SEPTEMBER 30, 1977.

Take notice that an informal conference in the above-captioned proceeding will be held on October 6, 1977, at 10 a.m., e.s.t., at the offices of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. The conference is being convened by the Commission's staff pursuant to Ordering Paragraph (B) of the Commission's order in Docket No. RP73-43 (PGA77-3) issued September 21, 1977.

Customers and other interested persons will be permitted to attend, but if such persons have not been permitted to intervene by order of the Commission, attendance will not be deemed to authorize intervention as a party in this proceeding.

All parties will be expected to come fully prepared to discuss all issues arising out of Mid Louisiana Gas Co.'s filing in the instant docket, to make and accept offers of settlement with respect to such

issues, and to make commitments concerning procedural matters antecedent to a full evidentiary hearing should such hearing be required.

[6740-02]

[Docket No. CP77-624]

MONTANA-DAKOTA UTILITIES CO.
Application

SEPTEMBER 29, 1977.

Take notice that on September 20, 1977, Montana-Dakota Utilities Co. (Applicant), 400 North Fourth Street, Bismarck, N. Dak. 58501, filed in Docket No. CP77-624 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of certain gas receipt and appurtenant facilities which are necessary in order to allow Applicant to take into its system significant quantities of gas that it would purchase from the Montana Power Co. (Montana Power), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, Applicant proposes to construct and operate the following facilities:

(a) A 6-inch valve assembly and appurtenant facilities at a point on each loop of Applicant's Elk Basin to Billings transmission lines (two 12-inch lines) at a point in the NE $\frac{1}{4}$, SW $\frac{1}{4}$ of Section 18, T8S, R23E, near Belfry, Carbon County, Mont., where existing facilities of Applicant and Montana Power cross, and including:

(b) A 12-inch check valve at each valve assembly designed to prevent any of the gas purchased from Montana Power from physically leaving the State of Montana.

Applicant states that the proposed facilities would provide an interconnection of its transmission line with Montana Power's transmission line for purposes of receiving the gas to be delivered from Montana Power, and that the facilities would be capable of receiving up to 11,000 Mcf of natural gas per day.

Measurement would be performed by Montana Power, it is said. Applicant states that the check valve assemblies which it is also seeking authorization to install and operate are for purposes of confining the gas purchased from Montana Power to consumption solely within the State of Montana.

It is stated that by means of the proposed facilities, Applicant intends to purchase from Montana Power over the period October 1, 1977, through February 28, 1983, a quantity of gas up to approximately 13,750,000 Mcf, and that this quantity of gas would be made available by Montana Power from Canadian supplies which would be excess to Montana Power's market requirements over approximately the next five years. It is further stated that Montana Power is currently confronted with an excess

supply situation, and that it is obliged by take-or-pay contracts to purchase large volumes of Canadian gas, but because of the recent and drastic loss of its industrial loads it can no longer make use of all of the Canadian gas which it is obliged to take. This over-supply situation is expected to last for approximately five years, it is said.

Applicant, on the other hand, is currently in curtailment, is seeking every available source of gas supply with which to augment the natural gas supplies available to its customers, it is said. Consequently, the application shows that Applicant and Montana Power have entered into an agreement for the sale and purchase of natural gas dated August 2, 1977, which agreement provides that during the period October 1, 1977 through February 28, 1983, Montana Power would sell and Applicant would purchase up to approximately 13.75 Bcf as follows:

	Billion cubic feet
March 1 through November 30 of each year	2.5
December 1 through the last day of February in the following year	.25

It is stated that during the period October 1, 1977, through November 30, 1977, the amount of gas that is to be made available would be .55 Bcf, and that the maximum amount to be delivered on any one day would be 11,000 Mcf. It is further stated that during the March through November periods the minimum to be delivered on any one day would be 6,000 Mcf, and deliveries would be considered as firm. During the December through February period there would be no minimum delivery obligation, and all deliveries would be on a best efforts basis only, it is indicated.

It is stated that the price which Applicant would pay for the gas is to be the sum of the following elements: (a) the Canadian border price per million Btu plus (b) 4.267 percent of the Canadian border price as the cost of fuel necessary to deliver the subject gas into Applicant's pipeline system plus (c) a delivery charge of 11.6 cents per Mcf. The 11.6 cent per Mcf delivery charge would be increased by one cent per Mcf at the beginning of each contract year thereafter, it is said. Applicant states that initially this formula produces a rate of \$2.454 per Mcf delivered.

Applicant indicates that the cost of the facilities is estimated to be \$10,000, which cost would be financed with internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any

person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-612]

MONTAUP ELECTRIC CO.
Tariff Filing

SEPTEMBER 30, 1977.

Take notice that Montaup Electric Company (Montaup), on September 23, 1977, tendered for filing a service agreement providing for Montaup's transmission of a power purchase of the Middleborough (Massachusetts) Municipal Gas and Electric Department, pursuant to Montaup's generally applicable transmission tariff. According to Montaup, this service commenced on September 1, 1977 and will terminate on October 31, 1977.

Montaup requests waiver of the Commission's notice requirements to allow an effective date of September 1, 1977 for this service.

Montaup states that copies of the filing were served upon Middleborough Municipal Gas and Electric Department and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission.

sion and are available for public inspection.

[Docket No. ER77-607]

NEW ENGLAND POWER POOL Filing of Interconnection Agreement

SEPTEMBER 29, 1977.

Take notice that on September 21, 1977, the New England Power Pool (NEPOOL) filed an Interconnection Agreement between NEPOOL and the New York Power Pool, dated as of April 4, 1977. NEPOOL indicates that certificates of concurrence were filed on behalf of Central Hudson Gas & Electric Corporation, Consolidated Edison Company of New York, Inc., Long Island Lighting Company, New York State Electric & Gas Corporation, Niagara Mohawk Power Corporation, Orange and Rockland Utilities, Inc., and Rochester Gas and Electric Corporation.

NEPOOL states that the Interconnection Agreement provides for emergency and economy reserve and energy interchanges between NEPOOL and the New York Power Pool. NEPOOL further states that the Interconnection Agreement also provides for each of the pools to facilitate purchase and sale transactions which one pool may have with remote systems and with which the other pool is interconnected.

The parties have requested that the Commission waive its notice requirements and permit the Interconnection Agreement to become effective as of April 4, 1977, the date upon which the New York Power Pool first became operative.

Any person desiring to be heard or to make any protest with reference to the Interconnection Agreement should on or before October 11, 1977, file with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, petitions to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). Persons wishing to become parties to a proceeding or to participate as a party in any hearing related thereto must file petitions to intervene in accordance with the Commission's Rules. All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

SEPTEMBER 29, 1977.

Take notice that Northern States Power Company (NSPC), on September 21, 1977, tendered for filing an Interconnection and Interchange Agreement, dated September 16, 1977, with the City of Glencoe, North Dakota.

NSPC indicates that the Interconnection and Interchange Agreement includes service schedules, which provide for transactions between the parties, similar to the service schedule contained in the Mid-Continent Area Power Pool Agreement.

NSPC requests waiver of the Commission's notice requirements to allow for an effective date of October 21, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions and protests should be filed on or before October 11, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP75-340]

NORTHWEST PIPELINE CORP.

Petition to Amend

SEPTEMBER 29, 1977.

Take notice that on September 21, 1977, Northwest Pipeline Corporation (Petitioner), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP75-340 a petition to amend the Commission's order of February 17, 1977 (57 FPC ----), as amended, May 9, 1977 (57 FPC ----) issued in the instant docket pursuant to Section 3 of the Natural Gas Act so as to provide for the continued importation of additional volumes of natural gas through October 31, 1978 at the Kingsgate, British Columbia import point, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

It is indicated that pursuant to the Commission's order of February 17, 1977, as amended May 7, 1977, in the instant docket, Petitioner was granted authorization to continue the importation of an additional 125,000 Mcf of natural gas on peak days and up to 30,000 Mcf of natural gas on an average day basis at Kingsgate through a period ending October 31, 1977. Petitioner states that the additional volumes of natural gas are made available to Westcoast Transmission Company Limited (Westcoast) by Alberta and Southern Gas Company Limited (A&S) on a best efforts limited term basis, and that Pacific Gas Transmission Company (PGT) receives the volumes at Kingsgate and transports such volumes for delivery to Northwest at two existing points of interconnection between the facilities of PGT and Petitioner in the vicinity of Stansfield, Oregon and Spokane, Washington.

Petitioner requests authorization to continue the importation of additional volumes of natural gas to be purchased from Westcoast at the Kingsgate import point through October 31, 1978. Petitioner further requests that such volumes authorized to be imported at the Canadian Government's established border price of \$2.16 (United States) per Mcf.

It is indicated that Petitioner, in an effort to retain this supplemental supply of natural gas has entered into a new amendment to an agreement and consent with Westcoast dated August 1, 1977. It is further indicated that pursuant to such agreement Petitioner consented to Westcoast entering into an agreement dated August 1, 1977 with A&S. The agreement between Westcoast and A&S provides that A&S is willing and able to sell gas to Westcoast for resale to Petitioner, during the period November 1, 1977 to October 31, 1978 subject to A&S's existing sales contract obligations, it is said. Petitioner indicates that the quantity of natural gas that A&S would have available would be the quantity which A&S would have available after A&S has complied with its existing sales

contract obligations and would be dependent upon the volume of natural gas that PGT in its sole discretion is able to accept in its transmission system each day in excess of those volumes of natural gas necessary to meet its existing sales and transportation obligations. It is further indicated that Petitioner and PGT have entered into a letter agreement executed July 15, 1977 regarding the transportation of such excess volumes of natural gas, and that Petitioner has agreed to pay PGT for the volumes transported in accordance with the cost of service and cost allocation procedures contained in Rate Schedule I-1 of PGT's FPC Gas Tariff Original Volume No. 1.

The volumes of natural gas to be made available by A&S to Westcoast would not exceed 30,000 Mcf on an average day and 125,000 Mcf on a peak day, it is stated. It is indicated that the rate to be paid Westcoast for such volumes of natural gas would be the rate prescribed by the National Energy Board (NEB) of Canada for all gas exported pursuant to Westcoast's export license GL-41, which price is \$2.16 per Mcf.

Petitioner indicates that no new or additional facilities are required to effectuate the continued importation proposed herein as the existing transmission and border facilities of PGT would be utilized in the importation of the A&S volumes.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

PIONEER GAS PRODUCTS CO.

Notice of Applications For Certificates, Abandonment of Service and Petitions To Amend Certificates¹

SEPTEMBER 29, 1977.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to Section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure a hearing will be held without further notice before the Commission on all applications in which not petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicants to appear or to be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP77-137-1]

SOUTH GEORGIA NATURAL GAS CO.
(GREAT SOUTHERN PAPER CO.)

Petition For Extraordinary Relief From Curtailment and Reclassification of Requirements

SEPTEMBER 29, 1977.

Take notice that on September 13, 1977, Great Southern Paper Co. (Great Southern) filed a petition pursuant to § 1.7(b) of the Commission's Rules of Practice and Procedure and § 2.78(b) of the Commission's General Policy and Interpretations for extraordinary relief from the operation of the curtailment plan of South Georgia Natural Gas Co. (South Georgia). Specifically, Great Southern requests the Commission to (1) direct that an average daily volume of 545 Mcf of natural gas required for ignition service and flame stability in two coal-fired boilers, two recovery boilers and two lime kilns employed at Great Southern's plant in Cedar Springs, Georgia be classified as a Priority 2 requirement under South Georgia's Index of Requirements, and (2) require South Georgia to deliver up to 3,000 Mcf of natural gas per day for nonboiler fuel use in Great Southern's lime kilns as a Priority 7 load.

Great Southern states in its petition that South Georgia is the sole supplier of natural gas to Great Southern's paper mill located in Cedar Springs, Georgia, and that Great Southern has been subjected to increasing levels of curtailment since 1974. Great Southern anticipates almost total curtailment of its supplies in the upcoming winter heating season.

Great Southern alleges that reclassification is warranted to correct an erroneous priority classification resulting from South Georgia's adherence to the firm-interruptible distinction in its curtailment plan and from the aggregation of all of Great Southern's requirements for purposes of classification under South Georgia's Index of Requirements in disregard of the various end-uses of natural gas at the Cedar Springs mill. Under the operation of South Georgia's curtailment plan, all of Great Southern's minimum average daily requirements of 3,545 Mcf of natural gas per day, which are currently purchased on an interruptible basis from South Georgia, are placed in

South Georgia's curtailment priority 8. Great Southern contends that the different uses of natural gas in its paper mill operations should be categorized separately according to end-use within South Georgia's curtailment priorities.

According to the petition, only LP-gas can be used as an alternate fuel in Great Southern's present igniter systems, and Great Southern's allocation of propane from its supplier, Union Texas Petroleum, is not adequate to meet its requirements during periods of curtailment. Although No. 6 fuel oil can be substituted for natural gas in the lime kilns designed originally to use natural gas, Great Southern claims that use of such alternate fuel reduces both efficiency and the quality of the product, considerations not relevant in determining a fuel for the generation of steam in boilers.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 11, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules. The petition which was filed with the Commission is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI77-131]

SOUTH STATES OIL & GAS CO.

Petition for Special Relief From Refund Obligation

SEPTEMBER 29, 1977.

Take notice that on September 9, 1977, South States Oil and Gas Company (South States), Milan Building, San Antonio, Tex. 78205 filed a petition for special relief from refund obligation in Docket No. RI77-131 pursuant

to Section 1.7(a) of the Commission's Rules of Practice and Procedure and Section 154.109 of the Commission's Regulations.

Specifically, South States seeks special relief from the \$155,000.00 refund obligation imposed by the Commission for sales of gas made by South States to Tennessee Gas Pipe Line Co. (Tennessee) between 1961 and 1968 from wells located in the Texas Gulf Coast Area. South States alleges that its actual production, marketing and gathering expenses exceed the revenues derived from the sale of gas from the subject leases and that payment of the refunds and interest would result in the dissolution of this natural gas company.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER77-615]

SOUTHERN INDIANA GAS & ELECTRIC CO.
Cancellations

SEPTEMBER 29, 1977.

Take notice that Southern Indiana Gas & Electric Co. (Company) on September 26, 1966, tendered for filing notices of cancellation of the following rate schedules, involving Company and the parties listed. The Company requests waiver of the Commission's notice requirements to allow for the cancellations to become effective as of the dates listed:

Rate schedule	Party	Proposed effective date
FPC No.		
10	Dubois Rural Electric Co-operative, Inc. (Dubois).	Oct. 31, 1970
11	Dubois	July 31, 1972
12	Southern Indiana Rural Electric Co-operative, Inc. (Southern Rural).	Aug. 31, 1972
13	Southern Rural	Do
14	do	Do
15	do	Do
16	do	Do
18	do	Do
19	do	Do

The Company states that copies of this filing have been forwarded to Dubois and Southern Rural.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal

Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. CP77-616]

TEXAS GAS TRANSMISSION CORP. Application

SEPTEMBER 28, 1977.

Take notice that on September 12, 1977, Texas Gas Transmission Corp. (Applicant), 3800 Frederica Street, Owensboro, Ky. 42301, filed an application, in Docket No. CP77-616, pursuant to Section 7 of the Natural Gas Act, for a certificate of public convenience and necessity authorizing the construction of:

Approximately 20.4 miles of 20-inch pipeline and appurtenant facilities extending from the Houston Oil & Minerals Corp. platform in the Vermilion Area, Block 50, Offshore Louisiana (Block 50), to the southern terminus of Applicant's 20-inch Maurice-North Freshwater Bayou pipeline, as more fully described in the application.

The facilities proposed by Applicant are to provide a connection between the reserves to be produced in the Block 50 area.

Applicant shows that the total estimated cost of the proposed facilities is \$15,284,600. Applicant states that the additional volumes to be made available to Applicant from the block to be connected will help to reduce the level of future curtailments.

Any person desiring to be heard or to make any protest with reference to said application, on or before October 11, 1977, should file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the

Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-29379 Filed 10-5-77;8:45 am]

[6740-02]

[Docket No. ER77-614]

UNION ELECTRIC CO. Proposed Tariff and Rate Schedule Changes

SEPTEMBER 29, 1977.

Take notice that Union Electric Co. (Union) on September 26, 1977, tendered for filing proposed changes in its FPC Electric Service Tariffs Nos. W-2, 88 and 49. Union indicates that the proposed changes would increase revenues from jurisdictional sales and service by \$14,976,000 based on the twelve-month period ending September 30, 1978. Union further indicates that in addition, the proposed changes in the W-2 Tariff also modify the form of rate, power factor requirements, billing and payment provisions, and add provisions regarding load reduction as well as other minor modifications.

Union states that its proposed increase in rates is due to the increased costs of construction, capital, wages, property and payroll taxes and other similar increases in costs, and Union contends that the rate increases are necessary in order to provide a fair return to Union and its investors and at the same time generate sufficient cash to insure Union's ability to continue to provide adequate and reliable service.

According to Union, copies of the filing were served upon Union's jurisdictional customers and the Missouri Public Service Commission and Iowa State Commerce Commission.

Union requests that the changes proposed in this filing become effective as of October 26, 1977.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before October 12, 1977. Protests

will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person desiring to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6740-02]

[Docket No. RI77-121]

WALTER E. BAILY Petition for Special Relief

SEPTEMBER 29, 1977.

Take notice that on August 29, 1977, Walter E. Baily (Baily), Box 548, Seminole, Okla., filed a petition for special relief pursuant to Section 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76).

Baily seeks authorization to charge \$1.50/Mcf for the sale of gas from his well in Wood County, Okla., to Cities Service Gas Co. Baily states that the gas is presently shut-in because it can't deliver against Cities Service's line pressure and as a result the well has loaded up with salt water. Baily estimates there are 150,000 Mcf of remaining recoverable reserves in the well. Baily currently is authorized a 31 cents/Mcf rate. He states that his proposed reconconditioning will cost \$55,000.

Any person desiring to be heard or to make any protest with reference to said petition should on or before October 20, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-29401 Filed 10-5-77;8:45 am]

[6210-01]

FEDERAL RESERVE SYSTEM LANDMARK BANCSHARES CORP.

Order Approving Acquisition of Bank

Landmark Bancshares Corp., St. Louis, Mo., a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a) (3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares (less directors' qualifying shares) of Fidelity Bank and Trust Co., Creve Coeur, Mo. ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the twelfth largest banking organization in Missouri, controls three banks with total deposits of approximately \$222.4 million, representing 1.2 percent of total deposits in commercial banks in the State.¹ Acquisition of Bank (deposits of approximately \$13.4 million) would increase Applicant's share of commercial bank deposits in Missouri by less than .1 of one percent and would have no appreciable effect on concentration of banking resources in the State.

Bank ranks 66th out of 81 banking organizations in the relevant banking market² and holds .1 of one percent of the total commercial bank deposits in the market. Applicant's three banking subsidiaries are all located in the St. Louis market and control in the aggregate 2.6 percent of market deposits, making Applicant the ninth largest banking organization in the market. Upon consummation of the proposed acquisition, Applicant's share of commercial bank deposits would increase to 2.7 percent and Applicant would become the eighth largest banking organization in the market. The Board does not view such effects as being particularly serious in light of the competitive banking structure in the St. Louis market. Thirteen of the twenty largest banking organizations in Missouri are represented in the market and nine of those organizations are among the ten largest banking organizations in the market. In addition, although Applicant's rank in the market will improve as a result of the proposed acquisition, Applicant's share of market deposits would not increase significantly. While consummation of the proposal would reduce the number of independent banking organizations in the St. Louis market, that effect is not regarded as important in view of the fact that a large number of independent banking organizations would remain competing in the market. In light of the above and other facts of record, the Board concludes that the proposed acquisition would have only slightly adverse effects on competition and, in light of the considerations discussed below, the Board does not view such effects as being so serious as to require denial of this proposal.

The financial and managerial resources and future prospects of Applicant, its subsidiaries, and Bank are regarded as generally satisfactory and consistent with approval of the proposal.

¹ Banking data are as of December 31, 1976.

² The relevant banking market is approximated by the city of St. Louis, St. Louis County, portions of St. Charles and Jefferson Counties in Missouri, and portions of Madison and St. Clair Counties in Illinois.

As a result of its affiliation with Applicant, Bank would be able to offer additional services to its customers, including automatic telephone fund transfers and direct deposit of payroll and social security funds. In addition, Applicant intends to lower the charges on certain of Bank's services. These considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application and, in the Board's judgment, are sufficient to outweigh any slight adverse competitive effects that might result from consummation of the proposal. It is the Board's judgment that approval of the application would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of St. Louis pursuant to delegated authority.

By order of the Board of Governors, effective September 29, 1977.

GRAFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-29348 Filed 10-5-77;8:45 am]

[6210-01]

SIERRA PETROLEUM CO., INC., K&B PRODUCERS, INC.

Order Approving Acquisition of Shares of a Bank Holding Company

Sierra Petroleum Co., Inc., Wichita, Kans. ("Sierra"), a bank holding company by virtue of its ownership of 87.2 percent of the voting shares of United American Bank & Trust Co., Wichita, Kans. ("United Bank"), and K&B Producers, Inc., Wichita, Kans. ("K&B"), a bank holding company by virtue of its ownership of 95.8 percent of the voting shares of Allen County State Bank, Iola, Kans. ("Allen Bank"), have applied for the Board's approval under section 3(a) (3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) for each to acquire 24.9 percent of the voting shares of Twin Lakes Financial Corp., Wichita, Kans. ("Twin Lake"), a proposed bank holding company with respect to Twin Lakes State Bank, Wichita, Kans. ("Twin Lakes Bank").

Notice of the applications, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of

¹ Voting for this action: Vice Chairman Gardner and Governors Wallich, Jackson, Partee, and Lilly. Absent and not voting: Chairman Burns and Governor Coldwell.

² In a related action, the Board approved today an application by Twin Lakes to become a bank holding company through the acquisition of 98.9 percent of the voting shares of Twin Lakes Bank.

the Act.³ The time for filing comments and views has expired, and the applications and all comments and views received have been considered by the Board in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Twin Lakes Bank (\$28.4 million in deposits) ranks 84th among 616 commercial banks in Kansas and controls 0.3 percent of the total commercial bank deposits in the State.⁴ Twin Lakes Bank is the 14th largest of 28 commercial banks in the Wichita banking market (the relevant market) and controls approximately 1.9 percent of the total deposits held by commercial banks in that market.⁵ Sierra's subsidiary bank, United Bank (\$29.9 million in deposits), controls 2 percent of the total deposits held by commercial banks in the relevant market and is the eighth largest commercial bank in that market. K&B's subsidiary bank Allen Bank (\$30.7 million in deposits), is located in Iola, Kans., over 100 miles east of Wichita. In a separate banking market, United Bank and Twin Lakes Bank are located in the same banking market, along with a third commercial bank⁶ also controlled by the principals of Sierra and K&B; thus, consummation of the proposals would result in some elimination of existing competition. However, it appears that the proposed transactions will not have an significant adverse competitive effects due to the relative size of these banking organizations in the Wichita market (in the aggregate they control only 5.75 percent of the total deposits in commercial banks in the market, and together would rank as the fifth largest organization therein⁷), the number of remaining banking alter-

³ Pursuant to the Supreme Court's holding in *Whitney National Bank of Jefferson Parish v. Bank of New Orleans and Trust Co.*, 379 U.S. 411, (1965), the Board may not approve an application by a bank holding company if Board approval of the proposal contemplated by such application would result in the violation of a valid State law. Kansas law prohibits the formation of multi-bank holding companies. The relevant statute generally defines a bank holding company as any company that directly or indirectly owns, controls, or holds with power to vote, 25 percent or more of the voting shares of each of two or more banks; or controls in any manner the election of a majority of the directors of each of two or more banks (K.S.A. § 9-504). Notice of the subject proposals has been given to the Kansas Banking Commissioner, as required by § 3(b) of the Bank Holding Company Act (12 U.S.C. 1842(b)). The Banking Commissioner has indicated that consummation of the proposals, which involve the direct acquisition by Sierra and K&B of 24.9 percent each of the voting shares of Twin Lakes, would not contravene the provisions of Kansas law.

⁴ All banking data are as of December 31, 1976, and reflect bank holding company formations and acquisitions approved as of July 31, 1977.

⁵ The relevant market is the Wichita banking market, approximated by Sedgewick County, Kans.

⁶ Wichita State Bank, Wichita, Kans. (\$28.5 million in deposits) controls 1.9 percent of total commercial bank deposits and ranks 13th in the relevant banking market.

natives in the market, and the common ownership ties between the three institutions. Accordingly, on the basis of the facts of record, the Board concludes that consummation of the proposals would not have any significant adverse competitive effects in any relevant area.

The financial and managerial resources and future prospects of Sierra and its subsidiary bank and K&B and its subsidiary bank are considered satisfactory and consistent with approval. The acquisition of Twin Lakes' shares by Sierra and K&B will not adversely affect the overall financial conditions of Sierra, United Bank, K&B, Allen Bank, or Twin Lakes Bank. To the contrary, the proposals would have the effect of enabling Twin Lakes to reduce the debt incurred in connection with the acquisition of Twin Lakes Banks. Considerations relating to the convenience and needs of the communities to be served also appear to be consistent with approval of the applications. It is the Board's judgment that the proposed transactions would be consistent with the public interest, and that the applications to acquire shares of Twin Lakes should be approved.¹

Based upon the foregoing and other considerations reflected in the record,² the applications are approved for the reasons summarized above. The transactions to acquire shares of Twin Lakes shall not be made (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board or by the Federal Reserve Bank of Kansas City, pursuant to delegated authority.

By order of the Board of Governors,³ effective September 29, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.
